## **Preface**

This report was initially prepared in 1988 by the Evaluation Directorate of the Department on Indian Affairs and Northern Development (DIAND). The responsibility for the updates has been transferred to Quantitative Analysis and Socio-demographic Research (QASR), Finance and Professional Services of DIAND. Annual updates of this report would not be possible without the cooperation of the various programs in DIAND.

The officers responsible for this project were Gilles Y. Larocque (Project Manager), R.Pierre Gauvin (Project Leader) assisted by Darrell Buffalo.

## Introduction

As registered Indians reassume control of their political, social and economic affairs, it is essential that those individuals involved in this process have available a comprehensive and accurate picture of Indian conditions.

The *Basic Departmental Data* report was designed to be a key data reference document on the demographic, social and economic conditions of registered Indians in Canada using departmental administrative databases.

This report provides historical and current statistics on the evolution of the conditions of registered Indians living on-reserve over the past 23 years.

A chapter focusing on the North has been introduced in this release. The Department of Indian Affairs and Northern Development (DIAND) is responsible for the well-being of both Native and non-Native populations in the Northwest Territories and the Yukon either in the form of direct program expenditures or transfer payments to the territorial governments. Data in the chapter on the North pertains to the total population unless otherwise indicated.

Data for this report are derived primarily from departmental administrative data sources as well as sources from departments with an interest in Indian conditions (e.g. Health and Welfare Canada). Subjects covered include: population, education, health and housing conditions, social assistance, self-government and labour force participation.

*Basic Departmental Data - 1989* includes projections in the Population and Health Conditions chapters. It was felt that users would benefit by having historical and projected trends to gain better insights on the evolution of the registered Indian population.

The analysis found in this report is essentially descriptive in nature. This report updates the earlier release of *Basic Departmental Data* in 1988. A number of presentation changes have been made in this update. On each subject, the report presents the statistics in textual, graphical and table formats on a two page spread. On the page opposite each table, highlights pertaining to the table are provided as well as a graphic representation of the information. Appropriate notes and sources are indicated at the bottom of each table. Numbers may differ slightly from the previous release due to rounding or revisions.

Throughout this report "Indian" means registered or status Indian, that is persons with status within the meaning of the Indian Act and whose names appear on a register maintained by DIAND.

In 1988 registered Indians comprised 1.7 percent of the total Canadian population. They were generally affiliated to one of the 593 bands in the country and three-fifths of the population resided on 2,234 reserves and Crown lands.

## Population / Growth

Chart 1

### Registered Indian Population Growth On and Off-Reserve

### Highlights

The registered Indian population increased from 224,164 in 1966 to 443,884 in 1988, a twofold increase.

With the reinstatement of Indians through Bill C-31, this population is expected to reach approximately 623,000 at the turn of the century, a 40 percent increase from 1988.

Eight out of 10 registered Indians lived on-reserve in 1966 but this proportion dropped to 62 percent in 1988 and is expected to remain at this level in 2001.

The off-reserve population growth rate, which was quite significant between 1986 and 1988, was largely attributable to the reinstatement of Indians under Bill C-31.

Table 1

# Registered Indian Population and Average Annual Growth Rates (AAGR), On / Off-Reserve

			2.30			1.30			1.91
1996	354,379	61.8		218,890	38.2		573,269	100	
			1.70			1.64			1.67
2001	385,514	61.9		237,387	38.1		622,901	100	

## Notes:

1. On-reserve includes Crown lands and settlements.
2. See Glossary for definition of term.
3. In 1966, the off-reserve total includes 274 individuals whose type of residence was not stated.
4. In 1971, the off-reserve total includes six individuals whose type of residence was not stated.
5. In 1985 the Indian Act was amended to allow, through Bill C-31, the restoration of Indian status to those who had lost it. The inflated AAGRs from 1986 to 1991, particularly off-reserve, are a result of the reinstatement process, the bulk of which is expected to be completed in 1990/91.

## Population / Bill C-31

---

Chart 2

### Registered Indian Population Growth Showing Bill C-31

---

### Highlights

In 1985 at the beginning of the reinstatement process under Bill C-31, approximately 1,600 C-31 registrants were added to the Indian Register.

By 1991 at the end of the reinstatement process, roughly 92,000 C-31 registrants and their offsprings are expected to be added to the Register, representing 18 percent of the total registered Indian population for that year.

## Population / Regions

---

Chart 3

### Registered Indian Population by Region

---

### Highlights

While the total registered Indian population nearly doubled between 1966 and 1988, the biggest regional gains south of 60° were in Saskatchewan and Alberta. This trend is expected to continue until 2001.

In 1988, 23 percent of the total Indian population was located in Ontario, the largest proportion of all regions. Slightly over one percent of the population was in the Yukon.

## Population On-Reserve / Regions

---

Chart 4

### Registered Indian Population On-Reserve by Region

---

### Highlights

The regional on-reserve proportions (including Crown lands and settlements) in 1988 ranged from a low of 54 percent in Saskatchewan to a high of 87 percent in the Northwest Territories.

The biggest regional gains south of 60° were in the Atlantic and Quebec regions where the on-reserve population increased by 86 and 75 percent respectively between 1966 and 1988.

South of 60°, Quebec had the highest proportion of its Indian population living on-reserve in 1988 (74%) and is expected to be the same in 2001.

Between 1988 and 2001, Saskatchewan and Alberta are expected to have the largest percentage increases in the on-reserve population among all regions (74 and 48 percent respectively).

## Population Off-Reserve / Regions

Chart 5

### Registered Indian Population Off-Reserve by Region

### Highlights

The off-reserve population increased substantially between 1966 and 1988 largely due to the implementation of Bill C-31 in 1985. It increased from 43,746 to 170,118 registered Indians nationally, a fourfold gain.

The proportion of off-reserve Indians increased accordingly from 20 percent in 1966 to almost 40 percent in 1988, as most C-31 registrants lived off-reserve.

All regions have seen their respective shares of off-reserve Indians increase over the last 20 years. The biggest off-reserve regional gains south of 60° between 1966 and 1988 were in Saskatchewan and Alberta with seven and sixfold increases respectively. Quebec had the lowest increase.

Among regions in 1988, Saskatchewan had the highest proportion of its Indian population living off-reserve (46%) while the Northwest Territories had the lowest (13%).

From 1988 to the turn of the century, Alberta and Manitoba are expected to have the largest increases in the off-reserve population south of 60°.

---

## Population / Geographical Zones

---

Chart 6

### Registered Indian Population On-Reserve by DIAND Geographical Zones

---

### Highlights

The proportion of on-reserve Indians living in urban, rural, remote or special access areas has remained relatively constant between 1971 and 1987.

In 1987, slightly more than a third of on-reserve Indians (37%) were located in DIAND defined urban zones while almost one-fifth (19%) of Indians were in special access zones where no year-round road access to the nearest service centre is available.

## Population / Geographical Zones / Regions

---

Chart 7-A

### Registered Indian Population On-Reserve by Region and DIAND Geographical Zones Urban & Rural

---

### Highlights

The regional proportions of on-reserve Indians living in DIAND defined geographical zones have remained nearly constant between 1971 and 1987 (Tables 7-A and 7-B).

Over one-fifth of on-reserve Indians lived in remote and special access areas in 1971.

All Indians living on-reserve in the Atlantic region were located in urban and rural areas while only half of Yukon's Indians were in these areas.

Manitoba had the highest proportion of its on-reserve Indian population (31%) living in special access areas where no year-round road access to the nearest service centre is available.

## Population / Geographical Zones / Regions

---

Chart 7-B

### Registered Indian Population On-Reserve by Region and DIAND Geographical Zones, 1987

### Highlights

The regional distribution of the on-reserve Indian population by DIAND geographical zones has remained relatively constant between 1971 and 1987 (Tables 7-A and 7-B).

As in 1971, approximately three-quarters of on-reserve Indians lived in urban and rural areas in 1987.

At least nine out of 10 Indians in the Atlantic, Alberta and Saskatchewan regions were located in urban and rural areas in 1987.

Table 7-B

## Health Conditions

---

- ◆ *Life Expectancy*
- ◆ *Mortality Rates*
- ◆ *Infant Mortality Rates*
- ◆ *Mortality Rates by Cause*
- ◆ *Tuberculosis*

## Life Expectancy

Chart 8

### Registered Indian Population, Life Expectancy at Birth by Sex

### Highlights

Life expectancy at birth for registered Indians is increasing and will continue to increase.

Between 1976 and 2001, the life expectancy at birth of Indians is expected to increase by approximately 10 years for both sexes.

The gap between sexes will continue to increase until 2001. The gap in 1976 was 6.5 years in favour of females and could climb to 7.2 years by 2001.

Life expectancy for males increased from 59.8 in 1976 to an expected 69.8 years in 2001 while that for females should increase from 66.3 to 77.0 years.

Table 8

# Life Expectancy at Birth by Sex, Registered Indian Population

Canada, 1976 – 2001

<u>Life Expectancy at Birth(1)</u>		
Year	Male	Female
1976	59.8	66.3
1981	62.4	68.9
1986	63.8	71.0
1991	65.7	73.0
1996	67.7	75.0
2001	69.8	77.0

Population Projections of Registered Indians, 1987 to 2011, Preliminary Report, DIAND, 1989.

---

## Mortality Rates

---

Chart 9

### Registered Indian Population On-Reserve, Deaths and Mortality Rates

---

### Highlight

While the number of deaths between 1955 and 1986 was relatively constant, averaging approximately 1,700 deaths per year over the period, the registered Indian mortality rates have decreased significantly from 10.5 to 5.3 deaths per 1,000 population.

Table 9

## Deaths and Mortality Rates, Registered Indian Population Living On-Reserve

Canada, 1955 - 1986

Year	<u>Number of Deaths</u>	<u>Mortality Rates (1)</u> (per 1,000)
1955	1,578	10.5 (2)
1960	1,623	8.8
1967	1,932	8.4
1976	1,875	7.3
1982	1,709	6.0
1983	1,642	5.7
1986 (3)	1,671	5.3

### Notes:

1. Mortality rates have been calculated using Health and Welfare Canada data. The population numbers do not correspond exactly to Indian Register population numbers.
2. Since the mortality rate for 1955 was not available from Health and Welfare Canada, this figure was estimated using the number of registered Indians in 1955 derived from "Indian Conditions: A Survey".
3. Figures for 1986 include estimates for the province of British Columbia.
4. Population served by Health and Welfare Canada. See Glossary for definition of term.

---

## Infant Mortality Rates

---

Chart 10

### Registered Indian Population On-Reserve, Infant Mortality Rates

---

### Highlights

One factor in the increased life expectancy of registered Indians is the declining infant mortality rate.

Over the past 26 years, infant mortality rates for Indians have dropped dramatically from 82.0 in 1960 to 15.9 per 1,000 live births in 1986.

Table 10

**Infant Deaths and Infant Mortality Rates  
Registered Indian Population Living On-Reserve**

**Canada, 1960-1986**

<b>Year</b>	<b>Number of Infant Deaths (1)</b>	<b>Number of Live Births</b>	<b>Infant Mortality Rate (per 1,000)</b>
1960	617	7,522	82.0
1963	568	8,071	70.4
1968	n/a	n/a	48.6
1973	273	6,717	40.6
1978	192	7,239	26.5
1983	146	8,029	18.2
1986 (2)	132	8,320	15.9

**Notes:**

1. Infants are children of one year of age and under.
2. Figures for 1986 include estimates for the province of British Columbia.
3. Population served by Health and Welfare Canada. See Glossary for definition of term.

**Sources:**

---

## Mortality Rates by Cause

---

Chart 11

### Registered Indian Population On-Reserve, Mortality Rates by Major Cause

---

### Highlights

Over the past 26 years, Indian mortality rates associated with Respiratory and Digestive diseases have declined.

In 1986, Injury and Poisoning, Circulatory System diseases and Neoplasms have become the three major causes of death among registered Indians.

Table 11

## Number of Deaths and Mortality Rates by Cause Registered Indian Population Living On-Reserve

## Tuberculosis

---

Chart 12

### Registered Indian Population, Tuberculosis Cases

---

### Highlights

Although the number of tuberculosis cases decreased over the last 32 years from 1,922 in 1955 to 372 in 1987, little improvement has been made since 1980, averaging approximately 350 cases per year between 1980 and 1987.

Since 1985, the number of new and reactivated cases of tuberculosis has been rising approximately eight percent a year.

Table 12

- ◆ *Band-operated Schools*
- ◆ *Enrolment by School Type*

---

## Enrolment

---

Chart 13

### Enrolment in Kindergarten, Elementary and Secondary Schools On-Reserve

---

### Highlights

The number of on-reserve children enrolled in elementary and secondary schools has been increasing in the last three decades. It doubled between 1960/61 and 1988/89, reaching 85,582 students in 1988/89.

Enrolment is increasing not only due to the increase in the school-age population, but also due to increases in the enrolment rate.

The percentage of school-aged children living on-reserve enrolled in kindergarten, elementary and secondary schools has increased from 72 percent in 1960/61 to 89 percent in 1988/89.

Table 13

# Enrolment in Kindergarten, Elementary and Secondary Schools, On-Reserve

Canada, 1960/61 - 1988/89

Year	<u>Enrolment (1)</u>	<u>Population 4-18 Years</u>	<u>Enrolment Rate</u>
1960/61 (2)	41,671	57,550	72.4 %
1965/66 (2)	54,670	73,632	74.2 %
1970/71	68,449	81,531	84.0 %
1975/76	71,817	88,660	81.0 %

1985/86	80,623	92,080	87.6 %
1986/87	82,271	94,169	87.4 %
1987/88	84,271	95,336	88.4 %
1988/89	85,582	96,606	88.6 %

## Notes:

1. Total enrolment include registered, non-registered Indians and Inuit in Grades K4 to 13.
2. A breakdown of on/off-reserve Indian population was not available in 1960/61 and 1965/66. Based on 1975 Indian Register data, off-reserve was estimated to be 26 percent of the total population. Data were also not available for the 4-18 population for 1960/61 and was estimated to be 42 percent of the total Indian population.
3. On-reserve includes Crown lands and settlements.

## Post-secondary Enrolment

---

Chart 15

### Registered Indian Population, Enrolment in University and Post-secondary Institutions

---

### Highlights

The number of registered Indians enrolled in University increased from 60 in 1960/61 to 5,800 in 1985/86.

The number of Indians enrolled in post-secondary institutions increased 35 percent between 1985/86 and 1988/89, from 11,170 to 15,084.

Table 15

## Band-operated Schools

---

Chart 16

### Band-operated Schools

---

### Highlights

Indian bands and Tribal Councils are assuming more control in the education of Indian children on-reserve.

The number of band-operated schools increased from 53 in 1975/76 to 280 in 1988/89, a fivefold increase.

Table 16

**Band-operated Schools****Canada, 1975/76 - 1988/89**

---

## Enrolment by School Type

---

Chart 17

### Registered Indian Population, Enrolment by School Type

---

### Highlights

The government's commitment to increased Indian control of Indian education is reflected in the enrolment trends.

The proportion of children enrolled in band-operated schools is increasing while the proportion enrolled in federal or provincial schools is declining.

The proportion of children enrolled in band-operated schools increased ninefold from approximately four percent in 1975/76 to 36 percent in 1988/89.

The proportion enrolled in federal schools in 1988/89 dropped to 16 percent from 41 percent in 1975/76.

The proportion of students enrolled in provincial schools dropped between 1975/76 and 1988/89, from 53 to 48 percent.

## Children in Care

---

Chart 18

### Registered Indian Population On-Reserve, Children in Care

---

### Highlights

The ratio of registered Indian children in care to Indian children aged 16 and under peaked at about 6.5 percent in the mid-seventies, and has since gradually declined to four percent in 1988/89.

In 1988/89, the number of children in care stood at approximately 4,000 children.

Table 18

# On-Reserve Children in Care, Registered Indian Population

Canada, 1966/67 - 1988/89

Fiscal Year	Children in Care (1)	Children Aged 16 and under	Ratio
1966/67	3,201	93,101	3.4%
1967/68	3,946	93,484	4.2%

## Adults in Residential Care

---

Chart 20

### Registered Indian Population, Adults in Care

---

### Highlights

The proportion of Indian adults in care increased almost two and one-half times between 1972/73 and 1988/89.

Since the early eighties, at least five Indian adults per 1,000 adult Indians were in residential care. This proportion increased to 8.4 per 1,000 adult Indians in 1988/89.

## Per Adult Expenditures

Chart 21

### Registered Indian Population, Adults in Care and Per Adult Expenditures

### Highlights

In 1988/89, a total of 1,358 Indian adults were in residential care.

Approximately \$16,700 was required to cover the cost of care for one Indian adult in a residential home or institution in that year.

Expressed in 1981 constant dollars, the average cost per adult increased two and one-half times between 1971/72 and 1988/89, from \$4,690 to \$11,813.

## Social Assistance Recipients and Dependants

---

Chart 22

### Registered Indian Population, Average Number of Social Assistance Dependants

---

### Highlights

The average annual number of social assistance dependants among registered Indians has increased 45 percent in the last eight years from slightly over 88,000 dependants in 1981/82 to over 127,000 in 1988/89.

The ratio between social assistance recipients and dependants for Indians remained relatively constant between 1981 and 1988, fluctuating between 2.2 and 2.3.

Table 22

# **Average Annual Number of Social Assistance Recipients and Dependants per Month, Registered Indian Population**

**Canada, 1981/82 - 1988/89**

---

Fiscal Year	Average Annual Number of Recipients per Month (1)	Average Annual Number of Dependants per Month (2)
1981/82	39,146	88,079
1982/83	42,101	94,726
1983/84	43,750	98,438
1984/85	45,408	102,168
1985/86	48,494	109,112
1986/87	50,879	114,478
1987/88	54,170	121,882
1988/89	56,573	127,290

---

**Notes:**

1. The number of single recipients has been estimated by Social Development Branch to be 50 percent of the total recipients per month. See Glossary for definition of Recipients. Excludes Indians residing in N.W.T. and Newfoundland.
2. The average number of dependants living in a family has been calculated by multiplying the annual average number of recipients living in a family by the average family size which has been estimated to be 3.5. The total average number of dependants is the sum of the annual average number of single recipients and the average number of dependants living in a family. Excludes Indians residing in N.W.T. and Newfoundland.

## Dwellings

---

Chart 24

### Registered Indian Population On-Reserve, Dwellings and Persons Per Dwelling

---

### Highlights

The number of dwelling units on-reserve increased by approximately two-thirds between 1977 and 1988, from 37,003 to 61,080.

This increase in dwelling units had the impact of reducing the average number of persons per unit over the same period. In 1977, dwellings on-reserve had an average of 5.6 occupants compared to an average of 4.2 occupants in 1988.

Table 24

## Self-government Negotiations

---

Chart 26

### Self-government Negotiations

---

### Highlights

As of July 1989, a total of 122 proposals were submitted by Indian bands to achieve self-government.

As of July 1989, the Sechelt band and the James Bay Cree were the only bands to reach self-government but two proposals involving seven bands were in the final stages prior to legislation in Parliament.

Over 70 proposals are presently at various stages of negotiations involving a total of 190 bands.

## Alternative Funding Arrangements

---

Chart 27

### Alternative Funding Arrangements - Agreements by Stage of Development

---

### Highlights

Indian bands are increasingly involved in the development of alternative funding arrangements (AFA) as a stepping stone towards self-determination.

There has been an almost twofold increase in the number of signed agreements between Indian leaders and DIAND representatives. In 1988, only nine AFA agreements were signed compared to 16 in 1989 (involving 38 bands). One of the agreements was with a Tribal Council involving 14 bands.

A total of 55 proposals involving 72 bands in 1989 were at various stages of development.

## Devolution

---

Chart 28

### Indian-administered Expenditures as a Percent of Indian & Inuit Program Expenditures

---

### Highlights

Indian control of program expenditures has steadily increased over the past 17 years.

In 1988/89, registered Indians through their Band Councils, administered approximately 70 percent of DIAND's Indian and Inuit total program expenditures.

Since 1971/72, the number of authorized person-years in the Indian & Inuit Program decreased steadily from 6,556 to 3,260 in 1988/89.

Table 28

# Devolution of Indian and Inuit Program Expenditures and Person-years

Canada, 1971/72 – 1988/89

## Labour Force Participation

Chart 29

### Registered Indian Population On-Reserve 15 Years and Over in the Labour Force

### Highlights

In 1986, 43 percent of Indians aged 15 years and over living on-reserve were in the labour force.

Among the provinces in 1981 and 1986, British Columbia and Ontario had the highest participation rates of any other provinces.

Almost three-fifths of Yukon's Indian population aged 15 years and over living on-reserve were in the labour force in 1986.

Table 29

# Percent of Population 15 Years and Over in the Labour Force, Registered Indians Living On-Reserve by Province

1981 and 1986

Province	1981	1986 (1)

## North / DIAND Expenditures

Chart 36

### DIAND Expenditures on the North

### Highlights

DIAND expenditures on the North have steadily increased since 1980.

Transfer payments to the Government of the Northwest Territories (GNWT) and to the Yukon Territorial Government (YTG) increased 176 and 181 percent respectively between 1980/81 and 1988/89.

Table 36

**DIAND Expenditures on the North****1980/81-1988/89**

Type	Year	<u>1980/81</u>	<u>1981/82</u>	<u>1982/83</u>	<u>1983/84</u>	<u>1984/85</u>	<u>1985/86</u>	<u>1986/87</u>	<u>1987/88 (3)</u>	<u>1988/89 (4)</u>
		Thousands of dollars								
Transfers to YTG		63 648	65 032	76 203	108 805	116 953	146 937	160 397	172 686	178 915
Transfers to GNWT		244 235	287 018	304 985	374 927	412 384	471 125	494 168	595 601	674 860
Direct Expenditure on the North (1)		93 964	105 309	116 789	136 533	180 527	135 642	147 556	125 143	122 932
Yukon		22 513	29 718	34 184	37 990	37 260	40 092	46 197	48 633	48 073
N.W.T.		30 966	30 790	33 959	40 284	41 050	37 987	49 800	23 546	22 798
North Generally		40 485	44 801	48 646	58 259	102 217	57 563	51 559	52 964	52 061
Total Expenditure (Current dollars)		401 847	457 359	497 977	620 265	709 864	753 704	802 121	893 430	976 707
Total Expenditure (Constant 81 dollars) (2)		445 507	457 359	458 121	543 615	601 113	622 382	645 830	689 375	723 487

**Notes:**

1. Direct expenditures on the North have been broken down by the location of the principal benefit.
2. Constant dollar series obtained by deflating total DIAND expenditures by the gross domestic product implicit price index (Statistics Canada).
3. 1987/88 figures are forecasts.
4. 1988/89 figures are planned expenditures.
5. The Annual Northern Expenditure Plan was revised in 1989. Some of the figures which appear may therefore differ from previous editions of ANEP.

## North / Employment

---

Chart 37

### Native and Non-Native Employment Distribution Yukon and the Northwest Territories

---

### Highlight

Since 1971, the percentage of Natives aged 15 and over who are employed has increased in both territories, most notably in the Yukon. However, the Native employment population ratios in the N.W.T. and Yukon remain substantially lower than those for non-Natives.

Table 37

# Employment Distribution of Population 15 Years and Over, Yukon and Northwest Territories

1971-1986

	1971		1981		1986	
	<u>Native (1)</u>	<u>Non-Native</u>	<u>Native</u>	<u>Non-Native</u>	<u>Native</u>	<u>Non-Native</u>
<b>YUKON</b>						
Population 15 +	1,530	10,495	2,615	14,370	3,395	14,095
Employed	425	7,280	1,165	10,820	1,520	10,495
Percent employed	27.8	69.4	44.6	75.3	44.8	74.5
<b>NORTHWEST TERRITORIES</b>						
Population 15 +	9,450	10,420	15,380	14,285	18,675	16,255
Employed	3,200	7,360	6,090	11,520	7,505	13,445
Percent employed	33.9	70.6	39.6	80.6	40.2	82.7

**Note:**

1. In 1971 only two aboriginal origins were identified, Indian and Eskimo. Those with Métis origin therefore may have been included as Indian or as some other non-aboriginal origin. There are no separate counts for Métis available. In 1981 and 1986, Métis "ethnic origin" was recognized as a separate Native origin.

## Glossary

### **Adequate Water Supply:**

Refers to pressurized potable water (i.e. piped, well, trucked, other) in a housing unit.

### **Adults in Care:**

DIAND provides funding for care in Type I and II institutions which may be located on reserve or operated by the province. Individuals must be assessed according to provincial standards to determine the level of care required. Residents of institutions are elderly and disabled persons in need of supervision and assistance.

### **Alternative Funding Arrangements (AFA):**

AFA agreements were established by DIAND with Indian bands to allow new and more flexible financial and administrative arrangements in which the primary accountability of the band council is to the band members. The following steps are required to reach an agreement:

#### **Agreements:**

The draft agreement is signed by DIAND and Indian representatives:

#### **Entry confirmed:**

The applicant has been confirmed eligible for AFA and the draft agreement is being developed:

#### **Applications:**

Formal application has been made for AFA and the entry assessment is proceeding.

### **Average Annual Growth Rate:**

The following formula was used to calculate the average annual growth rates:

$$\text{AAGR} = (X_1 / X_0)^{1/n} - 1$$

where:  $X_1$  = data for the most recent year in period

$X_0$  = data for the earliest year in period

$n$  = length of period (years)

### **Children in Care:**

Is defined as the number of children who had to be placed away from parental care in order to protect them from neglect and/or abuse or prevent neglect and/or abuse.

### **Dwellings:**

Defined as living accommodations (with at least one separate bedroom) irrespective of occupancy, level of completeness or need for renovation or replacement.

### **Geographical Zones:**

**Urban:** Is a zone where a band is located within 50 km from the nearest service centre with year-round road access.

**Rural:** Is a zone where a band is located between 50 km and 350 km from the nearest service centre with year-round road access.

**Remote:** Is a zone where a band is located over 350 km from the nearest service centre with year-round road access.

**Special Access:** Is a zone where a band has no year-round road access to the nearest service centre and as a result, experiences a higher cost of transportation.

**Service Centre:** Is a community where the following services are available:

- a)- supplies, material and equipment (ie. construction, office, etc.)
- b)- a pool of skilled or semi-skilled labour
- c)- at least one financial institution
- and d)- Provincial and Federal services.

### **Indian Register:**

"The Indian Register is a list of all registered Indians (as defined in the Indian Act) which is kept by DIAND. Information on this list concerning the demographic characteristics of the Indian population is updated regularly by band officials and published for December 31 of each year." From Lithwick, Schiff, Vernon, *An Overview of Registered Indian Conditions in Canada*, INAC, 1986.

### **Life Expectancy:**

"Is an estimation of the average number of years of life remaining to each member of a group of persons. It is calculated on the basis of observed age-specific mortality rates at any particular moment in time, assuming that the risks of dying remain constant from the moment of estimation until the death of all members of the group." From Wilkins, Russell, *Health Status in Canada, 1926-1976*, Institute for Research on Public Policy, May 1980.

### **Population Served:**

"... Since vital statistics are reported by the regions and represent individuals served by the Medical Services Branch (MSB), the population at risk ... should be population served, not total Indian population. Crude rates are calculated using population served as reported by the regions. MSB data are also subject to variations in coverage. Some regions obtain statistics for both on and off-reserve Indians whereas other regions obtain figures for on-reserve Indians only (e.g. Ontario and Quebec)." From Lithwick, Schiff, Vernon, *An Overview of Registered Indian Conditions in Canada*, INAC, 1986.

**Recipients:**

Are defined as those individuals who receive social assistance payments whereas **Dependants** are all individuals who benefit from the payments.

**Self-government Negotiations:**

Process in which government authority is transferred to Indian and Inuit people. The following steps are required:

**Substantive negotiations:**

Negotiations leading directly to new arrangements which will be effected through legislation.

**Framework negotiations:**

Terms of reference for negotiations: a community's itemization of the authorities desired beyond the Indian Act, the proposed modifications to its governing structures and the new legislative arrangements sought to enable these changes. Workplan and budget for substantive negotiations and the ratification process for any agreements.

**Developmental:**

Research and community consultation.

**Workshops:**

Meetings held by a community or communities to explore and discuss self-government issues and exchange information and experiences among communities.
