## Market Access Secretariat Global Analysis Report

## Sector Trend Analysis

## Pet Food Trends <br> In Germany

## July 2017

## Executive summary

The German pet food retail sector is a multi-billion dollar market. In 2016, Mintel estimated the retail value of pet food sales in this country to be nearly US\$3.4 billion. Germany is the largest economy in the European Union (EU) and the fourth-largest economy in the world. Furthermore, Germany is a leading market for pet food products. Germany's pet food market is steadily growing and sales are dominated by dog and cat food. If the trend continues, total sales of pet food will climb to around US\$ 4 billion by 2020.

Canada's participation in the German pet food market remains negligible, despite increased exports of dog and cat food between 2012 and 2014. However, there may be opportunities for processors to gain market share by taking advantage of high end markets, driven by the 'humanization' of pet food. Particularly, health and wellness trends are being transferred to the pet food sector, increasing demand for specialty pet products such as functional foods.

The primary functional claims being promoted by the pet food industry in Germany are identical to those endorsed by human consumer goods: no artificial ingredients; no gluten; no sugar; organic; high protein; high in vitamins; and no artificial color.

The main subsectors studied in this report include cat and dog food only, but 'other' pet food developed for birds, fish, small mammals and reptiles, offer another potential market for Canadian exporters.

## Pet population

While there were some fluctuations in the German pet population over the years, the pet population was estimated at around 34.5 million animals in 2016.

As of 2016, $22 \%$ of German households owned a cat. Cats are highly popular pets amongst German consumers, especially those living in relatively in urban areas in small apartments. They are also preferred companion where dogs are not allowed as pets. Even though they are often considered less interactive than dogs, many cat owners establish a close and positive relationship with them.

Despite the increasingly limited living space, especially in larger cities, the tendency to keep two or more cats is likely to continue. Nevertheless, the growth in the cat population is expected to remain low, accounting for a stagnant customer base. At the same time, the significance of providing high quality and living that is more natural and feeding conditions for cats is high, or even increasing in the years ahead.

Pet population in Germany in 2016

Source: Industrieverband Heimtierbedarf (IVH)
Pets in Germany are often welcomed as providing balance to their owner's hectic lives and sometimes even viewed as taking the place of a partner or child. They are often considered beloved companions that enhance their owners' wellbeing and quality of living.

German households with pets

Source: Industrieverband Heimtierbedarf (IVH)

Even though the dogs are not as popular as cats in Germany, their population of 7.9 million remained stable, and significantly smaller than the cat population. As of $2016,16 \%$ of German households owned a dog.

Dogs are also viewed as supporting their owners' fitness and health and as helping them to reconnect with nature on their daily walks. As a result, the pet population is growing at rates almost parallel to the number of small households according to Euromonitor.

| 43\%of all households in <br> Germany own at least one pet. | 58\%of all families with children <br> own a pet. | 19\%of all households with pets <br> own at least 2 pets. |
| :---: | :---: | :---: |

Source: Industrieverband Heimtierbedarf (IVH)
Germany is the second in Europe in terms of number of pets owned, at 34.5 million to Russia's 47 million, which ranks number one. Industrial Association of Pet Care Producers (German: Industrieverband Heimtierbedarf, IVH) and The German Pet Trade and Industry Association (ZZF) data show that 43\% of German households own at least one pet, and $58 \%$ of families with children own a pet. Unlike the rest of the world, where dogs are most popular, cats rank number one in Germany, with 12.9 million ( $22 \%$ of all households) to 7.9 million dogs (16\% of households). There are also 5.1 million small animals owned as pets in Germany (6\% of households).

## Retail market size

As the third largest consumer retail market for pet food in the European Union, Germany had retail value sales of just over US\$3.3 billion in 2016, with over US\$1.7 billion spent on cat food and just over US\$1.4 billion on dog food.

Pet food in Germany saw a successful year with regard to volume (+2.5\%) and current value growth ( $+2.6 \%$ ) in 2016. Even though the German pet food market is considered mature and saturated to certain extend, it saw strong competition. However, innovation and growing demand for premium products will continue to drive the growth in the year ahead.

The top pet food companies in Germany in 2016 were Mars Inc. (21.7\% of the total market value share and $15 \%$ of volume share) with their brands of Pedigree and Whiskas, followed by Nestlé SA (10.8\% value, 5.9 volume) and their brands of Purina Beneful and Purina Fancy Feast/Gourmet, and Vitakraft Werke Wührmann \& Sohn GmbH \& Co KG (3.8\% value and 2.0\% volume) and their brand of Vitakraft.

Germany - Pet Food: Company retail market share by value (\%)

| Market Player | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ |
| :--- | ---: | ---: | ---: |
| Mars Incorporated | 24.3 | 23 | 21.7 |
| Nestlé S.A. | 9.8 | 10.3 | 10.8 |
| Vitakraft-Werke Wührmann \& Sohn GmbH \& Co., KG | 3.6 | 3.7 | 3.8 |
| The Procter \& Gamble Company | 2.3 | 2.2 | 2.1 |
| Private Label | 34.4 | 35.5 | 36.6 |
| Others | 25.6 | 25.3 | 25.0 |

Source: Mintel

Private label brands continuously increased their shares, rising from 49.7\% to 52.5\% between 2014 and 2016. Collectively, private label brands have rapidly increased their market penetration between 2010 and 2016. However, from the available data, it is not possible to ascertain whether certain private label brands fared better than others within this category.

## Germany - Pet Food: Company retail market share by volume (\%)

| Market Player | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ |
| :--- | ---: | ---: | ---: |
| Mars Incorporated | 16.8 | 15.9 | 15.0 |
| Nestlé S.A. | 5.7 | 5.8 | 5.9 |
| Vitakraft-Werke Wührmann \& Sohn GmbH \& Co., KG | 1.6 | 1.8 | 2.0 |
| The Procter \& Gamble Company | 1.1 | 1 | 0.9 |
| Private Label | 49.7 | 51.1 | 52.5 |
| Others | 25.1 | 24.4 | 23.7 |

## Source: Mintel

Over 60\% of the retail sales of pet food are from private label brands and small pet food manufacturers (the other category). In 2016, these two groups accounted for $76.2 \%$ of volume pet food sales. Largely because of the growth of private label sales. The proportion of sales from others pet food companies market share, were stable during the review period.

## Market segmentation

Convenience is the main reason for the increasing popularity of prepared pet food in Germany. Dry or wet food is easier to handle, can be stored longer, and produces less waste. New pet food brands have done a good job of convincing potential consumers of the benefits of this type of pet food, marketing it as healthy, based on wholesome ingredients and offering a balanced diet.

Mintel notes that almost all of the cat food consumed in Germany are prepared, accounting for 98\% of total cat food consumption. The only way to achieve significant sales growth in the future will be by increasing the sales of premium food products in order to raise the value of cat food marketed in Germany.

| Dog | 418.4 | 418.8 | 420.9 | 422.1 | 428.9 | 450.1 | 449.5 |

Source: Mintel
The cat food market in Germany is led by Mars, and Nestlé and together they have a nearly 33\% market value share according to Mintel. Although the growth of the cat food market has slowed recently, the biggest growth was still in cat treats due to an increase in the sales of functional and premium products.

Mintel also predict that the cat food market will perform better than dog food because the German population is aging and cats are easier to look after than dogs. The good performance of cat treats is also due to the pet humanization trend in Germany. Segmentation and specialized products will continue to prevail in the cat food market in Germany. Products featuring specific health benefits are expected to perform especially well.

Wet cat food will continue to constitute the majority of the overall cat food sales. Premium cat food will be a major driver of overall cat food growth. However, economy wet cat food will likely grow due to the rising popularity of private label products.

Germany Cat food: Retail market segmentation by volume 000' tonnes

| Segment | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ |
| :--- | ---: | ---: | ---: | ---: |
| Cat | 550.8 | 556.7 | 550.6 | 555.4 |
| Wet | 441.9 | 446.8 | 445.0 | 453.5 |
| Dry | 108.9 | 109.9 | 105.6 | 101.9 |

Source: Mintel

Mars and Nestlé are also the major players in Germany's growing dog food market, accounting almost 50 $\%$ of total dog food sales in 2016. Total value sales of dog food in Germany were close to US\$ 1.7 billion in 2016 according to Mintel. Dog treats and mixers, dry dog food, and wet dog food each account for about a third of total sales.

The humanization trend in the dog food market is notable in the increasing success of premium dog products and specialty dog foods. Manufacturers are broadening product ranges by targeting specific breeds, sizes, and ages. Sales of therapeutic dog food have also increased; however, it remains a small niche product due to high prices. Premium dog food and dog treats are expected to be the primary drivers of future growth according to the German Industrial Association of Pet Care Producers (German: Industrieverband Heimtierbedarf, IVH)

Germany Dog food: Retail market segmentation by volume 000' tonnes

| Segment | 2013 | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ |

## Distribution channels

Pet food distribution in Germany is also primarily done through modern grocery retailers in particular supermarkets and hypermarkets. Supermarkets accounted for $28.4 \%$ of store based retailing pet food sales, followed by hypermarkets with $22.3 \%$. Non-grocery specialists such as pet superstores and pet shops combined accounted for 27.0 \% of pet food sales in 2016.

Germany pet food sales by distribution channels in \% in 2016

Source: Mintel
Mintel notes that the German pet food market is considered mature and saturated, but also separated in two main positioning, with both premium and economy-priced food doing well. Premium pet food products are mostly sold through specialty shops, while mid-priced products are available both in specialty shops and in supermarkets. Supermarkets and discounters mostly sell economy lines. Economy lines or private label products account for over $50 \%$ in volume sales and $36 \%$ in value of all sales.

The Internet is gaining in importance in the pet food sector in Germany. According to estimates from the industry and trade, the online sales volume in 2016 hovered around 460 million euros (US $\$ 500.0$ million). However the sales were not differentiated, species-specific data on the online market for "prepared pet food" as well as "pet accessories" were not available.

## German imports

In 2016, Germany's total dog and cat food imports were in excess of US\$1 billion. Nine of the top ten suppliers to the German market were European countries. In terms of both the volume and value of imports, the Netherlands and France were the most important suppliers of dog and cat food to Germany, holding $19.4 \%$ and $14.2 \%$ market shares, respectively in 2016. Thailand was the nearest competitors to these leading European suppliers, accounted for little over 3\% market share of dog and cat food imports (measured by value) in 2016.

New products analysis
According to the Mintel Global New Products Database, there were 2,903 new pet food product launches in the German market between January 2012 and March 2017. In the three months of 2017, there were

95 new products. Over half (57.8\%) of the launches were completely new products and $29.5 \%$ were new varieties or range extensions. The most commonly used claim was no additives/no preservatives, which appeared on $47.2 \%$ of the total launches, followed by "Pet-adult" with $42.5 \%$, and "low/no/reduced allergen" with $23.7 \%$. Approximately $26.5 \%$ of the total launches were in the cat food wet product subcategory and $26.5 \%$ were in the dog snacks and treats. Over $65 \%$ of the product launches were branded label.

Standards
FEDIAF, the European Pet Food Industry Federation, was established in 1970 and represents the pet food industry in 26 European countries. FEDIAF function is to collaborate with authorities, regulators and
academics to achieve positive conditions for the supply of safe, nutritious and palatable pet products (FEDIAF, 2015-A). FEDIAF has developed guidelines and a code for nutrition and labelling of pet food.

## Nutrition

FEDIAF developed "Nutritional Guidelines" for basic nutrient levels in cat and dog food and other animals. To review the complete guide, visit the FEDIAF website: http://www.fediaf.org/self-regulation/nutrition/

## Labelling

Pet food labelling in the European Union (EU) is primarily governed by EU regulation 767/2009. For more information on the specific labelling requirements in the EU, please visit the following website: EU Regulation - 767/2009

FEDIAF, based on interpretation of EU regulation 767/2009, established a "Code of Good Labelling Practices for Pet Food," which addresses three basic functions: 1) consumer information on product use; 2) control and enforcement; and 3) marketing and retailing. The following information is legally required on pet food labels (FEDIAF, 2015-B):

- Name and product description
- Ingredients list
- Information about nutrient levels
- Information about additives
- Best Before Date, Batch Code
- The name of the producer or the distributor and how to contact them for further information
- How to use the product (feeding instructions)
- Weight and/or quantity statement

To review the complete code, visit the FEDIAF website: http://www.fediaf.org/self-regulation/labelling/ In addition, EU labelling requirements will change for each type of pet food (compound, single ingredient, dietetic feed); additivities in pet food are regulated; and genetically modified (GM) ingredients contained in pet food must come from an approved GM crop and must be labelled. In addition, to learn more on export requirements for meat by-products to the EU, exporter's should consult Chapter 11 of the Canadian Food Inspection Agency's (CFIA)'s Meat Hygiene Manual of Procedures.

## For more information

International Trade Commissioners can provide Canadian industry with on-the-ground expertise regarding market potential, current conditions and local business contacts, and are an excellent point of contact for export advice.
