Crude oil and natural gas: Supply and disposition

June 2008 (preliminary)

Domestic production of crude oil and equivalent hydrocarbons totalled 12.5 million cubic metres in June, down 0.5% from June 2007.

Deliveries of crude oil and equivalent hydrocarbons to the export market increased 3.5% compared with the same month in 2007. In June 2008, 71% of Canada's total production went to the export market.

Domestic sales of natural gas rose 3.1% from the same month in 2007. This increase was led by higher sales to all three sectors (residential, commercial and industrial).

Marketable natural gas production in June declined 9.7% from June 2007. Natural gas exports made up 61% of marketable natural gas production.

Available on CANSIM: tables 126-0001 and 131-0001.

Definitions, data sources and methods: survey number 2198.

Note: Preliminary data are available on CANSIM at the national level to June 2008 inclusive. At the national and provincial levels, detailed information is available for crude oil (126-0001) up to April 2008 inclusive, and for natural gas (131-0001) up to February 2008 inclusive.

^E use with caution

1. Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.

2. Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.

3. Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.

4. Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.

5. Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.

6. Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).
