### BULLETIN OF

#### **INITIAL ASSESSMENT DECISIONS**

## UNDER THE FEDERAL ENVIRONMENTAL ASSESSMENT AND REVIEW PROCESS

EDITION 2

September 1, 1986 - December 31, 1986

#### INTRODUCTION

Initial assessment is part of the federal Environmental Assessment and Review Process (EARP) which is used to implement Government policy on environmental assessment. Initial assessment helps determine the potential environmental and directly related social implications of proposals for which the government has a decision-making responsibility. This Bulletin contains summaries of decisions about proposals made as a result of initial assessment.

EARP is to be used early in planning before irrevocable decisions or actions are taken. Guidelines on this policy were issued by Order in Council June 21, 1984.

This Guidelines Order applies to all federal departments, boards, agencies. Parent corporations are expected to make this part of their corporate policy unless this is not possible within the legislative authority of the corporation. The Order also applies to agencies that deal with regulation of certain activities unless this would cause a duplication of procedures or legislation does not permit their decisions to be based on environmental factors. In this publication all these are referred to as departments.

EARP consists of two possible phases: initial assessment and public review. This Bulletin deals with the decisions arising from the first phase. It is published quarterly by the Federal Environmental Assessment Review Office (FEARO) and is supplementary to the "Initial Assessment Guide" to EARP (also published by FEARO) that provides federal departments with procedural guidelines for the initial environmental assessment of proposals.

#### **INITIAL ASSESSMENT**

Initial assessment is used when a department intends to undertake any proposal of its own. It is also used when a department has the authority to make a decision about a proposal of another organization that:

- might have an effect on federal Government responsibility;
   would require federal Government financial commitment;
- would be undertaken on lands administered by the federal Government, including those offshore.

Initial assessment starts with an environmental screening by a department to determine the potential environmental and directly related social effects of a proposal; that is, effects that could bring adverse changes to the natural environmental and effects that these changes could have on people. Screening may lead to additional study that results in a detailed document called an Initial Environmental Evaluation (IEE). This document is described in more detail on page 4 of the "initial Assessment Guide" published by FEAR0 for departments to use during initial assessment. Its place in initial assessment can be seen in the diagram on page 4 of this Bulletin, which is taken from the Guide.

As a result of assessment, a department makes a decision about the environmental significance of a proposal. In this Bulletin each proposal listed has been assigned a number indicating what decision was taken. These decisions are described on page 5 in the section "How To Use This Bulletin." Eight decisions in that list are the same as those described on page 4 of the "Initial Assessment Guide." There are two additional numbers: 0 -to indicate that initial assessment of the proposal has started but no decision has been taken and 10 -to indicate that the proposal is to be carried out in another country under the auspices of the Canadian international Development Agency and although an environmental impact statement may be produced, there may be no public review by an independent panel.

Two of the decisions may be made immediately: automatic exclusion from study or automatic referral to the Minister of the Environment for a public review by an independent panel. Excluded proposals are those that would not produce any adverse environmental effects, such as routine maintenance. Automatic referrals are made for proposals that potentially could produce significant adverse environmental effects. Automatic exclusions or referrals are usually based on lists prepared by departments in co-operation with FEARO.

#### **INITIAL ASSESSMENT**

#### How to Use This Bulletin

The list in this bulletin consists of four columns of information: LOCATION - PROPOSAL - DEPARTMENT - DECISION

#### Location

Locations are listed by province first and locality second, for example, ALTA.-Banff Park. Two other designations are used: offshore and international.

Provinces and territories are abbreviated as follows:

NFLD. Newfoundland N.B. New Brunswick QUE. Quebec MAN. Manitoba ALTA. Alberta Yukon Territory Y.T. Prince Edward Island P.E.I. N.S. Nova Scotia

N.S. Nova Scotia
ONT. Ontario
SASK. Saskatchewan
B.C. British Columbia
N.W.T. Northwest Territories

Offshore designations are:

Gr. Banks Grand Banks Offshore

Sct. Shelf Scotian Shelf
H. Bay Hudson Bay
B. Sea Beaufort Sea
St. Lawrence Gulf of St. Lawrence
Geo. Bank Georges Bank
Arc. Is. Arctic Islands
W. Coast Offshore West Coast

The designation for proposals outside of Canada is Int. - International.

#### **Proposal**

Each proposal is described first from its largest to its smallest components in descending order, and second, by the action, for example, AIRPORT RUNWAY-EXTEND.

#### **Department**

Department means any department, board or agency and any parent corporation of the Government of Canada.

#### **Decisions**

Initial assessment decisions about proposals are listed as numbers and for the most part, are the same decisions as those listed on page 4 of the "Initial Assessment Guide". Number 0, however, is not a decision; rather, it indicates that the initial assessment of the proposal has begun and n o decision has been made as yet. One of the outcomes of initial assessment may be an automatic exclusion of a proposal from study. Exclusions are not included in this Bulletin but information about them may be obtained from departments. Decisions designated as Number 10, indicating the proposal is to be implemented in another country through CIDA, are not in the Guide but are in this Bulletin.

- 0 initial assessment starting no decision yet;
- 1 automatically exclude proposal from study as a type that would not produce any adverse environmental effects, (NOT listed in this Bulletin);
- 2 proceed with proposal because there are no significant adverse effects:
- 3 proceed with proposal because the potentially adverse impacts may be mitigated with known technology;
- 4 assess the proposal in greater detail (Initial Environmental Evaluation-IEE) because the adverse effects that might be caused by the proposal are unknown:
- 5 give the proposal further study (IEE) because the ability to mitigate adverse effects is unknown;
- 6 refer the proposal to the Minister of the Environment for a public review by a panel because the potential adverse impacts are significant;
- 7 refer the proposal to the Minister of the Environment for a public review because public concern about it is such that a review is desirable:
- 8 automatically refer the proposal to the Minister of the Environment for a public review as a type that potentially could produce significant environmental effects.
- 9 either modify the proposal and rescreen it or abandon it because the impacts are unacceptable.
- 10 production of an Environmental Impact Statement at request of the Canadian International Development Agency because potential adverse impacts are significant (CIDA)

#### To Obtain More Information on Any Proposal

The list of proposals is a summary meant to identify, in a few key words, proposals that have entered the process. It is not intended to provide a complete description nor be the sole source for information about such proposals. More detail about any proposal, as well as lists of automatic exclusions and automatic referrals, is retained by the department concerned. Requests for additional information -available in either official language- should be made to the appropriate departmental contact listed at the end of this bulletin.

FEAR0 staff are also available for advice. Write or telephone collect to:

13th Floor 750 Cambie Street Vancouver, B.C. Hull, Quebec V6B 2P2
