Labour Force Survey

July 2008

Following gains at the beginning of 2008, and little change from April to June, employment dropped by 55,000 in July. The unemployment rate edged down 0.1 percentage points to 6.1%, as many people, particularly youth, left the labour force.

Employment

thousands

While employment grew by 1.3% over the last 12 months (+227,000), the pace of growth has slowed in recent months. Employment gains have averaged 10,000 per month thus far in 2008 compared with an average monthly gain of 30,000 for 2007.

Most of the employment losses in July were in part time, down 48,000. Over the last 12 months, however,

Note to readers

Please note that Table 1 in the publication 71-001-XWE has been extended to include labour force characteristics for men and women aged 25 to 54 years and 55 years and over at the Canada level.

The Labour Force Survey (LFS) estimates are based on a sample, and are therefore subject to sampling variability. Estimates for smaller geographic areas or industries will have more variability. For an explanation of sampling variability of estimates, and how to use standard errors to assess this variability, consult the "Data quality" section of the publication Labour Force Information (71-001-XWE, free).

part-time employment has grown by 3.5%, much faster than the 0.9% growth in full time.

Employment decreases in July occurred in manufacturing; business, building and other support services; and educational services. The only significant gains were in accommodation and food services.

Losses for the month were notable for private sector employees, while the public sector saw some gains. Since July 2007, employment in the public sector has grown by 6.1%, compared with 0.5% for the private sector.

July's employment losses occurred in Quebec, Ontario, Saskatchewan and Prince Edward Island.

In recent months, employment for youth aged 15 to 24 has edged down, resulting in a year-over-year employment decline of 0.3%. The fastest growth rate over the year was for older workers, aged 55 and over, whose employment grew by 7.0%, while employment for core-aged workers, 25 to 54, was up 0.5% over the same period.

Since July of 2007, average hourly wages have risen by 4.0%, still ahead of the most recent increase of 3.1% in the Consumer Price Index. Year-over-year wage increases have been at 4.0% or above since August 2007.

Unemployment rate

Manufacturing losses continue

Overall, manufacturing employment declined by 32,000 in July, as the number of factory workers dropped by 41,000 in Ontario and increased by 7,000 in Alberta. Over the past 12 months, manufacturing employment across Canada was down 88,000, with nearly all the losses in Ontario.

Employment in business, building and other support services continued on its recent downward trend, with a decline of 30,000 in July. Since July 2007, employment in this industry has decreased by 5.4%, mainly in Alberta, Ontario and Quebec.

Educational services was down 27,000 workers in July. Despite this decline, employment in education has grown by 3.2% over the past 12 months.

Accommodation and food services was the only industry showing notable gains in July, up 22,000. Over the last 12 months, employment in this industry has risen by 2.1%.

Employment declines in Central Canada in July

Employment in Quebec declined by 30,000 in July, pushing the unemployment rate up 0.2 percentage points to 7.4%. Quebec's employment level is little changed from a year ago as employment increases in construction; professional, scientific and technical services; and manufacturing, were offset by weakness in trade; and information, culture and recreation.

In July, employment in Ontario edged down by 19,000, all in full time. The unemployment rate declined 0.3 percentage points to 6.4%, as 42,000 people, mostly youth aged 15 to 24, left the labour market.

Since July 2007, Ontario's employment is up 1.2%, slightly below the national average. Large losses in manufacturing have been more than offset by gains in public administration; health care and social assistance; construction; and educational services.

Available on CANSIM: tables 282-0001 to 282-0042, 282-0047 to 282-0064 and 282-0069 to 282-0099.

Definitions, data sources and methods: survey number 3701.

A more detailed summary, *Labour Force Information* (71-001-XWE, free) is now available online for the week ending July 19. From the *Publications* module of our website, under *Free Internet publications*, choose *Labour*. LAN and bulk prices are available on request. The CD-ROM *Labour Force Historical Review, 2007* (71F0004XCB, \$209) is also available.

Data tables are also now available online. From the *By Subject* module of our website, choose *Labour*.

The next release of the Labour Force Survey will be on September 5.

Domestic sales of refined petroleum products

June 2008 (preliminary)

A 3.4% decline in the sales of refined petroleum products in June, compared with the same month in 2007, was led by lower demand for motor gasoline and diesel fuel oil. This was the second consecutive month of a year-over-year decline in sales for motor gasoline and diesel fuel oil.

Refined petroleum product sales totalled 8,372.4 thousand cubic metres, down 294.4 thousand cubic metres from June 2007. Sales decreased in five of the seven major product groups. Heavy fuel oil and aviation turbo fuels were the only products to post modest increases. (One cubic metre equals 1,000 litres.)

Motor gasoline sales in June totalled 3.5 million cubic metres, 4.5% or 165.1 thousand cubic metres

below the same month a year earlier. Regular unleaded, which accounted for 91% of all grades, slipped 3.3%. Diesel fuel oil sales totalled 2.2 million cubic metres, down 3.6% or 81.6 thousand cubic metres below June 2007.

Note: Preliminary domestic sales of refined petroleum products data are not available on CANSIM.

Definitions, data sources and methods: survey number 2150.

Aircraft movement statistics: Small airports

January, February and March 2008

Goose Bay, Newfoundland and Labrador, was the most active site in the first three months of 2008. It recorded 2,385 movements in January, 2,750 in February and 2,859 in March, reflecting increases from the previous January, February and March, respectively.

All movements at Goose Bay were itinerant movements (flights from one airport to another).

Guelph, Ontario, was the most active airport for local movements (flights that remain in the vicinity of the airport) during this period with 1,133 take-offs and landings in January, 1,637 in February and 2,326 in March. Local movements at Guelph were down compared with the corresponding month of the previous year.

Data for small airports are now available for January through March 2008.

Available on CANSIM: tables 401-0021 to 401-0022.

Definitions, data sources and methods: survey number 2715.

The monthly publications will be released over the next few weeks. The January 2008 issue of *Aircraft Movement Statistics, Airports without Air Traffic Control Towers (TP 141)*, Vol. 3, no. 1 (51-008-XWE, free), is now available from the *Publications* module of our website. This report is a joint publication of Statistics Canada and Transport Canada.

For more information, or to enquire about the concepts, methods or data quality of this release, contact Client Services (toll-free 1-866-500-8400; transportationstatistics@statcan.ca), Transportation Division. ■
