Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Canadian Centre for Justice Statistics, Statistics Canada, Ottawa, Ontario, K1A 0T6 (Toll-Free 1-800-387-2231) (telephone: (613) 951-9023) (fax : (613) 951-6615) or to the Statistics Canada Regional Reference Centre in:

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 85-223-XPE, is published annually in a paper version for \$32.00 in Canada. Outside Canada the cost is US \$32.00.

Please send orders to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or by dialling (613) 951-7277 or 1 800 700-1033, by fax (613) 951-1584 or 1 800 889-9734 or by Internet: order@statcan.ca. For change of address, please provide both old and new addresses. Statistics Canada publications may also be purchased from authorized agents, bookstores and local Statistics Canada offices.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Foreword

The responsibility for Canada's system of justice is shared between twenty-four federal, provincial and territorial government departments, while the lead responsibility for the development of Canada's statistical system rests with Statistics Canada. The term "Initiative", therefore, refers to this unique partnership whereby all jurisdictions share authority and responsibility for developing and achieving common objectives for the collection, analysis and dissemination of justice statistics and information.

The mandate of the National Justice Statistics Initiative is to provide information to the justice community and the public on the nature and extent of crime and the administration of civil and criminal justice in Canada.

Through the Canadian Centre for Justice Statistics, the energies of the Initiative will be directed towards the production of useful information to support the legislative, policy, management and research agendae of the Partners, and to inform the public.

Introduction

Data for this report are collected from the Police Administration Annual Survey and the Uniform Crime Reporting (UCR) Survey, conducted by the Canadian Centre for Justice Statistics (CCJS). These two surveys are the main vehicles for collection and reporting of crime and police resources in Canada, and have been in operation since 1962. The purpose of the Police Administration Annual Survey is to collect personnel and operating expenditures for all police forces in Canada. The purpose of the UCR Survey is to count and describe those criminal incidents which are reported to or become known by the police.

Although the surveys collect information from all police forces in Canada, this report contains summary information only on Canada's **municipal** police forces which employ 64% of all police officers in Canada and provide policing services to 22.7 million Canadians (76% of the Canadian population). The definition of municipal policing includes contract policing provided by provincial police forces and the RCMP. It should be noted that counts of crime within a given police force exclude offences investigated by federal RCMP personnel.

The report is organized by province. Within each province, municipal police forces are grouped into one of five population ranges and the municipalities within each group are listed alphabetically. The RCMP municipal police forces are separated by a line from the other municipal police services and then arranged alphabetically within the five population ranges. For additional information on terminology and limitations, refer to notes on the following page.

Important Notes

Population

Most municipal populations represent updated postcensal estimates for July 1st 1996 based on 1991 Census data as provided by Demography Division, Statistics Canada and are rounded to the nearest hundred. The population estimates are based on usual place of residence. Populations for British Columbia municipalities are provided by the province. Populations for aboriginal police services were provided by Indian and Northern Affairs Canada.

Population data are updated regularly and figures published in this report may differ slightly from figures published in earlier reports.

Municipalities are grouped according to the following population ranges –

- 100,000 +
- 50,000 – 99,999
- 15,000 – 49,999
- 5,000 – 14,999
- < 5,000

Police Officers

Counts represent the “actual” number of sworn police officers (of all ranks) as of June 15th 1996.

Other Personnel

Counts include civilian and other personnel (e.g., clerical, dispatch, management, cadets, special constables, security officers, school crossing guards, by-law enforcement officers) on the police department’s payroll as of June 15th 1996.

There are no other personnel included in the counts for the RCMP municipal policing contracts. The municipality may hire other personnel, but they are not included in this report.

Expenditures

Figures include salaries, wages, benefits, and other operating expenses that are paid from the police force budget, as well as benefits paid from other government sources. They have been rounded to the nearest thousand. Revenues, recoveries, and those costs that fall under a police force's capital expenditures are excluded.

Many municipalities contract the RCMP to provide policing services. Expenditure figures for the RCMP in this report represent **only the amount billed to the municipality and not the total cost of the contract, nor any additional policing costs (e.g., accommodation, support staff, etc.) incurred by the municipality.** Under the RCMP billing agreement, municipalities with a population under 15,000 are billed 70% of total expenditures, and those of 15,000 and over are billed 90% of total costs.

As operational situations may vary considerably between police forces, so will the operational costs that result. For example, some costs (accommodation, by-law enforcement, court security) and some services (computing, personnel, and financial services) may be included within the police force's operational budget for some municipalities, but in other municipalities it may be paid for by other departments or through the police force's capital budget (which is excluded). **Comparisons should be made with caution.**

For most forces, data represents calendar year (January 1st – December 31st 1996) expenses. All RCMP municipal contracts are fiscal year (April 1st 1996 – March 31st 1997) expenses.

Per Capita Cost

Figures represent expenditures divided by the population of the municipality (rounded to the nearest dollar). For the reasons described above, **comparisons should be made with caution.**

Population per Police Officer

Figures represent the population of the municipality divided by the number of police officers.

For some forces, particularly those patrolling cottage or tourist areas, the population policed can fluctuate dramatically throughout the year, usually peaking during the summer months. Correspondingly, the number of police officers assigned to these forces may also fluctuate to accommodate these peak periods. Because the personnel data is collected for a specific point in time (June 15th 1996) and the population estimates are based on usual place of residence only, these aspects are not captured.

Crime Data

The "incident" is the basic unit of count used to report crime to the Uniform Crime Reporting (UCR) survey. An incident is the set of connected events which usually constitutes an occurrence report, a document used by police to record information. The UCR survey classifies incidents according to the most serious offence (generally the offence which carries the longest maximum sentence under the *Criminal Code of Canada*). Since one incident may include more than one offence, less serious offences are under-represented by the UCR survey.

In categorizing incidents, violent offences always take precedence over non-violent offences. For violent crime, a separate incident is recorded for each victim (i.e., if one person assaults three people, then three incidents are recorded; but if three people assault one person, only one incident is recorded). For non-violent crimes, one incident is counted for every distinct or separate occurrence. Robbery, a violent offence, is an exception to this rule. Unlike other violent offences, one occurrence of robbery is equal to one incident regardless of the number of victims. The reason for this exception is that robbery can involve many people who could all be considered victims, and would seriously overstate the number of robberies.

Violent Crime

Violent incidents involve offences that deal with the application, or threat of application, of force to an individual. These include homicide, attempted murder, various forms of sexual and non-sexual assault, other sexual offences, robbery, and abduction. Data on homicides are extracted from the Homicide survey database.

Property Crime

Property incidents involve unlawful acts with the intent of gaining property, but do not involve the use or threat of violence against an individual. Theft, breaking and entering, fraud, and possession of stolen goods are examples of property crimes.

Total Criminal Code (C.C.)

This total reflects both violent and property crimes, as well as other *Criminal Code* offences (e.g., damage to property, prostitution) reported for 1996. *Criminal Code* traffic incidents are excluded.

Number

The "actual" number of incidents recorded by the UCR survey refers to the total that have come to the attention of the police and that have been substantiated through police investigation.

Rate

Figures represent the total number of incidents per 100,000 population.

Clearance Rate

When a police investigation leads to the identification of a suspect against whom a charge could be laid, then that incident can be cleared. Criminal incidents can either be "cleared by charge" or "cleared otherwise". When an "information" is laid against the suspect (i.e., the person is formally charged), then from a statistical point of view at least one actual incident can be "cleared by charge". In cases where the police do not lay an information, even though they have identified a suspect and have enough evidence to support the laying of such, the incident is "cleared otherwise". Examples include instances where the complainant declines to proceed with charges, or cases where the alleged offender dies before they can be formally charged.

The clearance rate reflects the total number of incidents cleared (by charge, or otherwise) during the year divided by the total number of incidents during the year.

Since the process of solving crime is often time-consuming, a criminal incident may be solved months or even years after it was reported to police and recorded by the UCR survey. Therefore, it is possible for the number of incidents cleared to be greater than the total number of actual incidents, and thus for the clearance rate to exceed 100%.

% Change in Rate of Total Criminal Code (C.C.) Incidents 1995-1996

This figure represents the year-over-year percent change in the rate of total *Criminal Code* incidents (excluding traffic) per 100,000 population between 1995 and 1996.

Criminal Code (C.C.) Incidents per Officer

This figure represents the number of actual *Criminal Code* incidents (excluding traffic) reported to the police divided by the number of police officers.

¹ As of April 1, 1996 Halifax, Dartmouth and Bedford municipal forces amalgamated to form Halifax Regional Police. For reporting purposes, data from the three municipal forces for the first three months of 1996 were added to the data from the Regional force for the last 9 months to represent a full year of data for the Halifax Regional Force.

² Due to the policing jurisdiction change, the comparison between 1995 and 1996 crime rates is not applicable.

³ Cape Breton Regional Force includes data for: Sydney, North Sydney and Glace Bay.

⁴ New Glasgow includes data for Westville.

⁴ As of April 1, 1996 Lunenburg and Mahone Bay municipal forces amalgamated to form Lunenburg-Mahone Police. Data from the two municipal forces for the first three months of 1996 were added to the data from the Regional force for the last 9 months to represent a full year of data for the Lunenburg-Mahone Police Force.

⁵ Due to the change in policing jurisdiction, the comparison between 1995 and 1996 crime rates is not applicable.

⁵ Liverpool (RCMP) closed in late 1996 and is now policed under an RCMP provincial contract. Expenses for 1996 represent only a partial year and therefore, per capita costs are not presented. Crime data for 1996 are not available due to the change in policing arrangements.

.. Figures not available.

- nil or zero.

¹ The population shown for the Miramichi may represent an over estimate, as population estimates are based on growth patterns from 1986 to 1991.

² Due to an administrative change to the type of police contract and consequent reporting structure for this police service, 1996 crime data are not available.

³ Nackawic closed in July 1996 and is now being policed under an RCMP provincial contract. Crime data, expenditures and per capita cost are not available for 1996, due to this change.

⁴ St. Basile includes data for Rivière-Verte.

.. Figures not applicable.

- nil or zero.

¹ Ontario Provincial Police (OPP) crime data were not available for the first seven months of 1996. Consequently, 1996 crime data and other calculations such as year-over-year changes and Criminal Code incidents per officer, dependent on these data are not presented.

² Mitchell (OPP) signed a municipal contract with the OPP in October 1996. Personnel data are from Mitchell police service and expenditure data were received from the OPP and represent only three months of expenses; therefore, expenditures and per capita cost are not shown.

³ Rockcliffe Park (OPP) closed in mid 1996; therefore expenditures and per capita cost are not available.

⁴ The U.C.C.M. Anishnaabe Police commenced in April 1996. As their crime data only represent 9 months, rate calculations, year-over-year comparisons, and Criminal Code incidents per officer are not applicable.

.. Figures not available.

... Figures not applicable.

- nil or zero.

¹ In 1996, crime data for Blood Tribe are not available.

² Cold Lake (RCMP), formerly known as Grand Centre, enlarged its policing jurisdiction in October 1996; therefore per capita costs, population per police officer, crime rates, year-over-year comparisons, and incidents per officer are not presented.

³ Crime data for Siksika Nation Police were not available for 1995.
