ESTIMATED POPULATION OF CANADA BY PROVINCE AT JUNE 1, 1968

The estimated population of Canada at June 1, 1968, was 20,744,000. This figure results from a population accounting which starts with the 1966 Census, adds births and immigration, and deducts deaths and an estimate of emigration based largely on United States and United Kingdom government statistics of immigration from Canada. For each province the same general method is used as for Canada. For purposes of estimating interprovincial migration, Family Allowances statistics are used.

The 1968 estimate is distributed by provinces as follows:

Canada	20,744,000
Newfoundland -- Terre-Neuve	507,000
Prince Edward Island -- Île-du-Prince-Édouard	110,000
Nova Scotia -- Nouvelle-Écosse	760,000
New Brunswick -- Nouveau-Brunswick	624,000
Québec	5,927,000
Ontario	7,306,000
Manitoba	971,000
Saskatchewan	960,000
Alberta	1,526,000
British Columbia -- Colombie-Britannique	2,007,000
Yukon	15,000
Northwest Territories -- Territoires du Nord-Ouest	31,000

The historical record by provinces is shown on the reverse of this sheet.

The figures presented for 1962-1965 have been revised following publication of the 1966 Census population count.

Les données chronologiques, par province, sont indiquées au verso de cette page.

Les chiffres donnés pour les années 1962-1965 ont été modifiés d'après la publication des résultats du recensement de 1966.
