Releases

Gross domestic product by industry, July 2008 2

Real gross domestic product increased 0.7% in July after advancing 0.1% in June and retreating 0.1% in May. The energy sector, which has been trending down during the last four quarters, accounted for almost half of the July increase. Manufacturing and wholesaling industries also contributed significantly to the advance.

Industrial product and raw materials price indexes, August 2008 5

In August, the price indexes for manufactured goods and raw materials declined 0.2% and 7.7% respectively from July. The strong decrease in prices for petroleum products brought to a halt the uninterrupted monthly growth observed since the end of 2007.

Electric power selling price indexes, May to August 2008 9

Computer and peripherals price indexes, August 2008 9

Commercial Software Price Index, August 2008 9

Releases

Gross domestic product by industry

July 2008

Real gross domestic product increased 0.7% in July after advancing 0.1% in June and retreating 0.1% in May. The energy sector, which has been trending down during the last four quarters, accounted for almost half of the July increase. Manufacturing and wholesaling industries also contributed significantly to the advance.

Economic activity moves ahead

gross domestic product in billions of chained (2002) dollars

Output of the energy sector rises significantly

Output of the energy sector increased 3.1% in July. Oil production grew following the completion of maintenance at petroleum production facilities in Eastern and Western Canada in June. Following three consecutive monthly declines, natural gas extraction was up sharply, as storage levels were being replenished.

Services to oil and gas extraction facilities were up significantly as rigging activities surged in July, while contract drilling dipped slightly.

Note to readers

The monthly gross domestic product (GDP) by industry data are chained volume estimates with 2002 as their reference year. This means that the estimates for each industry and aggregate are obtained from a chained volume index multiplied by the industry's value added in 2002. For the 1997 to 2005 period, the monthly estimates are benchmarked to annually chained Fisher volume indexes of GDP obtained from the constant-price input-output tables.

For the period starting with January 2006, the estimates are derived by chaining a fixed-weight Laspeyres volume index to the prior period. The fixed weights are the industry output and input prices of 2005. This makes the monthly GDP by industry estimates more comparable with the expenditure-based GDP data, chained quarterly.

Revisions

This release of monthly GDP by industry incorporates the revised 2004 and new 2005 input-output annual benchmarks, revised data sources and improved methodologies resulting in revisions to the monthly series back to January 2002.

Oil and gas extraction bolsters the energy sector

gross domestic product in billions of chained (2002) dollars

Manufacturing activity advances

The manufacturing sector advanced 1.3%. The increase was broadly based, with 17 of the 21 major groups posting a gain.

Main industrial sectors' contribution to total growth

1. Education, health and public administration.

Significant gains were registered in the production of primary and fabricated metals products, and machinery. Exports of primary iron and steel products, and industrial machinery were particularly strong during the month. Pharmaceutical and medicine manufacturing also posted a robust gain. Declines were recorded in beverage and tobacco, and petroleum and coal products manufacturing.

Wholesale trade increases

Wholesaling activity advanced 1.9% in July. Increases were widespread within the sector, notably in the wholesaling of automotive products. Food products wholesalers were the only sub-sector to record a decline in activity in July.

The finance and insurance sector moves forward

The finance and insurance sector advanced 0.3% in July on the strength of banking. There was a notable increase in fixed-term deposits. Conversely, the volume of activity of stock brokerages and the sales of mutual funds both decreased.

Construction is unchanged

After two consecutive monthly increases, construction was unchanged in July. The increase in repair and engineering works was offset by the declines in both residential and non-residential building construction. A substantial decline in construction of single-family homes more than offset the increases in the other categories of residential construction.

After a general downward trend over the last few months in the home resale market, the real estate agents and brokers industry posted a 1.1% gain in July.

Retail trade is stable

Value added in the retail trade sector was unchanged for July, following three consecutive monthly advances. There was higher activity at gasoline stations, computer stores and alcoholic beverage vendors and significant declines in the volume of sales of building materials and convenience stores. The volume of activities of new and used car dealers was down.

Other industries

A decline in the number of overnight travellers from the United States and abroad contributed to a drop in the accommodation and food services sector. Air transportation fell for a fourth consecutive month.

1. Millions of chained (2002) dollars, seasonally adjusted at annual rates.

Industrial product and raw materials price indexes

August 2008

In August, the price indexes for manufactured goods and raw materials declined 0.2% and 7.7% respectively from July. The strong decrease in prices for petroleum products brought to a halt the uninterrupted monthly growth observed since the end of 2007.

The monthly decline of 0.2% in the Industrial Product Price Index (IPPI) in August was largely attributable to a 6.0% drop in prices for petroleum and coal products. Excluding petroleum and coal products, the prices of other industrial goods increased 0.8%, a rate of growth comparable to the average rate recorded in the previous two months.

Prices for manufactured goods decrease slightly

Also contributing to the decline in August was a 3.1% drop in prices for primary metal products, as a result of lower global demand.

In contrast, the increases observed in August mainly came from groups of industrial goods that are sensitive to the effect of the exchange rate, in particular, motor vehicles and other transport equipment.

In fact, the Canadian dollar lost 4.1% of its value in relation to the US dollar in August, after edging up 0.4% in July. The relative weakness of the Canadian dollar against its US counterpart exerted upward pressure on prices overall, partly because some manufacturers set their prices in US dollars. If the exchange rate used to convert these prices had remained unchanged, the IPPI

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp and paper products, and wood products. Determining the full effect of fluctuating exchange rates on the IPPI is a difficult analytical task. However, it should be noted that many prices collected to calculate the IPPI are quoted in US dollars and then converted into Canadian dollars. Therefore, a rise or fall in the value of the Canadian dollar against its US counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

would have fallen 1.3% compared with July, instead of declining 0.2%.

12-month change: industrial prices continue their upward trend for a fifth consecutive month

Year over year, the IPPI rose 8.1% in August, up from the 7.3% increase posted in July, and continuing its growth for a fifth consecutive month. Prices for petroleum and coal products increased 46.2% compared with August 2007 and were the main factor behind the rise in the IPPI.

If petroleum and coal products were excluded, the IPPI would have increased 3.8%, which would have been the largest growth rate since April 2007. Among the other products, chemical products rose 15.4%, pushed up by fertilizers and chemical products related to petroleum and synthetic resins.

Over 12 months, the Canadian dollar rose 0.4% against the US dollar, and if the direct effect of the exchange rate were excluded, the IPPI would have risen 8.2% rather than 8.1%.

Raw material prices post significant drop after 10 straight monthly increases

The Raw Materials Price Index (RMPI) posted a strong 7.7% decline in August, ending a string of 10 consecutive monthly increases. This change in direction for the RMPI was mainly due to the strong 11.3% contraction in the prices for mineral fuels, following 5 straight monthly increases. If mineral fuels were excluded, the RMPI would have fallen 1.8% after a brief upturn of 0.5% in July.

Compared with August 2007, raw materials cost plants 22.7% more, which represented a second slowdown in the growth of prices since the 32.1% increase in June. The rise in the index was mainly attributable to higher prices for mineral fuels and vegetable products, while non-ferrous metals and wood slowed its advance.

Available on CANSIM: tables 329-0038 to 329-0049 and 330-0006.

Definitions, data sources and methods: survey numbers, including related surveys, 2306 and 2318.

The August 2008 issue of *Industry Price Indexes* (62-011-XWE, free) will soon be available.

The industrial product and raw material price indexes for September will be released on October 30.

Electric power selling price indexes

May to August 2008

Electric power selling price indexes (1997=100) are now available for May to August.

Available on CANSIM: table 329-0050.

Definitions, data sources and methods: survey number 2325.

The August 2008 issue of *Industry Price Indexes* (62-011-XWE, free) will soon be available.

For more information, or to enquire about the concepts, methods or data quality of this release, contact Client Services (toll-free 1-866-230-2248; 613-951-9606; fax: 613-951-1539; prices-prix@statcan.gc.ca) or Adrian Fisher (613-951-9612; adrian.fisher@statcan.gc.ca), Prices Division. ■

Computer and peripherals price indexes

August 2008

The index for commercial computers increased 1.37% in August to 35.55 (2002=100). The index for consumer computers declined 0.75% to 21.18.

In the case of computer peripherals, monitor prices increased 0.27% to 52.33 and printer prices fell 1.26% to 46.25.

These indexes are available at the Canada level only.

Available on CANSIM: tables 331-0004 and 331-0005.

Definitions, data sources and methods: survey number 5032.

For more information, contact Client Services (toll-free 1-866-230-2248; 613-951-9606; prices-prix@statcan.gc.ca). To enquire about the concepts, methods or data quality of this release, contact Lu Li (613-951-1290; lu.li@statcan.gc.ca), Prices Division. ■

Commercial Software Price Index

August 2008

The Commercial Software Price Index for August was 68.79 (2002=100), up 1.39% from July.

Note: The Commercial Software Price Index is a monthly series measuring the change in the purchase price of pre-packaged software typically bought by businesses and governments.

This index is available at the Canada level only.

Available on CANSIM: table 331-0003.

Definitions, data sources and methods: survey number 5068.
