Releases

Canada's international transactions in securities

August 2009

Cross-border portfolio investment resulted in sizeable inflows of funds to Canada in August. Non-residents invested further in Canadian securities, adding \$5.1 billion to their portfolios. Foreign investment in August was spread among all asset classes, except government short-term debt securities.

Foreign portfolio investment in Canadian securities

\$ billions

Meanwhile, Canadian investors adjusted their portfolios of foreign securities, moving from foreign debt to foreign stocks for a net reduction of \$112 million.

Non-residents continue to favour Canadian bonds over money market instruments

The trend of foreign acquisitions of Canadian bonds in 2009 carried into August, with non-residents acquiring an additional \$4.5 billion worth of these instruments. Federal government and its enterprises' bonds accounted for nearly all of this activity in August.

Non-residents picked up \$2.8 billion of federal bonds over the month. Foreign acquisitions were

Note to readers

All values in this release are net transactions unless otherwise stated.

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less.

Government of Canada paper includes treasury bills and US-dollar Canada bills.

focused on the five-year benchmark bond, partially offset by divestment in the two-year benchmark bond. In August, yields on the five-year benchmark bond were largely unchanged while those on other federal government benchmark bonds dropped considerably.

While the overall supply of federal bonds expanded further, three-quarters of the foreign investment in Canadian bonds was comprised of acquisitions on secondary markets. New issues by the private corporate and provincial government sectors slowed significantly from recent strong borrowing activity.

Meanwhile, foreign investors removed a further \$1.1 billion from their holdings of Canadian money market instruments in August, after July's divestment of \$3.8 billion. Divestment in August again focused on federal government short-term paper, as retirements remained high. However, non-residents invested in corporate short-term securities, mainly bank issues.

Foreign investment in Canadian stocks sustained since February 2009

Non-residents purchased \$1.7 billion of Canadian equities in August, as Canadian stock prices (+0.8%) continued to trend up in August. This was the seventh straight month of foreign investment in Canadian shares. Equities of Canadian banks and financial firms again attracted the bulk of the foreign investment over the month. These two sectors were among the top performers on the Canadian stock market, posting year-to-date gains of 51% and 37% respectively.

1. Interest accrued less interest paid.

Note: A minus sign indicates an outflow of money from Canada, that is, a withdrawal of foreign investment from Canada or an increase in Canadian investment abroad.

Oil and gas extraction industry: Capital and operating expenditures 2008

Capital expenditures by the conventional oil and gas extraction industry totalled \$35.6 billion in 2008, up 12.5% from 2007.

Production facilities expenditures were 7.3% higher than in 2007. Oil and gas rights acquisitions and retention costs also increased in 2008.

The non-conventional sector capital expenditures increased 0.3% in 2008 to \$18.1 billion. This marks the fourth year in a row that expenditures have surpassed the \$10 billion level in the non-conventional sector.

According to the Canadian Association of Petroleum Producers, capital expenditures in the conventional and non-conventional petroleum sectors are expected to reach \$34 billion in 2009.

Operating expenses for the conventional sector rose 20.9% from 2007 to \$32.4 billion, the result of higher operating costs and royalty payments. For the non-conventional sector, operating expenses reached \$14.7 billion, up 44.6% from 2007, largely as a result of new projects and higher royalty payments.

Releases

Canada's balance of international payments, first quarter 2008 <small>The current account surplus with the rest of the world (on a seasonally adjusted basis) increased sharply to \$5.5 billion in the first quarter of 2008, led by higher prices for several export commodities combined with a lower trade deficit. In the financial account, foreign direct investment flows into Canada slowed significantly from the acquisition-driven pace of the previous quarter, while Canadian direct investment abroad continued to strengthen.</small>	2
