INTRODUCTION

In order to assist the reader in locating the data more easily for each responsibility centre or band, the responsibility centres are ordered alphabetically within each region and the bands are ordered alphabetically within each responsibility centre. The band number also is included beside each band name.

Any administrative changes to the bands or responsibility centres occurring in 1982 appear on page (xi).

The symbols used in the statistical tables are TOT for total population, M for male population and F for female population.

The full definitions for the type of residence are described below; abridged definitions and the corresponding code numbers are shown on each page of the statistical report.

The reader should note that the On Reserve type of residence is expanded to include registered Indian band members who are living (1) on reserves set aside for their band, and living (2) on reserves set aside for other bands. The same applies to the registered Indian band members who are living (3) on Crown land in a community administered by their band, living (4) on Crown land in a community administered by other bands, and living (5) on Crown land in a community which is not administered by any specific band.

(vi)

Finally, those band members who are not living on reserve or on Crown land as defined above are coded as (6) Off Reserve.

As a result of the new residence definitions, the On Reserve population, namely the sum of the population living (1) on reserves set aside for their band and the population living (2) on reserves set aside for other bands, will not be historically comparable to the "on reserve" population figures prior to 1974.

The same holds true for the On Crown Land and Off Reserve populations. However, the new residence definitions provide a significant improvement to the quality of the residence data since they are more precise than the old definitions.

INTRODUCTION

Afin d'aider le lecteur à repérer plus facilement chaque centre de responsabilité ou bande, les centres de responsabilité sont disposés par ordre alphabétique à l'intérieur de chaque région, et les bandes sont également disposées par ordre alphabétique à l'intérieur de chaque centre de responsabilité. Le numéro de la bande apparaît à côté du nom de chaque bande.

Tous les changements administratifs survenus au cours de 1982 dans le cas des bandes et des centres de responsabilité, sont indiqués à la page (xi).

Dans les tableaux statistiques, le symbole TOT représente la population entière, M la population masculine et F la population féminine.

Les types de résidence sont décrits en détail ci-après. Les descriptions en sabrége et les numéros de code correspondants apparaissent sur chaque page du rapport statistique.

Le lecteur devra noter que le type de résidence Dans une réserve comprend les membres inscrits de bandes qui résident (1) dans des réserves mises de côté pour leur bande et ceux qui résident (2) dans des réserves mises de côté pour d'autres bandes. Il en est de même pour les membres inscrits de bandes indiennes qui habitent

sur une terre de la Couronne. La catégorie Sur une terre de la Couronne comprend les membres de bandes qui habitent (3) sur une terre de la Couronne dans une communauté administrée par leur bande, ceux qui habitent (4) sur une terre de la Couronne dans une communauté administrée par d'autres bandes, et ceux qui habitent (5) sur une terre de la Couronne dans une communauté qui n'est pas administrée par aucune bande spécifique. En dernier lieu, les membres de bandes qui n'habitent pas dans les réserves ni sur une terre de la Couronne sont codés (6), c'est-à-dire, habitant Hors d'une réserve.

A la suite de ces nouvelles définitions de types de résidence, la population Dans une réserve, c'est-à-dire, la somme de la population résidant (1) dans des réserves mises de côté pour la bande et la population résidant (2) dans des réserves mises de côté pour d'autres bandes, ne sera pas comparable historiquement aux chiffres de population dans les réserves avant 1974. Il en est de même pour la population Sur une terre de la Couronne et la population Hors d'une réserve. Quoiqu'il en soit, ces nouvelles définitions améliorent sensiblement les données concernant la résidence, puisqu'elles sont plus précises que les anciennes définitions.
