Released at 8:30 a.m. Eastern time

MAJOR RELEASES

- **Census of Population: Income of individuals, families and households; religion, 2001**

A detailed analysis of changes in the income levels of Canadian families during the 1990s, as well as shifts in the religious make-up of the population, is now available on Statistics Canada's website in two reports: *Income of Canadian families* and *Religions in Canada*.

2
- **Canadian international merchandise trade, March 2003**

With energy prices surging to near-record levels in March, merchandise exports jumped 2.8% to \$35.9 billion, while imports fell to \$30.0 billion. Canada's trade surplus with the rest of the world rebounded, increasing by \$1.1 billion to \$5.9 billion in March, after falling in three of the previous four months.

MAJOR RELEASES

Census of Population: Income of individuals, families and households; religion 2001

The eighth and last round of data from the 2001 Census of Population provides an analysis of changes in the income of families from 1990 to 2000, as well as shifts in the religious makeup of the population.

This release includes detailed information on the median income of various types of families, changes in the composition of family income, and low income among children and seniors. It also analyses developments in religious affiliation and the growth in the number of Canadians who reported "no religion" to the census.

High-income families make gains, while incomes remain stable for other families

The median income before taxes of Canadian families, at \$55,000, remained essentially unchanged from 1990 to 2000 after adjusting for inflation, according to new data from the 2001 Census.

Incomes of families in the bottom half of the income distribution showed little or no improvement through the 1990s. However, the 10% of families with the highest incomes experienced substantial gains.

In 2000, the combined income before taxes of the 10% of families with the highest incomes accounted for 28% of total family income; in 1990, they accounted for 26% of all family income. The 10% of families with the lowest incomes made up less than 2% of all family income, the same as in 1990.

Census data also showed that the proportion of total income among working-age families that came from government transfer payments declined from 6.4% in 1990 to 5.6% in 2000.

Based on before-tax income, an estimated 19% of children were living in low-income families in 2000. This proportion was virtually unchanged from a decade earlier.

Unlike the results from the 1981 and 1991 Censuses, the low-income rate was lower among seniors (people aged 65 and over) than among children in 2001. Among the population of seniors who were not institutionalized, the low-income rate based on income before tax declined from 20% in 1990 to 17% in 2000. This continued a long-term downward trend that has seen low income rates among seniors nearly cut in half over the past two decades.

Lone-parent families with children aged 17 and under made particularly big gains between 1990 and 2000, the result of greater labour market activity and increased government transfers. In 2000, the median income of these lone-parent families was \$26,000, up 19% from \$21,800 in 1990.

Canada still predominantly Roman Catholic and Protestant

In 2001, 7 out of every 10 people still identified themselves as either Roman Catholic or Protestant.

Census data showed a continuation of a long-term downward trend in the population who report Protestant denominations. The number of Roman Catholics increased slightly during the 1990s, but their share of the total population fell marginally.

At the same time, the number of Canadians who reported religions such as Islam, Hinduism, Sikhism and Buddhism has increased substantially.

Much of the shift in the nation's religious makeup during the past several decades is the result of the changing sources of immigrants, which has created a more diverse religious profile. As well, many major Protestant denominations that were dominant in the country 70 years ago, such as Anglican and United Church, are declining in numbers, in part because their members are aging and fewer young people are identifying with these denominations.

In addition, far more Canadians reported that they had no religion. This group accounted for 16% of the population in 2001, compared with 12% a decade earlier.

In 2001, Roman Catholics were still the largest religious group, drawing the faith of just under 12.8 million people, or 43% of the population, down from 45% in 1991. The proportion of Protestants, the second largest group, declined from 35% of the population to 29%, or about 8.7 million people.

Combined, the two groups represented 72% of the total population in 2001, compared with 80% a decade earlier.

Detailed analysis of these new census data is presented in two online reports, *Income of Canadian families* and *Religions in Canada*, available on Statistics Canada's website (www.statcan.ca). Both documents include several tables and charts.

These reports also link to various products and services available from the *Census* module, which was designed to provide easy access to census data using new electronic tools. Information in the module

is organized into four broad categories: analysis, data, maps and reference material.

In addition, in the *Community profiles* module, data on income and religion are available for Canada and the provinces and territories, as well as for 27 metropolitan areas and nearly 6,000 cities, towns, villages and Indian reserves.

Information on methods and data quality available in the Integrated Meta Data Base: survey number 3901.

Canadian international merchandise trade

March 2003

With energy prices surging to near-record levels in March, merchandise exports jumped 2.8% to \$35.9 billion, while imports fell to \$30.0 billion. Canada's trade surplus with the rest of the world rebounded, increasing by \$1.1 billion to \$5.9 billion in March, after falling in three of the previous four months.

Exports and imports

Near-record energy exports provided the bulk of the increase in total exports. Excluding energy, exports would have risen by less than 1% and the trade balance would have risen by less than a quarter billion dollars.

Exports to the United States, which accounted for 84% of the total, rose 2.6% to \$30.2 billion. Exports to other OECD countries jumped 36.2% to \$1.1 billion, while exports to Japan fell 9.4% to \$831 million.

Imports from the United States fell 2.5% to \$20.7 billion, accounting for most of the drop. Increases in imports from Japan and the European Union partly offset these declines.

Canada's trade balance with the rest of the world jumped from \$4.8 billion in February to \$5.9 billion in March. Strong energy exports and a turn-around in industrial goods and materials contributed to the

Note to readers

Merchandise trade is one component of the current account of Canada's balance of payments, which also includes trade in services.

Revisions

In general, merchandise trade data are revised on an ongoing basis for each month of the current year. Customs basis data are revised for the previous data year each quarter.

Factors influencing revisions include late receipt of import and export documentation, incorrect information on customs forms, replacement of estimates with actual figures (once available), changes in classification of merchandise based on more current information, and changes to seasonal adjustment factors. Revised data are available in the appropriate CANSIM tables.

largest single-month jump in exports in eight months. Declines in merchandise imports occurred in four of seven sectors.

The energy-driven trade surplus with the United States increased by \$1.3 billion to \$9.4 billion, the largest single-month increase in 11 months. Canada's trade deficit with countries other than the United States increased to \$3.5 billion in March from \$3.3 billion in February.

Higher energy prices drive export increase

Continued colder-than-normal weather in the first quarter put upward pressure on home heating fuel prices. Exports of energy products jumped 14.9% to \$7.2 billion, the seventh straight monthly increase. With the price for natural gas increasing by a fifth in one month, exports to the United States jumped 21.4% to \$3.5 billion in March. Natural gas exports have risen 82.4% over the last two months to a level one-and-a-half times higher than in March 2002.

Crude petroleum exports increased 12.6% to \$2.3 billion, a record level, as a result of stronger volumes, as prices eased to just below record levels. Petroleum and coal products exports pushed to their third straight record high, \$1.1 billion.

The largest sector, machinery and equipment, rose marginally to \$7.6 billion. The 5.1% increase in aircraft, engines and parts to \$1.4 billion offset declines in industrial and agricultural machinery exports, which decreased 3.5% to \$1.6 billion.

Exports of automotive products continued to see-saw, falling 1.2% to \$7.6 billion in March. Exports

of motor vehicle parts decreased 3.6% to \$2.4 billion in anticipation of lower US assembly plant production in the second quarter.

Trade balance

\$ billions

Exports of trucks and other motor vehicles dropped 8.9% to \$1.4 billion when a labour stoppage in February stretched into March, reducing the number of trucks available for export. The decrease in March is the fifth in last six months.

Passenger automobile exports increased 3.7% to \$3.8 billion. Passenger auto exports, which strengthened through the first quarter of 2003, reversed the declines of the fourth quarter in 2002, when consumer demand, particularly in the United States, had softened.

Forestry products exports fell 7.3% through the first quarter of 2003, down 2.0% in March to \$2.8 billion. Lumber and sawmill product exports fell 2.5% to \$1.3 billion, the third month in a row. Lumber prices have fallen steadily for the last 12 months, while volumes of lumber improved 1.3% after falling in the previous three months. New housing starts in the United States rebounded in March following a sudden drop in February. March housing starts in the United States totalled 1.8 million annualized units, up 8.3% from February, according to the US Census Bureau.

Industrial goods, autos and energy nudge imports lower

Automotive imports decreased 0.8% to \$6.8 billion in March. Imports of trucks and other motor vehicles fell

in response to lower truck sales at the end of the first quarter, dropping to \$1.1 billion; this was down 8.1% from February's record-setting level. Motor vehicle parts imports destined for Canadian auto assembly plants increased slightly to \$3.5 billion, the third consecutive increase following a five-month decline. Imports of passenger autos increased 1.5% to \$2.3 billion.

Cold weather and tensions in the Middle East contributed to record price levels for imported energy products, mainly crude petroleum and petroleum and coal products. In spite of these price increases, reduced volume resulted in imports of energy products falling 2.6% to \$1.8 billion.

Canada's largest import sector, machinery and equipment, increased 0.9% to \$8.6 billion. Imports of other machinery, which includes high-tech equipment, decreased 1.1% to \$3.8 billion. Aircraft and other transportation equipment imports increased 7.3% to \$1.2 billion. Imports of aircraft, engines and parts advanced 5.5% to just over three-quarters of a billion dollars. "Other" transportation equipment imports also rose, up 10.3% to \$480 million, helped by a strong increase in imports of bicycles from China.

Following three consecutive months of decline in imports of consumer goods, a 0.3% increase to \$3.9 billion brought consumer goods imports to just below the record levels in October and November. Increases in imports of apparel offset declines in house furnishings.

Available on CANSIM: tables 226-0001, 226-0002, 227-0001, 227-0002, 228-0001 to 228-0003 and 228-0033 to 228-0040.

Information on methods and data quality available in the Integrated Meta Data Base: survey numbers, including related surveys, 2201, 2202 and 2203.

The March 2003 issue of *Canadian international merchandise trade* (65-001-XIB, \$14/\$141) will be available soon. The publication will include tables by commodity and country on a customs basis. Current account data (which incorporate merchandise trade statistics, service transactions, investment income and transfers) are available quarterly in *Canada's balance of international payments* (67-001-XIB, \$29/\$93; 67-001-XPB, \$38/\$124). See *How to order products*.

Merchandise trade data are available by fax or in PDF format on the morning of release.

For more information on the publications, contact Jocelyne Elibani, (1-800-294-5583; 613-951-9647). To enquire about the concepts, methods or data quality of this release, contact Daryl Keen (613-951-1810), International Trade Division.

OTHER RELEASES

Export and import price indexes

March 2003

Current- and fixed-weighted export and import price indexes (1997=100) on a balance of payments basis are now available. Price indexes are listed from January 1997 to March 2003 for the five commodity sections and the major commodity groups (62 exports and 61 imports).

Current- and fixed-weighted US price indexes (1997=100) are also available on a customs basis. Price indexes are listed from January 1997 to March 2003. Included with the US commodity indexes are the 10 all-countries and US-only Standard International Trade Classification section indexes.

Indexes for the five commodity sections and the major commodity groups are also available now on a customs basis.

Available on CANSIM: tables 228-0001, 228-0003 and 228-0033 to 228-0040.

Information on methods and data quality available in the Integrated Meta Data Base: survey numbers, including related surveys, 2201, 2202 and 2203.

The March 2003 issue of *Canadian international merchandise trade* (65-001-XIB, \$14/\$141) will be available soon. See *How to order products*.

Statistics Canada

Thursday, June 3, 1997
For release at 8:30 a.m.

MAJOR RELEASES

- **Urban transit, 1996** 2
Despite the emphasis on taking urban transit, Canadians are using it less and less. In 1996, each Canadian took an average of about 20 trips on some form of urban transit, the lowest level in the past 25 years.
- **Productivity, hourly compensation and unit labour cost, 1996** 4
Growth in productivity among Canadian businesses was modestly weak again in 1996, accompanied by sluggish gains in employment and slow economic growth during the year.

OTHER RELEASES

- **Help-wanted index, May 1997** 3
- **Short-term Expectations Survey** 2
- **Steel primary forms, week ending May 31, 1997** 12
- **Egg production, Apr. 1997** 12
