The estimated number of households in Canada in June, 1948, was 3,235,000 as compared with 3,128,000 in 1947. At the 1941 Census, the number of households recorded was 2,706,089. Hence, the increase in households in Canada between 1941 and 1947 was 421,911, and between 1941 and 1948 it was 528,911. The average size of household declined from 4.2 to 3.9 persons over the latter period. The average size of household in 1948 was largest in Quebec at 4.7 persons and smallest in British Columbia at 3.2 persons.

The estimated number of families in Canada in June, 1948, was 3,088,000, an increase of 46,000 over June, 1947, and of 562,701 or 22.3 p.c. since the 1941 Census. The average size of family in Canada in 1948 was 3.8 persons as compared with 3.7 persons in 1947 and 3.9 persons in 1941. In each region of Canada, a decline in size of family had taken place between 1941 and 1948. This is reflected in an increasing proportion of families in the smaller size groups, the percentage of families of from two to four persons constituting 74.4 p.c. of all families in 1948 as compared with 70.3 p.c. in this category in 1941. Additional information on size and composition of families, classified according to (a) occupation, and (b) age of head, will be found in Tables 4 and 5, respectively.

Table I. Estimated number of households and families, number of persons and average size, for Canada (1) and regions, 1941, 1947 and 1948
(Including unsampled areas)

de recensement

Le nombre estimatif de ménages au Canada en juin 1948 est de 3,235,000 au regard de 3,128,000 en 1947. Lors du recensement de 1941, il était de 2,706,089. L'augmentation est donc de 421,911 entre 1941 et 1947, et de 528,911 entre 1941-1948. La grandeur moyenne du ménage fléchit de 4.2 à 3.9 personnes au cours de la dernière période. Elle est la plus élevée dans le Québec avec 4.7 personnes et la moins élevée en Colombie-Britannique avec 3.2 personnes.

Le nombre estimatif de familles au Canada en juin 1948 est de 3,088,000, augmentation de 46,000 sur juin 1947 et de 562,701 ou 22.3 p. 100 depuis le recensement de 1941. La grandeur moyenne de la famille canadienne en 1948 est de 3.8 personnes comparativement à 3.7 personnes en 1947 et 3.9 personnes en 1941. La grandeur de la famille diminue dans chaque région du Canada entre 1941 et 1948, ce qui se reflète dans une augmentation de la proportion de familles dans les groupes de plus petites familles. Les familles de deux à quatre personnes représentent 74.4 p. 100 de toutes les familles en 1948 comparativement à 70.3 p. 100 en 1941. Des renseignements supplémentaires sur la grandeur et la composition des familles classées d'après a) l'occupation, et b) l'âge du chef sont données respectivement aux tableaux 4 et 5.

(1) Not including Yukon and Northwest Territories - A l'exclusion du Yukon et des Territoires du Nord-Ouest.

(2) Not including households and families in institutions - A l'exclusion des ménages et des familles qui vivent dans des institutions.

The statistics on households and families in 1947 and 1948, as shown in Table I are derived from the data collected in conjunction with the 2 p.c. sample survey of the Labour Force for June, 1947 and 1948. It should be noted that the survey covers the total non-institutional civilian population, with the exception of a small unsampled population in the northern areas of certain provinces. However, in Table I estimates are given of the total number of households and families in Canada, including the unsampled areas. In the detailed Tables 4 and 5 the figures are exclusive of these unsampled areas.

Household defined. - A household for purposes of the sample survey is a group of people living together in the same living quarters and sharing the same house-keeping arrangements. It may be a single family, or sometimes a single person or a group of unrelated persons or, perhaps, a family with a lodger or servant making up the household.

Family defined. - For purposes of comparison with the 1941 Census statistics on families, a family in the sample survey was defined as a group of two or more persons living in a dwelling related either as husband or wife, with or without children, or as parent and child. Other relatives living in the same dwelling, including married children, were not counted as members of the family. However, where a married son (or daughter) and family were living in the same dwelling or household as their parents, they were counted as a second family in the dwelling.

La statistique des ménages et des familles en 1947 et 1948, telle qu'elle paraît au tableau I, est tirée des données réunies lors du relevé-échantillon de 2 p. 100 de la main - d'œuvre en juin 1947 et 1948. Il faut remarquer que le relevé embrasse toute la population civile qui ne vit pas dans des institutions, à l'exception, toutefois, d'une petite population non échantillonnée dans les régions septentrionales de certaines provinces. Toutefois, le tableau I donne des estimations du nombre total des ménages et des familles au Canada, y compris les régions non échantillonnées. Dans les tableaux détaillés 4 et 5, les chiffres ne tiennent pas compte des régions non échantillonnées.

Définition du ménage. - Pour les fins du relevé-échantillon, un ménage est un groupe de personnes qui vivent ensemble dans les mêmes quartiers d'habitation et partagent les mêmes arrangements ménagers. Il peut ne comprendre qu'une famille, ou parfois, une seule personne ou un groupe de personnes non apparentées; il peut se composer peut-être d'une famille avec un logeur ou un domestique.

Définition de la famille. - Pour fins de comparaison avec les chiffres du recensement de 1941 sur les familles, une famille, d'après le relevé-échantillon, est un groupe de deux personnes ou plus vivant dans un logement et apparentées comme époux ou épouse, avec ou sans enfants, ou comme parent et enfant. Les autres parents qui habitent le même logement, y compris les enfants mariés, ne comptent pas parmi les membres de la famille. Toutefois, lorsqu'un fils marié (ou une fille) et sa famille habite le même logement ou vit avec le même ménage que ses parents, ils sont considérés comme seconde famille dans le logement.
