# Production and disposition of tobacco products

March 2001

Both sales and production of cigarettes by tobacco product manufacturers advanced in March; sales showed stronger growth than did production. Inventories rose slightly.

During March, 4.1 billion cigarettes were sold, an increase of 14% over February and of 22% over March 2000. Year-to-date sales, at 10.9 billion cigarettes, were up 5% compared with the first three months of 2000.

March production expanded to 4.0 billion cigarettes from February's 3.7 billion, an 8% increase and the same production level seen in March 2000. For the first three months of 2001, total production was 10.6 billion cigarettes, or 7% behind that of the first three months in 2000.

Inventories gained 4% to close at 4.2 billion cigarettes at the end of March. This was 16% below closing inventories at the end of March 2000.
