

Canada's

Agriculture, Food and Beverage INDUSTRY

Canada's Distillery Industry

Canada is a world leader in the improvement of farm management, production, processing, and storage techniques for a wide variety of agri-food products. Environmental responsibility, innovation and quality assurance are the core values practiced in all of Canada's agriculture sectors.

Canada – Clean and Abundant Resources

A clean environment, abundant natural resources, and high standards for food regulation allow Canada to offer some of the very best agri-food products in the world. The great success of the Canadian distillery industry can be attributed to a ready supply of high-quality raw ingredients, innovative processing, and proven distilling techniques.

Beverage Production

Canada's distilled spirits industry has a long history with the first distillery established in Quebec City in 1769.

Today, the Canadian distilling industry produces a variety of spirits, including whisky, rum, vodka, gin, brandy, liqueurs and spirit coolers.

Canadian distilled spirits accounted for 16% of all Canadian alcoholic beverage manufacturing shipments, and nearly 11% of all manufacturing shipments of Canadian alcoholic and non-alcoholic beverages in 2007.

Canada's distinctive rye-flavoured, high quality Canadian whisky is distilled in Canada from cereal grains, aged in oak barrels for a minimum of three years, and contains 40% alcohol by volume. Canadian whisky is the only distilled spirits product that is "appellation protected" which means that,

by law, it can only be produced in Canada.

Quality Assurance

Health Canada regulates the contents of all distillery products through the Food and Drugs Act, while the Canadian Food Inspection Agency monitors domestic and imported distilled products for compliance with net quantity, label and container regulations.

Innovation

Innovative products, such as low-alcohol coolers and ready-to-drink products, are gaining in popularity, both in Canada and abroad.

Agriculture and Agri-Food Canada supports Canada's alcoholic beverages industry through research into the development of new varieties of grain, and new methods, tests and procedures to improve production.

Trade & Investment Opportunities

In 2007, Canada exported \$393 million in distilled spirits. Canada's major export market is the United States to which shipments of spirits exports were valued at \$368 million in 2007.

Manufacturing shipments of distilled spirits

totalled \$799 million in 1997 and increased by almost 26% to a value of \$1 billion in 2007. Adult per capita consumption of spirits in Canada has been rising since 2001, when it was 6.7 litres, reaching 7 litres in 2006.

There are 805 domestic spirit brands and 4,553 imported spirit brands available in Canada, excluding coolers.
