### **EXPORT CONTROLS**

A key priority of Canada's foreign policy is the maintenance of peace and security. To this end, the Government of Canada strives to ensure that Canadian military exports are not prejudicial to peace, security or stability in any region of the world or within any country.

This policy is implemented primarily through Canada's system of export controls, as authorized by the *Export and Import Permits Act* (enacted in 1947). This act requires that any resident of Canada who wishes to export an article named in the Export Control List (ECL) obtain, prior to shipment, an export permit issued by Foreign Affairs and International Trade Canada (DFAIT).<sup>1</sup> The Export Control List includes military, dualuse, and strategic goods and technology, all U.S.-origin goods and technology, and a limited number of items that are controlled for economic reasons.

The military goods and technology described in this report are listed under Group 2 ("Munitions List") of the Export Control List. Items listed in Group 2 are "specially designed or modified for military use." Civilian goods and technology that are not covered by any group in the Export Control List are not normally subject to export controls, even if they are intended for sale to a military end user (these are items such as fuel and food). Certain multilateral trade sanctions, such as those imposed by the United Nations Security Council, may also be implemented through export controls. As well, Canada maintains an Area Control List (ACL), which currently includes two countries: Myanmar and Belarus.<sup>2</sup> All goods destined to these countries are subject to export controls. In addition, Canada has maintained a ban on Group 2 items to Pakistan since 1998.

Under current export control policy guidelines mandated by Cabinet, Canada closely controls the export of military goods and technology to countries:

- that pose a threat to Canada and its allies;
- that are involved in or under imminent threat of hostilities;
- that are under United Nations Security Council sanctions; or
- whose governments have a persistent record of serious violations of the human rights of their citizens, unless it can be demonstrated that there is no reasonable risk that the goods might be used against the civilian population.

Once an application to export controlled goods or technology has been received from an exporter, wide-ranging consultations are held among human rights, international security and defence industry experts at DFAIT (including those resident at Canada's overseas

<sup>&</sup>lt;sup>1</sup> Further information about Canada's export controls can be found on the Internet at www.exportcontrols.gc.ca.

<sup>&</sup>lt;sup>2</sup> Under the authority of Section 6 of the *Export and Import Permits Act*, the Governor-in-Council added Myanmar to the Area Control List effective August 5, 1997, and added Belarus to the ACL effective December 14, 2006.

diplomatic missions), the Department of National Defence and, as necessary, other government departments and agencies. Through such consultations, each export permit application is assessed for its consistency with Canada's foreign, security and defence policies. Regional peace and stability, including civil conflict and human rights, are actively considered. Careful attention is paid to mandatory end-use documentation in an effort to ensure that the export is intended for a legitimate end-user and will not be diverted to illegitimate ends that could threaten the security of Canada, its allies, or other countries or people.

The bulk of reported firearms exports are of firearms intended for sporting or other recreational use and are not modern military weapons. Since a large volume of Canadian firearms exports go to private end-users, steps are taken to ensure items are not diverted into the illegal arms trade or used to fuel local violence. As part of this process, the bona fides of the end-users are thoroughly investigated. Canadian diplomatic missions and other sources may provide information about destination countries' firearms control laws, procedures and enforcement practices.

Prohibited firearms, weapons, devices, or components thereof<sup>3</sup> that are included in the Export Control List may be exported only to destinations in the Automatic Firearms Country Control List (AFCCL) (see Table 6). Canada has inter-governmental defence, research, development and production arrangements with countries in the AFCCL.

Canada's defence industry makes valuable contributions to the nation's prosperity. It develops high-technology products and is closely integrated with counterparts in allied countries. Export controls are not meant to hinder international trade unnecessarily but to regulate and impose certain restrictions on exports in response to clear policy objectives, described above. Canada's defence industry provides the Canadian Forces, as well as the armed forces of our allies, with the equipment, munitions and spare parts necessary to meet operational needs, including requirements for combat and peacekeeping missions. As stated in the United Nations Charter, all states share a right to legitimate self-defence.

#### INTERNATIONAL COOPERATION ON MILITARY TRADE

Multilateral action is an important means of promoting international peace and security. Canada supports and participates in a range of arms control and non-proliferation activities, working closely with like-minded countries.<sup>4</sup>

#### Wassenaar Arrangement

Most items in the Export Control List are there because of Canada's commitments to like-minded countries that participate in multilateral export-control regimes or because of

<sup>&</sup>lt;sup>3</sup> Subsection 84(1) of the Criminal Code provides definitions of "prohibited firearm", "prohibited weapon", and "prohibited device".

<sup>&</sup>lt;sup>4</sup> Further information about Canada's non-proliferation policies can be found on the Internet at www.dfaitmaeci.gc.ca/arms/menu-en.asp.

Canada's obligations as a signatory to international agreements that seek to control and monitor the movement of sensitive goods and technology.

The control regime that deals with the military goods and technology covered in Group 2 of the Export Control List is the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies.<sup>5</sup> Founded in 1996, the Initial Elements define the objectives of the Arrangement as, inter alia:

"to contribute to regional and international security and stability, by promoting transparency and greater responsibility in transfers of conventional arms and dual-use goods and technologies, thus preventing destabilising accumulations."

Through their national policies, the 40 participating states seek to ensure that transfers of items covered by the common export control lists created in meetings of the Wassenaar Arrangement do not contribute to the development or enhancement of military capabilities that have the potential to undermine regional and global security and stability. Participating states also take every precaution to ensure that such goods and technologies are not diverted.

### United Nations Register of Conventional Arms

Canada continues to actively promote greater transparency in the trade of conventional weapons. In 1991, Canada was a founding contributor to the United Nations Register of Conventional Arms, to which governments voluntarily supply data on their imports and exports of seven major categories of conventional weapons systems.<sup>6</sup> The annually updated Register makes a significant contribution to transparency, confidence-building and enhanced global security. Each year since the inception of the Register, more than 90 governments on average have made submissions to it; of these, about 70 have done so consistently, including Canada. Currently, there is reasonable representation from most geographic regions, capturing over 95 percent of the international trade in major conventional weapons. As a result, the Register has become an important and authoritative source of information.

Canada is also one of a growing number of countries that voluntarily submit data to the Register on military holdings and on procurement through national production. This information goes beyond the minimum currently required by the United Nations and makes an important contribution to global transparency on military capabilities.

#### Trade in Small Arms and Light Weapons

Resolving the global small-arms problem is seen as an integral aspect of conflict prevention and management, peacemaking and post-conflict reconstruction. In support of this, Canada, in cooperation with like-minded partners, is looking at ways to address the

<sup>&</sup>lt;sup>5</sup> More information about the Wassenaar Arrangement can be found on the Internet at www.wassenaar.org. <sup>6</sup> More information about the United Nations Register of Conventional Arms can be found on the Internet at http://disarmament.un.org.

problem of small-arms proliferation, which can undermine security and development efforts and contribute to human suffering. Canada has adopted an integrated approach, addressing the arms control, crime prevention and peacebuilding dimensions of the issue at the global, regional and national levels. Such an approach targets supply-side and transit issues, and seeks to cope with post-conflict surplus stocks and reduce the demand for weapons.

With respect to arms controls, Canada promotes measures designed to achieve greater restraint and transparency in legal transfers of small arms and light weapons. Aspects under review include codes of conduct, transparency and registry initiatives, as well as consciousness-raising activities in security-related bodies such as the North Atlantic Treaty Organization (NATO), the Organization for Security and Co-operation in Europe, and the Wassenaar Arrangement. Canada's own procedures are strict and seek to ensure a high level of control over exports of small arms.

### MILITARY EXPORT STATISTICS

As part of Canada's effort to encourage greater transparency on military exports, DFAIT has published periodic reports on annual exports of military goods and technology since 1990.

Statistics are obtained from utilization reports filed by exporters of military goods or technology, which detail actual shipments up to the maximum authorized quantity or value defined on export permits. Reports include the country of destination, a description of the goods exported, their quantity and their value in Canadian dollars. Details of export transactions are protected due to the commercially confidential nature of such information and restrictions under the *Privacy Act*.

Export controls apply to all foreign destinations. However, due to close and long-standing military cooperation with the United States, including the integrated nature of North America's defence industry, permit exceptions apply to most Group 2 exports destined for final use in that country. Exports of military goods and technology to the United States are therefore not reported here.

Certain statistics on Canadian exports to U.S. military users may be available from other sources, such as Statistics Canada or the Canadian Commercial Corporation, but these figures may include non-military goods such as commercial computers, civil-certified aircraft or other civilian equipment. Since there is no direct correlation between the commodity codes used by Statistics Canada and the Export Control List numbers, and because each source uses different methods of data collection, a meaningful evaluation of the information from these two sources is extremely difficult.

The internationally accepted standard for statistics on worldwide military trade is the previously mentioned United Nations Register of Conventional Arms. However, the Register limits itself to precise categories of weapons systems and does not include parts, components or the wide assortment of non-lethal support systems (such as radar

equipment, simulators and software designed for military use) that make up a certain percentage of Canada's military exports.

Canada's total exports of military goods and technology amounted to \$724 million, \$644 million and \$322 million in 2003, 2004 and 2005 respectively. In 2002, the last year this report was produced, Canada's exports of military goods amounted to some \$678 million. As in previous years, the major share of Canada's military exports went to NATO member countries and countries in the AFCCL, and the majority of these are highly developed countries. Exports to countries ranked as having a low human development index by the United Nations Development Programme declined from an already minimal level to zero in 2005.

## DATA INTERPRETATION NOTES

The following data interpretation notes apply to Tables 2, 4, and 5:

i) Since procurement contracts awarded by governments may have very high values and extended delivery schedules, single sales contracts by a single exporter may account for a large share of total military exports in a given year or number of years. Major changes in totals from one year to another may be explained by the beginning or end of a small number of large contracts.

ii) The tables do not report exports to the United States, which are estimated to account for over half of Canada's exports of military goods and technology.

iii) The Export Control List (ECL) item numbers used in Tables 4 and 5 are explained with illustrative examples in Table 3. The full ECL, which consists of detailed technical descriptions of all controlled goods and technology, can be found in *A Guide to Canada's Export Controls*, which is available on the Internet at:

www.exportcontrols.gc.ca

iv) Table 2 reports annual values of total exports of military goods and technology, including exports to individual countries. Table 4 breaks down the value of exports to individual countries according to the ECL item number assigned to those exports. However, the sum total of exports by ECL item number to an individual country calculated from Table 4 might not equal the total value of exports to that destination reported in Table 2. Since goods or technology included in a single export permit may be classified under several ECL item numbers, Tables 4 and 5 contain some double-counting.

## **Table 1: Summary Statistics**

| Year  | 2003  |           | 2004          |       | 2005          |       |  |
|---|---|-----------|---------------|-------|---------------|-------|--|

\* Please refer to Data Interpretation Notes on page 6. \*\*Please note that if a destination does not appear in the above list, there were no military exports from Canada to that destination in calendar years 2003, 2004 or 2005. As noted in the introduction, exports of military products to the United States do not require a permit and are therefore not reported here.

| Export<br>Control List<br>Item | Illustrative Examples   |
|--------------------------------|---|
| 2-1                            | Smooth-bore weapons with a calibre of less than 20 mm, other arms and automatic weapons with a calibre of 12.7 mm or less and accessories   |
| 2-2                            | Smooth-bore weapons with a calibre of 20 mm or more, other weapons or armament with a calibre greater than 12.7 mm, projectors and accessories,   |
| 2-3                            | Ammunition and fuse-setting devices, and specially designed components  |
| 2-4                            | Bombs, torpedoes, rockets, missiles, other explosive devices and charges, and related equipment and accessories specially designed for military use   |
| 2-5                            | Fire control, related alerting and warning equipment, and related systems; test, alignment and countermeasure equipment specially designed for military use; and specially designed components and accessories  |
| 2-6                            | Ground vehicles and components  |
| 2-7                            | Chemical or biological toxic agents, riot control agents, radioactive materials, and related equipment, components, materials   |
| 2-8                            | Energetic materials and related substances  |
| 2-9                            | Vessels of war, special naval equipment and accessories, and components specially designed for military use   |
| 2-10                           | Aircraft, lighter-than-air vehicles, unmanned airborne vehicles, aero-engines<br>and "aircraft" equipment, related equipment and components, specially<br>designed or modified for military use   |
| 2-11                           | Electronic equipment not controlled elsewhere and components  |
| 2-12                           | High-velocity kinetic energy weapon systems and related equipment, and specially designed components  |
| 2-13                           | Armoured or protective equipment and constructions and components   |
| 2-14                           | Specialized equipment for military training or for simulating military scenarios, simulators specially designed for training in the use of any firearm or weapon controlled in 2-1 or 2-2, and specially designed components and accessories                      |
| 2-15                           | Imaging or countermeasure equipment, specially designed for military use, and specially designed components and accessories   |
| 2-16                           | Forgings, castings and other unfinished products the use of which in a controlled product is identifiable by material composition, geometry or function, and which are specially designed for any products controlled in 2-1 to 2-4, 2-6, 2-9, 2-10, 2-12 or 2-19 |
| 2-17                           | Miscellaneous equipment, materials and specially designed components  |

# Table 3: Group 2 of Canada's Export Control List

| Export<br>Control List<br>Item | Illustrative Examples  |
|--------------------------------|--|
| 2-18                           | Equipment for the production of products referred to in the Munitions List   |
| 2-19                           | Directed energy weapon systems, related or countermeasure equipment and test models, and specially designed components |
| 2-20                           | Cryogenic and superconductive equipment, and specially designed components and accessories                             |
| 2-21                           | Software   |
| 2-22                           | Technology   |

Note: The full list of goods and technology, including precise definitions of the terms used in the table, may be found in A Guide to Canada's Export Controls, available on the Internet at www.exportcontrols.gc.ca.
