

This statistical report for the school year 1957-58 consists of the following four sections:
(1) Report on promotions, non-promotions and attendance of Indian pupils June 1958.
(2) Age ${ }_{s}$ grade and sex report on Indian pupils, January 1958.
(3) Report on destinations of pupils withdrawing from Indian Schools June 1957.
(4) Results of Grade IV Dominion Achievement tests, May 1958.

The Education Division gratefully acknowledges the co-operation of Principals, Teachers, Regional School Inspectors, Agency Superintendents and Regional Supervisors in collecting and forwarding data for the reports and the work of the Elementary and Secondary Education Section of the Dominion Bureau of Statistics in compiling and processing the numerical results.

## Introduction

This statistical survey provides a factual study of the progress of pupils in Indian schools. It contains a summary of non-promotions which have been classified according to the reason for failure.

Tables have been arranged for each region showing Indian Day and Residential schools separately. Totals of the regions show the results for Canada.

In the attendance reports the numbers above the dark line are considered unsatisfactory and indicate a possibility of failure due to irregular attendance. This result is illustrated in the dark section of the circular attendance chart.

In Day Schools it appears that non-promotions in over thirty per cent of cases may result from irregular attendance. In Residential Schools the percentage of failures fror irregular attendance is not too serious.

## INTRODUCTION

This statistical survey is a quantitative study dealing with the number of Indian pupils in each grade and the number of grades taught in the schools.

The data for this survey were gathered from Indian and provincial schools across Canada from a Dominion Bureau of Statistics form entitled, "Teacher's Annual Age-Grade Report" on which each teacher entered the number of children in her class by age, grade and sex in each classroom.

These forms have been constructed to indicate between the dark heavy lines, the number of students progressing according to the normal age group. Number above the higher dark line indicate the number of under age students, while the numbers below the lower dark line indicate the number of over age students.

A circular chart has been included showing the ratio of under age, normal age and over age Indian students of Canada.

## THE STRUCTURE OF THE SIUDY

The Indian school population falls into five groups, (1) the children attending Indian day schools (2) those who for various reasons require institutional care of the residential schools (3) those who live within a short distance of a residential school and may attend it as day students (4) those who have been integrated into the Canadian educational system and attend provincial schools and (5) those who for various reasons it is advantageous to have them attend a private school. Although fundamentally the schools attended by these five groups have similar aims nevertheless each type of school has a special function and attracts children of parents of divergent socioeconomic backgrounds and cultural and educational development. It was expected that cortain well dofined differences in pupil distribution might be discovered between the five groups and for this reason they were separated for comparative study.

The school population was next divided into administrative regions, Maritimes, Quebec, Southern Ontario, Northern Ontario, Manitoba, Saskatchewan, Alberta and British Columbia and Yukon.

STATISTICAL REPORT ON DESTINATIONS OF PUPILS WITHDRAWING FROM INDIAN SCHOOLS JUNE 1957

## DESTINATIONS OF PUPILS WITHDRAWING FROM SCHOOL

The data for this statistical report on the pupils leaving Indian schools in June 1957 were gathered from the schools on the form prepared by the Dominion Bureau of Statistics entitled. "Principal's Report on Destinations of Pupils Withdrawing from School", and processed by the Bureau of Statistics.

The report is arranged by regions with a separation of day and residential schools.

This section of the report deals only with pupils attending Indian schools and, therefore, excludes 20 per cent of the Indian school population attending provincial schools.

In this report the withdrawing pupils are divided into three categories:

1. Pupils withdrawing from the Indian school to continue their education at another school.
2. Pupils leaving to take employment.
3. Pupils leaving school for other purposes, such as, to help in the home, marriage, death, etc.

The data on these three categories are presented in two series of tables, one showing the grade, sex and destinations of all withdrawing pupils and the other giving the age, grade and sex of categories 2 and 3 only.
