### Estimated Population of Canada by Provinces at June 1, 1965

The estimated population of Canada at June 1, 1965, was 19,571,000. This figure results from a population accounting which starts with the 1961 Census, adds births and immigration, and deducts deaths and an estimate of emigration based largely on United States and United Kingdom government statistics of immigration from Canada. For each province the same general method is used as for Canada. For purposes of estimating interprovincial migration, Family Allowances statistics are used.

The 1965 estimate is distributed by provinces as follows:

Canada ..... 19,571,000

Newfoundland -- Terre-Neuve .....	498,000
Prince Edward Island -- Île-du-Prince-Édouard .....	108,000
Nova Scotia -- Nouvelle-Écosse .....	761,000
New Brunswick -- Nouveau-Brunswick .....	623,000
Québec .....	5,657,000
Ontario .....	6,731,000
Manitoba .....	962,000
Saskatchewan .....	951,000
Alberta .....	1,451,000
British Columbia -- Colombie-Britannique .....	1,789,000
Yukon .....	15,000
Northwest Territories -- Territoires du Nord-Ouest .....	25,000

The historical record by provinces is shown on the reverse of this sheet.

The figures presented for 1962-1965 will be subject to revision when the data from another census become available.

Les données chronologiques, par province, sont indiquées au verso de cette page.

Les chiffres donnés pour les années 1962-1965 seront peut-être modifiés quand les résultats d'un autre recensement seront connus.
