NOTE.—The rate per 10,000 in the above table is computed in each case on the total population of a class. For example the rate for blind males is computed on the whole male population, the rate for single males on the whole single male population. The rate in each age group is computed on the population in that group, etc. La proportion par 10,000 dans ce tableau est basée dans chaque cas sur la population totale d'une classe. Par exemple la proportion pour les aveugles du sexe masculin est basée d'après la population totale de ce sexe, tandis que la proportion des aveugles non-mariés est basée sur la population totale des célibataires, la proportion du groupe de chaque âge est basée d'après la population de ce groupe, etc.

## APPENDIX.

## CENSUS OF THE FAR NORTH OF CANADA.

The census of regions in the Far North of Canada was taken by special officers who had been appointed for that purpose in 1910 and early in 1911, owing to the great distance of the localities and the want of mail accommodation in reaching them and of procuring reports of their work.

The posts of the Hudson's Bay Company from Mackenzie River eastward to the Labrador boundary were assigned to their several factors, with Mr. R. H. Hall, Fur Trade Commissioner of the Company in general charge; but posts on the Mackenzie River and its tributaries were taken by Henry A. Conway of the Indian Department.

Archdeacon R. J. Renison of the Church Missionary Society had general charge of the mission stations of that Society, including Agomaska, Attawapiskat, Brunswick House, Charlton Island, Eastmain English River, Flying Post, Fort Albany, Fort George, Fort Hope, Great Whale River, Hope's Welcome, Little Whale River, Marten's Falls, Matagami, Moose Factory, Nemaska, New Post, Nichequon, Osnaburgh, Rupert's House, Waswanoby and other parts.

Rev. Father Prevost of the Oblate Fathers' Mission, Hull, had charge of the census at mission stations in the unorganized parts of Nipissing, Pontiac, Abitibi, Mistassini, Champlain and the Lake St. John country, including among other places the Grand Trunk Pacific line, Abitibi, Metagami and Lake Opasatika in Ontario, Albany and other places on James Bay, Renard, Longue Pointe, Grassy Lake, and Hunter's Point in Pontiac, Grand Lake Victoria, Lake Barrière, Rapid Post, Lake Farm, Sturgeon, Lepine Farm, Lake Caynar, Lake St. Ignace, Lake Desert, Lac Bras Coupé, Lake Carrière, Fort Hope, Kikandatsh, Kou-kou-cache, Weymontaching, St. Maurice, Masagamous, River Manawan, Labelle Lake Vert, Lake Baskatong, etc.

Mr. Courtlandt Starnes of Fort Churchill was appointed to enumerate the Indians and Eskimos of the region west and northwest of Fort Churchill. He held the position of commissioner of Customs at Fort Churchill and was besides superintendent of the Royal Northwest Mounted Police in that region.

Mr. Fabien Vanasse, who was historiographer of the Canadian Government steamship *Arctic* under Captain Bernier, was appointed to take the census of Baffin Island and took in addition the census of Kilkeneck or Port Burwell on the south side of Hudson's straits. The five divisions of his work were Arctic Bay at the south end of Admiralty Bay, Topic-Vink, and the islands of Kekerton, Blacklead and Kilkeneck or Burwell.

## Report of the Archdeacon of Moosonee.

Rev. R. J. Renison of Moose Fort, Archdeacon of Moosonee, wrote under date of May 8, 1911: "I beg to acknowledge receipt of your letters of January 21 and 26 and March 4, with very complete instructions as to the census in this district. I have already made several winter trips in order to insure that the work would be properly carried out over the entire district. Some of the districts are very remote, but I think that I can obtain a complete return. I find that acting under general instructions from Winnipeg the Hudson's Bay Co. officers are going to take a census of their own people. I find that the only satisfactory method will be for me to make a complete census of every soul, leaving excision to the head office. I am preparing an estimate of the population of the far north on both sides of the straits where we have missions. I shall supply some information about the Eskimos from our missionaries. I am leaving on June 1 for the completion of the work. I shall visit the entire Moose and Albany rivers in person and arrive at Dinorwic about August 1." On September 28 he wrote from Chapleau: "I am sending you by registered mail the census returns of Rupert's House, Eastmain, Charlton, Stratton's Island, Namiska, Waswanoby, Mistassini and Nichequon. Rev. J. E. Woodhall has made a very complete return. Even Nichequon has been reached, which is the most secluded spot in the entire country. I have had a letter from Rev. W. G. Walton, who is forwarding the Fort George and Whale River returns by H. B. Co. packet. I expect to return to Hudson's Bay about November, and if possible I should like to have the accounts settled before that time, that I may be able to remunerate those who have assisted me."

Rev. W. G. Walton, the missionary to the Eskimos, writing from Fort George on August 31, said: "It is reasonably thought that there are altogether 600 Eskimos living on the east coast of Hudson's Bay, but I have only managed to get 542 names. It would be impossible to make a complete census unless one spent four or five years on the work, since those people do not visit the trading posts as regularly as the Indians. Sickness prevented me from visiting them last winter, and it is only in the winter time that we come in touch with them. My catechist did the work for me, and the names are thoroughly reliable. But the ages would be pure guess work. In calling most of them pagans it must be remembered that they are so in name only, since all of them have their religious books and practically every one from the age of ten can read them. Heathen practices are a thing of the past. The majority of the people live in the most squalid conditions and are destitute of proper clothing through the failure of the deer, which long ago were numerous along the east coast of Hudson Bay. I would be glad to make a more complete census during the next few years if it was thought necessary. The present one is the largest ever taken."

## Report of Mr. Courtlandt Starnes.

Sir—I have the honour to forward herewith my returns of the census of that part of Canada adjacent to the western shore of the Hudson Bay from Fort Churchill to the northern extremity of Melville peninsula, with the reports of the enumerators.

For the better carrying out of the work I divided the district over which I was given charge into three parts, for each of which I appointed an enumerator.

The first was given to Doctor T. N. Marcellus. It included Churchill proper and vicinity, and the country west and northwest through which the Chippewyan Indians are scattered, trapping, fishing and hunting. Those Indians have no settled camps, and move about according to where they can best find their food. They have no habitation except deerskin tents. This section of the work was done

thoroughly, every lodge was visited, Indians were seen by the doctor, and none have been omitted. I had the means of checking this work. The doctor was away 12 days from the 5th to the 17th of January. I had given him a half-breed interpreter, a constable from the force, an Indian guide, a dog team and camping outfit. The farthest Indians were about 120 miles from Churchill. The trails were heavy with snow and the weather never above 40 degrees below zero.

The second was given to Sergeant A. F. Borden, and covered the country between Churchill and Ranken Inlet. The only inhabitants of this part belong to a tribe of Eskimos called Padlimuits. They have no fixed places, but build snow houses wherever their hunting takes them. Sergeant Borden put on the list all those whom he actually saw; the others are included in a statement attached. These natives every spring come to Churchill for a couple of months to seal-hunt at the mouth of the river, and last spring, before I had heard of the census being taken, I had started getting through our interpreter a complete list of the tribe for my own information. It is from that list that the statement is completed.

Sergeant Borden left here on the 2nd of February with two natives and a team of ten dogs. He arrived at Ranken Inlet on the 22nd, where he made connection with Sergeant Hayter, receiving from him the Fullerton returns, and arrived back at Churchill on the 11th of March. The trip occupied 38 days 33 of which were actual travelling; the other five were taken up by three days resting and two days stowabound. Seven hundred and fifty miles were covered. The weather was very cold and an almost constant wind and drift blew from the northwest which made the trip particularly arduous on the way north.

The third was given to Sergeant C. N. C. Hayter. This covered all the country north of Ranken Inlet. The ground covered by actual travelling by this officer was one patrol from Fullerton to Wager Inlet, one from Fullerton to near Baker Lake and one to Ranken Inlet. Owing to the nomadic character of these natives in that part of the country it was useless to try and fill up the regular census forms, and a statement was made as accurately as possible from information obtained. These people have no idea whatever of their age. Old and young is as near as they can get at it, and of course they know nothing of our divisions of time. They are sometimes polygamists, sometimes polyandrists. They are fond of children but change them about, adopting some or giving their own away according to convenience, so that it is hard to reckon by families.

It has been impossible to get any statistics regarding furs or fisheries from those people; they do not keep track. What adds also to our difficulty in obtaining information is the want of proper interpreters; there are none obtainable. We can get along for ordinary purposes in our work, but when it comes to figures, time, or anything out of the everyday things it is not possible to make ourselves understood.

The following is a summary of the population in the territory covered by the census taken by me.

| Districts.                     | White. | Half-Breed. | Indian. | Eskimo. | Total. |
|--------------------------------|--------|-------------|---------|---------|--------|
| Churchill and vicinity.....    | 20     | 26          | 180     | 23      | 249    |
| Churchill to Ranken Inlet..... | -      | -           | -       | 236     | 236    |
| Ranken Inlet North.....        | 2      | -           | -       | 1,101   | 1,103  |
|                                | 22     | 26          | 180     | 1,360   | 1,588  |

Sergeant Hayter had omitted to enumerate himself and the constable with him at Fullerton. I added a sheet for them to his statement. The unused forms are too bulky a package to send by the over-land patrol which takes this return. I will send them by first ship.

(Sgd.) COURTLANDT STARNES,

Superintendent.

Churchill, March 18, 1911.

#### Report of Mr. Fabien Vanasse.

SIR,—On the 8th July, 1910, I received on board the Dominion ship "Arctic," at Father Point, instructions from your Department authorizing me to take the Census of the Northwest Territories. The ship was then on her way to the Arctic regions of Canada, whence she returned on the 24th of September last. I have had the honour since that date to forward to your address the schedules containing the information asked for by the Census Act.

In the course of that voyage I have had occasion to visit parts of the coast of the immense Island of Baffin, and according to instructions I made it a duty to reach the shore and take the census of each of the villages which it was possible for us to visit. A few nomadic tribes are met with on the islands of King William, Prince of Wales, Victoria and Bank. But these children of the desert are only there travelling solely for hunting purposes.

The Innuits (improperly called Eskimos) seemed to have adopted the Baffin Land as their home. They live there permanently and only leave the place for hunting, but always with the intention of returning back. Some of their villages are met with on almost every point of the coasts.

In the course of the last voyage we have visited four of these villages, of which two on the north coast of the island (Arctic Bay and Topik-Vink) and two in Cumberland Sound, those of the Kekerten island and Blacklead island. But at a distance from the shore we have seen many others along the coast of the straits of Davis, namely at Adair Cape, Scott Inlet, Clyde River, Durban Head, New Grinnell Bay and Cornelius Grinnell Bay. According to information gathered at the village of Blacklead relating to the population of each of these villages, which information I have reason to believe correct, the population of the villages can be estimated at about one hundred souls. I have not been able to visit them on account of the ice. There are moreover a dozen of such villages on the southern coast along the straits

of the Hudson, on some of the islands along the coast. As to these latter habitations I have been unable to obtain the necessary information to enable me to furnish the approximate population. On the whole however I do not think that the total population of Baffin island is over 1,200 souls.

Of the four villages that I have visited I have found only two white families, and even they are of mixed blood, those of Jean Racine and Paul Racine. Another one is also found of French and German descent in the village of Durban Head, that of William Duval,—all the rest of the population being of pure Eskimo origin.

One man alone could not, unless he spent three years in those regions, take the census of all these camps on the coasts of Baffin island and the islands which border their coasts.

The Eskimo hunter is essentially nomadic, he having no special domicile. It is the game which leads him, and thus he travels continually. His daily bread is of predilection the seal. When this manna of the desert becomes scarce about the isles the hunter and his family get quickly into the omiak (family boat) if in summer; if in the course of the winter he has soon harnessed his 10 or 12 dogs to the comelik (sledge) and, bag and baggage, away he goes at a venture along the coast in search of a place where the game is more abundant. From week to week, and month to month, the hunter will travel hundreds of miles in order to find sustenance for his family—an example witnessed by us in the course of the cruise which has just been completed. The *Arctic* went into her winter quarters on the 13th September, 1910, in the Arctic Bay on the east coast of Admiralty Entrance. We found at that place a camp of seven hunters. The total population of the village was then 19 souls; now, at the end of December 1910, the population was over 100 souls. This sudden increase had been caused by the immigration in a body from a number of villages scattered along the eastern, western and southwestern coasts of Baffin island; some came from a distance of more than three hundred miles from our winter quarters. These hunters had heard of the wintering of the Government ship at Arctic Bay, and they had come bag and baggage to our quarters for trading purposes; some came during the whole course of the winter. I took the census of Arctic Bay. I did not think that I could distinguish between the new comers and those found on our arrival. After all, the latter had only been there themselves since the month of August 1910. At the present moment this population is perhaps scattered all over the different points of the coast of Baffin island.

Having received no schedule from the Department on which to take the Census of animals, as well as of households and hunting articles, I have taken upon myself to make an inventory of each island. These sheets will show the means of existence of this brave little people who live on the outskirts of the Canadian lands in the polar regions. I believe these data will be of some interest to the Canadian public, and will even interest our members of Parliament. This is why I am sending them to you.

TABLE I. Arctic Bay, June 30, 1911.

The Arctic came into the harbour of Burwell on the 5th of September 1911. The census of this village was taken on the 7th of September. There is an important part of the Moravian Missions at this place. It is also a trading post where the hunters of the northeast extremity of the coast of Labrador go to exchange their furs for biscuits, tobacco and clothing. The Government of Newfoundland had the census of this village taken in 1910. This land belongs indubitably, however, to the Ungava Territory, and consequently to Canada.

The following is a table showing the hunting plants for this village. The Eskimo name of the village of Burwell is Killenek.

| Names.          | Guns. | Komelik. | Dogs. | Harpoons. | Caiaks. | Traps. | Nets. |
|-----------------|-------|----------|-------|-----------|---------|--------|-------|
| Pouska.....     | 2     | 2        | 10    | -         | -       | -      | 2     |
| Ik-ka-na.....   | 2     | 1        | 13    | -         | 2       | -      | -     |
| Kaller-sek..... | 2     | 1        | 8     | -         | 2       | -      | 2     |
| Bob.....        | 2     | 1        | 5     | -         | 1       | -      | 1     |
| Peter.....      | 1     | 1        | 6     | -         | 1       | -      | 1     |
| Benjamin.....   | 2     | 1        | 5     | -         | 2       | -      | 1     |
| Charley.....    | 1     | -        | -     | -         | 1       | -      | 1     |
| Tobias.....     | 1     | -        | 9     | -         | 1       | -      | -     |
|                 | 13    | 7        | 56    | -         | 10      | -      | 8     |

Each igloo is supplied with what are generally called kitchen utensils, but these utensils, few in number, do not really deserve any special mention.

The lamps which are used by hunters to light and heat their igloos as also to cook, are nothing more than a stone block of about eight to ten inches in circumference in which is carved a semi-circular cavity about three inches deep. This cavity is filled with seal oil, then a wick made of dry moss is placed around this bowl and when this primitive wick is well soaked with oil it is lighted. The lamp gives a dim light and produces a heat of about two or three degrees. This affords all the light and all the heat which is enjoyed by the Eskimo during his existence in his house of snow.

The above tables are interesting in this sense, that they show the restricted means of the hunter to carry on the struggle for life.

By looking over the schedules which contain the results of his work one can see with what success, conceding the slight means of action at their disposal, he manages to get through his task.

I do not think that I am over the mark when I place the yearly value of the hunt for each Eskimo hunter at \$800 or \$1,000 on the premises.

If this forsaken one of civilization were living in the proximity of our competitive markets, if he knew the value of the products of the hunt, if he was more concerned about the future, he might live in modest comfort, in spite of all the inconveniences he has to suffer from the inhospitable climate where God has placed him. But unfortunately the Eskimo has no idea of the economical values he holds in his hands, after his slaughter of 10 or 20 polar bears, his capture of 25, 30 and sometimes 100 foxes, of two three or four narwhals, of eight to ten wolves, of hundreds of large salmon each weighing 10, 20 or 30 pounds

and which he throws to his dogs. Besides this he is cheated odiously each year by the skimmers of the sea who visit him to collect his furs. At the trading counters he exchanges for a few pounds of biscuits and tobacco, a few quarts of molasses, pipes, matches and some few yards of showy cotton goods, his silky furs of the greatest economical value.

It would be a great pleasure for me to be able to say here that the Eskimo hunter was being treated with more justice and more equity by the Canadian Government's ship which visits the Arctic regions each year, but I am unable to pay this compliment.

Is the population of Baffin land increasing or decreasing? Actual information is lacking to make a comparison between the number of births and deaths. In order to get this information it would be necessary to consult the archives of the old trading posts of Topek-Vink, Kekerten and Blacklead; but I have not had the time.

The first nominal census, incomplete as it is, will serve as a basis for the future to make comparisons between the births and deaths of the Eskimo people of Baffin island. It is however shown, by the actual data, that the deaths have exceeded the births by a few units in 1910 throughout the camps visited. In spite of the want of care given the children by the parents, by reason of the condition of things in the Arctic regions, it is seen that the ratio of deaths is higher for adults than for children. Lung and bowel diseases are the most prevalent among the Eskimos. Phthisis, consumption, inflammation of the lungs and inflammation of the bowels are the most common causes of death. There is no physician in Baffin island.

Generally speaking the Eskimo does not attain a very advanced age. I have met some however aged 60 to 65 years. The average length of life of this little people is from 35 to 40 years. There is no settled age for domestic pairing. I have met couples of nine and twelve years; then children live together in the iglo as man and wife. The chief provides regularly for the wants of his companion. After a few months, and even a few years of this apprenticeship in married life, if any friction occurs under the iglo between the two apprentices, the couple separates, without noise, and for the two life has to begin over again. A Christian can hardly honour with the name of "marriage" the unions formed under the iglo of the Eskimo. These unions are for the most part simply promiscuous pairings. Bigamy and polygamy have been during centuries one of the forms of those pairing of a bestial kind. But I must say, to the honour of the Eskimos of Baffin island, that this sad state of affairs tends more and more to disappear among these tribes. The zealous work of the Anglican unions among this people during thirty years has largely contributed to diminish, I might even say extirpate entirely this pagan vice, destroyer of the family and its domestic happiness. I have met with only one case of polygamy in taking the last census, and yet the Isky who acknowledged it seemed to be ashamed of it.

It may be interesting to know the difficulties which I met with in taking the census of this little people of hunters. I will only say a word of it. It was not always easy to obtain the information asked for by the census schedules. The visit to the domicile, or the iglo, is not what one may think. The iglo is of circular form, eight feet in diameter and as much in height. It is made of blocks of snow, the door is at the bottom, on a level with the ground, it is about one foot and a half wide by two feet high. It is not every one that can pass through it easily. To get in one must at first get on his knees, then lie flat on his stomach and slide in, snakelike, for a distance of about ten or twelve feet in this tube of the same dimension as the door. One never gets in and comes out of it spotless, for this vestibule is not kept in an exaggerated state of cleanliness. Once in the iglo you are asked to sit on a block of snow, which is covered with a deerskin. In less than five minutes you are covered with the white hairs of this fur. But after a few visits to the domicile one does not notice these small details. The interpreter is alongside of you. Naturally this brave man, the sage of the village, has no idea of what constitutes a census. I had to make him understand at first the questions I had to put to the head of the iglo. There are English and French words which have no equivalent in the language of the Eskimo. Thus, for example, the words "years," "months," "days," "hours" are denominations of time absolutely ignored by the natives. These are so many mysteries to them.

"What is your age," was invariably answered by "none save mi." Then I had to enter into a conversation, carried on much more by gestures than by the voice, with the interpreter, in order to make him understand my question. This done, the interpreter and the hunter, or the wife of the latter in his absence, made endless calculations. It was a review of all the important events in the country from as far back as the hunter could remember, and the farthest away event was used as a basis to determine as near as possible the date of his birth. There is another difficult point for the Eskimo to elucidate. I had a great deal of trouble in the beginning to ascertain from the head of an iglo if he was married or single. The word marriage is absolutely unknown among the natives. The same with the words "child" and "family." I could manage to make myself understood by asking first if they had an iglo, a koney, a pik-ki-nini. Now the head of the iglo is Osky; koney is the wife, and pik-ki-nini the children. Each child has his name and constitutes by himself a separate unit. Here is an example: The Osky Nassou has three sons, namely, Ik-ton-ta, Kak-ton and Pro-mik-ton. We do not say Ik-tou-ta Nassou, etc., as we say in the Christian world John Smith, etc.

In twenty years from this, when a new generation will have grown up, who will know that Ik-ton-ta and his brothers are the sons of old Nassou?

With such a system it is difficult to preserve family traditions.

As to the month of their birth, it is a mystery to themselves, they don't know this subdivision of the year. In reality there are only two seasons for the Eskimo—"summer" and the ice season—"winter." As the winter lasts nine or ten months of the year the greater number of births is in winter.

The same difficulty exists as to the number of animals slaughtered or captured by the hunter during the year. The Eskimos count easily up to ten, above that their mode of calculation is long.

Generally speaking, a hunter harpoons from 250 to 300 seals during the year; he slaughters as many deer and captures as many salmon in the many salmon rivers all around the land of Baffin island. When I would ask a hunter how many seals he had harpooned during the year, he would laugh and say "mi non save"—"A-ni-shoute," meaning "it is incalculable," "there is no number to express it."

To them the hundred is infinitely great and in those cases the interpreter would make me write 200, 250 or 300.

On the whole, in spite of all these inconveniences, I believe that I have succeeded in collecting, as near as possible, correct information as to the population of the villages visited, and on the conditions of existence of this interesting little people of Baffin island.

If the Government of Canada wants to preserve these relics of primitive humanity they will very soon have to put a stop to the depredations, plunders and thefts of which the Eskimos are the victims

on the part of the rovers of the sea. The Government of Denmark has shown a noble example in this respect in favour of the Greenland Eskimos.

The preceding remarks are perhaps too long, but the novelty of the subject seems to authorize and justify them.

(Sgd.) FABIEN VANASSE.

Montreal, October 24, 1911.

## APPENDICE.

## RECENSEMENT DE L'EXTRÊME NORD DU CANADA.

Le recensement de l'extrême nord du Canada a été confié à des officiers spéciaux nommés à la fin de 1910 et au commencement de 1911, à cause des grandes distances à parcourir pour atteindre les endroits à être recensés, et du manque de communication postale pour en recevoir les rapports.

Les postes de la Compagnie de la Baie-d'Hudson, à l'est de la rivière MacKenzie jusqu'aux confins du Labrador, ont été assignés aux facteurs de cette compagnie sous la direction du Commissaire du commerce des pelleteries, M. R. H. Hall; mais les postes situés sur la rivière MacKenzie et ses tributaires ont été recensés par M. Henry M. Conway, du département des Indiens.

Le recensement des missions appartenant à la Church Mission Society a été confié à l'archidiacre R. J. Renison; ces missions comprenaient Agomaska, Attawapiskat; Brunswick House, Ile Charlton, Eastmain, English River, Flying Post, Fort Albany, Fort George, Fort Hope, Great Whale River, Hope's Welcome, Little Whale River, Marten's Falls, Matagam, Moose Factory, Nemaska, New Post, Nichequon, Osnaburgh, Rupert's House, Waswanoby et autres points.

Le révérend Père Prévost, des Pères Oblats de Hull, avait la direction du recensement dans les parties non organisées du Nipissingue, de Pontiac, d'Abitibi, de Mistassini, du St-Maurice et du Lac St-Jean, comprenant les endroits suivants: la ligne du Grand Trunk Pacifique, Abitibi, Metagam et le lac Opasatika dans Ontario, Albany et autres endroits sur la Baie James, Renard, Longue Pointe, Grassy Lake et Hunter Point dans Pontiac, Grand Lac Victoria, Lac Barrière, Rapid Post, Lake Farm, Sturgeon, Ferme Lepine, Lac Caymar, Lac St-Ignace, Lac Désert, Lac Bras Coupé, Lac Carrière, Fort-Hope, Kikandatsch, Coucoucache, Weymontaching, St-Maurice, Massagamous, Rivière Manawan, Labelle, Lac-Vert, Lac Baskatong, etc.

M. Courtlandt Starnes, de Fort Churchill, commissaire des douanes et surintendant de la gendarmerie à cheval du Nord-Ouest dans ces régions, avait la direction du recensement des Esquimaux qui habitent à l'ouest et au nord de Fort Churchill.

M. Fabien Vanasse, qui s'était embarqué sur le steamer «Arctic» en qualité d'historiographe du gouvernement canadien, sous le capitaine Bernier, avait reçu ordre de faire le recensement de l'île de Baffin; il prit de plus le recensement de Kilkencok ou Port Burwell au sud du détroit de Hudson. Les cinq divisions de son recensement étaient: la Baie Arctique à l'extrémité sud de la baie Amiraute, Topic-Vink, et les îles de Kekerton, Blacklead et Kilkencok ou Burwell.

## Rapport de l'archidiacre de Moosonee.

En date du 8 mai 1911, le révérend R. J. Renison de Moose Fort, archidiacre de Moosonee, écrivait: «J'ai l'honneur d'accuser réception de vos lettres datées les 21 et 26 janvier et le 4 mars, avec instructions très complètes quant au recensement de ce district. J'ai déjà fait plusieurs voyages dans le but de m'assurer que le travail sera poursuivi efficacement dans toute l'étendue du district. Plusieurs des districts sont très éloignés, mais je crois que je pourrai en obtenir un rapport complet. Je vois que, sur des instructions reçues de Winnipeg, la Compagnie de la Baie-d'Hudson a décidé de faire le recensement de ses propres gens. Je trouve que la seule méthode satisfaisante pour moi à suivre, c'est d'inscrire tout le monde, laissant les excisions au Bureau central. Je suis à préparer une estimation de la population de l'extrême nord des deux côtés du détroit où nous avons nos missions. J'obtiendrai de nos missionnaires les renseignements sur les Esquimaux. Je partirai le 1er juin pour compléter le travail. Je visiterai personnellement les rivières Moose et Albany, et arriverai à Dinorwic vers le 1er août.» Le 28 septembre il écrivait de Chapleau: «Je vous envoie sous pli enregistré les rapports du recensement pour Rupert's House, Eastmain, Charlton, Stratton's Island, Namiska, Waswanoby, Mistassini et Nichequon. Le rév. J. E. Woodhall a fait un rapport très complet. Même Nichequon a été atteint, bien que ce soit le point le plus isolé de tout le pays. J'ai reçu une lettre du rév. W. G. Watton qui a expédié les rapports de Fort George et Whale River par le vaisseau de la Cie de la Baie-d'Hudson. J'espère retourner à la baie d'Hudson vers le mois de novembre, et, si la chose est possible, je désirerais voir les comptes réglés avant ce temps-là, afin de pouvoir payer ceux qui m'ont aidé.»

Le rév. W. G. Watton, missionnaire chez les Esquimaux, écrivait de Fort-George, à la date du 31 août, disait: «On croit avec raison qu'il y a en tout 600 Esquimaux qui habitent sur la côte est de la Baie d'Hudson, mais je n'ai pu en trouver que 542. Il serait impossible de faire un recensement complet de cette région, à moins de consacrer quatre ou cinq ans à ce travail, vu que les Esquimaux ne visitent pas les comptoirs pour la traite aussi régulièrement que les autres sauvages. La maladie m'a empêché de les visiter l'hiver dernier, et c'est seulement l'hiver qu'il est possible de les rencontrer. Mon catéchiste a fait le travail pour moi et les noms sont dignes de créance. Mais les âges ne seraient que simple conjecture. En nommant la plus grande partie d'entre eux payens, on doit se rappeler qu'ils le sont seulement de nom, vu que chacun a son livre de prières et que pratiquement parlant, à partir de l'âge de dix ans, tous peuvent les lire. Les coutumes payennes sont une chose du passé. La majorité de cette population vit dans la plus grande malpropreté et est dénuée des vêtements nécessaires, vu l'absence du chevreuil qui abondait sur la côte est de la baie d'Hudson. Je serais content de faire un recensement plus complet de cette région dans quelques années. Le présent recensement est le plus complet qui ait encore été fait.»

Rapport de W. Courtlandt Starnes.

«MONSIEUR,—J'ai l'honneur de vous envoyer ci-joint mon rapport du recensement pour cette partie du Canada située à l'ouest de la Baie d'Hudson, de Fort-Churhill à l'extrémité nord de la péninsule de Melville, avec les rapports des recenseurs.

Afin de mieux faire le travail, j'ai divisé le district qui m'avait été assigné en trois parties, pour chacune desquelles j'ai nommé un recenseur. La première, donnée au docteur T. U. Marcellus, comprenait Churchill même et ses environs, ainsi que le pays adjacent situé à l'ouest et au nord-ouest, à travers lequel se trouvent les sauvages Chippéouans faisant la pêche et la chasse. Ces sauvages n'ont pas de campements fixes et vont à l'aventure là où ils peuvent mieux trouver leur nourriture, n'ayant d'autre habitation que leurs tentes en peau de chevreuil. Le travail de cette division a été fait d'une manière très complète, chaque habitation a été visitée par le docteur qui a pu voir tous les sauvages et n'en a omis aucun. J'avais d'ailleurs un moyen de vérifier son travail. Le docteur a été absent douze jours, du cinq au dix-sept janvier. Je lui avais donné un métis pour interprète, un gendarme, un guide sauvage, des chiens et tout un équipement de camp. Les sauvages les plus éloignés étaient à environ 120 milles de Churchill. Les pistes étaient couvertes de neige et la température ne fut jamais au-dessus de 40 degrés de froid.

Le sergent A. F. Borden avait été nommé pour la seconde division qui comprend le pays entre Churchill et Ranken Inlet, dont les seuls habitants appartiennent à une tribu d'Esquimaux appelés les Padlimuits. Ils n'ont pas de demeures fixes, mais se construisent des huttes de neige là où la chasse les appelle. Le sergent Borden a inscrit tous ceux qu'il a rencontrés, et les autres sont donnés sur une liste à part. Ces sauvages viennent à Churchill tous les printemps pour une couple de mois pour faire la chasse au loup marin à l'embouchure de la rivière, et l'an dernier, avant qu'il fût question du recensement, j'avais commencé à obtenir, avec l'aide de notre interprète, une liste complète de la tribu, pour mon propre compte. C'est au moyen de cette liste que j'ai pu compléter mon rapport.

Le sergent Borden est parti de ici le 2 février, avec deux sauvages et dix chiens. Il est arrivé à Ranken Inlet le 22, où il rencontra le sergent Hayter, qui lui remit les rapports pour Fullerton, et il revint à Churchill le 11 mars. Le voyage dura 38 jours, dont 33 à voyager, trois à se reposer et deux à se protéger contre la tempête. Sept cent-cinquante milles furent parcourus dans ce trajet. La température fut très froide et un vent presque constant souffla du nord-ouest, ce qui rendit le trajet particulièrement difficile en route vers le nord.

Le sergent C. N. C. Hayter avait été nommé à la troisième division, qui comprenait tout le pays au nord de Ranken Inlet. Le trajet parcouru par cet officier consiste en une course de Fullerton à Wager Inlet, une de Fullerton à près de Baker Lake et une à Ranken Inlet. Vu le caractère nomade des habitants de ces régions, il était impossible de remplir les formules du recensement, et un rapport aussi fidèle que possible a été préparé d'après les renseignements obtenus. Ces sauvages n'ont aucune idée de leur âge; «jeune» et «vieux» est tout ce qu'on peut obtenir d'eux, et, naturellement, ils ne connaissent rien de nos divisions de temps. Ils sont quelquefois polygames, quelquefois polyandres. Ils aiment les enfants mais les échangent entre eux, en les adoptant ou les donnant selon qu'il leur convient, de sorte qu'il est très difficile de faire un dénombrement par familles. Comme ils ne tiennent compte de rien, les statistiques des pêcheries et des fourrures n'ont pu être obtenues. Ce qui ajoute encore aux difficultés d'obtenir les renseignements, c'est l'absence complète d'interprètes compétents. Dans le cours ordinaire des choses on finit toujours par se comprendre, mais lorsqu'il s'agit de chiffres, de temps, ou quoi que ce soit en dehors de l'ordinaire, la chose devient alors impossible.

Le tableau suivant est un sommaire de la population pour le territoire dont le recensement a été fait sous ma direction:

| Districts.                     | Blancs. | Métis. | Sauvages. | Esquimaux. | Total |
|--------------------------------|---------|--------|-----------|------------|-------|
| Churchill et ses environs..... | 20      | 26     | 180       | 23         | 249   |
| Churchill à Ranken Inlet.....  | -       | -      | -         | 236        | 236   |
| Ranken Inlet nord.....         | 2       | -      | -         | 1,101      | 1,103 |
| Total.....                     | 22      | 26     | 180       | 1,360      | 1,588 |

Le sergent Hayter ayant oublié de s'inscrire, ainsi que le gendarme à Fullerton, j'ai ajouté ces deux noms à son rapport. Les formules non remplies qu'il me reste en main forment un paquet trop lourd pour en charger le postillon qui doit emporter ce rapport. Je les expédierai par le prochain vaisseau.

(Signé) COURTLANDT STARNES.

Churchill, 18 mars, 1911.

Rapport de M. Fabien Vanasse.

MONSIEUR,—Le 8 juillet 1910, j'ai reçu, à bord du Dom. Gov. S. S. Arctic, à la Pointe-au-Père, des instructions de votre département, m'autorisant à prendre le recensement de la population dans les territoires du Nord-Ouest. Ce navire était alors en route vers les régions arctiques du Canada, d'où il est revenu le 24 septembre dernier. J'ai eu l'honneur, depuis cette date, de vous faire parvenir les tableaux contenant les informations requises par l'Acte du Recensement.

Au cours de ce voyage j'ai eu l'occasion de visiter une partie des côtes de l'immense île de Baffin (Baffin Land), dans le territoire Franklin, et conformément aux instructions qui m'avaient été données, je me suis fait un devoir de descendre à la côte, et de prendre le recensement de chacun des villages qu'il nous a été possible de visiter.

De tout le territoire Franklin (dont l'étendue dépassera un million de milles carrés quand on l'aura scientifiquement arpenté), la terre de Baffin est, pour ainsi dire, la seule qui soit actuellement habitée. On rencontre quelques tribus nomades sur les îles King William, Prince de Galles, Victoria et Bank. Mais ces enfants du désert n'y sont qu'en passant, et uniquement pour les fins de la chasse.

Les Innuits, (improprement appelés Esquimaux), semblent avoir adopté la terre de Baffin pour leur *home*. Ils y passent leur vie en permanence. Ils n'en sortent que pour la chasse, mais toujours avec l'intention d'y retourner. On rencontre de leurs villages sur tous les points des côtes.

Au cours du dernier voyage, nous avons visité quatre de ces villages, dont deux sur la côte nord de l'île, (Arctic Bay et Topik-Vink), et deux dans le golfe de Cumberland, (côte est de Baffin); celui de l'île Kekerten, et celui de l'île Black-Lead. Mais, du large, nous en avons vu plusieurs autres, le long de la côte du détroit de Davis, notamment au Cap *Adair*, à *Scott Inlet*, à la *Rivière Clyde*, à *Durban Head*, à la *Baie New Gummuit* et à la *Baie Cornelius Grinnell*. Des informations prises au village de Blackhead, au sujet de la population de chacun de ces villages, et que j'ai raison de croire exactes, me permettent de porter au chiffre d'une centaine d'âmes, la population de chacune de ces bourgades. Je n'ai pu y descendre à raison de l'état des glaces.

On compte de plus, une douzaine de semblables villages sur la côte sud de l'île, le long du détroit d'Hudson, et sur quelques-unes des îles, le long de cette côte. Au sujet de ces dernières habitations je n'ai pu avoir des renseignements assez précis pour pouvoir donner le chiffre approximatif de leur population. En somme, cependant, je ne crois pas que la population totale de la terre de Baffin dépasse de beaucoup 1,200 âmes.

Des quatre grands villages que j'ai visités, je n'ai trouvé que deux familles de race blanche, et encore sont-elles d'un sang bien mêlé; celle de J.-Bte. Racine et celle de Paul Racine. Il en existe une autre de descendance française et allemande, au village de *Durban Head*: celle de William Duval. Tout le reste de la population est de pure origine innuite.

Un seul homme ne pourrait faire, à moins d'un voyage de trois ans, le recensement de tous les campements sur les côtes de Baffin et sur les îles qui bordent ces côtes.

Le chasseur innuit est essentiellement nomade; il n'a aucun domicile privilégié. C'est le gibier qui le mène. Où abonde le gibier, là se porte le chasseur. Aussi voyage-t-il continuellement. Son pain quotidien et de prédilection c'est le loup marin. Cette manne du désert se fait-elle rare dans les environs de l'iglo, vite le chasseur et sa famille montent dans l'omiak (bateau de famille), si c'est en été; si c'est au cours de l'hiver, il a bientôt fait d'atteler ses 10 à 12 chiens sur le cometik (traîneau); et, armes et bagage, on s'en va à l'aventure, le long de la côte, à la recherche d'un endroit plus giboyeux. D'une semaine, d'un mois à l'autre, le chasseur se transportera à des centaines de milles, pour trouver la nourriture de sa famille. Un exemple dont nous avons été témoins au cours de la croisière qui vient de finir.

L'*Arctic* est entré en hivernement le 13 septembre 1910, dans la baie Arctic, sur la côte sst du goulet Amiralauté (Admiralty Inlet). Nous trouvâmes à cet endroit un campement de sept chasseurs. La population totale du village s'élevait à 19 âmes; or, à la fin de décembre 1910 le chiffre de la population passait 100 âmes. Cette augmentation subite avait été causée par l'immigration, en masse, de plusieurs villages éparpillés sur les côtes est, ouest, et sud-ouest de la terre de Baffin; il en vint d'une distance de plus de 300 milles de nos quartiers d'hiver. Ces chasseurs avaient eu vent de l'hivernage du bateau du gouvernement à Arctic Bay, et on s'était rendu, armes et bagages, à ses quartiers dans un but de traite. Il en arriva durant tout le cours de l'hivernage.

Quand j'ai pris le recensement de la population du village d'Arctic Bay, je n'ai pas cru devoir distinguer les noms des nouveaux venus de ceux que nous y avions trouvés à notre arrivée. Au reste, ces derniers n'y résidaient eux-mêmes, que depuis le mois d'août 1910. A l'heure actuelle toute cette population est peut-être déjà dispersée sur différents points des côtes de Baffin.

N'ayant reçu du département aucun tableau pour prendre le recensement ou l'inventaire des animaux et articles de ménage, et de chasse, j'ai pris sur moi de faire cet inventaire dans chaque iglo. Ces tableaux démontreront les moyens d'existence du courageux petit peuple qui habite les confins des terres du Canada, dans les régions polaires. Je crois que ces données pourront être de quelque intérêt pour le public canadien et même pour les honorables membres du Parlement. C'est pourquoi je me permets de vous en envoyer

TABLEAU I. Baie Arctic, Territoire Franklin, 30 juin 1911.

L'Arctic est entré dans le havre de Burwell, Territoire Ungava, (côte-nord), le 5 septembre 1911. Le recensement de la population de ce village a été pris le 7 septembre. Il y a dans ce village un important poste des Missions Moraviennes. C'est aussi un poste de traite où les chasseurs de l'extrémité nord-est de la côte du Labrador vont échanger leurs fourrures contre des biscuits, du tabac, des vêtements, etc.

Le gouvernement de l'Isle de Terre-Neuve, a fait faire le recensement de la population de ce village en 1910. Cette terre appartient, cependant, indubitablement au territoire Ungava, et par conséquent au Canada.

Voici maintenant le tableau indiquant l'outillage des chasseurs de ce village. Le nom inuit du village de Burwell est Killenek.

TABLEAU V. Killenek, Territoire Ungava.

| Noms.            | Fusils. | Komelik. | Chiens. | Harpons. | Cahiaks. | Trappes. | Filets. |
|------------------|---------|----------|---------|----------|----------|----------|---------|
| Bouska.....      | 2       | 2        | 10      | -        | -        | -        | 2       |
| Ik-ka-ra.....    | 2       | 1        | 13      | -        | 2        | -        | -       |
| Kaller-sock..... | 2       | 1        | 8       | -        | 2        | -        | 2       |
| Bob.....         | 2       | 1        | 5       | -        | 1        | -        | 1       |
| Peter.....       | 1       | 1        | 6       | -        | 1        | -        | 1       |
| Benjamin.....    | 2       | 1        | 5       | -        | 2        | -        | 1       |
| Charley.....     | 1       | -        | -       | -        | 1        | -        | 1       |
| Tobias.....      | 1       | -        | 9       | -        | 1        | -        | -       |
|                  | 13      | 7        | 56      | -        | 10       | -        | 8       |

Chaque iglo est pourvu de ce que l'on appelle communément « la batterie de cuisine », mais ces ustensiles sont en très petit nombre, et ne méritent, vraiment, aucune mention spéciale.

La lampe dont se servent les chasseurs pour éclairer et chauffer leurs iglos, comme aussi pour cuire leur nourriture, n'est rien autre chose qu'un bloc de pierre, de 8 à 10 pouces de circonférence. Le chasseur pratique, à la surface, une excavation demi-circulaire, de deux à trois pouces de profondeur. On remplit cette cavité d'huile de loup marin; puis un cordon de mousse sèche est placé autour de l'ouverture, et quand cette mèche primitive est bien imbibée d'huile on y met le feu. La lampe donne une demi-clarté, et dégage une chaleur de deux à trois degrés. C'est toute la lumière et toute la chaleur dont jouit l'Innuït au cours de son existence, dans sa maison de neige.

Les tableaux ci-dessus sont intéressants, en ce sens qu'ils font voir les moyens restreints du chasseur pour conduire sa lutte pour la vie de chaque jour. En consultant les cédules qui contiennent les résultats de ses travaux, on verra avec quel succès le chasseur réussit malgré les pauvres moyens d'action à sa disposition.

Je ne crois pas outrepasser la note juste, en disant que les chasseurs innuits dans la terre de Baffin font en moyenne, chaque saison, des chasses d'une valeur, (sur place), de \$800 à \$1,000.

Si ce délaissé de la civilisation était à proximité de nos marchés de compétition; s'il connaissait la valeur des produits de sa chasse; s'il était plus soucieux de son avenir, il pourrait encore vivre dans une modeste aisance, malgré tous les inconvénients des climats inhospitaliers où Dieu l'a placé. Mais, malheureusement, l'Innuït n'a aucune idée de la valeur économique qu'il a entre les mains, après ses abatages de 10 à 20 ours polaires; sa capture de 25, 30 et quelquefois 100 renards; de 2, 3, 4 narvals; de 8 à 10 morses (walrus), de centaines de grands saumons, de 10, 20, et 30 livres et qu'il jette en pâture à ses chiens. Pour comble de malheur, il est odieusement pillé, chaque année, par les écumeurs de la mer, qui le visitent pour la cueillette de ses fourrures. Il échange au comptoir de traite, pour quelques livres de biscuit et de tabac, quelques pintes de mélasse, des pipes, des allumettes, et quelques verges de cotonnade aux couleurs voyantes, ses fourrures les plus soyeuses et de la plus grande valeur économique. J'aurais beaucoup de plaisir à dire, ici, que le chasseur innuit est traité avec plus de justice et plus d'équité par le navire du gouvernement canadien qui visite les régions arctiques, chaque année, mais je suis incapable de faire ce compliment.

La population de la terre de Baffin augmente-t-elle, ou diminue-t-elle? Les renseignements nous manquent pour faire aujourd'hui des comparaisons entre les naissances et les mortalités. Il faudrait pour cela consulter les archives des vieux postes de traite de Topik-Ving, de Kikerten et de Blacklead. Je n'en ai pas eu le temps. À l'avenir, on pourra se baser sur ce premier recensement nominal, tout incomplet qu'il soit, pour faire des comparaisons entre les natalités et les décès chez le petit peuple innuit de Baffin.

On constate, cependant, par les données actuelles que les décès ont excédé les naissances par quelques unités, en 1910, dans les campements visités. Malgré le peu de soins que les enfants reçoivent de leurs parents, à raison des conditions de l'existence dans les régions arctiques, on remarque que la proportion des décès est plus considérable chez les adultes que chez les enfants. Les maladies de la poitrine et des intestins sont les plus fréquentes parmi les Innuïts: la phthisie, la consommation, les inflammations de pommions et des intestins sont les causes les plus fréquentes des mortalités.

Il n'y a aucun médecin dans la terre de Baffin.

En général, les Innuïts n'atteignent pas un âge très avancé. J'en ai rencontré quelques-uns, cependant de 60 à 65 ans. La moyenne de la vie chez ce peuple paraît être de 35 à 40 ans.

Il n'y a pas d'âge déterminé pour l'accouplement domestique. J'ai rencontré des couples de neuf et douze ans; ces enfants vivent ensemble sous l'iglo, comme mari et femme. Le chef pourvoit régulièrement à la nourriture et à l'entretien de sa compagne. Après quelques mois, quelques années même de cet apprentissage pour la vie commune s'il survient quelques frictions sous l'iglo, entre les deux apprentis, le couple se sépare, sans tambour ni trompette, et pour les deux le noviciat est à recommencer.

Un chrétien peut difficilement honorer de nom de « mariage », les unions qui se forment sous les iglos de l'Innuït. Ces unions ne sont pour la plupart, que des simples accouplements passagers. La bigamie, et la polyandrie ont été pendant des siècles une des formes de ces accouplements d'un genre bestial. Mais je dois dire à l'honneur du peuple innuit de Baffin, que ce triste état de chose tend de plus en plus à disparaître parmi les tribus. Le travail zélé des unions anglicanes, parmi ce peuple, depuis plus de trente ans, a largement contribué à diminuer, je pourrais même dire extirper radicalement ce vice payen, destructeur de la famille et de tout le bonheur domestique. Je n'ai rencontré qu'un cas seul de polygamie en prenant le dernier recensement, et encore semblait-il avoir honte, l'Osky qui m'en faisait l'aveu.

Il sera peut-être intéressant de connaître les difficultés que j'ai rencontrées pour prendre le recensement de la population de ce petit peuple de chasseur. Je n'en dirai qu'un mot. Il ne m'a pas été toujours facile, d'obtenir les informations demandées par les cédules du recensement. La visite à domicile, c'est à dire à l'iglo, n'est pas, « ce qu'un vain peuple pense ». L'iglo est de forme circulaire, il a environ huit pieds de diamètre sur autant de hauteur. Il est fait de blocs de neige; la porte est au bas et rasé le sol. Elle

a environ un pied et de ni de largeur sur deux pieds de hauteur. Tout le monde n'y peut passer facilement, pour y entrer, on doit d'abord se mettre à genoux, puis à plat ventre et se glisser, un peu comme un serpent, sur une longueur de 10 à 12 pieds, dans un couloir de même dimension que la porte. On n'y entre, et on n'en sort jamais indemne, car ce vestibule n'est pas tenu dans un état de propreté exagérée.

Une fois dans l'iglo, on vous fait asseoir sur un bloc de neige, que recouvre une peau de chevreuil. En moins de cinq minutes on est tout couvert des grands poils blancs de la bête. Mais après quelques visites à domicile on ne fait plus attention à ces détails. L'interprète est à côté de vous. Naturellement, ce brave garçon, le savant du village, n'a aucune idée d'un recensement. Aussi fallait-il d'abord lui faire comprendre la question que j'avais à poser au chef de l'iglo. Il y a des mots anglais et français qui n'ont pas leurs équivalents dans la langue des Innuits. Ainsi, pour exemple, les mots «année», «mois», «jour», «heure» sont des dénominations de temps absolument ignorées des naturels. Ce sont autant de mystères pour eux.

Quel âge avez-vous? Invariablement on répondait «non savé mi». Alors j'étais obligé d'entamer une conversation, beaucoup plus par les gestes que par la voix, avec l'interprète, pour lui faire comprendre ma question. Cela fait, l'interprète et le chasseur, ou la femme de ce dernier, en son absence, faisaient des calculs à n'en plus finir. C'était la revue de tous les événements importants arrivés dans le pays, depuis son âge de connaissance, et le souvenir le plus lointain du chasseur était considéré comme la date la plus rapprochée de sa naissance.

Un autre point difficile à élucider, pour un Inuit: j'ai eu bien du trouble, au commencement, pour savoir d'un chef d'iglo, s'il était marié ou s'il était libre. Le mot mariage est absolument inconnu parmi les naturels.

Il en est de même du mot «enfant» et du mot «famille». J'arrivai à me faire comprendre en leur demandant d'abord, s'ils avaient un iglo? une koney? des Pik-ki-nini? Or le chef de l'iglo, c'est l'Osky; la koney, c'est sa femme, et les Pik-ki-nini, ce sont les enfants. Je constituais ainsi la famille. Ni le nom de l'Osky ni celui de sa koney, ne passent à leurs enfants. Chaque enfant a son nom et constitue une unité à part. Un exemple, l'Osky Nassou, a trois fils, savoir: Ik-tou-ta, Kak-tou, et Pio-mik-tou. On ne dit pas Ik-tou-ta Nassou, etc., comme on dit dans le monde chrétien, John Smith, etc.

Dans vingt ans d'ici, quand une génération nouvelle sera levée, qui saura que Ik-tou-ta et ses frères, sont les enfants du vieux Nassou? Avec ce système, il est difficile de conserver les traditions dans les familles.

Quant au «mois de leur naissance, c'est du mystère pour eux. Ils ne connaissent pas cette subdivision de l'année. A vrai dire, il n'y a que deux saisons pour un Inuit: la saison de l'eau—«l'été», et la saison de la glace—«l'hiver». Comme l'hiver dure neuf à dix mois par année, le plus grand nombre de naissances arrive en hiver.

Même difficulté pour connaître le nombre d'animaux abattus ou capturés, par le chasseur au cours de l'année. Les Innuits comptent facilement jusqu'à dix. Au delà, leur calcul est long.

En général, un chasseur harponne de 250 à 300 phoques par année. Il abat autant de chevreuils, et capture autant de saumons, dans les nombreuses rivières saumoneuses tout autour de la terre de Baffin. Quand je demandais à un chasseur combien de phoques il avait harponnés l'année dernière, il se mettait à rire en disant: «*Mi non savé*».—«A-mi-shoute» voulant dire: c'est incalculable, il n'y a pas de nombre pour l'exprimer.

Pour eux la centaine est l'infiniment grand. Dans ces cas l'interprète me faisait écrire, 200, 250 et 300.

En somme, malgré tous ces inconvénients, je crois avoir réussi à recueillir des informations aussi exactes que possible, sur le nombre de la population des villages visités, et sur les conditions d'existence, de l'intéressant petit peuple de la terre de Baffin.

Si le gouvernement du Canada veut conserver cette relique de l'humanité primitive, il lui faudra faire cesser au plus tôt les déprédations, les pillages, les vols, dont les Innuits de Baffin sont les victimes de la part des coureurs de la mer. Le gouvernement du Danemark a montré un noble exemple à ce sujet, en faveur des Innuits groenlandais.

Les remarques précédentes sont peut-être trop longues, mais la nouveauté du sujet semblait les autoriser et les justifier.
