CONSUMER PRICE INDEX

The February all-items index for Winnipeg decreased slightly from January to 125.6 (1986=100). This was largely the result of a decline in the Transportation index where lower prices for gasoline and air fares were recorded. Since February 1991, the all-items index for Winnipeg and for Manitoba has increased by 1.2%

LABOUR FORCE

The seasonally adjusted unemployment rate in Manitoba fell to 8.8% in February from 9.9% in January. On an unadjusted, year-over-year basis, the size of the labour force has decreased by 8,000 while there are 1,000 more unemployed persons. For Winnipeg, the adjusted three-month moving average unemployment rate was 10.9% in February, compared to 9.0% for Manitoba.

MANUFACTURING SHIPMENTS

Manitoba reported \$455.4 million in manufacturing shipments for January, down 5.3% from January 1991.

BUILDING PERMITS

The total value of building permits for Manitoba in December 1991 was \$29.0 million, bringing the yearly total to \$561.1 million. Compared to December 1990, total value has increased by 17.2%. However, the cumulative 1991 value shows a 23.3% decrease from the previous year's total.

RETAIL TRADE

Total retail sales in Manitoba for the year 1991 reached \$6.2 billion, down from 1990 when sales totalled nearly \$7.0 billion.

Saskatchewan Prairie Update

CONSUMER PRICE INDEX

In **Regina** the all-items index registered a marginal 0.1% increase, with the largest upward influence originating in the clothing index. Higher food prices were recorded, particularly for fresh vegetables. A drop in gasoline prices had a major dampening effect. Since February 1991, the all-items has risen by 1.6%.

In **Saskatoon** the all-items index rose slightly (0.1%), as a rise in the clothing index exerted a major upward influence. There was a rise in overall food prices, in particular fresh vegetables, beef and bakery products. Since February 1991, the all-items index has risen 0.5%.

In comparison, the all-items index in Canada rose 1.7% from February, 1991 and 0.1% from last month.

HOUSING STARTS

[Centers 10,000 and Over]

Housing starts continue to show a **dramatic increase**, up nearly two and one-half times last year as of the end of February. The **National Housing Outlook** (First Quarter) predicts there will be 1,325 starts in 1992, substantially up over the 998 last year.

NEW MOTOR VEHICLE SALES

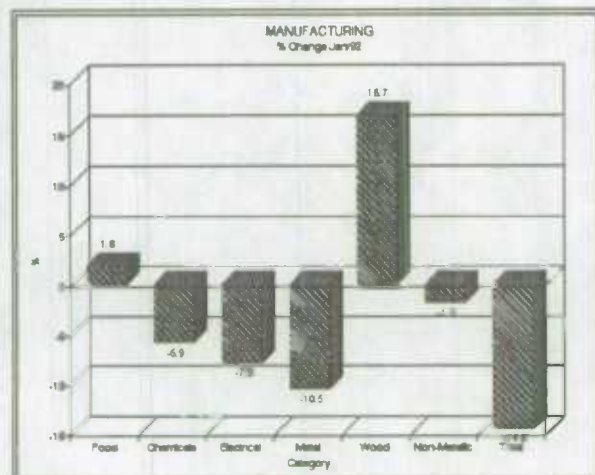

As the end of January, 1992 just over 2,200 units were sold. Compared to last year this is a decrease of 7.4% when there were slightly more than 2,400 units sold. The big decrease is in passenger cars manufactured in North America.

RETAIL TRADE

As of the end of December, 1991 retail trade was at 5.2 billion dollars. This is down 2.8% from 1990 when sales were \$153 million more at nearly 5.4 billion.

LABOUR FORCE

The Unemployment rate for February was 8.3% for Saskatchewan the same as it was in January but down from a February last year when it was 8.9%. Regina was 6.8%, slightly down from a year ago but up from January by nearly 1%. Saskatoon was 9.5% slightly up from last month but down from last year by 3%.

There were 39,000 people unemployed in Saskatchewan in February, down from 42,000 last year and the same as last month. Regina had 6,000 unemployed and Saskatoon had 9,000 unemployed. Both are down from last year.

MANUFACTURING

A comparison between this year and January last year for some major categories in manufacturing shows food and wood products up. All the others show a decrease and in total, for the month, there is nearly a 15% decrease. Fabricated metal products show the largest decline.

ALBERTA

The Consumer Price Index

The Consumer Price Index for Alberta rose by 0.2 index points, a year over year change from February of 1991 of 2.3%, approximately double the amount registered in Saskatchewan and Manitoba, with changes of 1.0% and 1.2% respectively. In Edmonton, the index decreased 0.1% over the same period, largely due to lower prices for gasoline and airfares. Calgary also experienced declines in these areas, but higher prices for packaged holiday trips, recreational equipment and personal care items contributed to an overall increase of 2.3% in the All-Items index for Calgary. Higher food prices in both Edmonton and Calgary exerted an upward influence on the provincial C.P.I., with increased charges for beef, fresh vegetable and chicken being noted in both cities.

The Labour Force

In February, Alberta's labour force declined by 4 000 from the previous month to reach 1 353 000. In Edmonton, the labour force increased by 2 000, while Calgary's labour force total was unchanged over that period. The number of employed in Alberta also fell by 4 000 to reach 1 214 000. Employment in Edmonton rose over this period to reach 371 000, up from 370 000 in January, while Calgary experienced a decline at 350 000 in February, down from 352 000 the previous month. Alberta's overall unemployment rate for February was 10.3%, down from 10.4% the previous month.

AVERAGE WEEKLY EARNINGS

The average weekly earnings industrial aggregate in Alberta for the month of December 1991 was \$555.77, while those of Manitoba and Saskatchewan registered at \$491.97 and \$486.24 respectively. In Alberta, this figure reflects a 7.9% increase over that of the same period the previous year, considerably higher than the change in the All-Items Consumer Price Index for that month, which was 3.6%.

NEW HOUSING PRICE INDEX

In Edmonton, the New Housing Price Index registered a decline of 1.7% in January when compared to the previous month, reaching 139.3. This figure is 0.7% lower than the index of 141.7 registered in January of 1991. Calgary's index registered a marginal increase at 132.3 in January 92, up 0.3% since December 91, but still showed a year over year decline of 0.7% over January 1991.

BUILDING PERMITS & HOUSING STARTS

In December 1991, the value of building permits in Alberta was \$139 124 000, a decline of 12.4% over November of 1991 and a decline of 18.0% over December of the previous year. Non-residential showed a smaller decline of 4.0% over the previous year. In Calgary, the total of all building permits showed a strong increase of 51.2% over November 91, reaching 65 270 in December, but registered a year over year decline of 20.4% over December of 1990.

In January of 1992, 729 housing starts were recorded in Alberta's metro centres of over 10 000 population. This is an increase of 82.3% over January of 1991, compared to increases of 22.2% in Saskatchewan, 77.1% in Manitoba and a national increase of 38.3.

DEFINITIONS

LABOUR FORCE: that portion of the civilian non - institutional population 15 years and over who, during the reference week, were employed or unemployed.

EMPLOYED: persons who, during the reference week, did any work at all or had a job but were not at work due to : (1) own illness or disability (2) personal or family responsibilities (3) bad weather (4) labour dispute (5) vacation (6) other reason not specified above (excluding persons on layoff and persons whose job attachment was to a job to start at a definite date in the future).

UNEMPLOYED: persons who, during the reference week, were without work and were available for work, had been on layoff, or had a new job to start in four weeks or less from the reference week.

UNEMPLOYMENT RATE: represents the number of unemployed persons expressed as a percent of the labour force.

PARTICIPATION RATE: represents the labour force expressed as a percentage of the population 15 years of age and over.

EMPLOYMENT/POPULATION RATIO: represents the number of persons employed expressed as a percentage of the population 15 years of age and over.

SA (SEASONALLY ADJUSTED): a seasonally adjusted series is one from which seasonal movement have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation period. It should be noted that the seasonally-adjusted series contains irregular as well as longer term cyclical fluctuations.

The most comprehensive and up-to-date reference publication available on Canadian consumer and industrial markets has just been released!

Dear Client:

Hot off the press! **The Market Research Handbook 1992** is now available for immediate delivery! Building on the depth and range of data you found in last year's edition, the 1992 edition of the **Market Research Handbook** has been expanded to make it more useful than ever before!

You need timely information to map your future business strategies and production plans. For 1992, the **Market Research Handbook** has been updated with the most current data from Statistics Canada's vast range of surveys. Imagine how you can stay ahead of the competition by tapping into essential information about Canada's marketplace - from consumer expenditure patterns, income levels, labour force productivity measurements and retail trade statistics to urban demographic profiles, population characteristics, education levels, industrial manufacturing data. . .and much more!

What's New for 1992?

In addition to having the most up-to-date data available, this year's edition of the **Market Research Handbook** marks the debut of a new data feature: Retail Commodity Sales statistics! These tables present data for more than 50 major commodity groupings - with special emphasis on food items. Use these figures to evaluate your market share, examine potential demand for your products, and spot emerging trends!

And to help you get a better handle on developments in Canada's manufacturing sector, this year's edition also features 1990 data on the number of manufacturing establishments, number of employees by industry, and the value of shipments. Now, at a glance, you can compare your organization's performance against industry averages!

Demographic and socio-economic profiles of Canada's urban centres have always been cornerstones of the **Market Research Handbook**. And the 1992 edition is no exception. Forty-five key cities are explored in detail. Each urban profile examines up to 30 important topics including population, education, income levels, consumer expenditures, retail trade and characteristics of the local labour market.

Ca 005

And this year the **Market Research Handbook** includes June 1990 population estimates for 45 urban centres across Canada! At your fingertips, the most current population estimates to help you monitor demographic shifts that have occurred in your markets in recent years!

With over 580 pages, the 1992 edition is rich in vital market data. More than 180 statistical tables are supported by over 50 charts and graphs. And because you may want even more detail, you'll find hundreds of footnotes throughout the publication directing you to key Statistics Canada publications used as data sources!

Get Your Data From the Source!

Statistics Canada has built a world renowned reputation for excellence and quality. The **Market Research Handbook** brings you the results from more than 20 specialized surveys, plus the national Census of Canada! Don't stake your organization's future on anyone else's data; only the **Market Research Handbook** is backed by Statistics Canada's commitment to data accuracy and integrity!

Secure your edition of the **Market Research Handbook 1992** while copies are still available. Order now!

Sincerely,

David Roy
