Données ministérielles de base - 1992.

Preface

Since 1989, Quantitative Analysis and Socio-demographic Research (QASR) of the Management Information and Analysis Branch (MIA) has updated the Basic Departmental Data report on an annual basis with the cooperation of the various programs in the Department of Indian Affairs and Northern Development (DIAND).

This 1992 edition was prepared by R. Pierre Gauvin (Project Manager) with the collaboration of Peter R. Oberle.

Introduction

First Nations are increasingly determined to assume greater control over their lands, their social and economic circumstances and the laws which govern them. It is essential that those involved in the process of developing a new relationship between First Nations and Canada have a comprehensive and accurate portrait of the circumstances of First Nations and the progress they have made towards self-reliance.

Basic Departmental Data is an annual reference report on the demographic, social and economic conditions of registered Indians in Canada. It provides historical (30 years) and current statistics on the conditions of registered Indians living on reserve as well as Northerners. Subjects covered include population, education, health, housing and social conditions, self-government and labour force participation.

This 1992 edition includes projections in the Population and Health Conditions chapters. Users will gain better insights into the conditions of the registered Indian population by having historical and projected trends.

The Department of Indian Affairs and Northern Development (DIAND) is responsible for the well-being of both aboriginal and non-aboriginal populations in the Northwest Territories and the Yukon either in the form of direct program expenditures or transfer payments to the territorial governments. Data in the chapter on the North pertain to the total population unless otherwise indicated.

Statistics for this report are derived primarily from departmental administrative data sources as well as from Health and Welfare Canada and Statistics Canada.

This report is essentially descriptive in nature. It updates the earlier annual releases of Basic Departmental Data. The first edition was published in 1988. On each subject, the report presents the statistics in textual, graphic and tabular formats on a two-page spread. On the page opposite each table, highlights pertaining to the table are provided as well as a graphic representation of the information. Notes and sources are indicated at the bottom of each table. Numbers may differ slightly from the previous release due to rounding or program / department revisions. These revisions are identified by an "r".

Throughout this report "Indian" means registered or status Indian, that is, persons with status within the meaning of the Indian Act and whose names appear on the Indian Register maintained by DIAND.

In June 1985, amendments to the Indian Act were passed by Parliament. These amendments (Bill C-31) restore Indian status and membership rights to individuals and their children who had lost them because of discriminatory clauses contained in the previous Indian Act. The chapter on Population reflects the significant growth in the registered Indian population since the reinstatement process began in 1985.

In 1991, registered Indians comprised 1.9 percent of the total Canadian population. They were generally affiliated to one of the 603 bands in the country and almost three-fifths of the population resided on reserve and Crown land.

Population / Growth

Chart 1

Registered Indian Population Growth On and Off Reserve

Highlights

The registered Indian population increased from 224,164 in 1966 to 511,791 in 1991, more than a twofold increase.

With the reinstatement of status to many Indians through Bill C-31, the registered Indian population is expected to reach approximately 700,600 in 2001, a 37 percent increase from 1991.

Eight out of ten registered Indians lived on reserve in 1966, but this proportion dropped to less than six out of ten in 1991.

The high growth rate for the off-reserve population between 1986 and 1991 is largely attributed to the reinstatement of Indians under Bill C-31.

Notes:

1. On reserve includes Crown lands and settlements.
2. See Glossary for definition of term.
3. In 1966, the off-reserve total includes 274 individuals whose type of residence was not stated.
4. In 1971, the off-reserve total includes six individuals whose type of residence was not stated.
5. In 1985, the Indian Act was amended to allow, through Bill C-31, the restoration of Indian status to those who had lost it due to discriminatory clauses in the Indian Act.
6. Growth rates calculated between 1991 and 1996 are based on population projections adjusted for late reporting of births and deaths.

Population / Bill C-31

Chart 2

Registered Indian Population Growth Showing Bill C-31

Highlights

In 1985, at the beginning of the reinstatement process under Bill C-31, approximately 1,600 C-31 registrants were added to the Indian Register.

In 1991, Bill C-31 registrants represented almost 16 percent of the total registered Indian population.

Population / Regions

Chart 3

Registered Indian Population by Region

Highlights

The total registered Indian population has more than doubled between 1966 and 1991. The regions south of 60° with the biggest proportional gains were Saskatchewan, Alberta and Manitoba.

In 1991, nearly a quarter of the total Indian population (23%) was located in Ontario, the largest proportion of all regions, while slightly over one percent of the Indian population was in the Yukon.

Population On Reserve / Regions

Chart 4

Registered Indian Population On Reserve by Region

Highlights

By region, the proportion of registered Indians living on reserve (including Crown lands and settlements) in 1991 ranged from a low of just under 46 percent in the Yukon to a high of 78 percent in the Northwest Territories.

The biggest proportional gains in regions south of 60° between 1966 and 1991 were in the Atlantic, Quebec and Manitoba regions where the on-reserve population increased by 112, 92 and 91 percent respectively.

South of 60°, Quebec had the highest proportion of its Indian population living on reserve in 1991 (71%).

Alberta is expected to have the largest percentage increase (37%) in its on-reserve population among all regions between 1991 and the turn of the century. At the other end of the range, British Columbia and the Territories could expect increases of approximately 17% on average.

Population Off Reserve / Regions

Chart 5

Registered Indian Population Off Reserve by Region

Highlights

The off-reserve population increased substantially between 1966 and 1991 from 43,746 to 207,032 in 1991. Growth was particularly high between 1985 and 1991 with the implementation of Bill C-31.

The proportion of off-reserve Indians increased from nearly 20 percent in 1966 to almost 41 percent in 1991, as most Bill C-31 registrants reside off reserve.

All regions have seen their respective share of off-reserve Indians increase. The largest off-reserve regional gains south of 60° between 1966 and 1991 were in Saskatchewan and Alberta with eightfold and sevenfold increases, respectively. Quebec and the Atlantic regions had the lowest increases but still tripled their respective off-reserve populations over the period.

From 1991 to the turn of the century, Quebec, the Atlantic and Alberta regions are expected to have the largest increases in the off-reserve population south of 60°.

Population / Geographical Zones

Chart 6

Registered Indian Population On Reserve by DIAND Geographical Zone

Highlights

The proportion of on-reserve Indians living in urban, rural, remote or special access areas has remained relatively constant between 1971 and 1991.

In 1991, more than a third of on-reserve Indians (37%) were located in DIAND defined urban zones while almost one-fifth (19%) of Indians were in special access zones where no year-round road access to the nearest service centre is available.

Population / Geographical Zones / Regions

Chart 7-A

Registered Indian Population On Reserve by Region and DIAND Geographical Zone Urban & Rural

Highlights

The regional proportions of on-reserve Indians living in DIAND-defined geographical zones have remained almost constant between 1971 and 1991 (Tables 7-A and 7-B).

Over one-fifth of on-reserve Indians lived in remote and special access areas in 1971.

In 1971, all Indians living on-reserve in the Atlantic region were located in urban and rural areas while slightly over half of Yukon's and Manitoba's Indians were in these areas.

Manitoba had the highest proportion of its on-reserve Indian population (31%) living in special access areas where no year-round road access to the nearest service centre was available in 1971.

Population / Geographical Zones / Regions

Chart 7-B

Registered Indian Population On Reserve by Region and DIAND Geographical Zone, 1991

Highlights

The regional distribution of the on-reserve Indian population by DIAND geographical zones has remained relatively constant between 1971 and 1991 (Tables 7-A and 7-B).

As in 1971, three-quarters of on-reserve Indians lived in urban and rural areas in 1991.

At least nine out of ten Indians in the Atlantic, Alberta and Saskatchewan regions were located in urban and rural areas in 1991.

Life Expectancy

Chart 8

Registered Indian Population, Life Expectancy at Birth by Sex

Highlights

Life expectancy at birth for registered Indians is increasing and will continue to increase.

Between 1975 and 2015, the life expectancy at birth of Indians is expected to increase by approximately 14 years for both sexes.

The gap between sexes in 1975 was 6.7 years in favour of females and could climb to 7.2 years by 2015.

Life expectancy for males is expected to increase from 59.2 in 1975 to 72.9 years in 2015 while that for females should increase from 65.9 to 80.1 years.

Table 8

Life Expectancy at Birth by Sex, Registered Indian Population**Canada, 1975 - 2015 (Revised)**

<u>Life Expectancy at Birth (1)</u>		
Year	Male	Female
1975	59.2	65.9
1980	60.9	68.0
1985	63.9	71.0
1990	66.9	74.0
1995	69.1	76.2
2000	70.2	77.3
2005	71.0	78.1

Mortality Rates

Chart 9

Registered Indian Population Mortality Rates

Highlight

Between 1955 and 1990, the mortality rates among registered Indians have decreased significantly from 10.5 to 3.8 deaths per 1,000 population. Between 1983 and 1987, the rates were relatively stable, however, since 1988 the rates have been falling sharply.

Table 9

Deaths and Mortality Rates, Registered Indian Population**Canada, 1955 - 1990**

Year	<u>Number of Deaths</u>	<u>Mortality Rates (1)</u> (per 1,000)
1955	1,578	10.5 (2)
1960	1,623	8.8
1967	1,932	8.4
1976	1,875	7.3
1982	1,740	6.2
1983	1,658	5.7
1984	1,675	5.7
1985	1,432	6.0
1986	1,380	5.6
1987 (3)	1,405	5.6
1988	1,435	5.3
1989	1,339	4.8
1990	1,357	3.8

Notes:

1. Mortality rates have been calculated using Health and Welfare Canada data. The population numbers are the population numbers served by Health and Welfare Canada and they do not correspond exactly to the Indian Register population. See Glossary for definition of Population Served.
2. The mortality rate was estimated using the total registered Indian population figure in 1955, derived from Indian Conditions: A Survey, DIAND, 1980.
3. Counts and rates since 1987 no longer include N.W.T. Indians because of the transfer of health services to the Government of the Northwest Territories.

Infant Mortality Rates

Chart 10

Registered Indian Population, Infant Mortality Rates

Highlights

One factor in the increased life expectancy of registered Indians is the declining infant mortality rate.

Between 1960 and 1990, infant mortality rates for Indians have dropped dramatically from 82 to about 10 infant deaths per 1,000 live births.

Table 10

Infant Deaths and Infant Mortality Rates, Registered Indian Population

Canada, 1960 - 1990

Year	<u>Number of Infant Deaths (1)</u>	<u>Number of Live Births</u>	<u>Infant Mortality Rates (per 1,000)</u>
1960	617	7,522	82.0
1963	568	8,071	70.4
1968	n/a	n/a	48.6
1973	273	6,717	40.6
1978	192	7,239	26.5
1983	146	8,029	18.2
1986	119	6,817	17.5
1987 (2)	87	7,465	11.7
1988	100	7,872	12.7
1989	80	8,067	9.9
1990	88	8,656	10.2

Notes:

1. Infants are children of one year of age and under.
2. Counts and rates since 1987 no longer include N.W.T. Indians because of the transfer of health services to the Government of the Northwest Territories.
3. Mortality rates correspond to the population served by Health and Welfare Canada. See Glossary for definition of population served.

Mortality Rates by Cause

Chart 11

Registered Indian Population, Mortality Rates by Major Cause

Highlights

Between 1982 and 1990, injury and poisoning has been the major cause of death among registered Indians with an average of 171 deaths per 100,000 over the period. However, since 1987, the rates attributed to injury and poisoning have declined 43 percent.

The second major cause of death between 1982 and 1990 has been circulatory system disorders followed by neoplasms with an average of 135 and 60 deaths per 100,000, respectively.

Death rates associated with digestive system disorders have decreased over the last seven years from 34.4 in 1982 to 16.8 deaths per 100,000 in 1990.

Table 11

Tuberculosis

Chart 12

Registered Indian Population, Tuberculosis Cases

Highlights

The rate of tuberculosis cases per 100,000 population dropped significantly between 1965 and 1985, from 270 per 100,000 to 90 per 100,000. Since 1985, there has been little change in the incidence of this disease.

Table 12

Enrolment

Chart 13

Enrolment in Kindergarten, Elementary and Secondary Schools On Reserve

Highlights

The number of on-reserve children enrolled in elementary and secondary schools has been increasing in the last three decades. It doubled between 1960/61 and 1991/92, reaching about 96,600 students in 1991/92.

Enrolment is increasing due both to the increase in the school-age population and decrease in the number of drop-outs.

The percentage of school-aged children living on reserve enrolled in kindergarten, elementary and secondary schools has increased from 72 percent in 1960/61 to nearly 96 percent in 1991/92.

Table 13

Enrolment in Kindergarten, Elementary and Secondary Schools On Reserve

Canada, 1960/61 - 1991/92

Year	<u>Enrolment (1)</u>	<u>Population 4-18 Years</u>	<u>Enrolment Rate</u>
1960/61 (2)	41,671	57,550	72.4%

1987/88	84,271	95,336	88.4%
1988/89	85,582	96,606	88.6%
1989/90	88,158	97,751	90.2%
1990/91	92,018	100,717	91.4%
1991/92	96,594	101,190	95.5%

Notes:

1. Total enrolment includes registered Indians, non-registered Indians and Inuit in Grades K4 to 13.
2. A breakdown of on/off-reserve Indian population was not available in 1960/61 and 1965/66. Based on 1975 Indian Register data, off reserve was estimated to be 26 percent of the total population. Data were also not available for the 4-18 population for 1960/61 and was estimated to be 42 percent of the total Indian population.
3. On reserve includes Crown lands and settlements.

Consecutive Years of Schooling

Chart 14

On-Reserve Students Remaining Until Grade XII for Consecutive Years of Schooling

Highlights

Indian children are increasingly successful in their schooling.

The percentage of Indian children who are in grade XII after consecutive years of schooling has increased from about three percent in 1960/61 to slightly over half in 1991/92.

Post-secondary Enrolment

Chart 15

Registered Indian Population, Enrolment in University and Post-secondary Institutions

Highlights

The number of registered Indians enrolled in university increased from 60 in 1960/61 to 5,800 in 1985/86.

The number of Indians enrolled in post-secondary institutions nearly doubled between 1985/86 and 1991/92, from 11,170 to 21,442 students.

Band-operated Schools

Chart 16

Band-operated Schools

Highlights

Indian bands are assuming more control in the education of Indian children on reserve.

The number of band-operated schools increased from 53 in 1975/76 to 329 in 1991/92, a sixfold increase.

Table 16

Enrolment by School Type

Chart 17

Registered Indian Population, Kindergarten, Elementary and Secondary Enrolment by School Type

Highlights

The government's commitment to increased Indian control of Indian education is reflected in the enrolment trends. The proportion of children enrolled in band-operated elementary and secondary schools is increasing while the proportion enrolled in federal and provincial/private schools is declining.

The proportion of children enrolled in band-operated schools increased almost 12 times from 4 percent in 1975/76 to 47 percent in 1991/92.

The proportion enrolled in federal schools dropped to 6 percent in 1991/92 from 41 percent in 1975/76.

The proportion of students enrolled in provincial/private schools dropped from 55 percent 1975/76 to 46 percent in 1991/92.

Children in Care

Chart 18

Registered Indian Population On Reserve, Children in Care

Highlights

The ratio of on-reserve registered Indian children in care to Indian children aged 16 and under peaked at about 6.5 percent in the mid-seventies and has since gradually declined to 3.5 percent in 1986/87.

Since 1987/88, the ratio increased slightly to reach 4.0 percent in 1991/92. In 1991/92, the number of children in care stood at 4,586 children.

Per Child Expenditures

Chart 19

Registered Indian Population, Children in Care and Per Child Expenditures

Highlights

While the number of children in care fluctuated since 1980/81, the total expenditures expressed in 1986 constant dollars have been increasing.

Per child expenditures in constant 1986 dollars have increased gradually from approximately \$6,100 in 1970/71 to just over \$23,800 per child in 1991/92, an almost fourfold increase.

Adults in Residential Care

Chart 20

Registered Indian Population On Reserve, Adults in Care

Highlight

Over the last two decades, the average proportion of on-reserve Indian adults in residential care dropped slightly. From 3.7 per 1,000 in the seventies, this ratio decreased to 3.2 per 1,000 Indian adults on average in the eighties. In 1991/92, the ratio stood at 2.9 per 1,000 Indian adults.

Per Adult Expenditures

Chart 21

Registered Indian Population, Adults in Care and Per Adult Expenditures

Highlights

In 1991/92, a total of 525 Indian adults were in residential care.

Slightly under \$33,000 was required to cover the cost of care for one Indian adult in a residential home or institution in 1991/92.

Expressed in 1986 constant dollars, the average cost per adult increased just over four times between 1971/72 and 1991/92, from approximately \$6,200 to slightly over \$26,000.

Registered Indian Population, Average Monthly Number of Social Assistance Dependants

Highlight

The average monthly number of social assistance dependants among registered Indians has increased 72 percent in the last eleven years from slightly over 88,000 dependants in 1981/82 to just over 151,000 in 1991/92.

Table 22

**Average Number of Social Assistance Recipients
and Dependants per Month, Registered Indian Population**

Canada, 1981/82 - 1991/92

Fiscal Year	<u>Average Number of Recipients per Month (1)</u>	<u>Average Number of Dependants per Month (2)</u>
1981/82	39,146	88,079
1982/83	42,101	94,726
1983/84	43,750	98,438
1984/85	45,408	102,168
1985/86	48,494	109,112
1986/87	50,879	114,478
1987/88	54,170	121,882
1988/89	56,573	127,290
1989/90	59,680	134,280
1990/91	64,360	144,810
1991/92 (3)	67,139	151,065

Notes:

1. See Glossary for definition of Recipients. Excludes Indians residing in N.W.T. and Newfoundland.
2. The number of single recipients has been estimated by Social Development Branch to be 50 percent of the average number of recipients per month. The average annual number of dependants living in a family has been calculated by multiplying the annual average number of recipients living in a family by the average size which has been estimated to be 3.5: The total average number of dependants is the sum of the annual average number of single recipients and the average number of dependants living in a family. Excludes Indians residing in N.W.T. and Newfoundland.
3. In 1991/92, unlike previous years, social assistance for registered Indians living off reserve in Alberta was covered by the provincial government and is therefore not reflected in these numbers.

1991/92: Finance Branch, DIAND.

Social Assistance Expenditures

Chart 23

Registered Indian Population, Social Assistance Expenditures

Highlights

Total social assistance expenditures tripled between 1981/82 and 1991/92.

Expenditures per recipient increased 77 percent from 1981/82 to 1991/92, from \$4,216 to \$7,480. Over the same period, the consumer price index (inflation index) increased by 67 percent.

Dwellings

Chart 24

New and Renovated Dwelling Units On Reserve

Highlights

Between 1983/84 and 1991/92, an average of 3,212 new dwelling units per year were built on reserve. In 1991/92, slightly under 3,300 new units were constructed.

Just under 4,000 dwelling units on average per year were renovated between 1983/84 and 1991/92.

Table 24

Total Number of New and Renovated Dwelling Units On Reserve**Canada, 1983/84 - 1991/92**

Dwellings (1)		
Year	<u>Number of New Dwelling Units (2)</u>	<u>Number of Renovated Dwelling Units</u>
1983/84	3,517	4,380
1984/85	2,999	3,780
1985/86	2,831	3,250
1986/87	2,929	3,490
1987/88	3,166	4,141
1988/89	3,345	4,538
1989/90	3,958	4,301
1990/91	2,879 (3)	4,655
1991/92	3,281	3,288

Notes:

1. Excludes dwellings in the N.W.T. and Inuit communities of Northern Quebec as well as dwellings of bands under the James Bay and Northern Quebec Agreement since 1984 and the Sechelt Band since 1986. See Glossary for definition of Dwelling.
2. Includes dwelling construction funded through regular DIAND subsidy and Bill C-31 DIAND subsidy.
3. There was a change in the reporting method beginning in this year. Instead of including both "starts" (but not completed) and "completions" as was done in previous years, only those units for which final inspection reports were received in 1990/91 were counted.

Dwellings / Infrastructure

Chart 25

On-Reserve Dwellings with Adequate Water Supply and Sewage Disposal

Highlights

In 1991/92, about 91 percent of dwellings on reserve had adequate water supply compared with slightly over half in 1977/78.

The proportion of dwellings with adequate sewage disposal also increased considerably from about 47 percent in 1977/78 to almost 80 percent in 1991/92.

Table 25

Dwellings with Adequate Water Supply and Sewage Disposal On Reserve

Canada, 1977/78 - 1991/92

Self-government Negotiations

Chart 26

Self-government Negotiations

Highlight

As of September 1992, self-government legislation had been enacted on behalf of two aboriginal communities, the Sechelt Band of British Columbia and the Cree-Naskapi of Quebec. One additional proposal was in the final stage of legislative drafting. Thirteen other communities (or groups of communities) had completed framework agreements and were in the process of substantive negotiations.

Alternative Funding Arrangements

Chart 27

AFA Participation Rates

Highlights

Alternative funding arrangements (AFA) became available to Indian bands in June 1986 and the first agreement was signed in May 1987. Since then, the proportion of Indian bands securing authority to manage program funding through alternative funding arrangements (AFA) has continued to increase.

As of March 31, 1992 a total of 122 agreements were signed. One hundred and one of these agreements were signed with individual bands and twenty-one with tribal councils and other Indian organizations.

Table 27

Alternative Funding Arrangements**Canada, 1986/87 - 1991/92**

	AFA Participation Rates (1)					
	1986-87	1987-88	1988-89	1989-90	1990-91	1991-92
Signed Agreements	0	9	25	58	89 ^r	122
Bands Involved	0	21	38	79	131	213
Band Participation Rates	0	3.7%	6.7%	13.9%	22.9%	37.2%

Notes:

1. Excluded are bands operating under self-government legislation and within the Northwest Territories. In the latter case, services are delivered primarily by the territorial government.

Devolution

Chart 28

Indian-administered Expenditures as a Percent of Indian & Inuit Program Expenditures

Highlights

Indian control of program expenditures has steadily increased over the past 20 years.

In 1991/92, registered Indians administered 77.3 percent of DIAND's Indian and Inuit total program expenditures through Band Councils, Tribal Councils or other Indian organisations.

Since 1971/72, the number of authorized person-years in the Indian & Inuit Program decreased steadily from 6,556 to 2,682 in 1991/92, a 59 percent decrease.

Table 28

Devolution of Indian and Inuit Program Expenditures and Person-years

Canada, 1971/72 - 1991/92

Year	Indian & Inuit Program Expenditures (1) (Current \$)	Indian-administered Expenditures (Current \$)	Percent	Indian & Inuit Program (Auth. P.Y.'s)
1971/72	265,361,360	53,072,272	20.0	6,556
1979/80	718,895,900	276,955,600	38.5	5,569
1985/86	1,539,059,600	955,654,500	62.1	4,400
1986/87	1,705,026,500	1,092,086,500	64.1	4,108

Labour Force Participation

Chart 29

Registered Indian Population On Reserve 15 Years and Over in the Labour Force

Highlights

In 1986, 43 percent of Indians aged 15 years and over living on reserve were in the labour force.

Among the provinces in 1981 and 1986, British Columbia and Ontario had the highest participation rates.

Almost three-fifths of Yukon's Indian population aged 15 years and over living on reserve were in the labour force in 1986.

Table 29

**Percent of Population 15 Years and Over in the Labour Force,
Registered Indians Living On Reserve by Province/Territory**

1981 and 1986

Province	1981	1986 (1)

Labour Force Participation / Indian Males

Chart 30

Registered Indian Males On Reserve 15 Years and Over in the Labour Force

Highlights

Slightly more than half the Indian male population aged 15 years and over was in the labour force in 1986.

Three-fifths of Indian males in the Yukon, Ontario and British Columbia were in the labour force in 1986 while just over two-fifths were in the labour force in Nova Scotia and Newfoundland.

North / Aboriginal Composition

Chart 33

Aboriginal and Non-Aboriginal Populations, Yukon and the Northwest Territories

Highlights

As a percentage of the total territorial population, the aboriginal population of the Yukon increased from 15.1 percent in 1961 to 21.4 percent in 1986.

In the N.W.T., the proportion of aboriginals over the same period also increased but marginally from 57.5 to 58.7 percent.

Total								
Population	22,998	100	34,805	100	45,540	100	52,020	100

Notes:

1. For 1961 and 1971, two aboriginal origins were identified. Some Métis may have been represented as Indians but most are included in the non-aboriginal group.
2. For 1981, status and non-status Indians have been grouped as Indians; Métis appear in their own separate group; Persons reporting both aboriginal and non-aboriginal origins were accounted for under one aboriginal origin; no multiple aboriginal group existed.
3. For 1986, Inuit, North American Indians and Métis figures are a combination of the single response figure and those who identified one aboriginal ethnic origin and a non-aboriginal origin as a multiple response. Multiple aboriginal persons are those indicating more than one aboriginal origin.
4. The ethnic origin data for 1961 and 1971 include inmates in institutions while the data for 1981 and 1986 do not.

North / Mortality

Chart 34

Mortality Rates, Yukon and the Northwest Territories

Highlights

Mortality rates in the Yukon have declined slowly, averaging about 6 per 1,000 population in the 1960s and 5 per 1,000 population in the 1970s and 1980s.

The mortality rate in the Northwest Territories declined dramatically from an average of 10 per 1,000 population in the early 1960s to about 4 per 1,000 population since 1985.

Table 34

Mortality Rates, Yukon and Northwest Territories**1961 - 1990****Mortality Rates Per 1,000 (1)**

Year	<u>Yukon</u>	<u>N.W.T.</u>	Year	<u>Yukon</u>	<u>N.W.T.</u>
1961	6.4	11.4	1976	6.2	4.0
1962	5.0	12.9	1977	4.8	4.7

North / Infant Mortality

Chart 35

Infant Mortality Rates, Yukon and the Northwest Territories

Highlight

Infant mortality rates in the two territories declined significantly over the last 29 years. The Northwest Territories experienced the steepest decline, from 111 deaths per 1,000 live births in 1961 to a rate of 12 in 1990. Nevertheless, the Northwest Territories continues to have a higher rate than the Yukon in most years. Because of the small populations involved, random fluctuations in rates from year to year are to be expected.

Table 35

Infant Mortality Rates, Yukon and Northwest Territories

1961 - 1990

Infant Mortality Rates (1) (per 1,000 live births)					
Year	<u>Yukon</u>	<u>N.W.T.</u>	Year	<u>Yukon</u>	<u>N.W.T.</u>
1961	41.2	111.0	1976	22.3	34.7

North / DIAND Expenditures

Chart 36

DIAND Expenditures on the North (Current Dollars)

Highlights

Total DIAND expenditures on the North have increased every year and by 1991/92 were 2.4 times the 1982/83 expenditures. In constant (1986) dollars (i.e., adjusting for inflation), total DIAND expenditures increased by 75 percent over the same period.

The driving force for the increases is the transfers to the territorial governments, primarily in Formula Transfer Grants. These include funds to operate programs devolved from other federal departments as well as DIAND.

Direct DIAND expenditures have declined from their peak in 1984/85, largely as a result of devolving programs such as Forestry and Fire Suppression, to the Government of the Northwest Territories (1987/88) and Inter-territorial Roads (March 31, 1991) to both territories.

Table 36

Annual Northern Expenditure Plan, (ANEP), DIAND, Ottawa. The ANEP was updated to 1991/92. Some of the figures which appear may differ from previous editions.

North / Employment

Chart 37 **Aboriginal and Non-Aboriginal Employment Distribution,
Yukon and the Northwest Territories**

Highlight

Since 1971, the percentage of aboriginals aged 15 and over who are employed has increased in both territories, most notably in the Yukon. However, the aboriginal employment population ratios in the N.W.T. and Yukon remain substantially lower than those for non-aboriginals.

Table 37

Employment Distribution of Population 15 Years and Over, Yukon and Northwest Territories

1971 - 1986

	1971		1981		1986	
	<u>Aborig.</u>	<u>Non-Aborig.</u>	<u>Aborig.</u>	<u>Non-Aborig.</u>	<u>Aborig.</u>	<u>Non-Aborig.</u>
YUKON						
Population 15+	1,530	10,495	2,615	14,370	3,395	14,095
Employed	425	7,280	1,165	10,820	1,520	10,495
Percent Employed	27.8	69.4	44.6	75.3	44.8	74.5
NORTHWEST TERRITORIES						
Population 15+	9,450	10,420	15,380	14,285	18,675	16,255
Employed	3,200	7,360	6,090	11,520	7,505	13,445
Percent Employed	33.9	70.6	39.6	80.6	40.2	82.7

Note:

1. In 1971 only two aboriginal origins were identified, Indian and Inuit. Those with Métis origin therefore may have been included as Indian or as some other non-aboriginal origin. There are no separate counts for Métis available. In 1981 and 1986, Métis "ethnic origin" was recognized as a separate aboriginal origin.

1986: Statistics Canada, Census of Canada, Special Tabulations for the Strategic Analysis Division, DIAND.

North / Per Capita Income

Chart 38

Per Capita Income by Source, Yukon and the Northwest Territories, 1985

Highlights

The gap between aboriginal and non-aboriginal total income per capita is greater in the Northwest Territories than in the Yukon. In 1985, per capita income for aboriginals in the Northwest Territories was approximately 30 percent that of non-aboriginals while this percentage was 45 percent in the Yukon.

The difference in aboriginal income per capita between the two territories is largely due to the higher levels of both employment and government transfer income per capita in the Yukon.

Per Capita Income by Source for Population 15 Years and Over, Yukon and Northwest Territories

Statistics Canada, 1981 and 1986 Censuses of Canada. Special tabulations for the Strategic Analysis Division, DIAND.

Glossary

Adequate Water Supply:

Refers to the presence of pressurized potable water (i.e. piped, well, trucked, other) in a housing unit.

Adequate Sewage:

Includes the presence of lift stations, septic systems, forcemains, sewage collection mains, manholes, service connections, treatment plants, lagoons and outfall sewers and appurtenances, but excludes plumbing and fixtures.

Adults in Care:

DIAND provides funding for care in Type I and II institutions which may be located on reserve or operated by the province. Individuals must be assessed according to provincial standards to determine the level of care required. Residents of institutions are elderly and disabled persons in need of supervision and assistance.

Type I:

"is that required by a person who is ambulant and/or independently mobile, who has decreased physical and/or mental faculties, who requires primarily supervision and/or assistance with activities of daily living and provision for meeting psycho-social needs through social and recreational services. The period of time during which care is required is indeterminate and related to the individual condition";

Type II:

"is that required by a person with a relatively stabilized (physical or mental) chronic disease or functional disability, who, having reached the apparent limit of his recovery, is not likely to change in the near future, who has relatively little need for the diagnostic and therapeutic services of a hospital but who requires availability of personal care on a continuing 24-hour basis, with medical and professional nursing supervision and provision for meeting psycho-social needs. The period of time during which care is required is unpredictable but usually consists of a matter of months or years".

From Adult Long Term Institutional Care, Report of the Sub-Committee on Special Services in Hospitals, 1984.

Alternative Funding Arrangements (AFA):

AFA agreements were established by DIAND with Indian bands (and/or tribal councils) to allow new and more flexible financial and administrative arrangements in which the primary accountability of the band council is to the band members.

Average Annual Growth Rate:

The following formula was used to calculate average annual growth rates:

$$\text{AAGR} = (X_1 / X_0)^{1/n} - 1$$

where: X_1 = data for the most recent year in period
 X_0 = data for the earliest year in period
 n = length of period (years).

Bill C-31:

"Passed by Parliament in June 1985, Bill C-31 contained important amendments to the Indian Act. It had three principal goals:

to eliminate discrimination based on gender and marital status in the Indian Act;

to restore Indian status to victims of past discrimination; and

to enable Indian bands to assume control over their membership.

As a result of Bill C-31, the Indian Act now essentially treats men and women equally when determining status, and prevents anyone from gaining or losing status through marriage." From Lands, Revenues and Trust Review, Phase II Report.

Children in Care:

Is defined as the number of children who had to be placed away from parental care in order to protect them from neglect and/or abuse or prevent neglect and/or abuse.

Devolution:

Refers to the transfer of services and programs from DIAND control to Indian bands, tribal councils and other Indian authorities.

Dwellings:

Defined as living accommodations (with at least one separate bedroom) irrespective of occupancy, level of completeness or need for renovation or replacement.

Geographical Zones:

Urban: Is a zone where a band is located within 50 km from the nearest service centre with year-round road access.

Rural: Is a zone where a band is located between 50 km and 350 km from the nearest service centre with year-round road access.

Remote: Is a zone where a band is located over 350 km from the nearest service centre with year-round road access.

Special Access: Is a zone where a band has no year-round road access to the nearest service centre and, as a result, experiences a higher cost of transportation.

Service Centre: Is a community where the following services are available:

- a) - supplies, material and equipment (ie. construction, office)
- b) - a pool of skilled or semi-skilled labour
- c) - at least one financial institution, and
- d) - provincial and federal services.

Indian Register:

"The Indian Register is a list of all registered Indians (as defined in the Indian Act) which is kept by DIAND. Information on this list concerning the demographic characteristics of the Indian population is updated regularly by band officials and

published for December 31 of each year." From Lithwick, Schiff, Vernon, An Overview of Registered Indian Conditions in Canada, INAC, 1986.

Life Expectancy:

"Is an estimation of the average number of years of life remaining to each member of a group of persons. It is calculated on the basis of observed age-specific mortality rates at any particular moment in time, assuming that the risks of dying remain constant from the moment of estimation until the death of all members of the group." From Wilkins, Russell, Health Status in Canada, 1926-1976, Institute for Research on Public Policy, May 1980.

Population Served:

Vital statistics are reported by the regions and represent individuals served by the Medical Services Branch (MSB, Health and Welfare). The population at risk should be population served, not total registered Indian population. Crude rates are calculated using population served as reported by the regions. MSB data are subject to variations in coverage. Some regions obtain statistics for both on and off-reserve Indians (Manitoba, Saskatchewan, Alberta and the Yukon) whereas other regions obtain figures for most on-reserve Indians only (Atlantic and Ontario). In Quebec, statistics cover less than half of the on-reserve Indians since 1990. The coverage excludes Indians in British Columbia. Since 1987, those living in the Northwest Territories because of the transfer of health services to the Government of the Northwest Territories.

Recipients:

Are defined as those individuals who receive social assistance payments whereas **Dependants** are all individuals who benefit from the payments.

Self-government Negotiations:

Process in which government authority is transferred to Indian and Inuit people. The following steps are required:

Substantive negotiations:

Negotiations leading directly to new arrangements which will be effected through legislation.

Framework negotiations:

Terms of reference for negotiations include a community's itemization of the authorities desired beyond the Indian Act, the proposed modifications to its governing structures and the new legislative arrangements sought to enable these changes. Also included are workplans and budgets for substantive negotiations and the ratification process for any agreements.
