REMERCIEMENTS

Cette bibliographie a été créée par le Comité de cartographie des plaines inondables. Le Comité de cartographie des plaines inondables est un partenariat entre Sécurité publique Canada, Ressources naturelles Canada, Environnement et Changement climatique Canada, le Conseil national de recherches du Canada, Recherche et développement pour la défense Canada et Affaires autochtones et du Nord Canada. De nombreuses des ébauches de meilleures pratiques citées sont dérivées du rapport d'AECOM intitulé «*National Principles, Best Practices and Guidelines – Flood Plain Mapping*» (AECOM 2016) (Principes nationaux, meilleures pratiques et lignes directrices – cartographie des plaines inondables).

AVIS

Exonération de responsabilité

Le présent document technique a été publié par Sa Majesté la Reine du chef du Canada, représentée par Ressources naturelles Canada (RNCan). RNCan n'offre aucune garantie et ne fait aucune représentation, expresse ou implicite, légale ou autre en ce qui concerne le document, son efficacité, son exactitude ou son intégralité. RNCan n'assume aucune responsabilité quant aux pertes ou dommages, directs ou indirects, engagés ou subis, en raison de l'utilisation faite du document, y compris la perte de profits, la perte de revenus ou de bénéfices, ou des réclamations par des tiers. En aucun cas RNCan ne sera tenu responsable de pertes de quelque nature que ce soit découlant d'erreurs, d'imprécisions ou d'omissions dans ce document. RNCan n'a aucune obligation, aucun devoir et aucune responsabilité en matière de contrat, de droit civil ou autre, y compris la négligence.

Renseignements supplémentaires

Pour plus de renseignements à propos de ce document, veuillez communiquer avec le Centre canadien de cartographie et d'observation de la Terre (CCCOT) de Ressources naturelles Canada à l'adresse suivante : NRCAN.GeoInfo.RNCan@Canada.ca.

**SÉRIE « GUIDES D'ORIENTATION FÉDÉRAUX SUR LA CARTOGRAPHIE DES
PLAINES INONDABLES »**

Les documents qui suivent ont pour but d'informer toute personne ou organisation participant à la gestion des plaines inondables au Canada :

1. Cadre fédéral de la cartographie des plaines inondables (2017)
2. Recensement des risques d'inondation et établissement des priorités (*en cours de rédaction*)
3. Procédures hydrologiques et hydrauliques fédérales pour la délimitation des plaines inondables (2017)
4. Guide d'orientation fédéral sur l'acquisition de données par lidar aéroporté (2017)
5. Études de cas sur les changements climatiques en cartographie des plaines inondables (2017)
6. Guide d'orientation fédéral en géomatique sur la cartographie des plaines inondables (2017)
7. Évaluation du risque d'inondation (*en cours de rédaction*)
8. Guide d'aménagement du territoire axé sur le risque : utilisation sécuritaire du territoire fondé sur l'évaluation des risques de dangers (2015)
9. **Bibliographie des meilleures pratiques et des références concernant l'atténuation des inondations (2017)**

CADRE DE LA CARTOGRAPHIE DES PLAINES INONDABLES

Le Cadre de la cartographie des plaines inondables comprend toutes les composantes du processus d'atténuation des inondations, de l'identification des risques d'inondation à la mise en œuvre des mesures d'atténuation des inondations. L'organigramme suivant illustre la relation entre ces différentes composantes et lie chacune d'entre elles au document de la série « Guides d'orientation fédéraux sur la cartographie des plaines inondables »:

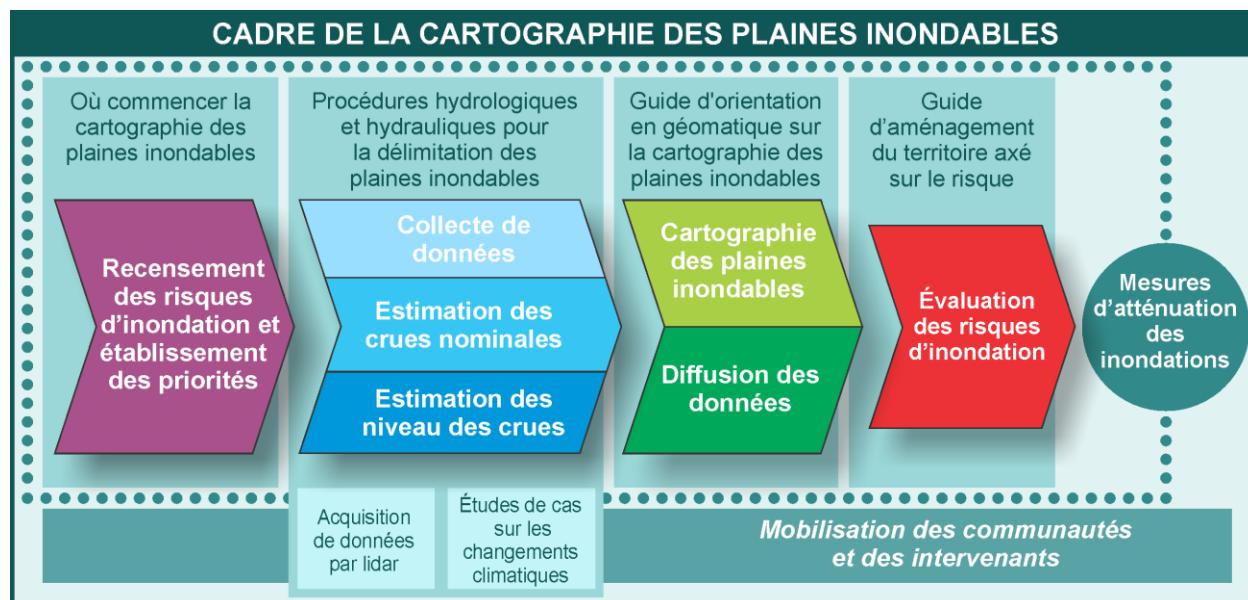

Figure 1: Cadre de la cartographie des plaines inondables

De plus, la série « *Guides d'orientation fédéraux sur la cartographie des plaines inondables* » comporte également une bibliographie qui contient des ouvrages de référence et de meilleures pratiques en matière d'atténuation des inondations.

1.0 INTRODUCTION

Au cours de l'élaboration des documents de la Série de guides d'orientation fédéraux sur la cartographie des plaines inondables, de nombreux matériaux de référence et d'études de cas ont été rassemblés concernant la cartographie des plaines inondables. L'objectif de ce rapport est de fournir une liste consolidée de ces matériaux afin de servir de référence à des fins d'enquêtes plus approfondies.

Le contenu de ce document est une liste des matériaux de référence destinés à être utilisés comme ressource par les spécialistes impliqués dans la cartographie des plaines inondables. Ces références sont divisées en sous-sections de « références canadiennes » et de « références internationales » et comprennent des ressources concernant tous les aspects du cycle de la cartographie des plaines inondables.

Tout comme les autres documents de la Série de guides d'orientation fédéraux sur la cartographie des plaines inondables, ce document est conçu afin d'être toujours d'actualité et d'être mis à jour au fur et à mesure que de nouveaux développements sont effectués.

2.0 MATÉRIEL DE RÉFÉRENCE

Les éléments suivants sont des documents de référence compilés au cours du processus d'élaboration des documents de la Série de guides d'orientation fédéraux sur la cartographie des plaines inondables. Ils ont été divisés en sous-sections correspondant aux sources canadiennes et internationales et sont à l'intention de consultation par des spécialistes qui possèdent plus d'intérêt dans des sujets associés à l'atténuation des inondations.

2.1 Références canadiennes

Les éléments suivants sont des documents de référence produits au Canada ou concernant précisément le contexte canadien.
