CENSUS OF INDUSTRY

OTTAWA - CANADA

Dominion Statistician: R. H. Coats, B.A., F.S.S. (Hon.), F.R.S.C.  
Acting Chief, Census of Industry: A. Cohen, B.Com.

Alphabetical List of the Products Reported as having been  
Manufactured in Canada during 1929.

The appended list of the products of Canadian manufacturing industries presents the value and in most cases the quantity of these products in a new and much more detailed form. Heretofore, in presenting statistics of manufacturing production, the whole production of an establishment has been taken as a unit. This has not only prevented the presentation of production figures for specific products in detail, but has involved numerous inaccuracies in the production statistics of classes of commodities, owing to the fact that commodities which may be the major line of production in one establishment may also be products of secondary importance in another establishment where the major line of production puts the establishment into a different class. The statistics which follow, however, have been compiled by taking from the individual returns of each of the 23,000 manufacturing establishments covered, the value and, when given, the quantity of each commodity specified as produced by that establishment. In this way, detailed production figures are obtained for specific commodities and furthermore the total production of each commodity is brought together, no matter how varied may be the operations in different establishments producing it. Nevertheless, it should be pointed out to those making use of these figures that there is one element of incompleteness about them. In the returns of many manufacturers, products of minor importance are grouped under the name "all other products." As will be seen from the group at the end of the list, the value of products not specified, while they may appear unimportant to the individual manufacturer, are, in the aggregate, a large amount, especially in the industries of the iron and steel group. It is obvious that one manufacturer may consider a product of insufficient importance to report separately for his establishment, while that same product may be reported separately by other establishments! In other words, included in the value of other products not specified at the end of the list, there are doubtless values which, had the products been specified by the manufacturer, would have been included in the values of commodities appearing in the list. However, the products not specified total only about 1.3 per cent in value of the whole manufacturing production, although in the iron and steel group this proportion is 4.2 per cent. With the exception of this group, therefore, the incompleteness of the figures on this account is insignificant.

An analysis of the value of the products of Canadian manufacture, similar to this, was made for the first time from the 1927 returns. In the course of further administrative experience it is hoped that it will be possible to reduce considerably the proportion of the products not specified.

The sum of the values of the commodities as listed here is \$4,063,987,279, which is the gross value of manufacturing production for the year. There is thus no duplication in the listing of products, nor do any of the items include products listed in more detail under another name. It is possible, however, that essentially the same commodity produced in different establishments may have been called by different names; in such a case, which is probably a very rare one, the items would appear separately in the following list.

The present report is published as a supplement to the report on General Manufactures for 1929, copies of which may be obtained on application to the Dominion Bureau of Statistics.

## ALPHABETICAL LIST OF PRODUCTS MANUFACTURED IN CANADA, 1929.

Item	Unit of Measure	Quantity reported	Value of Quantity reported	Total Value

1. This is a sample of a ledger page from a small business. It lists the names of customers, their addresses, telephone numbers, and the number of items purchased. The items are listed in a column labeled "ITEMS".

2. The page is numbered "1" at the top right corner.

3. The page is dated "JULY 1988" at the bottom center.

4. The page is signed "S. JONES" at the bottom right corner.

5. The page is dated "JULY 1988" again at the bottom center.
