Voir les notes à la fin du tableau.

<sup>1</sup>Excluding traffic offences.

<sup>2</sup>Rates are calculated on the basis of 100,000 population using population data supplied by provincial governments and have been rounded to remove the decimal.

<sup>3</sup>The data exclude RCMP cases in the jurisdiction, with the following exceptions.

For British Columbia municipal police, Camrose and Lacombe, Alberta, Moncton and Dieppe, New Brunswick and St. John's, Newfoundland, crimes occurring within the jurisdiction of a municipal police agency but handled by the RCMP have been attributed to the municipality in question.

<sup>4</sup>As of 1992, data on municipal by-law offences are not available. When comparing previous years to 1992 or later, municipal by-law data must be excluded.

<sup>5</sup>In 1992, Metropolitan Toronto Police converted to the "revised" Uniform Crime Reporting (UCR) Survey. Metropolitan Toronto Police had historically reported their crime data to the UCR Survey according to a multiple offence scoring rule. Therefore, caution should be used when comparing 1992 data to data from previous years for Toronto, Ontario and Canada.

<sup>6</sup>Non-Respondents in Group Size 7 : Standoff, Alberta.

<sup>7</sup>Non-Respondents in Group Size 8 : Baie St Paul and St. Cesaire, Québec.

<sup>8</sup>Non-Respondents in Group Size 9 : Chapais, Mistassini, Waswanipi, Terrasse-Vaudreuil, Wemindji and Murdochville, Québec.

Notes:

The reader is cautioned that there are problems in attempting to make comparisons between urban crime rates using the data in this table. The problem is that all municipal police forces do not have jurisdiction over comparable urban environments; for example, the Vancouver Police Department has responsibility for policing only the highly developed downtown part of the urban area while the surrounding suburban areas are policed by other municipal police forces. This is in contrast with the situation in Winnipeg in which the jurisdictional boundary of the police department coincides closely with the urbanized area. This means that the crime statistics from these two police departments cannot be directly compared because they police different environments. As a solution to this problem, the Policing Services Program staff are currently working to organize crime statistics according to Census Metropolitan Areas, thus making the data much more comparable.

<sup>1</sup>Sans les infractions au code de la route.

<sup>2</sup>Les taux sont calculés pour 100,000 habitants à l'aide des données démographiques fournies par les administrations provinciales et ont été arrondis pour supprimer la décimale.

<sup>3</sup>Les données ne comprennent pas les affaires de la GRC dans le secteur de compétence, à part les exceptions suivantes.

En ce qui concerne les corps policiers municipaux de la Colombie-Britannique, Camrose et Lacombe, Alberta, Moncton et Dieppe, Nouveau-Brunswick, et de St. John's, Terre-Nouve. Les crimes relevant de la compétence d'un corps policier municipal mais traités par la GRC ont été attribués à la municipalité en question.

<sup>4</sup>Depuis 1992, les données sur les infractions aux règlements municipaux ne sont pas disponibles. Par conséquent, on doit exclure ces données, lorsqu'on établit des comparaisons entre les données des années antérieures et celles de 1992 ou des années suivantes.

<sup>5</sup>En 1992, la police de la région métropolitaine de Toronto a adopté le Programme <révisé> de déclaration uniforme de la criminalité (DUC). Auparavant, elle déclarait ses données sur la criminalité au programme DUC en utilisant la règle des <infractions multiples>. Par conséquent, on doit faire preuve de prudence lorsque l'on compare les données de 1992 à celles des années antérieures pour Toronto, l'Ontario et le Canada.

<sup>6</sup>Non-déclarants en groupe de taille 7: Standoff, Alberta.

<sup>7</sup>Non-déclarants en groupe de taille 8: Baie St Paul et St. Césaire, Québec

<sup>8</sup>Non-déclarants en groupe de taille 9: Chapais, Mistassini, Waswanipi, Terrebonne-Vaudreuil, Hemindji et Murdochville, Québec

Notes:

Le lecteur est prié de noter que l'établissement de comparaisons entre les taux de criminalité urbaine à partir des données présentées dans cette publication pose certaines difficultés. Le problème vient du fait que les services de police municipaux n'exercent pas tous leur compétence dans des milieux urbains comparables. Par exemple, le corps policier de Vancouver assure le maintien de l'ordre uniquement dans la partie la plus développée du centre-ville, tandis que les banlieues environnantes relèvent d'autres corps policiers municipaux. Par ailleurs, à Winnipeg, les limites des territoires desservis par le service de police correspondent étroitement à la région urbanisée. Ainsi, on ne peut faire une comparaison directe entre les statistiques de la criminalité de ces deux corps policiers car ils assurent des services de police dans des milieux différents. Pour résoudre ce problème, le personnel du Programme de l'application de la loi s'emploie actuellement à organiser les statistiques de la criminalité selon les régions métropolitaines de recensement, ce qui augmentera la comparabilité des données.
