ALBERTA

Consumer Price Index

The Consumer Price Index for Alberta in June rose slightly from 126.7 to reach 128.1, a 1.1% increase over June 91. Edmonton saw an increase of 1.7 percent, bringing the index to 126.7, while a 1.2% increase brought Calgary to an index of 126.1.

Labour Force

Labour Force rose 16,000 in Alberta between May 92 and June 92, possibly due to students' participation. Edmonton saw an increase of 2000 while Calgary gained 5000 participants to the labour force.

Unemployment rates were 9.0 Alberta, 10.7 Edmonton, 9.5 Calgary. All of which are higher than one year ago.

Building Permits

Value of Building Permits are down in Edmonton but up in Calgary compared to the same period (April) last year.

Both Residential and Non-Residential permits have dropped from the same month (April) last year.

Nonetheless, year-to-date total are up.

Retail Trade

Alberta Retail Sales, all stores are down 1.2% from May last year, but up 1.7% on year-to-date dollars sold.

In Canada, dollar amount sold in drug and medicine stores increased by 4.7% , while supermarkets and grocery stores reduced by 3.7% or 48.1 million dollars. The highest percentage decrease was in men's wear with 11.7% for May and 8.0% decrease for the year-to-date.

MANITOBA

Consumer Price Index

The June All-items Consumer Price Index for Winnipeg increased 0.6% from the month of May. A contributing factor was the increase in the transportation index, primarily caused by higher prices for gasoline, increased vehicle rental charges and higher fares for air and rail travel. Higher prices for newspapers and alcoholic beverages were also recorded, while lower prices were in effect for men's wear, fresh vegetables, prepared meats and chickens. Since June 1992, the All-items index has risen 1.3%.

Labour Force

In June, the seasonally adjusted unemployment rate in Manitoba decreased to 9.6% from 9.7% in May. The number of people in the labour force decreased from 536,000 in May to 532,000 in June.

Retail Sales

Retail sales in Manitoba totalled \$510,600,000 in April, an increase of 6.2% over the month of March. The total value of retail sales for the first four months of 1992 stood at \$2,459,600 in April or an increase of 33% over the same period last year.

Manufacturing Shipments

Manitoba manufactures shipped \$552,657,000 worth of manufactured goods in May, an increase of 1.5% over the same month last year.

Building Permits

The total value of building permits in Manitoba for the month of April was \$49,433,000, an increase of 37% over the month of March and an increase of 10.6% over the same month last year. This increase was accounted for largely by the rise in value of permits issued for non-residential construction as opposed to residential construction. The value of non-residential construction increased from \$8,393,000 in March to \$18,850,000 in April, or a rise of just over 124%. In comparison, the value of residential building permits increased from \$27,625,000 in March to \$30,583,000, or an increase of about 10.7%.

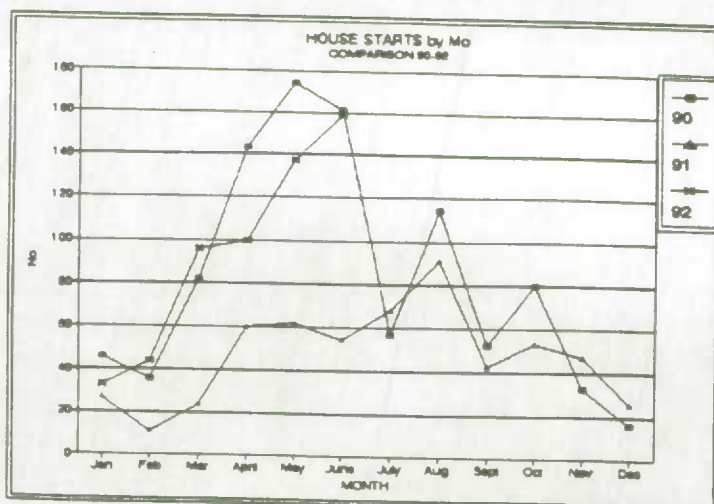

CONSUMER PRICE INDEX

Regina: Compared to last month the All-items index fell slightly (-0.1%), as the Transportation, Clothing and Housing indexes registered declines. Within Transportation vehicle rental charges decreased. This was partly offset by

increased fares for air and rail travel. The decline in the Housing index was mainly due to lower prices for household furnishings and decreased charges for owned accommodation. Largely offsetting these declines were higher prices for cigarettes, alcoholic beverages, personal care supplies and food. Since June 1991, the All-items index has risen 1.0%.

Saskatoon: Compared to last month the All-items index rose 0.2%. A large part of the increase was attributable to higher transportation charges and to increased prices for cigarettes and alcoholic beverages. Higher food prices also exerted a considerable upward impact. A decline in the Housing index had a major dampening effect, as lower prices for household furnishings and equipment and decreased charges for owned accommodation more than offset price advances for rented accommodation and household operation. A decline in the Clothing index also had a moderating influence. Since June 1991, the All-items index has risen 0.9%.

from last month but up 1.1% over June of 1991. There were 37,000 people unemployed which is up 5,000 from last year. The unemployment rate in Regina was 8.2% slightly down from last month but up 1.3% from last year. There were 8,000 people without work in Regina. The unemployment rate in Saskatoon was 12.3% slightly down from last month but slightly up from last year. There were 12,000 people without work in Saskatoon.

RETAIL TRADE

As of May this year Retail Sales for the province were holding their own with last year at 1.6 billion dollars, up just over 2%.

MOTOR VEHICLE SALES

There were 12,251 units sold as of the end of May this year compared to 13,670 last year. However the dollar value remains very close but down at \$254,000,000.

HOUSING STARTS

Housing starts continue their strong showing compared to last year. For population centres 10,000 and over the housing starts are double what they were last year. Estevan is at 20 compared to 4 in 1991, Moose Jaw is at 22 compared to 8, Prince Albert 20 compared to 5, Swift Current 1 compared to 6 and Yorkton is down slightly with 5 compared to 7. Regina has 318 compared to 86 and Saskatoon 172 compared to 123.

LABOUR FORCE

Unemployment for the month of June for Saskatchewan was 7.5% which is up slightly

DEFINITIONS

LABOUR FORCE: that portion of the civilian non - institutional population 15 years and over who, during the reference week, were employed or unemployed.

EMPLOYED: persons who, during the reference week, did any work at all or had a job but were not at work due to : (1) own illness or disability (2) personal or family responsibilities (3) bad weather (4) labour dispute (5) vacation (6) other reason not specified above (excluding persons on layoff and persons whose job attachment was to a job to start at a definite date in the future).

UNEMPLOYED: persons who, during the reference week, were without work and were available for work, had been on layoff, or had a new job to start in four weeks or less from the reference week.

UNEMPLOYMENT RATE: represents the number of unemployed persons expressed as a percent of the labour force.

PARTICIPATION RATE: represents the labour force expressed as a percentage of the population 15 years of age and over.

EMPLOYMENT/POPULATION RATIO: represents the number of persons employed expressed as a percentage of the population 15 years of age and over.

SA (SEASONALLY ADJUSTED): a seasonally adjusted series is one from which seasonal movement have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation period. It should be noted that the seasonally-adjusted series contains irregular as well as longer term cyclical fluctuations.

CAN WE TALK?

Interested in staying completely informed about Canadian society? Need to keep abreast of the nature of various communities? Statistics Canada is proud to present a seminar on **Canadian Social Trends**. Topics include population trends, fertility, divorce, families, youth, seniors, visible minorities, and more. This session is an educational talk on all the topics which are continuously covered in **Canadian Social Trends** magazine. Here are the thoughts of two CST readers:

The format is perfect. The language is good. The charts are beautiful. It could be just the kind of vehicle to significantly upgrade social, political and economic discussions in this country, and to provide a model for other countries.

Professor Alex C. Michalos, Editor, Social Indicators Research, University of Guelph

*After reviewing the available material, in my opinion, **Canadian Social Trends/Tendances Sociales Canadiennes** provides the most reliable and topical overview of the rapidly changing nature of the Canadian Population.*

David E. Bond, President, The Canadian Assembly of Broadcasters

ABOUT THE SPEAKER...

Dr. Craig McKie will present the seminar. Born in Toronto in 1944, he received his formal education in Sociology, completing his B.A. at Glendon College in 1967, his M.A. at York University in 1969 and his Ph.D. at the University of Toronto in 1974.

Dr. McKie came to Statistics Canada in 1977 from the Faculty of Sociology at the University of Western Ontario. At that time, he had also served as Senior Advisor on Social Policy for the Royal Commission on Corporate Concentration. At Statistics Canada, he worked as Senior Analyst for the Justice Statistics Division and Senior Research Officer for the Research and Analysis Division. Currently, Dr. McKie is Chief of Social Reporting in the Housing, Family and Social Statistics Division and Editor of **Canadian Social Trends** magazine.

TO ATTEND OR FOR MORE INFORMATION

If you are interested in attending the seminar, please contact Ms. Anastasia Lim, Manager, Data Dissemination at (403) 495-3027.
