**Données ministérielles de base - 1991.**

## Preface

Since 1989, Quantitative Analysis and Socio-demographic Research (QASR) has updated the Basic Departmental Data report on an annual basis with the cooperation of the various programs in DIAND.

The 1991 edition was prepared by R. Pierre Gauvin (Project Manager) assisted by Diane Fournier, Connie Gloade and Kimberly Thompson.

## Introduction

First Nations are assuming greater control over their lands, their social and economic circumstances and the laws which govern them. In the context of the new relationship between First Nations and Canada, it is essential that those involved in this process have available a comprehensive and accurate picture of the progress already achieved by these populations.

Basic Departmental Data is an annual report designed to be a key data reference document on the demographic, social and economic conditions of registered Indians in Canada using departmental administrative databases.

This report provides historical and current statistics on the evolution of the conditions of registered Indians living on reserve over the past 30 years as well as Northerners.

The Department of Indian Affairs and Northern Development (DIAND) is responsible for the well-being of both aboriginal and non-aboriginal populations in the Northwest Territories and the Yukon either in the form of direct program expenditures or transfer payments to the territorial governments. Data in the chapter on the North pertain to the total population unless otherwise indicated.

Statistics for this report are derived primarily from departmental administrative data sources as well as sources from Health and Welfare Canada and Statistics Canada. Subjects covered include: population, education, health, housing and social conditions, self-government and labour force participation.

Basic Departmental Data - 1991 includes projections in the Population and Health Conditions chapters. It is felt that users could benefit by having historical and projected trends to gain better insights on the conditions of the registered Indian population.

This report is essentially descriptive in nature. It updates the earlier annual releases of Basic Departmental Data which was first published in 1988. On each subject, the report presents the statistics in textual, graphic and tabular formats on a two-page spread. On the page opposite each table, highlights pertaining to the table are provided as well as a graphic representation of the information. Appropriate notes and sources are indicated at the bottom of each table. Numbers may differ slightly from the previous release due to rounding or program / department revisions. These minor revisions are identified by an "r". More extensive revisions have been made to tables showing expenditure in constant dollars. The constant dollar calculations are now based on the year 1986 rather than 1981.

Throughout this report "Indian" means registered or status Indian, that is, persons with status within the meaning of the Indian Act and whose names appear on the Indian Register maintained by DIAND.

In June 1985, amendments to the Indian Act were passed by Parliament. These amendments (Bill C-31) restore Indian status and membership rights to individuals and their children who had lost them because of discriminatory clauses contained in the previous Indian Act.

In 1990, registered Indians comprised 1.8 percent of the total Canadian population. They were generally affiliated to one of the 601 bands in the country and three-fifths of the population resided on reserve and Crown land.

## Population / Growth

---

Chart 1

### Registered Indian Population Growth On and Off Reserve

---

### Highlights

The registered Indian population increased from 224,164 in 1966 to 490,178 in 1990, more than a twofold increase.

With the reinstatement of Indians through Bill C-31, this population is expected to reach approximately 623,000 at the turn of the century, a 27 percent increase from 1990.

Eight out of ten registered Indians lived on reserve in 1966, but this proportion dropped to 60 percent in 1990.

The off-reserve population growth rate, which was quite significant between 1986 and 1990, is largely attributed to the reinstatement of Indians under Bill C-31.

## Population / Bill C-31

---

Chart 2

### Registered Indian Population Growth Showing Bill C-31

---

### Highlights

In 1985, at the beginning of the reinstatement process under Bill C-31, approximately 1,600 C-31 registrants were added to the Indian Register.

In 1990, Bill C-31 registrants represented approximately 15 percent of the total registered Indian population.

By 1996, roughly 100,000 Bill C-31 registrants and their offspring could be added to the Indian Register, representing approximately 17 percent of the total registered Indian population for that year.

---

## Population / Regions

---

Chart 3

### Registered Indian Population by Region

---

### Highlights

While the total registered Indian population has more than doubled between 1966 and 1990, the biggest proportional regional gains south of 60° were in Saskatchewan and Alberta. This trend is expected to continue until 2001.

In 1990, nearly a quarter of the total Indian population (23%) was located in Ontario, the largest proportion of all regions, while slightly over one percent of the Indian population was in the Yukon.

## Population On Reserve / Regions

---

Chart 4

### Registered Indian Population On Reserve by Region

---

### Highlights

The regional on-reserve proportions (including Crown lands and settlements) in 1990 ranged from a low of 46 percent in the Yukon to a high of 79 percent in the Northwest Territories.

The biggest proportional regional gains south of 60° were in the Atlantic and Quebec regions where the on-reserve population increased by 101 and 86 percent respectively between 1966 and 1990.

South of 60°, Quebec had the highest proportion of its Indian population living on reserve in 1990 (72%) and is expected to be the same in 2001.

While Saskatchewan is expected to have the largest percentage increase (58%) in its on-reserve population among all regions between 1990 and 2001, the Territories also expect high percentage increases (Yukon 46% and NWT 41%).

## Population Off Reserve / Regions

---

Chart 5

### Registered Indian Population Off Reserve by Region

### Highlights

The off-reserve population increased substantially between 1966 and 1990, particularly since 1985 with the implementation of Bill C-31. The population increased from 43,746 in 1966 to 196,974 in 1990.

The proportion of off-reserve Indians increased accordingly from nearly 20 percent in 1966 to 40 percent in 1990, as most Bill C-31 registrants reside off reserve.

All regions have seen their respective share of off-reserve Indians increase. The largest off-reserve regional gains south of 60° between 1966 and 1990 were in Saskatchewan and Alberta with about eightfold and sevenfold increases respectively. Quebec and the Atlantic regions had the lowest increases but still tripled their respective off-reserve population over the period.

From 1990 to the turn of the century, Alberta and the Atlantic regions are expected to have the largest increases in the off-reserve population south of 60°.

## Population / Geographical Zones

---

Chart 6

### Registered Indian Population On Reserve by DIAND Geographical Zone

---

### Highlights

The proportion of on-reserve Indians living in urban, rural, remote or special access areas has remained relatively constant between 1971 and 1990.

In 1990, more than a third of on-reserve Indians (37%) were located in DIAND defined urban zones while almost one-fifth (19%) of Indians were in special access zones where no year-round road access to the nearest service centre is available.

## Population / Geographical Zones / Regions

---

Chart 7-A

### Registered Indian Population On Reserve by Region and DIAND Geographical Zone Urban & Rural

### Highlights

The regional proportions of on-reserve Indians living in DIAND-defined geographical zones have remained almost constant between 1971 and 1990 (Tables 7-A and 7-B).

Over one-fifth of on-reserve Indians lived in remote and special access areas in 1971.

In 1971, all Indians living on-reserve in the Atlantic region were located in urban and rural areas while slightly over half of Yukon's and Manitoba's Indians were in these areas.

Manitoba had the highest proportion of its on-reserve Indian population (31%) living in special access areas where no year-round road access to the nearest service centre was available in 1971.

Table 7-A

---

## Population / Geographical Zones / Regions

---

Chart 7-B

### Registered Indian Population On Reserve by Region and DIAND Geographical Zone, 1990

---

### Highlights

The regional distribution of the on-reserve Indian population by DIAND geographical zones has remained relatively constant between 1971 and 1990 (Tables 7-A and 7-B).

As in 1971, three-quarters of on-reserve Indians lived in urban and rural areas in 1990.

At least nine out of ten Indians in the Atlantic, Alberta and Saskatchewan regions were located in urban and rural areas in 1990.

Table 7-B

---

## Life Expectancy

---

Chart 8

### Registered Indian Population, Life Expectancy at Birth by Sex

---

### Highlights

Life expectancy at birth for registered Indians is increasing and will continue to increase.

Between 1976 and 2001, the life expectancy at birth of Indians is expected to increase by approximately 10 years for both sexes.

The gap between sexes in 1976 was 6.5 years in favour of females and could climb to 7.2 years by 2001.

Life expectancy for males increased from 59.8 in 1976 to an expected 69.8 years in 2001 while that for females should increase from 66.3 to 77.0 years.

Table 8

**Life Expectancy at Birth by Sex, Registered Indian Population**  
**Canada, 1976 - 2001**

Year	<u>Life Expectancy at Birth (1)</u>	
	Male	Female
1976	59.8	66.3
1981	62.4	68.9
1986	63.8	71.0
1991	65.7	73.0
1996	67.7	75.0
2001	69.8	77.0

Population Projections of Registered Indians, 1986-2011, DIAND, 1990.

---

## Mortality Rates

---

Chart 9

### Registered Indian Population Mortality Rates

---

### Highlight

While the number of deaths between 1955 and 1989 was relatively constant, averaging approximately 1,600 deaths per year over the period, the registered Indian mortality rates have decreased significantly from 10.5 to 4.8 deaths per 1,000 population in 1989.

Table 9

**Deaths and Mortality Rates, Registered Indian Population****Canada, 1955 - 1989**

Year	<u>Number of Deaths</u>	<u>Mortality Rates (1)</u> (per 1,000)
1955	1,578	10.5 (2)
1960	1,623	8.8
1967	1,932	8.4
1976	1,875	7.3
1982	1,740	6.2
1983	1,658	5.7
1984	1,675	5.7
1985	1,432	6.0
1986	1,380	5.6
1987 (3)	1,405	5.6
1988	1,435	5.3
1989	1,339	4.8

**Notes:**

1. Mortality rates have been calculated using Health and Welfare Canada data. The population numbers are the population numbers served by Health and Welfare Canada and they do not correspond exactly to the Indian Register population. See Glossary for definition of population served.
2. The mortality rate was estimated using the total registered Indian population figure in 1955, derived from Indian Conditions: A Survey, DIAND, 1980.
3. Counts and rates since 1987 no longer include N.W.T. Indians because of the transfer of health services to the Government of the Northwest Territories.

**Sources:**1955-1967: Annual Reports, Health and Welfare Canada.1976: Indian and Inuit of Canada, Health Status Indicators 1974-1983, Health and Welfare Canada, Ottawa, 1986.

---

## Infant Mortality Rates

---

Chart 10

### Registered Indian Population, Infant Mortality Rates

---

### Highlights

One factor in the increased life expectancy of registered Indians is the declining infant mortality rate.

Between 1960 and 1989, infant mortality rates for Indians have dropped dramatically from 82 to just under 10 infant deaths per 1,000 live births.

Table 10

# **Infant Deaths and Infant Mortality Rates, Registered Indian Population**

**Canada, 1960 - 1989**

Year	<u>Number of Infant Deaths (1)</u>	<u>Number of Live Births</u>	<u>Infant Mortality Rates (per 1,000)</u>
1960	617	7,522	82.0
1963	568	8,071	70.4
1968	n/a	n/a	48.6
1973	273	6,717	40.6
1978	192	7,239	26.5
1983	146	8,029	18.2
1986	119	6,817	17.5
1987 (2)	87	7,465	11.7
1988	100	7,872	12.7
1989	80	8,067	9.9

**Notes:**

1. Infants are children of one year of age and under.
2. Counts and rates since 1987 no longer include N.W.T. Indians because of the transfer of health services to the Government of the Northwest Territories.
3. Mortality rates correspond to the population served by Health and Welfare Canada. See Glossary for definition of population served.

---

## Mortality Rates by Cause

---

Chart 11

### Registered Indian Population, Mortality Rates by Major Cause

---

### Highlights

Between 1982 and 1989, Injury and Poisoning has been the major cause of death among registered Indians with an average of 179 deaths per 100,000 over the period. However since 1987, the rates attributed to this cause of death have declined 28 percent.

The second major cause of death during this period has been Circulatory System disorders followed by Neoplasms with an average of 138 and 61 deaths per 100,000 respectively.

Deaths associated with Digestive System disorders have decreased in the last seven years, from 34.4 in 1982 to 20.3 deaths per 100,000 in 1989.

Table 11

## Tuberculosis

---

Chart 12

### Registered Indian Population, Tuberculosis Cases

---

### Highlights

The number of tuberculosis cases dropped significantly over the last 34 years from 1,922 in 1955 to 376 in 1989. Since 1980, little improvement in the incidence of this disease has been made in that the number of cases fluctuated between 300 and 400 a year.

Between 1985 and 1987, the number of new and reactivated cases of tuberculosis had risen approximately eight percent a year. However between 1987 and 1988, the number of cases dropped by 16 percent but rose 21 percent in 1989 to reach 376 cases.

Table 12

**Tuberculosis Cases, Registered Indian Population****Canada, 1955 - 1989**

## Enrolment

---

Chart 13

### Enrolment in Kindergarten, Elementary and Secondary Schools On Reserve

---

### Highlights

The number of on-reserve children enrolled in elementary and secondary schools has been increasing in the last three decades. It doubled between 1960/61 and 1990/91, reaching slightly over 92,000 students in 1990/91.

Enrolment is increasing due both to the increase in the school-age population and decrease in the number of drop-outs.

The percentage of school-aged children living on reserve enrolled in kindergarten, elementary and secondary schools has increased from 72 percent in 1960/61 to 91 percent in 1990/91.

Table 13

1987/88	84,271	95,336	88.4%
1988/89	85,582	96,606	88.6%
1989/90	88,158	97,751	90.2%
1990/91	92,018	100,717	91.4%

## **Notes:**

1. Total enrolment include registered, non-registered Indians and Inuit in Grades K4 to 13.
2. A breakdown of on/off-reserve Indian population was not available in 1960/61 and 1965/66. Based on 1975 Indian Register data, off reserve was estimated to be 26 percent of the total population. Data were also not available for the 4-18 population for 1960/61 and was estimated to be 42 percent of the total Indian population.
3. On reserve includes Crown lands and settlements.

## Consecutive Years of Schooling

---

Chart 14

### On-Reserve Students Remaining Until Grade XII or XIII for Consecutive Years of Schooling

---

### Highlights

Indian children are increasingly successful in their schooling.

The percentage of Indian children who are in grade XII or XIII after consecutive years of schooling has increased from about three percent in 1960/61 to slightly under half in 1990/91.

Table 14

**On-Reserve Students Remaining Until Grade XII or XIII  
for Consecutive Years of Schooling**

## Post-secondary Enrolment

---

Chart 15

### Registered Indian Population, Enrolment in University and Post-secondary Institutions

---

### Highlights

The number of registered Indians enrolled in University increased from 60 in 1960/61 to 5,800 in 1985/86.

The number of Indians enrolled in post-secondary institutions nearly doubled between 1985/86 and 1990/91, from 11,170 to 21,300 students.

Table 15

# **Enrolment in University and Post-secondary Institutions Registered Indian Population**

## Band-operated Schools

---

Chart 16

### Band-operated Schools

---

### Highlights

Indian bands are assuming more control in the education of Indian children on reserve.

The number of band-operated schools increased from 53 in 1975/76 to 312 in 1990/91, an almost sixfold increase.

Table 16

**Band-operated Schools****Canada, 1975/76 - 1990/91**

## Enrolment by School Type

---

Chart 17

### Registered Indian Population, Elementary and Secondary Enrolment by School Type

---

### Highlights

The government's commitment to increased Indian control of Indian education is reflected in the enrolment trends. The proportion of children enrolled in band-operated elementary and secondary schools is increasing while the proportion enrolled in federal and provincial schools is declining.

The proportion of children enrolled in band-operated schools increased elevenfold from four percent in 1975/76 to 44 percent in 1990/91.

The proportion enrolled in federal schools in 1990/91 dropped to 9 percent from 41 percent in 1975/76.

The proportion of students enrolled in provincial schools dropped between 1975/76 and 1990/91, from 53 to 47 percent.

## Children in Care

---

Chart 18

### Registered Indian Population On Reserve, Children in Care

---

### Highlights

The ratio of on-reserve registered Indian children in care to Indian children aged 16 and under peaked at about 6.5 percent in the mid-seventies and has since gradually declined to 3.5 percent in 1986/87.

Since 1987/88, the ratio increased slightly to reach 4.0 percent in 1990/91. In 1990/91, the number of children in care stood at 4,352 children.

**Table 18****On-Reserve Children in Care, Registered Indian Population****Canada, 1966/67 - 1990/91**

## Per Child Expenditures

---

Chart 19

### Registered Indian Population, Children in Care and Per Child Expenditures

---

### Highlights

While the number of children in care fluctuated since 1980/81, the total expenditures expressed in 1986 constant dollars have been increasing.

Per child expenditures in constant 1986 dollars have increased gradually from approximately \$6,100 in 1970/71 to just under \$23,550 per child in 1990/91, an almost fourfold increase.

Table 19

## Adults in Residential Care

---

Chart 20

### Registered Indian Population, Adults in Care

---

### Highlight

Over the last two decades, the average proportion of on-reserve Indian adults in residential care dropped slightly. From 3.7 per 1,000 in the seventies, this ratio decreased to 3.2 per 1,000 Indian adults on average in the eighties. In 1990/1991, the ratio stood at 3.2 per 1,000 Indian adults.

## Per Adult Expenditures

---

Chart 21

### Registered Indian Population, Adults in Care and Per Adult Expenditures

---

### Highlights

In 1990/91, a total of 561 Indian adults were in residential care, an almost nine percent increase from the previous year.

Over \$28,000 was required to cover the cost of care for one Indian adult in a residential home or institution in 1990/91.

Expressed in 1986 constant dollars, the average cost per adult increased over three and one-half times between 1971/72 and 1990/91, from approximately \$6,200 to just over \$23,600.

1988/89	56,573	127,290
1989/90	59,680	134,280 <sup>r</sup>
1990/91	64,360	144,810

---

**Notes:**

1. See Glossary for definition of Recipients. Excludes Indians residing in N.W.T. and Newfoundland.
  2. The number of single recipients has been estimated by Social Development Branch to be 50 percent of the average number of recipients per month. The average annual number of dependants living in a family has been calculated by multiplying the annual average number of recipients living in a family by the average size which has been estimated to be 3.5. The total average number of dependants is the sum of the annual average number of single recipients and the average number of dependants living in a family. Excludes Indians residing in N.W.T. and Newfoundland.
- r. Datum revised.

## Social Assistance Expenditures

---

Chart 23

### Registered Indian Population, Social Assistance Expenditures

---

### Highlights

Total social assistance expenditures, expressed in 1986 constant dollars, more than doubled between 1973/74 and 1990/91.

Expenditures per recipient have been relatively constant from 1981/82 to 1990/91 averaging just over \$5,600 per year over the period.

Chart 24

### New and Renovated Dwelling Units On Reserve

---

### Highlights

Between 1983/84 and 1990/91, an average of 3,200 new dwelling units per year were built on reserve. In 1990/91, slightly under 2,900 new units were constructed.

Just over 4,000 dwelling units on average per year were renovated between 1983/84 and 1990/91.

Table 24

**Total Number of New and Renovated Dwelling Units On Reserve**  
**Canada, 1983/84 - 1990/91**

Dwellings (1)		
Year	<u>Number of New Dwelling Units (2)</u>	<u>Number of Renovated Dwelling Units</u>
1983/84	3,517	4,380
1984/85	2,999	3,780
1985/86	2,831	3,250
1986/87	2,929	3,490
1987/88	3,166	4,141

## Self-government Negotiations

---

Chart 26

### Self-government Negotiations

---

### Highlights

As of September 1991, a total of 142 proposals had been submitted by Indian bands to achieve self-government.

As of September 1991, the Sechelt band and the eight James Bay Cree bands were the only ones to reach self-government but one proposal was at the final legislative drafting stage. Thirteen proposals involving 50 bands were in the substantive negotiation phase.

Thirty eight proposals are presently at other stages of negotiations involving a total of 127 bands.

Table 26

## Alternative Funding Arrangements

---

Chart 27

AFA Participation Rates

---

### Highlights

Alternative funding arrangements (AFA) became available to Indian bands in June 1986 and the first agreement was signed in May 1987. Since then, the rate at which Indian bands are securing authority to manage program funding through alternative funding arrangements (AFA) has continued to increase.

As of March 31, 1991 a total of 102 agreements were signed. Eighty-four of these agreements were signed with individual bands and eighteen with tribal councils and other Indian organizations.

Table 27

**Alternative Funding Arrangements****Canada, 1986/87 - 1990/91 (Revised)**

	Cumulative AFA Participation Rates (1)				
	1986-87	1987-88	1988-89	1989-90	1990-91

## Devolution

---

Chart 28

### Indian-administered Expenditures as a Percent of Indian & Inuit Program Expenditures

---

### Highlights

Indian control of program expenditures has steadily increased over the past 19 years.

In 1990/91 registered Indians, through Band Councils, Tribal Councils or other Indian organisations, administered 74.5 percent of DIAND's Indian and Inuit total program expenditures.

Since 1971/72, the number of authorized person-years in the Indian & Inuit Program decreased steadily from 6,556 to 2,913 in 1990/91, a 56 percent decrease.

Table 28

# Devolution of Indian and Inuit Program Expenditures and Person-years

Canada, 1971/72 - 1990/91

## Labour Force Participation

---

Chart 29

### Registered Indian Population On Reserve 15 Years and Over in the Labour Force

---

### Highlights

In 1986, 43 percent of Indians aged 15 years and over living on reserve were in the labour force.

Among the provinces in 1981 and 1986, British Columbia and Ontario had the highest participation rates.

Almost three-fifths of Yukon's Indian population aged 15 years and over living on reserve were in the labour force in 1986.

Table 29

Multiple Aboriginal	-	-	-	-	-	-	65	0.3
Non-Aboriginal	12,421	84.9	15,795	85.9	19,030	82.5	18,365	78.6
Total Population	14,628	100	18,385	100	23,075	100	23,360	100
<b>NORTHWEST TERRITORIES</b>								
Tot. Aboriginal	13,233	57.5	18,580	53.4	26,430	58.0	30,530	58.7
Inuit	7,977	34.7	11,400	32.8	15,910	34.9	18,135	34.9
Indian	5,256	22.9	7,180	20.6	7,930	17.4	8,435	16.2
Métis	-	-	-	-	2,590	5.7	2,970	5.7
Multiple Aboriginal	-	-	-	-	-	-	1,000	1.9
Non-Aboriginal	9,765	42.5	16,225	46.6	19,110	42.0	21,490	41.3
Total Population	22,998	100	34,805	100	45,540	100	52,020	100

#### Notes:

1. For 1961 and 1971, two aboriginal origins were identified. Some Métis may have been represented as Indians but most are included in the non-aboriginal group.
2. For 1981, status and non-status Indians have been grouped as Indians; Métis appear in their own separate group; Persons reporting both aboriginal and non-aboriginal origins were accounted for under one aboriginal origin; no multiple aboriginal group existed.
3. For 1986, Inuit, North American Indians and Métis figures are a combination of the single response figure and those who identified one aboriginal ethnic origin and a non-aboriginal origin as a multiple response. Multiple aboriginal persons are those indicating more than one aboriginal origin.
4. The ethnic origin data for 1961 and 1971 include inmates in institutions while the data for 1981 and 1986 do not.

## North / Infant Mortality

---

Chart 35

### Infant Mortality Rates, Yukon and the Northwest Territories

---

### Highlight

Infant mortality rates in the two territories declined significantly over the last 28 years. The Northwest Territories experienced the steepest decline, from 111 deaths per 1,000 live births in 1961 to a rate of 16.2 in 1989, but for most years maintained a higher rate than the Yukon. Because of the small populations involved, random fluctuations in rates from year to year are to be expected. Small changes are of no statistical significance.

Table 35

## North / DIAND Expenditures

---

Chart 36

### DIAND Expenditures on the North

---

### Highlights

Total DIAND expenditures on the North have steadily increased since 1981/82. The 1990/91 planned figure represents a conservative estimate of expenditures, but actual figures will most likely follow the upward trend.

Since 1984/85 direct DIAND expenditures have decreased in conjunction with devolution of DIAND programs, primarily to GNWT. The sharp increase forecast in 1989/90 is due primarily to DIAND's continuing responsibilities in the Yukon. Increases focus on capital facilities and community resources for Indian bands and the management of renewable resources.

Table 36

---

## North / Employment

---

Chart 37      **Aboriginal and Non-Aboriginal Employment Distribution,  
Yukon and the Northwest Territories**

---

### Highlight

Since 1971, the percentage of aboriginals aged 15 and over who are employed has increased in both territories, most notably in the Yukon. However, the aboriginal employment population ratios in the N.W.T. and Yukon remain substantially lower than those for non-aboriginals.

Table 37

# Employment Distribution of Population 15 Years and Over, Yukon and Northwest Territories

1971 - 1986

	1971		1981		1986	
	<u>Aborig.</u>	<u>Non-Aborig.</u>	<u>Aborig.</u>	<u>Non-Aborig.</u>	<u>Aborig.</u>	<u>Non-Aborig.</u>
YUKON						
Population 15+	1,530	10,495	2,615	14,370	3,395	14,095
Employed	425	7,280	1,165	10,820	1,520	10,495
Percent Employed	27.8	69.4	44.6	75.3	44.8	74.5
NORTHWEST TERRITORIES						
Population 15+	9,450	10,420	15,380	14,285	18,675	16,255
Employed	3,200	7,360	6,090	11,520	7,505	13,445
Percent Employed	33.9	70.6	39.6	80.6	40.2	82.7

**Note:**

1. In 1971 only two aboriginal origins were identified, Indian and Inuit. Those with Métis origin therefore may have been included as Indian or as some other non-aboriginal origin. There are no separate counts for Métis available. In 1981 and 1986, Métis "ethnic origin" was recognized as a separate aboriginal origin.

---

## North / Per Capita Income

---

Chart 38

### Per Capita Income by Source, Yukon and the Northwest Territories, 1985

---

### Highlights

The gap between aboriginal and non-aboriginal total income per capita is greater in the Northwest Territories than in the Yukon. In 1985, per capita income for aboriginals in the Northwest Territories was approximately 30 percent that of non-aboriginals while this percentage was 45 percent in the Yukon.

The difference in aboriginal income per capita between the two territories is largely due to the higher levels of both employment and government transfer income per capita in the Yukon.

# Per Capita Income by Source for Population 15 Years and Over, Yukon and Northwest Territories

1980 - 1985

Income Source	YUKON				NORTHWEST TERRITORIES

Statistics Canada, 1981 and 1986 Censuses of Canada. Special tabulations for the Strategic Analysis Division, DIAND.

## Glossary

**Adequate Water Supply:**

Refers to the presence of pressurized potable water (i.e. piped, well, trucked, other) in a housing unit.

**Adequate Sewage:**

Includes the presence of lift stations, septic systems, forcemains, sewage collection mains, manholes, service connections, treatment plants, lagoons and outfall sewers and appurtenances, but excludes plumbing and fixtures.

**Adults in Care:**

DIAND provides funding for care in Type I and II institutions which may be located on reserve or operated by the province. Individuals must be assessed according to provincial standards to determine the level of care required. Residents of institutions are elderly and disabled persons in need of supervision and assistance.

**Type I:**

"is that required by a person who is ambulant and/or independently mobile, who has decreased physical and/or mental faculties, who requires primarily supervision and/or assistance with activities of daily living and provision for meeting psycho-social needs through social and recreational services. The period of time during which care is required is indeterminate and related to the individual condition";

**Type II:**

"is that required by a person with a relatively stabilized (physical or mental) chronic disease or functional disability, who, having reached the apparent limit of his recovery, is not likely to change in the near future, who has relatively little need for the diagnostic and therapeutic services of a hospital but who requires availability of personal care on a continuing 24-hour basis, with medical and professional nursing supervision and provision for meeting psycho-social needs. The period of time during which care is required is unpredictable but usually consists of a matter of months or years".

From Adult Long Term Institutional Care, Report of the Sub-Committee on Special Services in Hospitals, 1984.

**Alternative Funding Arrangements (AFA):**

AFA agreements were established by DIAND with Indian bands (and/or tribal councils) to allow new and more flexible financial and administrative arrangements in which the primary accountability of the band council is to the band members.

**Average Annual Growth Rate:**

The following formula was used to calculate average annual growth rates:

$$\text{AAGR} = (X_1 / X_0)^{1/n} - 1$$

where:  $X_1$  = data for the most recent year in period  
 $X_0$  = data for the earliest year in period  
 $n$  = length of period (years).

**Bill C-31:**

"Passed by Parliament in June 1985, Bill C-31 contained important amendments to the Indian Act. It had three principal goals:

to eliminate discrimination based on gender and marital status in the Indian Act;

to restore Indian status to victims of past discrimination; and

to enable Indian bands to assume control over their membership.

As a result of Bill C-31, the Indian Act now essentially treats men and women equally when determining status, and prevents anyone from gaining or losing status through marriage." From Lands, Revenues and Trust Review, Phase II Report.

**Children in Care:**

Is defined as the number of children who had to be placed away from parental care in order to protect them from neglect and/or abuse or prevent neglect and/or abuse.

**Devolution:**

Refers to the transfer of services and programs from DIAND control to Indian bands, tribal councils and other Indian authorities.

**Dwellings:**

Defined as living accommodations (with at least one separate bedroom) irrespective of occupancy, level of completeness or need for renovation or replacement.

**Geographical Zones:**

**Urban:** Is a zone where a band is located within 50 km from the nearest service centre with year-round road access.

**Rural:** Is a zone where a band is located between 50 km and 350 km from the nearest service centre with year-round road access.

**Remote:** Is a zone where a band is located over 350 km from the nearest service centre with year-round road access.

**Special Access:** Is a zone where a band has no year-round road access to the nearest service centre and, as a result, experiences a higher cost of transportation.

**Service Centre:** Is a community where the following services are available:

- a) - supplies, material and equipment (ie. construction, office)
- b) - a pool of skilled or semi-skilled labour
- c) - at least one financial institution, and
- d) - provincial and federal services.

**Indian Register:**

"The Indian Register is a list of all registered Indians (as defined in the Indian Act) which is kept by DIAND. Information on this list concerning the demographic characteristics of the Indian population is updated regularly by band officials and

published for December 31 of each year." From Lithwick, Schiff, Vernon, An Overview of Registered Indian Conditions in Canada, INAC, 1986.

**Life Expectancy:**

"Is an estimation of the average number of years of life remaining to each member of a group of persons. It is calculated on the basis of observed age-specific mortality rates at any particular moment in time, assuming that the risks of dying remain constant from the moment of estimation until the death of all members of the group." From Wilkins, Russell, Health Status in Canada, 1926-1976, Institute for Research on Public Policy, May 1980.

**Population Served:**

Vital statistics are reported by the regions and represent individuals served by the Medical Services Branch (MSB, Health and Welfare). The population at risk should be population served, not total registered Indian population. Crude rates are calculated using population served as reported by the regions. MSB data are subject to variations in coverage. Some regions obtain statistics for both on and off-reserve Indians (Manitoba, Saskatchewan, Alberta and the Yukon) whereas other regions obtain figures for most on-reserve Indians only (Atlantic, Quebec and Ontario). The coverage excludes Indians in British Columbia and, since 1987, those living in the Northwest Territories because of the transfer of health services to the Government of the Northwest Territories.

**Recipients:**

Are defined as those individuals who receive social assistance payments whereas **Dependants** are all individuals who benefit from the payments.

**Self-government Negotiations:**

Process in which government authority is transferred to Indian and Inuit people. The following steps are required:

Legislative drafting:

New arrangements being affected through legislation.

**Substantive negotiations:**

Negotiations leading directly to new arrangements which will be effected through legislation.

**Framework negotiations:**

Terms of reference for negotiations: a community's itemization of the authorities desired beyond the Indian Act, the proposed modifications to its governing structures and the new legislative arrangements sought to enable these changes. Workplan and budget for substantive negotiations and the ratification process for any agreements.

**Developmental:**

Research and community consultation.

**Workshops:**

Meetings held by a community or communities to explore and discuss self-government issues and exchange information and experiences among communities.
