OF THE
DEPUTY SUPERINTENDENT GENERAL OF

## INDIAN AFFAIRS

FOR THE YEAR ENDED MARCH 31, 1926

## REPORT OF THE DEPUTY SUPERINTENDENT GENERAL

OTTAWA, October 1, 1926.
Hon. CHARLES STEWART,
Superintendent General of Indian Affairs,
Ottawa.
SIR, - I have the honour to submit the report of the Department of Indian Affairs for the year ended March 31, 1926.
The activities of the department can only be presented in a general way in the annual report. The large divisions of the administrative work have been dealt with year after year under the same heading, in much the same form, and will be found in the current report. The varied details that make this department most interesting to administer hardly find place in the record and would be too voluminous for presentation. The items which make up the day's activities vary from day to day, and routine is constantly broken by situations and problems which arise suddenly and demand solution; sometimes these problems are serious and sometimes trivial, but the relationship of guardian and ward between the department and one hundred thousand people produces throughout the year many and varied incidents. It has ever been the policy of the department to interfere as little as possible with the individual Indian. There is broad and generous provision in statute and in finance to assist in his progress and to protect his interests and estate, but individual liberty remains almost untouched. Indians are not confined to their reserves, but travel without restriction and engage in business or labour, following their own inclinations. Residents, on reserves are also, free agents, the representative of the department is available and ready to give them advice and to settle disputes between themselves or their white neighbours, and, upon reserves where instruction in farming is given, the farming instructors have close supervision of individual undertaking.

There is no statutory power to compel an Indian to remain on his reserve, engage in agriculture, or, when he has a standing crop, to harvest it and summer-fallow his fields.

The Indian Act prohibits the participation of Indians in stampedes, or pageants outside their own reserves, and makes the inducement or employment of Indians in this way an indictable offence unless the Superintendent General consents, but it is most difficult to control, under this, provision of the Indian Act, either Indians or municipalities. The attractions of stampedes, pageants and annual fairs are powerful, and the programs of such celebrations seem opposed to the civilizing influences, which are at work on the reserves. It has sometimes occurred to the undersigned that a drastic measure of restriction would be in the interest of the Indian. But reflection has always, resulted in a return to the opinion that a policy of suasion and an appeal to reason and experience is best in the long ran. We find the apparent results of this's policy in the older provinces of the Dominion; there the Indian is self-supporting and has developed independence to a remarkable degree, as a result of education and free contact with a civilizing environment. No doubt the same effect will follow from the pursuance of this policy in the newly settled provinces.

It cannot be too frequently stated that the Indian is self-supporting and that only those Indians are entirely dependent who belong to an indigent or improvident class which is also found in all white communities. The department must, in its capacity of guardian, take the place of all provincial or muni-
cipal organizations for the relief of such a class, and the expenditure in this direction, is undertaken as much for the protection of the white people as for the benefit of the Indian. Epidemic conditions of disease are dangerous, no matter where they originate. The white population has a vital interest in the expenditure for the prevention of tuberculosis and for treatment of venereal diseases. This expenditure is upon the increase, as the fact becomes clear that these diseases among Indians must be dealt with by modern scientific methods.

## INDIAN HEALTH PROBLEMS

Among the many important duties of the department, those associated with the conservation of the health of Indians must take a prominent place. Beginning in the residential schools, every effort is made to instil in the minds of the children at least a rudimentary knowledge of hygiene, particularly as related to the prevention of tuberculosis. The reserves in settled communities have physicians on part-time service, who come at the call of the agent, and in several large reserves the department employs permanent physicians whose whole time is devoted to the work. Indians of outlying bands who gather at stated times to receive the annual treaty payments are given medical attention by a doctor who accompanies the Indian agent.

The health problem is assuming a very serious aspect among the Indians of the more outlying districts, particularly in the northern parts of Alberta, Saskatchewan, Manitoba, Ontario, and Quebec, where the question is closely associated with their economic condition. These Indians of the unsettled or sparsely settled regions are still in a primitive state and almost solely dependent upon hunting and trapping for their livelihood. In former times the Indians had a virtual monopoly of the chase and their physical well being was reasonably assured. Now the situation is entirely altered. In recent years there has been an influx of white trappers, who are constantly moving northward in increasing numbers to an extent that is alarming from the point of view of the Indians. These white trappers are more astute and energetic than the aborigines, who cannot withstand keen competition to which they are utterly unaccustomed. Furthermore, it is the tendency of the whites to trap out an area until the game is completely exhausted, and then move on elsewhere, leaving the original native population in a state of destitution. The effect of these new hardships upon the health of the Indians concerned is already becoming evident. The department has received an interesting and instructive report from its medical officer in the Norway House agency, in northern Manitoba, Dr. E.L. Stone, C.M.G. The situation at this agency may be taken as typical of the present conditions among the more remote Indians, making allowances, of course, for local modifications.

There are, five bands of Indians in the Norway House agency, located at Norway House, Cross Lake, Oxford House, God's Lake, and Island Lake. The total population of the agency is 2,544, being distributed as follows: Norway House, 714; Cross Lake, 525; Oxford House, 378; God's Lake, 302; Island Lake, 625.

Dr. Stone states that these Indians are all badly affected with tuberculosis, except the Island Lake band, who are still living in a primitive state and have had comparatively little contact with white men. He states that "disease here means one malady, and one only, for all practical purposes. That is tuberculosis. Practically nobody dies of anything else."

In linking up these health conditions with the economic position of the Indians, particularly with reference to the hunting and trapping industry, Dr. Stone proceeds as follows:
'Not only is the standard of living insufficient for their more than ordinary needs, but there is a still more serious problem. The fur-bearing animals in this area are diminishing a very serious degree. Allowing for migration of foxes, and for the fact that
muskrats, scarce now, will probably increase under the present measures of protection, allowing for every favourable aspect of the case, the outlook is bad. Beaver have practically disappeared from this area, and all other fur bearers, with the possible exception of foxes, have diminished to such an extent as to make trapping a very precarious occupation. Trappers are going farther afield every year. Some Norway House and Cross Lake Indians go as far as three hundred miles. These long journeys cost money, and any goods that they buy in these remote regions cost very dear. They are compelled to take their whole winter's outfit in with them and, as few have the necessary capital, only the best of them can obtain the necessary credit. They do not like to be a whole winter away from their families, and a trip home consumes weeks of time. Some take their families, which adds to the expense. It is obvious that only the most energetic can do this sort of thing. Energy arises from a fair state of health. It must be said, that they get a somewhat better supply of fish and game by going far out and this to some extent offsets the increased expense. But really few can manage to go so far.
'The trapper who undertakes to live at home and operate a fairly local trap line is a hard case. Locally, the country really appears to be trapped out. And in this group fall the people who want to send their children to school.
'It may be asked, why do not these trappers go away and leave their families at home, where they may live comfortably and the children may be near school. That system is being brought in at one of our reserves, and, with all due respect to the missionary who is advocating it, I do not believe it a good one. Indians do not like, more than other people, to be separated from their families by long distances and for long periods. Credit arrangements have to be made to carry the family over till the hunter returns and the trader is reluctant to give too much credit. Supplies of fish and game are very poor at home, fuel has to be brought from a considerable distance, and the mother has often small children whom she cannot well leave to go for food and fuel. The result is that trappers, under this system, will not go far and so will not get much fur.
'We have trappers, of more than average strength and energy, who still do well, but the mass is not doing well and, considering the serious lessening of supply, the situation cannot be expected to improve.
'Another factor is the white trapper. He has not yet very seriously invaded this agency, but he swarms in a neighbouring agency and is beginning to come here. He is more energetic than the Indians and depletes the fur more rapidly. We hear complaints of his pushing Indians off their accustomed trapping grounds. What is still worse, he is accused, and apparently with some justice, or using poison. The fur poisoner finds a very small proportion of the animals he destroys. Most of his victims die in the bush where no one ever sees them. The Indian cannot compete with the white trapper. He has not the energy, he has not the health, nor the capital, and he has, what the white man seldom has, a family with its responsibilities. And if he could compete, and were to keep it up, there would not, in a very few years, be a fur bearing animal between the head of lake Winnipeg and Hudson bay. He would inevitably kill the goose that lays the golden egg. High fur prices have very nearly induced him to do that already."

If these Indians and others similarly situated are to be saved from privation and disease it will be, necessary either to remove them to other localities where they can take up agricultural pursuits or else to protect them in their aboriginal vocation by setting aside special and adequate hunting reserves from which all but Indians will be excluded. This latter experiment is already being carried out in the Northwest Territories, where there are seven such reserves. This policy is doubly beneficial in that it helps to prevent privation and hardship among the natives and also serves the ends of game conservation. In provincial territory, of course, this would have to be effected by arrangement with the provinces which control the game and fish. It may here be explained that it is only in the remote districts that this department desires to secure special hunting privileges for Indians. In the settled districts it is the aim of the department to have the Indians occupy themselves with agriculture and other industries, and to dissuade them as much as possible from their old preference for the chase.

The problems of the hunting Indians were the subject of interesting and useful discussion at the biennial conference of federal and provincial game officials which was held in Ottawa in April last and at which this department was represented. The department, through its agents, is co-operating with the provincial authorities in upholding the provincial laws and regulations for the protection of the game and is endeavouring to make the hunting Indians realize
that game conservation operates in their own interest and preserves to them the means of livelihood which they would otherwise lose. At the same time it may be mentioned that according to the best information received by the department the Indians, as a general rule, are by no means the worst offenders in the destruction and depletion of the fur-bearing animals.

It is the policy of the department to use as far as possible the hospital facilities provided by municipalities, but in some cases accommodation for the exclusive use of Indian patients has been added to municipal hospitals. There are also a number of departmental hospital for the sole use of Indian patients, and, by arrangement with the Saskatchewan Government, forty beds in the Qu'Appelle Sanitarium are made available for tubercular Indian patients.

One of the great difficulties encountered in the past has been the fact that the older Indians are inclined to place their faith in the Indian medicine men, and refuse treatment by white doctors. The members of the medical staff of the department report, however, that they are gradually overcoming this difficulty, and that hospitals maintained on the various reserves are being more freely and confidently used by the Indians. Another difficulty is that even if willing to submit themselves for medical treatment, Indians as a general rule are very negligent in carrying out the instructions of the physician. Under such circumstances it is difficult to make headway, but where the inroads of disease have been checked it is considered good work has been done.

In past reports it has been pointed out that the great foe of Indians is tuberculosis. The struggle against this disease is most arduous, not alone owing to its prevalence but to the conditions under which Indians live, and it is extremely difficult to extend to this people any prophylactic system. The assertion may safely be made that Indians who have been for years in contact with civilization begin to show a certain resistance to this disease, and methods which have been successful in white communities can be more readily applied to them; but it becomes extremely difficult to apply the modern, scientific methods of prevention and cure to the nomadic element of the aborigines, where the Indians gain their living by hunting and fishing and where their habitations are primitive and inadequate. It is a known fact that some Indian bands entirely remote from civilization have displayed no trace of tuberculosis, but even slight contact with civilization sets up an epidemic condition which spreads with alarming celerity.

We have enlisted the interest and co-operation of a group of medical men who have specialized in methods of combating tuberculosis in all its phases. Under their direction certain investigations are being carried out on the British Columbia coast among the fishing Indians, which will make available much interesting and valuable data which it is hoped will enable us to formulate a definite departmental policy.

As health conditions among the Indians affect the welfare of the contiguous white population, the health question as a whole is one of extreme importance, which the department has never sought to minimize. While generous expenditures have been made for tubercular Indians, these expenditures have been male largely in an effort to check the disease and to mitigate the suffering incident thereto. The cost of adopting an extensive system for the suppression of tuberculosis amongst the Indians would undoubtedly be very great, but until it becomes possible to remove the existing financial handicap, we cannot hope to take the radical steps necessary toward the elimination of tuberculosis.

The staff of travelling nurses, organized some years ago, has proved to be of great value. These nurses make regular inspection trips to the various agencies in several of the provinces, and it is their duty to make a thorough examination of all children in Indian schools, as well as to visit the homes on the reserves, giving assistance and advice. Simple talks on sanitation, diet and
home-making are given, and many of the Indian women gratefully accept the advice of the nurses regarding the care of their children. Baby clinics are held wherever possible, and on some of the reserves, in addition to monthly clinics, baby shows are being established with a view to stimulating the interest of Indian parents in proper methods of caring for their children. Indian women and girls are encouraged by the nurses and field matrons to cultivate gardens, and they are instructed in methods of canning fruit and vegetables for the winter months. By such simple instruction in the art of living, coupled with the care given by the Indian agents and medical attendants, the health of the Indian people must be improved. Although it is realized that their condition still leaves much to be desired, it should be remembered that the true standard by which to judge a people undergoing evolution is, not the height they have reached, but the distance they have advanced.

## AGRICULTURE AND STOCKRAISING AMONG THE PRAIRIE INDIANS FARMING

There are at the present time in the three prairie provinces about 2,500 Indians engaged in agriculture and according to estimates made this spring they will have under cultivation about 106,007 acres, allocated as follows: -

| Wheat | 37,531 |
| :--- | :--- |
| Oats | 24,843 |
| Barley | 5,738 |
| Other grain | 520 |
| Breaking | 6,931 |
| Summer-fallow | 30,444 |
| Total | 106,007 |

## CATTLE

With regard to live stock, according to the latest returns the Indians have 20,981 head of cattle in the three provinces: 4,106 in Manitoba, 8,188 in Saskatchewan, and 8,687 in Alberta. It is expected that about 5,000 calves will be added to the herds by way of natural increase during the present year, which will bring the total up to about 26,000 head. Steady progress has been maintained in the past few years and the importance of the industry is impressed upon the agents and farming instructors at every opportunity. The raising of live stock is of as great importance as the growing of grain and this is especially true in the case of the Indian because for him the way to emancipation lies through agriculture and there can be no permanent prosperity in agriculture without flocks and herds. There are some reserves within this territory upon which the growing of crops will never be practicable. When hunting, fishing, and trapping cease to provide the Indians with a living it will become necessary to start them raising live stock but they will need tuition, supervision, and, in some cases, monetary assistance.

To sum up the agricultural situation it may be said that the Indians are better equipped with buildings, implements and machinery, and better supplied with cattle and horses than they have ever been before. They are also better supervised in their work on the farms and the prospect generally is very encouraging.

## AGRICULTURAL WORK ON ONTARIO RESERVES

Fall Fairs. - Fall fairs have been organized on a number of reserves in the province of Ontario, and the Indians have shown considerable interest in preparing exhibits of grain, fruits, vegetables, and live stock. The Indian fair has
created an interest in better animals, grains, and vegetables. Very successful fairs were held last year on the Walpole Island, Moravian, Deseronto, Six Nations, Chemong, Saugeen, Cape Croker, and Rama reserves, and an International fair, in which American and Canadian Indians, of the St. Regis reserve took part, in Hogansburg.

Standing Crop Competitions. - Standing crop competitions were carried on at the following reserves: Deseronto, Caradoc, Walpole Island, Moravian, Cape Croker, Saugeen, New Credit. The crops grown in competition this year look very good. Some of the competitions were affected by the very dry summer. Some of the different oat fields judged would compare favourably with any oat competition held in the province of Ontario.

School Fairs. - School fairs were held last year on the Walpole Island, Cape Croker, Caradoc, Moravian, Six Nations, Tyendinaga and Rama reserves. The school children planted their seeds at their homes, and cared for the vegetables during the summer months. They also make their selections for the fair. This is a feature of considerable educational value. Children learn the best type of vegetable to grow. They are also encouraged to take better care of their garden in this way. One of the school fairs at the Six Nations brought out an exhibit of thirty spring calves and fifteen sucking colts, with a number of other fairs almost as good.

Ploughing Matches. - Ploughing matches were conducted on the following reserves lost year: Walpole Island, Sarnia, Cape Croker, Moravian, Caradoc, Six Nations, Alnwick, and Deseronto. Indian ploughmen were very successful in last year's ploughing matches, having carried off two provincial first prizes and fifteen county prizes, these all being won in open competition against the best white ploughers of the province.

Agricultural Meetings. - A series of agricultural meetings were held last winter on the following reserves: Deseronto, Cape Croker, Six Nations, Caradoc, Walpole Island, Sarnia, and Moravian. A very great deal of interest was taken by the Indians in the meetings, the meeting halls being packed at almost every meeting. The Indians in attendance were very anxious to receive all the information possible, and asked a great many questions in regard to stock, cultivation and crops.

General Report. - In a general way agricultural conditions on the Ontario reserves have been very much improved in the last five or six years. There are a great many more Indians farming at the present time than there were a few years ago. The holdings of stock on some of the reserves is more than doubled.

## ESKIMO AFFAIRS

During the session 1922-23 an amendment to the Indian Act provided that the Eskimos of Canada should be brought under the charge of the Superintendent General of Indian Affairs. These people, who, according to the best available census statistics, now number something over 6,000, were not, previous to this enactment, officially under the supervision of any government department. The Department of Indian Affairs, however, annually afforded them relief and medical attendance.

The Eskimos are widely scattered across the northern area of Canada, and only once a year can supplies be shipped in to certain central points, from which distribution is made by means of dog-sleds. The steamship which is sent annually by the Northwest Territories Branch of the Department of the Interior to Baffin Land and posts on the Hudson strait in Ungava, has proved to be of
great value in the distribution of supplies to these points, and the Hudson's Bay Company boats, which also make annual trips to this isolated country, serve portions of Ungava and the Northwest Territories.

In Baffin Land, the Eskimo settlements are largely, in the south and east, around Cumberland sound, Frobisher bay, and near the trading posts along the coast of Hudson strait. The Eskimos of Ungava are found along the coast line of Hudson strait, west from Port Burwell and as far south as Great Whale river, on the east coast of Hudson's bay. On the west coast of the bay a few of the Eskimos drift down to Fort Churchill, but they are found farther north in greater numbers, around Chesterfield inlet, Baker lake, and in the area including Melville, Boothia and Adelaide peninsulas. There are quite a number, also, in King William land and on some of the other islands off the Arctic coast, as the Eskimos naturally gravitate toward the sea, from which comes a large portion of their food supply. Scattered groups of natives will also be found around the Coronation gulf and in the district south of it, along the Western Backs river, the Coppermine and Tree rivers, and down to the north shore, of Great Bear lake; while in the MacKenzie delta are the natives who, have been more closely in touch with civilization, and who have, perhaps, better living conditions than any of the other Canadian Eskimos.

The natives of the Coronation gulf district have suffered great hardship during recent years, owing to the fact that the path of migration of the great cariboo herds has been deflected from the usual route leading across the Coronation gulf to Victoria island. It is unfortunate that since this change of route, the Eskimos of the district have not located the haunts of these cariboo herds which in the past furnished them with clothing as well as food. The department, is endeavouring to encourage these natives to turn their attention to securing a large catch of fish which can be dried and used during the long winter season. Fish nets have been sent in, as well as materials from which further nets can be made, and through the Royal Canadian Mounted Police, stationed in this area, the natives will be taught the use of the equipment sent to them and the proper methods of storing fish for later consumption. Nets have also been sent ta Chesterfield inlet for use at that point and in the Baker lakes, which are reported to be teeming with fish. In addition to the nets, harpoon irons and a certain amount of ammunition are being distributed at these points and in Baffin Land and Ungava. In Ungava, many of the natives are living in a territory now practically deserted by the fur-bearing animals upon which they depend for their livelihood, and it is felt that these people should be given some new means of support.

Supplies of relief rations, to be issued when necessary, have been sent to Mounted Police posts and to missionaries throughout the Arctic, and in ordering these supplies, special attention was given to the fact that foodstuffs containing an unusually high vitamine element are essential in the north. This department was. fortunate in securing from the Canadian National Parks Branch of the Interior Department a quantity of slightly defective buffalo skins for distribution to destitute natives, as well as a supply of pemmican made from buffalo meat, which is a strong and wholesome food particularly well suited for use in the north. It is felt that this and other highly nutritive relief rations will help to relieve the situation in districts where the depletion of the natural food supply has sometimes resulted in starvation. It is not anticipated that such relief will be necessary for any indefinite period, as the fishing operations which are being encouraged should gradually overcome the existing conditions to a very large extent.

It has not been possible to undertake extensive educational work in this inaccessible country, but the department has given assistance to Eskimo mission schools at Aklavik Shingle Point and Herschell Island in the MacKenzie District; and to the Lake Harbour and Cumberland Gulf schools in Baffin

Land. It was reported that many of the natives in the more remote districts have no conception of the laws, of their country, it being taken as a matter of course by them that a man should resent injury or protect his property by killing the offender. Simply worded posters in the Eskimo dialects prevailing in the eastern and western Arctic areas, explaining the law in this connection, have been distributed in districts recommended by the Mounted Police and the missionaries, with a view to assisting in the gradual education of these natives in adapting themselves to standards utterly foreign to their past mode of life.

The department has not undertaken any large outlay in regard to medical attention, as we are informed there is surprisingly little sickness throughout the north and the greatest physical difficulties of the Eskimo are the result of the famine periods following poor seasons for game. A physician is stationed at Fort McPherson to serve the MacKenzie Delta Eskimos. An Eskimo ward has also been established in connection with All Saints' hospital at Aklavik, and a graduate nurse, paid by the department, is stationed there. The doctor of the Government steamship, as well as the doctors of the Hudson's Bay Company boats, treat many of the natives on their annual trips, to the north, as it is the custom of the police, traders and missionaries to bring down to the boats natives requiring medical attention. First aid boxes containing a varied and adequate equipment of drugs, dressings, and bandages have been supplied to the Mounted Police posts in the north for the use of the natives as required, and in addition, it is the practice of the department to forward supplies of drug and simple remedies to the missionaries and traders of the Arctic, who have done excellent work in treating the ordinary ailments of the natives and in reporting cases requiring special treatment. Arrangements have been made for a physician to remain in the north next winter, with headquarters at Pangnirtung, Baffin island. It is expected that this doctor will patrol a considerable area for the purpose of treating the Eskimos and much valuable information should be available from his report, on which future plans may be based.

A considerable quantity of blankets and second-hand clothing is forwarded to the north by missionary societies and various organizations, each season for the relief of natives in the areas where such clothing would be serviceable. In view of our belief that in some instances at least the spread of infectious diseases among the Eskimos may be attributable to the use of such clothing, arrangements have been made to have future shipments for the eastern Arctic disinfected at Quebec. For this service we are indebted to the Dominion Department of Health.

Although the practice of infanticide by Eskimo mothers is undoubtedly dying out, cases are still reported. It does not seem reasonable to expect this practice to, cease so long as no provision is made for the care of children whose very existence, under the present conditions, in the Arctic, is a burden too great for the mothers to carry. These mothers would not do away with their children if they could see any other course to follow, and in view of this consideration, arrangements, have been, made for an Infants' Refuge near the, Coronation gulf, which will be under the supervision of the officers of the Royal Canadian Mounted Police stationed in that district. No elaborate equipment is being provided, as this. project is still in the experimental stage, but present plans are that Infants, brought to this post will be cared for by Eskimo women until the children are old enough to return to their parents. Suitable food and simple remedies for infants are provided, and this department is indebted to the Chief of the Child Welfare Division, Dominion Department of Health, for valuable advice in this connection.

Great praise should be given the work of the Royal Canadian Mounted Police, on, whose reports is largely based the administration of the affairs of the Eskimo. While the police posts are widely scattered, their patrol system
throughout this frozen country links together the many scattered groups of natives, and makes available a working knowledge of conditions in the various districts. The missionaries who have selected this northern territory as their field of labour, and the officers of the various trading companies have also rendered invaluable assistance to the department.

## EDUCATION

A special effort was made during the year to secure efficiency in both day and residential schools for Indian children. Many fully qualified teachers and instructors were engaged and much equipment was purchased with a view to better training for the younger generation of the department's wards. Parliamentary appropriation for the fiscal year ended March 31, 1926, was $\$ 1,918,000$ nearly as large as the 1923-24 record vote for Indian education.

Residential school activity was particularly encouraging. The four Canadian churches, that are associated with us in the conduct of these institutions, have all adopted a measure of centralized control which, of course, makes for efficiency. This type of school offers both academic and vocational instruction; and the aim is to graduate Indian boys and girls so equipped that they will go to their respective communities prepared for lives of general usefulness. 6,327 pupils were enrolled at residential schools during the year. Compare this with 4,783, the number maintained and trained in 1920 21, and the increasing importance of this, part of the department's educational program is apparent. The average attendance at these institutions for the year was 89.42 per cent of the enrolment. 5,658 of the youth of our wards daily received academic instruction and vocational training while living in homes managed by Christian workers.

The co-operation of the churches in the management of these residential schools is shown by the following table: -

| Roman Catholic | 40 | residential schools: enrolment, | 3,514 |
| :--- | :--- | :--- | :--- |
| Church of England | 20 | residential schools: enrolment, | 1,448 |
| Methodist | 7 | residential schools: enrolment, | 794 |
| Presbyterian | 7 | residential schools: enrolment, | 571 |
| Total | 74 | residential schools: enrolment, | 6,327 |

(As the figures are for the fiscal year ended March 31, 1926, they do not take into account a recent church union.)
The residential school enrolment by provinces for the fiscal year was as follows: -

| Ontario | 12 | institutions with | 1,094 pupils |
| :--- | :--- | :--- | :--- |
| Manitoba | 10 | institutions with | 1,024 pupils |
| Saskatchewan | 12 | institutions with | 1,290 pupils |
| Alberta | 19 | institutions with | 1,180 pupils |
| North West Territories | 3 | institutions with | 167 pupils |
| British Columbia | 16 | institutions with | 1,506 pupils |
| Yukon | 2 | institutions with | 66 pupils |
| Total | 74 | institutions with | 6,327 pupils |

Two hundred and fifty-four Indian day schools and 16 combined schools were in operation during the year. The Indian day schools are situated on reserves and are solely for Indian children. The combined schools are managed and financed jointly by the Department of Indian Affairs and local school boards and they are attended by both Indian and white pupils. The day schools were
attended by 8,455 Indian children during the fiscal year 1925-26. This phase of the department's educational work is becoming more important from year to year as better qualified teachers are being engaged. Field matrons and travelling nurses have special duties among day school pupils and classroom activity is being made more attractive. The average attendance was 58.42 per cent of the enrolment.

The day school enrolment by provinces for the fiscal year was as follows: -

| Prince Edward Island | 1 | day school with | 26 pupils |
| :--- | :--- | :--- | :--- | :--- |
| Nova Scotia | 13 | day school with | 318 pupils |
| New Brunswick | 10 | day school with | 274 pupils |
| Quebec | 35 | day school with | 1,598 pupils |
| Ontario | 82 | day school with | 2,736 pupils |
| Manitoba | 46 | day school with | 1,239 pupils |
| Saskatchewan | 25 | day school with | 602 pupils |
| Alberta | 4 | day school with | 103 pupils |
| Northwest Territories | 5 | day school with | 87 pupils |
| British Columbia | 44 | day school with | 1,346 pupils |
| Yukon | 5 | day school with | 126 pupils |
| Total | 270 | day schools with | 8,455 pupils |

The solution of the attendance problem at day schools is most difficult, but progress has been made. The following table shows the enrolment and average attendance at both types of schools for the past eleven fiscal years. The general percentage of attendance has reached a new high level and is indicative of an awakening interest in education, on the part of Indian communities. The numbers of the two types, of schools are not given, as they vary but little from year to year. Ten years ago there were two more residential institutions and one less day school than in 1925-26.

| Fiscal year | Residential Schools |  | Day Schools |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\ldots$ | Enrolment | Average Attendance | Enrolment | Average attendance | Enrolment | Average attendance | Percentage of attendance |
| 1915-16 | 4,661 | 4,029 | 8,138 | 4,051 | 12,799 | 8,080 | 63.13 |
| 1916-17 | 4,520 | 4,149 | 7,658 | 4,136 | 12,178 | 8,285 | 68.03 |
| 1917-18 | 4,692 | 4,081 | 7,721 | 3,797 | 12,413 | 7,878 | 63.46 |
| 1918-19 | 4,640 | 4,014 | 7,312 | 3,587 | 11,952 | 7,601 | 63.59 |
| 1919-20 | 4,719 | 4,133 | 7,477 | 3,516 | 12,196 | 7,649 | 62.71 |
| 1920-21 | 4,783 | 4,143 | 7,775 | 3,931 | 12,558 | 8,074 | 64.29 |
| 1921-22 | 5,031 | 4,360 | 7,990 | 4,308 | 13,021 | 8,668 | 66.56 |
| 1922-23 | 5,347 | 4,695 | 8,376 | 4,411 | 13,723 | 9,106 | 66.35 |
| 1923-24 | 5,673 | 4,856 | 8,199 | 4,332 | 13,872 | 9,188 | 66.23 |
| 1924-25 | 6,031 | 5,278 | 8,191 | 4,601 | 14,222 | 9,879 | 69.46 |
| 1925-26 | 6,327 | 5,658 | 8,455 | 4,940 | 14,782 | 10,598 | 71.69 |

Indian schools adopt the course of studies for the province in which they are situate. Emphasis is placed on the subjects of language, reading, domestic science, manual training, agriculture and physical training. Frequent inspections by officers of the department are supplemented by academic examinations by public and separate school inspectors.

The department continued to give considerable attention to the health of Indian children,particularly those in residential schools. Last year there was a comprehensive medical inspection and a special effort in the matter of physical education. Milk herds at residential schools were tested and the children's diet carefully supervised. Field matrons, travelling nurses and Red Cross workers have been given, opportunity to make arrangements for the promotion of better health among Indian school children.

Continuation and high school work is now being taught at several of the day and residential schools. The more advanced, pupils in those residential schools that are situate close to municipal collegiates are benefiting by secondary training in competition with white children. Then, there are 120 Indian students, not shown in the tabular statements, attending public schools, high schools and colleges in Canada. In the case of most of these, the department assists with a grant from parliamentary appropriation. In this connection, $\$ 19,386.38$ was expended during the past year. The policy is to make grants to the most promising graduates of Indian residential and day schools. If Church and department representatives consider a graduate worthy, the department provides a grant when the bona fide intention of the pupil is evident and provided proper supervision can be secured for the period of advanced study. These tuition grants are continued only when satisfactory reports are received. The practice of assisting ex-pupils of residential schools to start farming and housekeeping has been continued. Grants for stock, implements, building and household equipment have been made to some promising graduates. \$4,386.40 was the expenditure from Indian education for this assistance during the year.

Compared with the previous year, there was an increase of one residential school and ten day schools. A new residential school near McIntosh, Ont., was completed and opened for the admission of pupils. The additional day schools were established or reopened on reserves where this type of activity gave promise of success. Other important building operations were the commencing of residential school buildings near Sioux Lookout, Ont., Sturgeon Landing, Sask., and Morley, Alta.; the completion of the new buildings at the Duck Lake Indian residential school, in Saskatchewan; and the replacement of the buildings at Indian residential schools near Onion Lake, Sask., and on the Blood Reserve, Alta.

The expenditure for Indian education from parliamentary appropriation for the fiscal year ended March 31, 1926, amounted to $\$ 1,918,441.53$, as follows: -

EXPENDITURE FOR YEAR 1925-26 - INDIAN EDUCATION VOTE

| $\ldots$ | Day Schools | Residential Schools | Expupils | Special <br> Salaries | Tuition | Freight, express, etc. | Stationary | Miscellaneous | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

In addition to the above, certain bands of Indians, whose funds were sufficient to meet the expenditure, contributed the sum, of $\$ 66,901.56$ for school purposes. The interest contributions were for current expenses, salaries of teachers, minor repairs and tuition grants. The expenditure from Capital was for major repairs to, day school buildings on the Six Nations Reserve. For the fiscal year ended March 31, 1926, the amounts. so contributed were as follows:

| $\ldots$ | Capital | Interest |
| :---: | :---: | :---: |
| $\ldots$ | \$ cts. | \$ cts. |
| 1. Batchewana Band | ... | 2,578 47 |

## LANDS AND TIMBER

## LANDS

In Part II of this report a tabular statement appears of sales of surrendered, surveyed lands during the past fiscal year. Within the period covered by this report, March 31, 1925, to March 31, 1926, land patents to the number of 222 were issued and 27 returns of Crown grants prepared, and forwarded to the registrars of the counties, and districts in which the lands patented were situated. Four returns were made to the Provincial Secretary of Ontario covering lands patented within that province.

## LOCATION TICKETS

Location tickets granting title under the provisions of the Indian Act to individual owners for lands on the reserves were issued during the past year to the number of 77 , and on March 31 last there were current 2,624 location tickets.

## LEASES

Under the provisions of the Indian Act, leases were issued to white men at the request of the Indian locatees to the number of 115, and on March 31 last there were 1,294 leases current.

## ENFRANCHISEMENT

Under the provisions of section 122a of the Indian Act there were enfranchised during the past fiscal year 34 Indians, heads of families, comprising a total number of men, women and children of 89 . The total number of Indians enfranchised to March 31, 1926, under this section is 1,291.

During the past year four enfranchisements were carried out under section 107 of the Indian Act, whereby each enfranchised Indian obtained title to the land formerly held by him within the reserve, and also his Share of the capital or other band funds.

## TIMBER

The quantity of timber cut on Indian reserves in the Dominion during the season 1925-26 was slightly in excess of that cut during the previous year. The increased demand for hardwoods from the eastern provinces, together with a slight improvement in lumbering conditions throughout the Dominion, was responsible for the increased production. A diminution of 20 per cent in the production of western coniferous timber was more than offset by an increase of 40 per cent in eastern deciduous hardwoods.

The quantities and kinds of timber cut on Indian reserves, for sale, during the past year were as follows: -

| Fir (douglas) | $19,221,939$ | f.b.m. |
| :--- | :--- | :--- |
| Pine (yellow) | $1,885,462$ | f.b.m. |
| Pine (white) | $1,522,281$ | f.b.m. |
| Pine (red or norway) | 987,421 | f.b.m. |
| Pine (jack or banksian) | 207,456 | f.b.m. |
| Spruce (various species) | $3,510,737$ | f.b.m. |
| Hemlock (western) | $3,926,481$ | f.b.m. |
| Hemlock (eastern) | $2,972,424$ | f.b.m. |
| Cedar (red) | $7,210,426$ | f.b.m. |
| Cedar (white) | $2,305,405$ | f.b.m. |
| Tamarac | 287 | f.b.m. |
| Fir (balsam) | 166,256 | f.b.m. |
| Maple | $1,615,805$ | f.b.m. |
| Beech | 648,921 | f.b.m. |
| Ash | 44,903 | f.b.m. |
| Elm | 119,945 | f.b.m. |
| Birch | $1,318,021$ | f.b.m. |
| Oak | 52,042 | f.b.m. |
| Basswood | 713,779 | f.b.m. |
| Poplar | 197,865 | f.b.m. |
| Cottonwood | 872,010 | f.b.m. |
| Cordwood (mixed) | $11,7221 / 2$ | cords |

| Pulpwood (spruce) | $48,0761 / 2$ | cords |
| :--- | :--- | :--- |
| Shingle bolts (cedar) | $3,8843 / 4$ | cords |
| Boom logs | 29,563 | cu. ft. |
| Ties | 248,531 | cu. ft. |
| Posts (cedar) | 151,818 | cu. ft. |
| Poles (cedar) | 1,105 | cu. ft. |
| Piling | 92,757 | lin. ft. |

The total quantity of timber cut for sale, in terms of board measure feet, was approximately ninety million and in addition to this the Indians cut for their own use approximately seven million f.b.m. of timber for building and fencing purposes and 20,000 cords of fuel wood besides an unreported quantity of ash, maple, hickory, etc., for the native manufacture of snowshoes, baskets, axe handles, etc.

Sales of timber made during the year were: -

| Gros Cap Reserve, Ontario | Deposit \$ | 20000 |
| :--- | :--- | :--- |
| Reserve No. 27A, Saskatchewan | Deposit \$ | 52500 |
| Kitlope Reserve No.2, British Columbia | Deposit \$ | 28000 |
| Lower Kootenay Reserve No.1, British Columbia | Deposit \$ | 10000 |
| New Brunswick House Reserve, Ontario | Deposit \$ | 1,46950 |
| Weymontachi Reserve, Quebec | additional Bonus | 1,00000 |

Cash receipts were as follows: -

| Payments on account | 29,17196 |
| :--- | :--- |
| License dues and royalties | 105,51640 |
| Permit dues | 32,60916 |
| Trespass dues | 1,13988 |
| Fines | 12800 |
| Interest charges | 32469 |
| Rentals and fees | 2,32615 |
| Deposits | 2,57450 |
| Bonus | 1,00000 |
| Total | $\$ 174,79074$ |

There were thirty timber licenses current on April 30, 1926, being two less than the previous year, one having been cancelled, three terminated, three relinquished and five new licenses having been issued.

The expenditure for forest protection on Indian reserves amounted to the sum of $\$ 10,216.34$, of which $\$ 4,477.37$ was used for the purpose of extinguishing forest fires. A total of 43 fires were reported, of which 38 were extinguished without doing appreciable damage to the timber. The area reported burned over, was 7,350 acres, with a loss of timber of approximately $2,500,000$ f.b.m.

Estimates of timber and reports on land were made of three reserves during the course of the usual administrative work and this data has been added to the record of the timber resources of the Indians.

The Indians are continually urged to utilize and develop their forest resources to the best advantage and are constantly reminded that the forest in addition to providing lucrative employment also constitutes an effective screen and habitat for game and fur-bearing animals.

## BUILDINGS

The following is a summary of the buildings which were erected during 1925-26: -

## INDIAN RESIDENTIAL SCHOOLS

A new Indian residential school was built at Onion Lake, Sask.
A new Indian residential school was built on the Blood reserve. A portion of a new Indian residential school was built at Sturgeon Landing, Sask.

A commencement was made on the building of an Indian residential school at Morley, Alta., and Sioux Lookout, Ont. OTHER BUILDINGS

An electric lighting plant was installed at McIntosh Indian residential school.
A manual training building was built at Coqualeetza, B.C.
A manual training building was built at Fraser Lake, B.C.
An agent's and doctor's office was built at Restigouche,P.Q.
An Indian agent's office was built at Muncey, Ont., and at Point Bleue, Que.
Six houses were built for the Indians at Sydney, N.S.
The Department also contributed a portion of the cost of the building of a new Indian wing to the Lady Minto Hospital at Chapleau, Ont.

## DAY SCHOOL BUILDINGS

A combined,day school and residence was built at Oka, Que.
A combined day school and residence was built at Kettle Point, Ont.
A teacher's residence was built at Oneida No.'s 2 and 3 schools.
A class room and residence was added to the No. 11 school on the Six Nations Reserve.
A new day school and residence was built at the No. 6. school on the Six Nations reserve.
A new day school was built at Massett, B.C.

## BRIDGES, DRAINAGE, IRRIGATION SYSTEMS, ROADS AND WHARVES

This engineering work consisted principally in the construction and maintenance of bridges, roads, wharves, dyking, drainage, irrigation and water supply systems.

## BRIDGES

Bridges were constructed or repaired on the following reserves: - Doncaster, Que.; Maniwaki, Que.; Capilano, B.C.; Massett, B.C.; Peguis, Man.; Manitoulin Island, Ont.; and Millbrook, N.S.

## DRAINAGE SYSTEMS

Drainage systems have been constructed or improved on the following reserves: - Six Nations Ont., in co-operation with the city of Brantford, Ont; Cape Crocker, Ont.; Cote, Sask.; Sechelt, B.C.; Bella Coola, B.C. and North Temiskaming, Que.

## WHARVES AND DYKING

Protection work has been carried out in co-operation with the British Columbia Provincial Government at Port Essington, B.C., on the main road along the Skeena river, also along the Cowichan river. Cowichan reserve, B.C.

Repairs to wharf were carried out at Parry Island, Ont.

## IRRIGATION SYSTEMS

Irrigation systems have been installed or put in a state of repair for the improvement of farming lands on the following reserves. - Kamloops, B.C.; Fontaine Res., B.C.; Williams Lake Res, No. 1; Shackin Res., B.C.; Bridge River No. 2, B.C.; and Soda Creek, Res. No. 1, B.C.

## WATERWORKS SYSTEMS

A hydroelectric and waterworks system for domestic purposes and fire protection has been completed for the McIntosh Indian residential school, Ont.

## SEWAGE DISPOSAL SYSTEMS

A sewage disposal system has been installed for the new Kamloops Indian residential school.

## ROADS

Highways are in course of construction on the following reserves: -

Caughnawaga - St. Isidore highway on the Caughnawaga Indian reserve, Que.
Provincial highway through the Tyendinaga Indian Reserve, Ont.
Cockshutt - Willow Grove highway on the Six Nations Reserve, Ont.
Ottawa - Maniwaki highway through the Maniwaki Reserve, Que.

Main roads have been improved on the following reserves: -Golden Lake Indian reserve, Ontario; Tyendinaga Indian reserve, Ontario; Six Nations Indian reserve, Ontario; Oneida Indian reserve, Ontario; Carodoc Indian reserve, Ontario; Moravian Indian reserve, Ontario; Walpole Island Indian reserve, Ontario; Saugeen Indian reserve, Ontario; West Bay Indian reserve, Ontario; Gore Bay Indian reserve, Ontario; Cape Croker Indian reserve, Ontario; Manitoulin Indian reserve, Ontario; Alnwick Indian reserve, Ontario; Christian Island Indian reserve, Ontario; Salmon River Indian reserve, Nova Scotia; Eskasoni Indian reserve, Nova Scotia; New Germany Indian reserve, Nova Scotia; Whycocomagh Indian reserve, Nova Scotia; Malagawatch Indian reserve, Nova Scotia; Blackfoot Indian reserve, Alberta; Sea Bird Island Indian reserve, British Columbia; Lytton Indian reserve, British Columbia; Cote Indian reserve, Saskatchewan; Peguis Indian reserve, Manitoba; Abenakis Indian reserve, Quebec; Restilgouche Indian reserve, Quebec; Ouiatchouan Indian reserve, Quebec; Caughnawaga Indian reserve, Quebec.; Doncaster Indian reserve, Quebec; St. Regis Indian reserve, Quebec.

Electric lighting systems were installed in various Indian villages of British Columbia, viz., Cape Mudge and Squamish.

## SURVEYS

Nova Scotia. - Survey and subdivision of the Indian reserve at Sydney.
New Brunswick. - Retracement surveys were made at Eel Ground Indian reserve No. 2 and Richibucto Indian reserve No. 15.

Quebec. - Investigations and re-establishment surveys were made in connection with lots 197, 198, 208, 195, and 166A at Caughnawaga.

Ontario. - The work in connection with correction surveys and revaluations of islands in Georgian bay was continued.
School site was surveyed at Kettle Point.
A parcel in Indian reserve No. 38A at Kenora was surveyed for the Cecelia Jeffery school and a road survey was made in connection with this parcel.

A correction survey was made at, Kimerley townsite.
A location survey was made at Rama reserve.
A portion of the Whitefish Bay Indian reserve No. 32A was subdivided for Indian purposes.
Manitoba. - Part of the Lizard Point Indian reserve No. 62 was subdivided for Indian purposes.
Reserves were selected and surveyed at Island Lake for the Island Lake band.
British Columbia. - Seven survey parties were in the field on the work of surveying new reserves in accordance with the Royal Commission's report. 121 parcels were surveyed. Of these 66 are in the Stuart Lake agency; 6 in the New Westminster agency; 19 in Lytton, outside of the railway belt; 12 in the Bella Coola agency, and 18 in the Kwawkwelth agency.

A resurvey and subdivision were made of the Seymour Creek Indian reserve No. 2.
Yukon. - New reserve was selected and surveyed near Carmacks.

## SUMMARY OF INDIAN AFFAIRS IN THE VARIOUS PROVINCES BASED ON THE REPORT OF THE DEPARTMENT'S AGENTS AND THE INSPECTORS FOR THE FISCAL YEAR ENDED MARCH 31, 1926.

The local administration of the Indian lands, on the reserves scattered throughout the Dominion, is conducted through the department's agencies of which there are in all 114. The number of bands included in an agency varies from one to more than thirty. The staff of an agency usually includes various officers in addition to the agent, such as the medical officer, clerk, farm instructor, field matron, nurse, constable, stockman, etc., according to the special requirements of the, agency in question. At many of the smaller agencies in the older provinces, where the Indians are more advanced, the work is comparatively light, requiring only the services of an agent. The work of the agencies is supervised by the department's inspectors, each inspector having charge of a certain number of agencies.

## ONTARIO

Agencies. - The following agencies are included in the province of Ontario: Alnwick, Bay of Quinté, Cape Croker, Chapleau, Chippewas, Munsees, and Oneidas of the Thames, Christian Island, Fort Frances, Georgina and Snake Islands, Golden Lake, Gore Bay, Kenora, Lake Superior (Eastern and Western Divisions), Manitowaning, Missisaguas of the Credit, Moravians of the Thames, Parry Sound, Rama, Rice and Mud Lakes, Sarnia, Saugeen, Seugog, Six Nations, Sturgeon Falls, Thessalon and Walpole Island.

Tribal Origin. - The great majority of the Indians of Ontario are Ojibwas, and are of Algonkin stock. The Oneidas of the Thames, the Mohawks of the Bay of Quinté, the Mohawks of the Parry Sound district, and the Six Nation of Brantford are of Iroquoian stock. There is a band of Pottawattamies at Walpole island, and Delawares at the Caradoc agency; these are of Algonkin stock.

Occupations. - The Indians in the western and central parts of Ontario engage largely in farming. The reserves generally are well suited to this purpose and the activity of the department's field agents has resulted in a steady improvement both in the methods of operation and the results achieved. The success achieved by the returned soldiers of this province has been especially creditable and they are rapidly developing prosperous communities.

During the summer months Indians find a profitable source of income as guides and canoe-men. Many are employed at various industries and trades, while railway and navigation companies employ a large number. As a rule they are excellent bushmen and many find employment in the various lumber camps. There is still an excellent market for snowshoes, canoes and mocassins, and these are usually manufactured by the other members of the community.

The women also have many sources of income; some are employed as domestics; others support themselves by making baskets and fancy work. In certain districts berry-picking is an important item and furnishes considerable income.

Dwellings. - A great majority of the Ontario Indians have comfortable farmhouses which compare very favourably with those of their white neighbours. Many own houses of brick and stone, but in the outlying and more remote districts the old log houses are in the majority. In the more settled districts the Indians have followed the examples of the whites and both houses and farm buildings are comfortable and of excellent construction.

New Ontario. - In the remote parts of Ontario hunting and fishing are still the chief sources of livelihood. While fur has been very scarce the price has been correspondingly high. Fishing, however, has not been as successful this year owing to the scarcity of the market and the low prices. Acting as guides and canoe-men during the summer months adds considerably to, their income. While agriculture is not carried on to any extent, most of the bands grow considerable crops of potatoes and vegetables. They are, of necessity, more or less nomadic and consequently live in tents most of the year. This condition will greatly change as civilization progresses.

## QUEBEC

Agencies. - The following agencies are included in the province of Quebec: Bécancour, Bersimis, Caughnawaga, Lake St. John, Lorette, Maria, Mingan, Oka, River Desert, Restigouche, Seven Islands, St. Regis, Temiskamiiig and Viger.

Tribal Origin. - The principal tribes found in Quebec are: Iroquois at Caughnawaga, Lake of Two Mountains, and St. Regis; the Hurons of Lorette are also of Iroquoian stock; the Montagnais, who are also of Algonkin stock, at Bersimis, Mingan, Lake St. John, Seven Islands; the Abenakis, also of Algonkin stock, at Bécancour and St. Francis; the Micmacs, also of Algonkin stock, at Maria and Restigouche; and the Malecites, also of Algonkin stock, at Viger.

In the agricultural districts, of the province the Indians are developing a keener interest in farming operations and are making a decided success. In the Gaspe peninsula the Indians find employment in the lumber camps and mills, but on the north shore of the gulf, fishing, hunting and trapping are still the principal sources of income. In the northern part of the province lumbering is the chief pursuit. One of the principal industries of the Indians of Quebec is making baskets, and many of the Indians spend the summer months at the resorts in order to dispose of the baskets, lacrosse sticks, racquets, mocassins, etc., to the tourists. Some of them, particularly in the Saguenay district, act as guides and canoe-men.

Dwellings. - In the older settled districts of the province the Indians own many excellent stone and brick houses. Generally speaking, the buildings are almost all of good construction, comfortable and sanitary. In the more remote districts, where hunting and trapping are still the principal occupations, the Indians necessarily live in tents during the greater part of the year.

The North Shore. - Along the north shore of the gulf of St. Lawrence, the Indians have been taking a marked interest in the fishing industry. At Mingan, Natashkwan, Romaine, St. Augustine and Moisie, the fishing is under departmental supervision. Salmon and cod are the principal marketable fish, and are a source of considerable income to the Indians. The land is not suitable for extensive cultivation, but many of the Indians have very creditable gardens.

## NEW BRUNSWICK

Agencies. - There are three agencies in the province of New Brunswick, the Northeastern located at Buctouche, the Northern located at Perth, and the Southwestern located at Fredericton.

Tribal Origin. - The majority of the Indians of New Brunswick belong to the Micmac race, which is of Algonkin stock. In addition to these there are some bands of Malocites, also of Algonkin stock.

Occupations. - In the Northeast division the Indians are mostly engaged in fishing, hunting and trapping. Some farming is carried on, and the Indians have rather tended to increase their interest in this regard.

The lumbering industry employs quite a large number and the Indians all through the eastern provinces have become very proficient in the lumber camps, on the river drives and in the mills. In the Northern division there is less farming carried on, and the Indians during the summer months find employment generally as day labourers. In the Southern division they support themselves chiefly by the manufacture and sale of Indian wares.

## NOVA SCOTIA

Agencies. - There are nineteen Indian agencies in the province of Nova Scotia, namely: Yarmouth, Digby, Shelburne, Queens, Lunenburg, Annapolis, Kings, Windsor, Shubenacadie, Halifax, Cumberland, Colchester, Pictou, AntigonishGuysboro, Richmond, Inverness, Victoria, Sydney, and Eskasoni.

Tribal Origin. - The Indians of Nova Scotia are of Algonkin stock, and bear the distinctive name of Micmac.
Occupations. - They follow various occupations, but, as a rule, do not confine themselves to any particular one. Many of them cultivate the land with indifferent success, but as there are exceptions in almost every case, so it is with our Indians; a few of them are succeeding very well as farmers. The majority of those, living near industrial centres usually work as day labourers. Hunting, trapping, and acting as guides for sportsmen are favourite occupations, more especially with Indians of middle age. Basket-making and the manufacture of fancy moccasins, etc., are confined mostly to women. A profitable employment among Indians in a. few sections, of Nova Scotia is the manufacture of hockey sticks, and they appear to be experts at the business.

Dwellings. - With very few exceptions, Indians in Nova Scotia occupy houses of frame construction, well finished on the outside, but unfinished inside. Every settlement, however, has a few comfortable dwellings well finished throughout Other buildings owned by Indians - barns and storehouses - are mostly of frame construction also.

## PRINCE EDWARD ISLAND

Agency. - One agency is sufficient for the purposes of the department in this province, as the total Indian population is only 292.

Tribal Origin. - The Indians of this province all belong to, the Micmac tribe, which is of Algonkin stock.
Occupations. - But few of the Indians of Prince Edward Island are farmers. The principal industries are basket-making and fishing. The oyster fisheries which had been a complete failure for some years, are again profitable and have added somewhat to the income of the Indians.

## MANITOBA

Agencies. - The following agencies are included in the Province of Manitoba; Fisher River, Clandeboye, Norway House, Griswold, Portage la Prairie and Manitowapah, Pas and Birtle.

Tribal Origin. - The majority of the Indians of Manitoba belong to the Ojibewa race, which is of Algonkin stock. Bands of Swampy Crees are found at the Norway House and Fisher River agencies and in the York factory district;
these are also of Algonkin stock. The Indians located at the Griswold agency are Sioux; there are also, Sioux at the Birtle and Portage la Prairie agencies. There, is a band of Chipewyans at Fort Churchill; this tribe is of Athapascan stock.

The reserves in Manitoba suitable for extensive agriculture are mainly within the Birtle, Griswold, and Portage la Prairie agencies. On some reserves during the last two years the crops. have not been up to the standard and the Indians have somewhat lost heart in their farming operations, but generally speaking progress has been satisfactory.

In the northern agencies the occupations are mostly hunting and trapping, but fishing has been becoming a more and more important factor during the past four or five years, and considerable income has been derived therefrom. While fur has been scares the price has been high and the market for fish has increased. All of the northern Indians are expert guides and canoe-men, and many find employment in this way or with the transport or fur companies.

In the southern and more settled districts, many of the younger people seek employment as day labourers, and owing to the high wages have been fairly prosperous. The Indian women make, needle work, baskets, etc., for which there is a ready market.

Dwellings. - In recent years the Indians have adopted more sanitary methods of living. Their houses are more comfortably furnished and of better construction than formerly. In the north the nomadic life of the Indians does not permit of other than the old-fashioned log house, but even these are being greatly improved and in some cases are being replaced by suitable frame dwellings.

## SASKATCHEWAN

Agencies. - The following agencies are included in the province of Saskatchewan: Assiniboine, Battleford, Carlton, Crooked Lake, Duck Lake, Moose Mountain, Onion Lake, Pelly, Qu'Appelle and Touchwood Hills.

Tribal Origin. - The most numerous tribes among the Saskatchewan Indians are the Ojibewas, Swampy Crees and Plain,Crees, which all belong to the great Algonkin stock. In addition to these, Sioux Indians are found at the Assiniboine, Moose Mountain, Qu'Appelle and Carlton agencies, and on the Moose Woods reserve. In the Onion Lake agency there is a band of Chipewyan, who are of Athapascan stock. There are also a few Chipewyan Indians in the Isle à la Crosse district.

The principal occupation of the Indians of Saskatchewan is mixed farming and stock-raising. The close supervision which the department has bad over these Indians has tended to greatly improve their method of farming and consequently their crops and income derived front them have greatly increased. Most of the Indians are well provided with good quality of machinery. As a rule they have good stock and suitable houses. In the outlying districts, however, hunting and trapping are still the main sources of income and will so remain until civilization encroaches upon the hunting grounds.

Dwellings. - The dwellings of the Indians on the reserves where farming is carried on are now mostly of frame construction. The outbuildings, however, are generally of logs, but even there has been some improvement.

## ALBERTA

Agencies. - The following agencies are included in the Province of Alberta: Blackfoot, Blood, Edmonton, Hobbema, Peigan, Saddle Lake, Sarcee, Stony and Lesser Slave Lake.

Tribal Origin. - The Alberta Indians are of Algonkin stock, with the exception of the Sarcees near Calgary and the Beavers and Slaves in the Lesser Slave Lake agency, who are Athapascan, and the Paul's band in the Edmonton agency, who are Iroquoian, and the Stonies, who are of Siouan stock. The Algonkin Indians of Alberta axe subdivided into Blackfoot nation, comprising the Indians of the Blackfoot, Blood and Peigan agencies, Plain Crees found in the Lesser Slave Lake, Saddle Lake, and Hobbema agencies, and a band of Ojibewas at Moberly Lake, in the Lesser Slave Lake agency.

The principal occupations of the Indians of Alberta are farming and stock-raising. Almost all the reserves in the settled districts of the province have large herds of horses and cattle.

In the northern parts of the province hunting and trapping are still almost the sole sources of income; there is practically no farming carried on and the construction of steamers on the Peace and Athabasca rivers, and of the railways to Peace River Crossing and Fort McMurray, have greatly lessened the wages of the Indians with the trading companies and transports. However, the price of fur has been even higher than in past years.

Dwellings. - In the southern part of the province the dwellings and farm buildings are of excellent construction and quality. Almost all the reserves where extensive farming is carried on boast of up-to-date modern dwellings, comfortable and well constructed. In the northern parts of the province the majority of the Indians continue to follow their primitive nomadic mode of life, and many of them still live in tents and tepees during the greater part of the year.

## BRITISH COLUMBIA

Agencies. - The following agencies are included in the Province of British Columbia: Babine and Upper Skeena, Bella Coola, Cowichan, Kamloops, Kootenay, Kwawkewlth, Lytton, New Westminster, Okanagan, Queen Charlotte, Stikine, Stuart Lake, Vancouver, West Coast, Williams Lake and Skeena River.

Tribal Origin. - The Indians of the Bella Coola, Cowichan, Kamloops, Lytton, New Westminster, Vancouver, and Okanagan agencies belong to the Salish tribe. The Kootenay tribe is located in the agency of the same name. The Kwakiutl-Nootka tribe is located at the Kwawkewlth and West Coast agencies; the Haidas, in the Queen Charlotte islands; the Tlingits, in the Stikine; and the Tsimshians, in the Skeena River agency. The Indians of the Babine, Stuart Lake and Williams Lake agencies belong to the Athapascan race.

In addition to these there are about 3,000 nomadic Indians in the province who cannot be correctly classified according to linguistic stock or tribal origin.

Occupations. - The occupations of the Indians of British Columbia vary with their habitat. The Indians situated along the coast earn their livelihood principally by fishing. In many instances they own their own motor-launches, nets and gear, while others are supplied by the various canneries. Many of the women are also employed in the canneries or in the hop fields, and make a very steady income.

The Indians of the Queen Charlotte islands own and operate their own small plant for rendering the oolachan or candle fish. In the inland parts of the province some farming operations are carried on and particularly in the irrigated districts grain, fruits of all kinds, and vegetables have been raised with success.

These Indians have been making marked progress in this regard and are now well equipped with modern machinery.

The Kootenay, Kamloops, Okanagan and New Westminster Indians own large herds of horses and cattle. While the Indians in the northern and remote parts of the province still depend upon hunting and trapping for their livelihood, the agents report a marked improvement in their manner of living.

Dwellings. - Except for the more remote districts the Indians have built comfortable and modern dwellings and outbuildings. Their progress in this respect has been perhaps more rapid than that of any other Indians of the Dominion.

## NORTHWEST TERRITORIES

Agencies. - The department has now three agencies in the Northwest Territories, namely Fort Simpson, Fort Smith, and Fort Resolution.

Tribal Origin. - The principal tribes found in the Far North are the Slave, Hares, Loucheux, Sicannies, Dogribs, Yellow-knives, Chipewyans and Caribou Eaters. All these tribes are of Athapascan stock. There are a few Crees in the neighbourhood of Chipewyan. These are of Algonkin stock. The most northerly tribes are the Takudah, who extend to the Mackenzie Delta; and the Copper Mines, who are located along the Coppermine river. The territory occupied by these two last-mentioned tribes is contiguous to that inhabited by the Eskimos.

These Indians depend entirely upon hunting and trapping for a livelihood. The department in 1921 made a treaty with the Indians along the Mackenzie river thus bringing under the supervision of the Dominion Government practically the only Indians in Canada with whom treaty had not been made.

Occupations. - A few have been induced to raise small plots of potatoes. They own no horses or cattle, transportation being almost entirely by canoe along the great waterways, or by dogs in winter. They catch and preserve large quantities of whitefish for their own use and for consumption by their dog-trains in winter.

## YUKON

Tribal Origin. - The Forty Mile, Blackstone, and Moosehide bands belong to the Takudah tribe. There is a band of Slavies at Lancing Creek who migrated from Fort Good Hope, On the Mackenzie river; another band of Slavies, called Nahanies, is located at the headwaters of the Pelly river. All these Indians are of Athapascan stock. At Mayo, Selkirk, Little Salmon and Carmaeks there are bands belonging to the tribe known as Stick Indians. Bands belonging to the Tlingit tribe are found at Whitehorse, Teslin Lake, Champagne Landing, and Carcross.

Occupations. - Hunting trapping and fishing are the chief occupations of the Yukon Indians, and they have been fairly successful during the past year. The women also derive some revenue from the sale of mocassins and curios of various kinds, while the men are expert at making toboggans and snowshoes. Practically no farming is carried on owing to climatic conditions, but some of the Indians cultivate patches of potatoes and other vegetables.

## FINANCIAL

At the close of the twelve months ended March 31, 1926, capital of the Indian Trust Fund, which at the end of the preceding year amounted to $\$ 12,124,389.17$, had increased to $\$ 12,418,460.77$.

The amounts expended from the Consolidated Revenue Fund were as follows voted by Parliament for the purposes of the department, $\$ 3,673,968.78$, and annuities by statute, $\$ 217,031$.

On March 31, 1926, the balance to the credit of the Indian Savings Account for the funding of the annuities and earning of pupils at industrial schools was $\$ 200,493.39$. Deposits and interest during the twelve months aggregated \$61,124.15, and withdrawals, \$27,909.93.

## GENERAL

In 1924 a complete census was made by the department of the Indians and Eskimos of Canada, which was published in the annual report. This was the first census that had been made since 1916 and it shows slight increase in the Indian population as compared with previous records. A recapitulation of this census will be found in Part II of this report, which follows herewith and therein also will be found statistics with regard to Grain, Vegetable and Root Production: Land, Private and Public Buildings and Property; Live Stock and Poultry; General Effects; Value of Real and Personal Property and Progress during year; Sources and Value of Income; Schools; Indian Land; Civil Government; Appropriation Accounts and Indian Trust Fund.

I have the honour to be, sir, Your obedient servant, DUNCAN C. SCOTT,
Deputy Superintendent General of Indian Affairs

TABULAR STATEMENTS

TABLE No. 1. - RECAPITULATION: CENSUS OF INDIANS AND ESKIMOS ARRANGED UNDER DEPARTMENTAL INSPECTORATES AND DISTRICTS

| Inspectorates and Districts | Number in Band | Religions |  |  |  |  |  |  | Under 6 years |  | From 6 to 15 inclusive |  | From 16 to 20 inclusive |  | From 21 to 65 inclusive |  | From 65 years upwards |  |

## SCHOOL STATEMENT

## STATEMENT of Indian Day Schools in the Dominion for the Fiscal Year ended March 31, 1926

NOTE. - The "Standard" indicates the classification of the pupils according to the reading-book used and therefore shows the degree of general advancement in all the studies prescribed by the Curriculum, thus: -

| Standard I First Reader, Part I. | Standard IV Third Reader. |
| :--- | :--- |
| Standard II First Reader, Part II. | Standard V Fourth Reader. |
| Standard III Second Reader. | Standard VI Fifth Reader. |

| School | Reserve | Agency | Teacher | Number on Roll |  |  | Average Attendance | Standard |  |  |  |  |  |
