# STATISTICS OF CANADA.

CENSUS OF 1870-71.

## INTRODUCTION.

### VOLUME SECOND.

The seventh Table of the Census, which is the first in the second volume, gives the number of Births during the twelve months immediately preceding the 2nd of April 1871, the months in which such births took place, and the population, by ages, grouped in periods of five and ten years for every district, sub-district and province.

The asterisks, to be found affixed in some cases to the totals, refer to a column of details not given in the other columns, but summed up in the general result.

The ages, as given, are counted from the last birth-day. The first column of 0 to 1, therefore, represents a greater or lesser fraction of a year. In grouping the years of age in the general Table No. VII., that order has been preserved by giving that fraction of a year a column to itself, as also the system of making the period immediately anterior to the age of majority (21) to stop at that important stage of life, and the following period to begin with that age, thereby giving, for both sexes, the total proportion of those who have not reached, and of those who have attained the age of majority.

It would have been impossible, on account of space, to have given the ages year by year for all the districts and sub-districts; but as such a statement is very important for general comparative statistics, this information in relation to the population of each of the four Provinces, and to the total population of the Provinces combined, will find a proper place in another volume, in which the adjustment, comparisons, ratios, proportions and deductions will be discussed.

# STATISTIQUES DU CANADA.

RECENSEMENT DE 1870--71.

## INTRODUCTION.

### SECOND VOLUME.

Le Tableau VII du recensement, premier de ce volume, donne le chiffre des Naissances arrivées pendant les douze mois précédent immédiatement le 2 avril 1871, le mois de ces naissances et la population par âges, groupés en périodes de 5 et 10 années, et cela séparent pour chaque sous-district, district et province. Les astérisques insérés dans la colonne des totaux ont trait à des détails omis dans d'autres colonnes, mais additionnés dans le total.

L'âge a été compté comme se référant au dernier anniversaire de la naissance : la première colonne, 0 à 1, conséquemment, représente des fractions plus ou moins grandes d'un an. Dans le groupement des années d'âge, l'ordre indiqué par cette circonsistance a été conservé, en consacrant dans le tableau général des âges, No. VII, une colonne à part pour cette année fractionnaire. On a fait aussi que le groupement des âges permet d'établir de suite, et pour les deux sexes, le chiffre de la population qui se trouve au-dessus et au-dessous de l'âge de majorité, la première partie finissant à l'âge de 21 ans arrivant, et la seconde commençant à l'âge de 21 ans accomplis.

Il eût été impossible, pour raison d'espace, de consacrer une colonne à chaque année d'âge, pour chaque district et sous-district ; mais comme ce renseignement, dans son ensemble, est nécessaire aux travaux de la statistique comparative, cette information sera fournie, mais seulement par provinces et par grands totaux, dans un autre volume qui contiendra les travaux de corrections, de comparaisons et de proportions avec les déductions et autres données de ce genre.

The other Tables of this volume are given by districts. Tables VIII to XII require no special remark.

Table XIII contains the enumeration of the people by occupations, being a general exposé of the various industries in which the population is engaged. The details, in reference to this object of statistics, are further supplemented in the third volume, in which will be found a statement of the manufacturing industries with the numbers employed.

At the end of this Table is given a classified summary of the number of persons engaged in agricultural, commercial, domestic, industrial and professional pursuits respectively.

It must be borne in mind that, as regards the female part of the population, the enumeration does not include women engaged in attendance on their own household and their own family, and having no other specific occupation.

The five following Tables, namely, the fourteenth, fifteenth, sixteenth, seventeenth and eighteenth, are devoted to the enumeration of the deaths that occurred during the twelve months preceding the 2nd April, 1871, by districts, giving the sexes of the dead, the months in which the deaths took place, the marriage state, the places of birth and religions of the dead, the occupations followed during life, and the causes of death. The last information has been compiled by Provinces, not by Districts.

As is always the case when deaths are enquired into by means of a census, instead of by a well organized and properly conducted system of registration from day to day, the number of deaths recorded falls very greatly short of the actual rate of yearly mortality. This deficiency will be at once perceived and appreciated by any one conversant with the subject.

In the province of Ontario, the recorded deaths are about equal to one in every eighty-nine individuals of the total population; in the Province of Quebec to one in every fifty-seven; in the Province of New Brunswick to one in every eighty; and in the Province of Nova Scotia to one in every eighty; being one in seventy-three persons of the population of the four Provinces.

It will be seen that, even in the Province of Quebec, where the Census returns of deaths are much more accurately given than elsewhere, there is still a large deficiency.

Means, however, happily exist, and those possessing the character of great certainty, to enable an adjustment of these figures to be made, so that an expression of the real facts may be arrived at sufficiently near to serve all statistical and other purposes.

Les autres tableaux de ce volume donnent les renseignements par district seulement. Les Tableaux de VIII à XII ne nécessitent aucune remarque.

Le Tableau XIII contient l'état des professions, c'est-à-dire un exposé général des occupations suivies par la population du Canada. Les détails de ce chef trouvent un complément supplémentaire dans le troisième volume, au chapitre des industries manufacturières, où sont donnés les chiffres représentant le nombre des employés de chaque industrie.

On a inséré à la fin de la Table des Professions un sommaire classé du nombre des individus appartenant à l'agriculture, au commerce, à la domesticité, à l'industrie manufacturière et aux professions libérales.

On ne doit point oublier que, pour ce qui a trait à la partie féminine de la population, on n'a point fait l'énumération séparée des femmes n'ayant point d'autre occupation que celle de ménagères dans la maison de la famille.

Les Tableaux XIV, XV, XVI, XVII et XVIII sont consacrés à l'énumération des morts arrivées pendant les douze mois immédiatement antérieurs au 2 avril 1871, avec mention, pour chaque district de recensement, du sexe des décédés, du mois du décès, de l'état de mariage, du lieu de naissance et du culte des décédés, de la profession suivie par les décédés pendant la vie et des causes de la mort. Ce dernier renseignement, toutefois, est donné par Province et non par District.

Comme il arrive toujours lorsque l'énumération des décès se fait par moyen de recensement et non par enrégistrement journalier, le nombre de décès accusé dans ces tableaux comporte un énorme déficit, comparé au taux réel de la mortalité annuelle. Ce déficit est de suite évident pour quiconque s'est occupé de la question.

Dans la province d'Ontario, le nombre de décès consigné est à la population à peu près dans la proportion de 1 à 89 ; dans la province de Québec dans la proportion de 1 à 57 ; dans la province du Nouveau-Brunswick de 1 à 80 ; dans la province de la Nouvelle-Ecosse de 1 à 80 ; et pour les quatre Provinces réunies, dans la proportion de 1 à 73.

On voit que, même dans la province de Québec où l'énumération des décès s'est faite d'une manière bien plus correcte qu'ailleurs, ces chiffres dénotent cependant un déficit considérable.

Heureusement qu'il existe, en dehors des rapports du recensement, des moyens, créés par des faits correctement recueillis, de suppléer à ce défaut d'énumération.

Les causes de décès sont données par Province et ont été divisées en trois grandes catégories comme suit : décès par maladies, décès par accidents et décès résultant d'actes

---

The causes of deaths—divided into three principal categories, that is, by Disease, by Accident and by Criminal interference—are given by Provinces. Although partaking necessarily of the deficiency experienced in the general Census record of deaths, the statement is not devoid of interest, nor are these returns, when critically examined, rendered worthless on account of their defects, great as these defects confessedly are.

The statement of facts ascertained from the Census proceedings and the adjustment of the errors in the present returns of deaths will constitute an interesting chapter of the last volume of this publication.

The nineteenth Table, the last of the second volume, contains a statement of the number of churches belonging to the several religious denominations, with the number of buildings attached to, or immediately connected with these churches. Similar information is also given in the same table in relation to the higher class of educational institutions, and to penitentiaries and gaols, with the additional information of the total number of persons who abode in these institutions on the 2nd April, 1871.

This volume is furnished with two Indexes of Districts, one in numerical, the other in alphabetical order, giving with the pages of the volume where each District is mentioned the particular statistical table in which it will there be found. There is also an alphabetical table of subjects.

The long Index of sub-districts, inserted at the end of the first volume of this publication is so framed, as to serve for all the volumes, in the manner explained in the Introduction to the first volume, thereby avoiding the necessity of reprinting it.

---

criminels. Naturellement l'énumération des décès, d'après les causes qui les ont produits, participe du caractère d'inexactitude qui distingue ce genre d'énumération ; ces détails, malgré cela, ne sont pas tels-quecls dépourvus d'intérêt et d'utilité.

La considération de cette question de la mortalité, déduite des renseignements donnés dans le présent volume et des corrections qui y seront faites, formera un chapitre intéressant du dernier volume de la présente publication.

Le XIXme Tableau du recensement, dernier de ce volume, contient un état du nombre des Églises consacrées aux différents cultes, avec addition du nombre des édifices qui y sont attachés ; ce même tableau contient aussi les renseignements du même genre concernant les institutions de charité, de haute éducation et les institutions pénales et de répression. Le nombre des personnes formant la population résidante de ces institutions, à la date du 2 avril 1871, occupe encore une colonne de ce tableau, pour chaque classe de ces établissements publics.

Le présent volume est muni de deux Index des districts, l'un d'après l'ordre numérique, l'autre d'après l'ordre alphabétique, avec indication des pages où se trouvent les renseignements de divers genres se rattachant à ces districts.

Le volume se termine par une Table alphabétique des sujets qui y sont traités.

Le grand Index des sous-districts, inséré dans le premier volume de cet ouvrage, a été fait de façon à servir pour tous les volumes en la manière expliquée dans l'Introduction première, évitant ainsi la nécessité de réimprimer cette longue liste à la fin de chaque tome.
