

BULLETIN:
INITIAL ASSESSMENT DECISIONS

**Federal Environmental Assessment
and Review Process**

Edition 5
June 1, 1988 — December 31, 1989

INTRODUCTION

Initial assessment is part of the federal Environmental Assessment and Review Process (EARP) which is used to implement Government policy on environmental assessment. Initial assessment helps determine the potential environmental and directly related social implications of proposals for which the government has a decision-making responsibility. This Bulletin contains summaries of decisions about proposals made as a result of initial assessment.

EARP is to be used early in planning before **irrevocable** decisions or actions are taken. Guidelines on this policy were issued by Order in Council June 21, 1984.

This Guidelines Order applies to all federal departments, boards, agencies. Parent corporations are expected to make his part of their corporate policy unless this is not possible within the legislative authority of the corporation. The Order also applies to agencies that deal with regulation of certain activities unless this would cause a duplication of procedures or legislation does not permit their decisions to be based on environmental factors. In this publication all these are referred to as departments.

EARP consists of two possible phases: initial assessment and public review. This Bulletin deals with the decisions arising from the first phase. It is published quarterly by the Federal Environmental Assessment Review Office (FEARO) and is supplementary to the *Initial Assessment Guide* to EARP (also published by FEARO) that provides federal departments with procedural guidelines for the initial environmental assessment of proposal s.

INITIAL ASSESSMENT

Initial assessment is used when a department intends to undertake any proposal of its own. It is also used when a department has the authority to make a decision about a proposal of another organization that:

- might have an effect on federal Government responsibility;
- would require federal Government financial commitment; or,
- would be undertaken on lands administered by the federal Government, including those offshore.

Initial assessment starts with an environmental screening by a department to determine the potential environmental and directly related social effects of a proposal; that is, effects that could bring adverse changes to the natural environment and effects that these changes could have on people. Screening may lead to additional study that results in a detailed document called an Initial Environmental Evaluation (IEE). This document is described in more detail on page 4 of the **Initial Assessment Guide** published by FEARO for departments to use during initial assessment. Its place in initial assessment can be seen in the diagram on page 3 of this Bulletin, which is taken from the Guide.

As a result of assessment, a department makes a decision about the environmental significance of a proposal. In this Bulletin each proposal listed has been assigned a number indicating what decision was taken. These decisions are described on page 5 in the section “How to Use this Bulletin”. Eight decisions in that list are the same as those described on page 4 of the **Initial Assessment Guide**. There are two additional numbers: 0 — to indicate that initial assessment of the proposal has started but no decision has been taken and 10 — to indicate that the proposal is to be carried out in another country under the auspices of the Canadian International Development Agency and although an environmental impact statement may be produced, there may be no public review by an independent panel.

Two of the decisions may be made immediately: automatic exclusion from study or automatic referral to the Minister of the Environment for a public review by an independent panel. Excluded proposals are those that would not produce any adverse environmental effects, such as routine maintenance. Automatic referrals are made for proposals that potentially could produce significant adverse environmental effects. Automatic exclusions or referrals are usually based on lists prepared by departments in cooperation with FEARO.

Initial Assessment

HOW TO USE THIS BULLETIN

Proposed projects are listed alphabetically by province or territory and by location. Inter-provincial and offshore projects are listed under "CANADA", and international projects under the designation "INTERNATIONAL".

The project is described in a few key words. The federal department, board, agency or corporation responsible for the project is listed (see list of abbreviations). A document number is provided to assist requests for additional information. Initial assessment decisions are listed in the final column, by number code 0 to 10. See the next page for details on the Decisions Code.

DEPARTMENTAL ABBREVIATIONS

Names of federal departments, boards, agencies and corporations are abbreviated as follows:

AC	Agriculture Canada	FO	Fisheries and Oceans
AECB	Atomic Energy Control Board	HWC	Health and Welfare Canada
CIDA	Canadian International Development Agency	INAC	Indian and Northern Affairs Canada
CNR	Canadian National Railways	NCC	National Capital Commission
DND	Department of National Defence	PWC	Public Works Canada
EC	Environment Canada	RCM	Royal Canadian Mint
EMR	Energy, Mines and Resources	TC	Transport Canada

KEY TO DECISIONS CODE

Initial assessment decisions are listed as numbers from 0 to 10. Those projects qualifying for automatic exclusion from further study, Code 1, are not listed in this Bulletin, but information about them may be obtained from departments.

- 0 Initial assessment starting; no decision yet.
- 1 Automatically exclude proposal from study as a type that would not produce any adverse environmental effects (NOT listed in this Bulletin).
- 2 Proceed with proposal because there are no significant adverse effects.
- 3 Proceed with proposal because the potentially adverse impacts may be mitigated with known technology.
- 4 Assess the proposal in greater detail (Initial Environmental Evaluation — IEE) because the adverse effects that might be caused by the proposal are unknown.
- 5 Give the proposal further study (IEE) because the ability to mitigate adverse effects is unknown.
- 6 Refer the proposal to the Minister of the Environment for a public review by a panel because the potential adverse impacts are significant.
- 7 Refer the proposal to the Minister of the Environment for a public review because public concern about it is such that a review is desirable.
- 8 Automatically refer the proposal to the Minister of the Environment for a public review as a type that potentially could produce significant environmental effects.
- 9 Either modify the proposal and rescreen it or abandon it because the impacts are unacceptable.
- 10** Production of an Environmental Impact Statement at request of the Canadian International Development Agency (CIDA) because potential adverse impacts are significant.

TO OBTAIN MORE INFORMATION ON ANY PROPOSAL

The list of proposals is a summary meant to identify, in a few key words, proposals that have entered the process. It is not intended to provide a complete description nor be the sole source for information about such proposals. More detail about any proposal, as well as lists of automatic exclusions and automatic referrals, is retained by the department concerned. Requests for additional information — available in either official language — should be made to the appropriate department contact listed.

FEARO staff are also available for advice. Write or telephone collect to:
