

MARKET ACCESS SECRETARIAT Global Analysis Report

Innovation Series New Products Containing Pulse Ingredients

In China

Novembre 2016

EXECUTIVE SUMMARY

- With a population of 1.35 billion and growing, China continues to be import dependant on several sectors of food and food products and the evolving pulse sectors are no exception. However, with its growing middle class, increasing production costs and expanding palate, the demand for pulses and pulse products is hardly static as a result of shifting demands and a rapidly changing society.
- China's market for new products containing pulse ingredients has seen an overall positive trend in number of launches over the course of the January 2005 to December 2015 review period.
- Pulses are incorporated within all of Mintel's food product categories, but the top four (snacks, bakery, meals and centres, and breakfast cereals) make up a combined 60% of the total launches, perhaps illustrating the more limited use of pulse ingredients in China compared to other markets, such as North America.
- The most frequently listed pulse ingredients among the new launches were those already common to Chinese cuisine: kidney/red bean, black bean, pea flour and white bean.
- Of the total new product releases, 44% were completely new products introduced into the market, followed by new varieties and range extensions (41%). This suggests a growing interest in pulse-related products.
- "No additives/preservatives" was the top claim used across the new launches, occurring 425 times over the review period. This indicates that Chinese consumers are becoming more health conscious, driving the trend toward more natural and less processed products.

NEW PRODUCT LAUNCH ANALYSIS

From January 1, 2005 to December 31, 2015, a total of 3,026 food products were launched containing pulse ingredients in China. The Chinese market has great potential for pulses and pulses products and is well-positioned to continue this trend beyond 2015 (See figure 1).

**Figure 1: New Product Releases Containing Pulse Ingredients in China
January 2005 – December 2015**

Product Categories

The top five product categories incorporating pulse ingredients over the period included snacks (27.36% of total launches), bakery (21.61%), meals and meal centres (11.47%), breakfast cereals (8.33%) and dairy (6.87%) (See figure 2).

The snacks category is the most active category overall, followed by bakery products. The side dishes category also recorded a significant gain albeit from a small base, growing from 3 to 15 products from 2014 to 2015 (See figure 3).

Figure 4 depicts the top 10 subcategories for new food products using pulse ingredients. Cakes, pastries and sweet goods (10.74 % of total launches) and hot cereals (8.16%) are the top subcategories over the period (with 2 other categories tied for third place, each representing 7.87% of launches followed by prepared meals in fifth place with 7.47%.

Among the top 10 subcategories, prepared meals and instant noodles saw a positive number of new launches in 2015 over 2014 (+6 and +7 respectively) (See figure 5).

Product Claims

Over 14% of the new products released were positioned as having no additives/ preservatives, which was by far the most frequently occurring claim. Other leading claims represented fairly small proportions of the total launches, including time/speed (6.7%), microwavable (5.62%), baby and toddlers (4.89%), and low/no/reduced sugar (4.73%) (See figure 7).

“No additive/preservatives” was the top claim in most of the categories, while “time/speed” was used most frequently by products in the meal and meals centers and breakfast cereal category. The “suitable for babies and toddlers 0-4” claim was most prominent within the baby food category (See figure 8).

**Figure 7: Pulse Ingredient Product Releases,
by Top 30 Claims, January 2005 – December 2015**

Claim	Number of Products	% of Products

TOP COMPANIES AND BRANDS

Products incorporating pulse ingredients are largely dominated by branded products, which represented 96.4% of the new releases, whereas only 3.6% of the introductions were released under a private label. However, there is no one dominant brand, with the top 20 (See figure 9).

There is no one company that dominates in terms of manufacturing or launching new products with pulse ingredients, with the top 10 only representing a combined 10.4% of the total launches. Each holding very small shares, Sanquan Foods (1.0%), Inner Mongolia Yili Industrial Group (0.8%) and Xiamen Yinlu Foods (0.7%) were the top companies over the period (See figure 10).

PRODUCT EXAMPLES

Company: Liaoning Green Fangshan Organic Food Co., China

Brand: Green Fangshan

Launch Type: New Variety/Range Extension

Storage: Shelf stable

Price: US\$2.66

Pack Size: 400.00 g / 400.00 g

Date Published: Dec 2015

Product Description

Green Fangshan You Ji Hei Dou (Organic Black Beans) are organic certified by COFCC. This product retails in a 400g pack.

Ingredients On Pack organic black bean

Company Koushuiwa Foods, China

Brand Kou Shui Wa

Category Snacks > Vegetable Snacks

Launch Type New Packaging

Storage Shelf stable

Price US\$0.91

Pack Size 88.00 g / 88.00 g

Date Published Jan 2016

Product Description

Kou Shui Wa Xiang La Wei Qing Wan Dou (Spicy Green Peas) have been repackaged. This product is now available in a newly designed 88g pack containing individually wrapped sachets.

Ingredients on Pack

Pea, vegetable oil, spicy flavouring (white granulated sugar, salt, spices (irradiated), monosodium glutamate, soy sauce powder (brewed soy sauce, maltodextrin, salt, monosodium glutamate), maltodextrin, capsicum oleoresin, hydrolyzed vegetable protein.

Company: San Shu Gong Foods, Taiwan

Brand: Yuki & Love

Category: Bakery > Cakes, Pastries & Sweet Goods

Launch Type: New Product

Storage : Shelf stable

Price: US\$1.56

Pack Size: 120.00 g / 120.00 g

Date Published: Nov 2015

Product Description

Yuki & Love Hei Dou Pai (Black Bean Pie) features a generous filling, which comprises sweet black beans and mellow milk.

Ingredients on Pack

Maltose, white granulated sugar, wheat flour, hydroxy propyl distarch phosphate, vegetable oil (palm oil, canola oil, coconut oil), egg, water, whole milk powder, black bean, food flavouring, beta carotene, sodium bicarbonate, salt, potassium sorbate, xanthan gum, mono- and di-glycerides of fatty acids

Company Aletai Arman Dairy, China

Brand Arman

Category Hot Beverages > Malt & Other Hot Beverages

Launch Type New Product

Storage Shelf stable

Price US\$1.41

Pack Size 360.00 g / 360.00 g

Date Published Jul 2014

Product Description

Arman Chickpea Powder is made with rare chickpeas and is most suitable for seniors. According to the manufacturer, chickpea contains amino acids, linoleic acids, fats, minerals and vitamins. This chickpea powder has been halal and green food certified.

CHINA'S TRADE WITH CANADA

Canada pulses export to China is dominated by dry peas products. In 2015 Canada exported C\$316 million of dry peas, lentils and dry beans.

Canada Pulses Export to China
