## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed standards of service that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on [www.statcan.gc.ca](http://www.statcan.gc.ca) under “Contact us” > “Standards of service to the public.”

## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

## Standard table symbols

The following symbols are used in Statistics Canada publications:

- |                |  |
|----------------|--|
| .              | not available for any reference period   |
| ..             | not available for a specific reference period  |
| ...            | not applicable   |
| 0              | true zero or a value rounded to zero   |
| 0 <sup>s</sup> | value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded |
| <sup>p</sup>   | preliminary  |
| <sup>r</sup>   | revised  |
| x              | suppressed to meet the confidentiality requirements of the <i>Statistics Act</i>                                   |
| <sup>E</sup>   | use with caution   |
| F              | too unreliable to be published   |
| *              | significantly different from reference category ( $p < 0.05$ )   |

# Aboriginal Peoples: Fact Sheet for Manitoba

## One in seven Aboriginal people in Canada live in Manitoba

- Numbering 195,900,<sup>1</sup> 14% of the Aboriginal identity population in Canada lived in Manitoba in 2011. They made up 17% of the total population of that province, the highest share of all provinces.
- Four in ten Aboriginal people in Manitoba resided in Winnipeg, representing 11% of the total population living there. Aboriginal people make up more than one-third of the total population of Thompson (35%) and nearly one-quarter (23%) of Portage la Prairie.
- Manitoba was home to 114,230 First Nations people, 78,835 Métis, and 580 Inuit, with the rest reporting other<sup>2</sup> Aboriginal identities (1,055) or more than one Aboriginal identity (1,200). From 2006 to 2011, the First Nations population in Manitoba increased by 15%, while the Métis population rose by 10%, and the Inuit population by 6%.<sup>3</sup>
- Of those who identified as First Nations people in 2011, 93% or 105,820 reported being a Treaty Indian or a Registered Indian as defined by the *Indian Act* of Canada. More than half (54% or 61,685) of all First Nations people (58% of First Nations people who were Treaty or Registered Indians, or 61,255 individuals) lived on a reserve.

## Aboriginal population younger than non-Aboriginal

- Half (51%) of Aboriginal people in Manitoba were under the age of 25, compared with 30% of the non-Aboriginal population. More than half of First Nations people (56%) were in this age group, as were 45% of Inuit and 43% of Métis. The percentage of First Nations people 25 and younger was the same for both the on- and off-reserve populations.
- In 2011, the median age of First Nations people was 21.0; the off-reserve population was slightly younger (20.6) than those living on a reserve (21.2). Métis had a median age of 29.6; that of Inuit was 25.8. All three groups were younger than the non-Aboriginal population, whose median age was 40.7.

### About the data sources

The 2011 National Household Survey (NHS) and the 2012 Aboriginal Peoples Survey (APS) are the main data sources for this fact sheet. The 2011 NHS collected social and economic data about the Canadian population. The 2012 APS was a national survey of First Nations people **living off reserve**, Métis, and Inuit aged 6 and older. The data are for the **Aboriginal identity population**, which refers to people who reported identifying with at least one Aboriginal group, that is, First Nations, Métis or Inuit, and/or those who reported being a Treaty Indian or a Registered Indian as defined by the *Indian Act* of Canada, and/or those who reported they were members of an Indian band or First Nation. It was possible to report both single and multiple responses to the Aboriginal identity questions on the NHS and the APS. The NHS data in this fact sheet are based on single responses only. The APS data represent a combination of the single and multiple Aboriginal identity populations. Nearly all off-reserve First Nations, Métis, and Inuit respondents reported a single identity.

1. Some Indian reserves and settlements did not participate in the 2011 National Household Survey (NHS) as enumeration was either not permitted, it was interrupted before completion, or because of natural events (e.g., forest fires).  
 2. This includes people who reported having Registered Indian status and/or being members of an Indian band or First Nation without reporting an Aboriginal identity.  
 3. A number of factors should be taken into account when comparing data on Aboriginal people over time. Please refer to the [Aboriginal Peoples Reference Guide, National Household Survey, 2011](#), Catalogue no. 99-011-X2011006 and the [Aboriginal Peoples Technical Report](#), Catalogue no. 99-011-X.

## Almost half of Aboriginal children live with both parents

- In Manitoba, 40% of First Nations children aged 14 and younger lived in a family with both their parents in 2011, as did 57% of Métis children and 75% of Inuit children. The corresponding percentage for non-Aboriginal children was 80%. Four in ten First Nations children and 31% of Métis children lived in a lone-parent family, rates that were higher than that for their non-Aboriginal peers (15%).
- In 2011, 6% of Aboriginal children aged 14 and younger were in foster care; the percentage was highest for Inuit children (19%) and First Nations children living off reserve (12%). Moreover, of all Manitoba children in foster care in 2011, 85% were Aboriginal children, the majority of whom (82%) were First Nations children.

Table 1

**Percentage distribution of children aged 14 and under by living arrangement, by selected Aboriginal identity group and area of residence, Manitoba, 2011**

	Total Aboriginal identity population	First Nations single identity		Métis single identity	Inuit single identity	Non- Aboriginal identity population
		Total	On reserve	Off reserve		
				percent		
Children of both parents <sup>1</sup>	45.5	39.8	48.3	29.9	56.9	79.7
Stepchildren	7.2	7.0	6.9	7.0	7.8	4.3
Children of lone parent	37.1	40.2	35.2	46.0	30.9	14.9
Grandchildren in skip-generation family	3.1	4.1	5.0	3.2	1.1	0.3
Foster children	5.7	7.0	2.8	11.9	2.9	0.4
Children living with other relatives <sup>2</sup>	1.4	1.9	1.9	2.0	0.4	0.3

1. Includes children in a two-parent family where there may also be stepsiblings or half-siblings present. Also includes children in a two-parent family for whom it cannot be determined if they are stepchildren.

2. Non-relatives may be present. Excludes foster children.

Source: Statistics Canada, National Household Survey, 2011.

## On-reserve First Nations people most likely to live in crowded homes and homes requiring major repairs

- In 2011, 41% of on-reserve and 13% of off-reserve First Nations people in Manitoba lived in crowded homes, that is, with more than one person per room. Among Métis, the percentage was 4%, and among Inuit, 8%. The comparable figure for the non-Aboriginal population was 5%.
- Almost four in ten First Nations people (38%) and 14% of both Métis and Inuit lived in homes in need of major repairs; the rate was highest for First Nations people living on a reserve (52%).

Table 2

**Percentages living in crowded homes and homes in need of major repairs, by selected Aboriginal identity group and area of residence, Manitoba, 2011**

	Total Aboriginal identity population	First Nations single identity		Métis single identity	Inuit single identity	Non- Aboriginal identity population
		Total	On reserve	Off reserve		
				percent		
Crowding <sup>1</sup>	17.8	27.7	40.7	12.5	3.8	4.7
Home in need of major <sup>2</sup> repairs	28.2	38.0	51.7	21.9	14.3	8.3

1. More than one person per room.

2. For example, dwellings with defective plumbing or electrical wiring and dwellings needing structural repairs to walls, floors or ceilings.

Source: Statistics Canada, National Household Survey, 2011.

## Ability to speak an Aboriginal language highest among on-reserve First Nations people

- In Manitoba, 54% of First Nations people living on a reserve reported the ability to conduct a conversation in an Aboriginal language, a rate higher than among off-reserve First Nations people (15%), Métis (1%) and Inuit (28%). The Aboriginal languages most commonly spoken by First Nations people were Cree languages, Ojibway and Oji-Cree. Métis spoke mostly Cree languages, Ojibway, and Michif. Inuktitut was the Aboriginal language most commonly spoken by Inuit.
- The number of First Nations people who reported being able to converse in an Aboriginal language exceeded the number who reported an Aboriginal mother tongue, which suggests acquisition of an Aboriginal language as a second language.
- Based on results of the Aboriginal Peoples Survey,<sup>4</sup> 69% of off-reserve First Nations people and 36% of Métis<sup>5</sup> aged 6 and older reported that speaking and understanding an Aboriginal language was important to them.

**Chart 1**

**Ability to converse in an Aboriginal language and Aboriginal language as mother tongue, by selected Aboriginal identity group and area of residence, Manitoba, 2011**

Source: Statistics Canada, National Household Survey, 2011.

## Four in ten have postsecondary qualifications

- In 2011, 40% of Aboriginal people aged 25 to 64 in Manitoba had a certificate, diploma or degree from a trade school, college or university: 31% of First Nations people, 49% of Métis and 40% of Inuit. The comparable percentage for their non-Aboriginal counterparts was 60%.
- Among those with postsecondary credentials, First Nations people, Métis and Inuit were more likely than non-Aboriginal graduates to have completed programs below the bachelor's level (trades or college programs).
- There was also a difference in the proportion of Aboriginal and non-Aboriginal people with "no certificate, diploma or degree". In 2011, 50% of First Nations people aged 25 to 64, 24% of Métis and 27% of Inuit did not have a certificate, diploma or degree. The corresponding percentage for the non-Aboriginal population was 14%.

4. The target population of the 2012 Aboriginal Peoples Survey (APS) excluded people living on Indian reserves and in Indian settlements in the provinces and in selected First Nations communities in the territories.

5. Some characteristics for Inuit are not included because of the small number of Inuit living in the province.

**Table 3**

**Highest level of educational attainment of population aged 25 to 64, by selected Aboriginal identity group and area of residence, Manitoba, 2011**

	Total Aboriginal identity population	First Nations single identity			Métis single identity	Inuit single identity	Non- Aboriginal identity population
		Total	On reserve	Off reserve			
				percent			
No certificate, diploma or degree	37.3	49.5	61.9	34.9	23.9	27.4	13.9
High school diploma or equivalent	23.2	19.5	16.4	23.1	27.3	32.3	25.9
Postsecondary certificate, diploma or degree	39.5	31.0	21.7	42.0	48.8	40.3	60.1
Apprenticeship or trades certificate or diploma	10.6	8.1	5.9	10.8	13.3	16.1	10.6
College, CEGEP or other non-university certificate or diploma	17.1	13.2	9.5	17.6	21.4	21.0	19.6
University certificate or diploma below bachelor level <sup>1</sup>	2.9	2.7	2.2	3.2	3.1	0.0	5.0
University certificate, diploma or degree at bachelor level or above	8.9	7.0	4.1	10.5	11.0	0.0	24.9

1. Comparisons with other data sources suggest that the category "University certificate or diploma below bachelor level" was overreported in the National Household Survey (NHS). The results for this category should be interpreted with caution. For more information on concepts and data quality, refer to the [NHS reference guides](#) and [Education Reference Guide](#) on the Statistics Canada website.

Source: Statistics Canada, National Household Survey, 2011.

## Employment rates and median total income generally increase with education

- In 2011, the employment rates of First Nations people, Métis and Inuit aged 25 to 64 in Manitoba who did not have a certificate, diploma or degree were 32.5%, 60.6% and 76.5% respectively. Employment rates were generally higher for those with further education. For example, among those with postsecondary credentials, the employment rate of First Nations people was 70.7%, while that of Métis was 82.6%.

**Table 4**

**Employment rate of population aged 25 to 64, by highest level of educational attainment, selected Aboriginal identity group and area of residence, Manitoba, 2011**

	Total Aboriginal identity population	First Nations single identity			Métis single identity	Inuit single identity	Non- Aboriginal identity population
		Total	On reserve	Off reserve			
				employment rate (percent)			
<b>Total</b>	<b>61.3</b>	<b>48.4</b>	<b>40.3</b>	<b>58.0</b>	<b>75.7</b>	<b>78.7</b>	<b>80.0</b>
No certificate, diploma or degree	41.1	32.5	29.4	39.0	60.6	76.5	68.7
High school diploma or equivalent	66.3	53.3	46.7	58.9	76.8	85.0	78.1
Postsecondary certificate, diploma or degree	77.6	70.7	66.9	73.1	82.6	72.0	83.5

Source: Statistics Canada, National Household Survey, 2011.

- Median total income<sup>6</sup> was also higher for those with higher education levels. Among First Nations people aged 25 to 64, median total income (rounded to the nearest \$1,000) ranged from \$10,000 for those with no certificate, diploma or degree to \$28,000 for those with postsecondary credentials. The range for Métis was from \$22,000 to \$41,000, and for Inuit, from \$30,000 to \$40,000.

## Half rate their health as excellent or very good

- Based on results of the Aboriginal Peoples Survey, more than half (53%) the Aboriginal population aged 12 and older in Manitoba rated their health as excellent or very good in 2012: 50% of First Nations people living off reserve, and 55% of Métis.
- First Nations people living off reserve and Métis aged 12 to 24 had overall health ratings closer to their non-Aboriginal peers<sup>7</sup> than those in the older age groups.

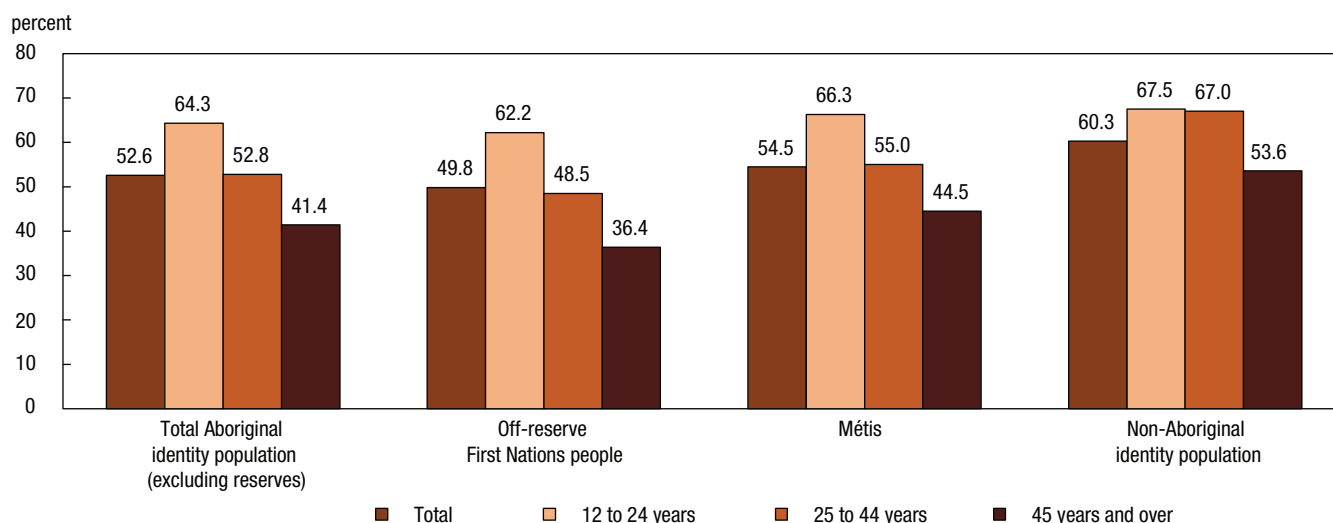

6. Total income includes income from all sources, including employment income, income from government programs, pension income, investment income and any other money income. The calculation includes population with income and without income (with an income of zero).

7. Health data for the non-Aboriginal population were drawn from the 2012 Canadian Community Health Survey.

**Chart 2**

**Excellent or very good self-rated overall health of population aged 12 and over, by selected Aboriginal identity group<sup>1</sup> and age group, Manitoba, 2012**

1. Data for Inuit are included in the total Aboriginal identity population but are not shown separately because of the small number of Inuit living in the province.

Sources: Statistics Canada, Aboriginal Peoples Survey, 2012; and Canadian Community Health Survey, 2012.

- Over a half of off-reserve First Nations people (55%), and 63% of Métis aged 18 and older reported excellent or very good mental health.<sup>8</sup>
- Over a half of off-reserve First Nations people (54%) and Métis (58%) aged 12 and older reported that they had been diagnosed with at least one chronic condition. The corresponding percentage for the non-Aboriginal population was similar (55%).
- Among off-reserve First Nations people and Métis, commonly reported conditions included arthritis excluding fibromyalgia (15% and 17%, respectively), high blood pressure (15% and 18%), and asthma (16% and 12%). In addition, 12% of off-reserve First Nations people and 11% of Métis reported being diagnosed with a mood disorder, and 15% of off-reserve First Nations people and 12% of Métis reported an anxiety disorder.

**Table 5**

**Excellent or very good self-rated mental health of population aged 18 and over, by selected Aboriginal identity group<sup>1</sup> and age group, Manitoba, 2012**

	Total Aboriginal identity population (excluding reserves)	Off-reserve First Nations people	Métis	Non-Aboriginal identity population
	percent			
<b>Total</b>	<b>60.1</b>	<b>55.1</b>	<b>63.1</b>	<b>69.6</b>
18 to 24	56.5	52.2	60.3	72.5
25 to 44	58.9	54.1	61.7	72.9
45 and over	62.6	57.5	65.2	66.9

1. Data for Inuit are included in the total Aboriginal identity population but are not shown separately because of the small number of Inuit living in the province.

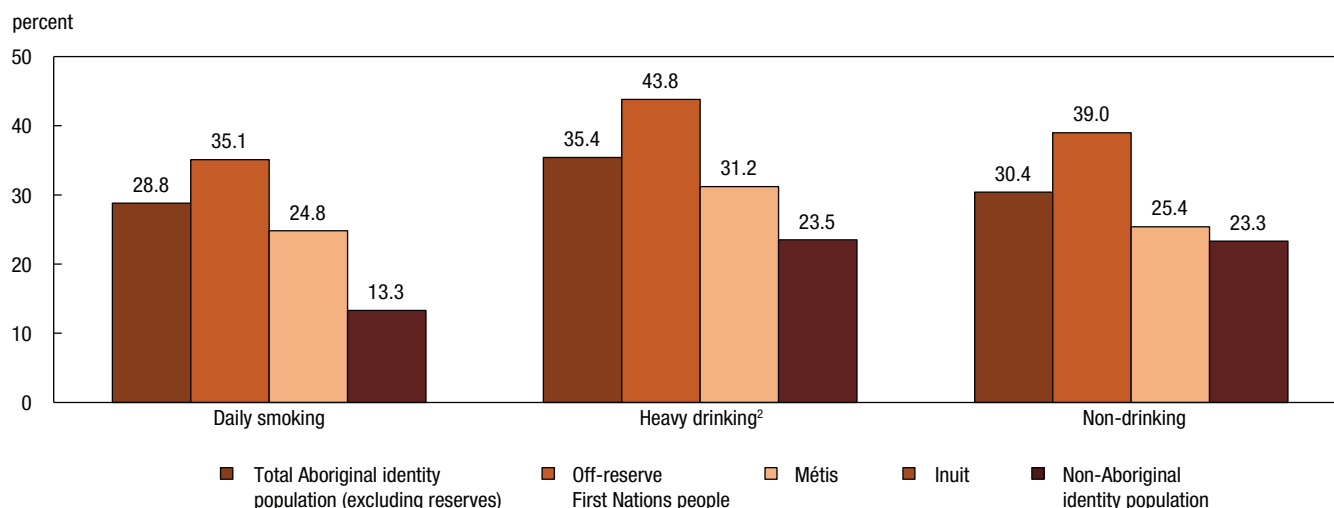

Sources: Statistics Canada, Aboriginal Peoples Survey, 2012; and Canadian Community Health Survey, 2012.

8. Questions on self-rated mental health were only asked of respondents who were providing answers to the survey directly, on their own behalf (i.e., data are not available when questionnaires were completed by proxy interview).

## About a third of off-reserve First Nations people smoke daily

- In 2012, 35% of off-reserve First Nations people aged 12 and older in Manitoba reported that they smoked daily, as did 25% of Métis. The comparable percentage for the non-Aboriginal population was 13%.
- First Nations people and Métis in all age groups in Table 6 had higher rates of daily smoking than did their non-Aboriginal counterparts.

**Chart 3**  
**Selected health behaviours of population aged 12 and over, by selected Aboriginal identity group,<sup>1</sup> Manitoba, 2012**

1. Data for Inuit are included in the total Aboriginal identity population but are not shown separately because of the small number of Inuit living in the province.

2. Heavy drinking refers to the consumption of five or more drinks on one occasion at least once a month in the 12 months preceding the survey.

Sources: Statistics Canada, Aboriginal Peoples Survey, 2012; and Canadian Community Health Survey, 2012.

- For those 12 and older, the rate of heavy drinking (five or more drinks on one occasion at least once a month in the 12 months preceding the survey) was 44% for off-reserve First Nations people and 31% for Métis, compared with 24% for non-Aboriginal people. Half of off-reserve First Nations people and 39% of Métis and non-Aboriginal people aged 12 to 24 reported heavy drinking.
- At the same time, 39% of off-reserve First Nations people were non-drinkers (consumed no alcohol in the 12 months preceding the survey), compared with 23% of the non-Aboriginal population. The percentage for Métis was 25%. At ages 12 to 24, 46% of First Nations people and 38% of Métis were non-drinkers, as were 43% of non-Aboriginal people in this age group. The percentage of non-drinkers was also high for off-reserve First Nations people aged 45 and older (49%).

**Table 6**  
**Selected health behaviours of population aged 12 and over, by selected Aboriginal identity group<sup>1</sup> and age group, Manitoba, 2012**

	Total Aboriginal identity population (excluding reserves)	Off-reserve First Nations people	Métis	Non-Aboriginal identity population
		percent		
<b>12 to 24</b>				
Daily smoking	18.0	24.7	12.7	5.7 <sup>E</sup>
Heavy drinking <sup>2</sup>	43.2	49.8	38.8	38.9
Non-drinking	40.7	45.5	37.6	43.2
<b>25 to 44</b>				
Daily smoking	37.2	43.2	33.3	12.9
Heavy drinking	35.3	44.1	30.0	28.8
Non-drinking	17.5	22.2	14.8 <sup>E</sup>	13.4
<b>45 and over</b>				
Daily smoking	30.8	38.8	26.9	16.2
Heavy drinking	29.2	35.7 <sup>E</sup>	27.2	15.7
Non-drinking	32.9	48.9	25.1	22.3

<sup>E</sup> use with caution

1. Data for Inuit are included in the total Aboriginal identity population but are not shown separately because of the small number of Inuit living in the province.

2. Heavy drinking refers to the consumption of five or more drinks on one occasion at least once a month in the 12 months preceding the survey.

Sources: Statistics Canada, Aboriginal Peoples Survey, 2012; and Canadian Community Health Survey, 2012.
