## Releases

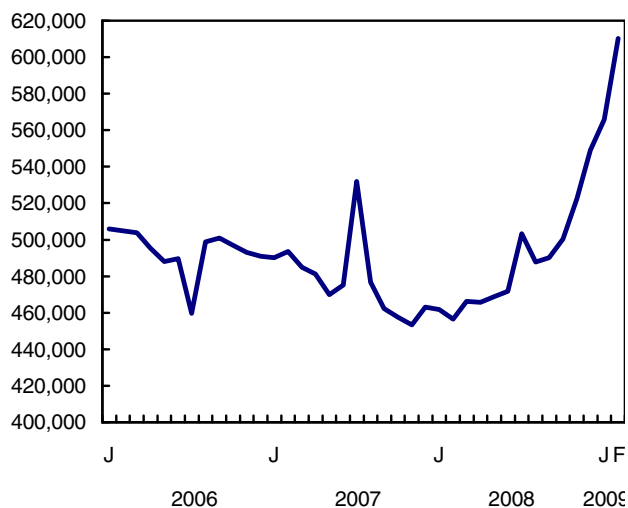

### Employment Insurance

February 2009 (preliminary)

In February, the number of people receiving regular Employment Insurance (EI) benefits increased by 44,300 or 7.8% from January. Alberta, British Columbia, Ontario and Saskatchewan experienced the strongest increases.

#### Sharp increase in number of people receiving regular benefits

number

In recent months, labour market conditions in Canada have deteriorated significantly. Through the early part of 2008, employment slowed, and since October has fallen sharply.

The number of regular EI beneficiaries has climbed 21.9% since October 2008, reaching 610,200 in February.

#### Note to readers

Each month, Statistics Canada will be providing enhanced analysis of the current labour market situation, using Employment Insurance (EI) statistics and other sources. The Labour Force Survey (LFS) will provide the first picture of overall labour market conditions, with unemployment and total employment and who is affected by changes in the labour market. Later in the month, Statistics Canada will provide additional regional detail through the EI statistics and detail by industry through the Survey of Employment, Payrolls and Hours.

EI statistics are produced from an administrative data source and may, from time to time, be affected by changes to the Employment Insurance Act or administrative procedures. The number of regular beneficiaries and the number of claims received for January and February 2009 are preliminary.

The number of beneficiaries is a measure of all persons who received EI benefits from the 15th to the 21st of February. This period coincides with the reference week of the Labour Force Survey for February.

Regional EI data and data by sex and age are not seasonally adjusted and therefore should only be compared on a year-over-year basis. These comparisons can be influenced by unusual spikes or declines in the end points of the period.

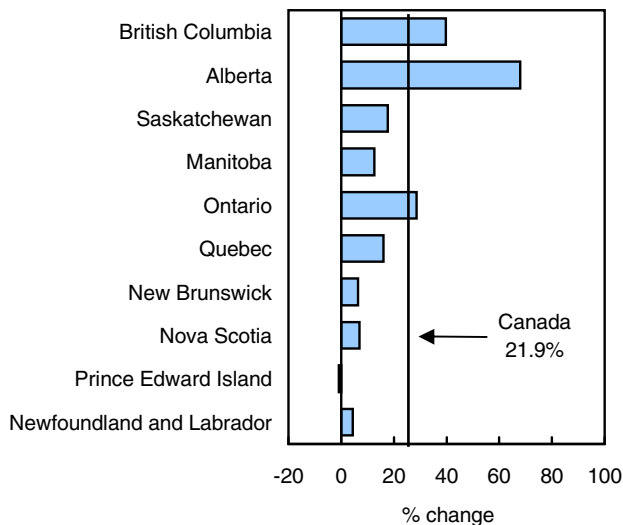

EI statistics indicate the number of people who received EI benefits, and should not be confused with data coming from the Labour Force Survey, which provides information on the total number of unemployed.

There is always a certain proportion of unemployed who do not qualify for benefits. The first are those who have not contributed to the program because they have not worked in the past 12 months or their employment is not insurable. This group includes self-employed workers. The second are those who have contributed to the program, but do not meet the eligibility criteria, such as workers who left their job voluntarily or those who did not accumulate enough hours of work to receive benefits.

The data on employment and employment by industry used in this analysis are drawn from the Labour Force Survey.

Over the same period, the number of regular EI beneficiaries has increased in almost all provinces and territories, with the largest percentage gains in Alberta, British Columbia and Ontario.

## Growth in the number of people receiving regular benefits since October 2008 is strongest in Alberta

## The West and Ontario show largest increases in number of beneficiaries

In Alberta, the number of regular beneficiaries jumped by 27.3% in one month to 30,600 in February, bringing the total increase since October 2008 to 67.9%.

The number of beneficiaries in British Columbia reached 63,700 after an 11.6% increase in February. The total increase since October 2008 was 39.8%.

In Ontario, the 7.8% increase in February brought the number of regular EI beneficiaries to 198,900. Since October 2008, the number of beneficiaries has risen by 28.6%.

From January to February, the number of beneficiaries in Saskatchewan rose 7.3% to 10,000. Since October 2008, the number of beneficiaries has risen 17.6%, slower than the national average of 21.9%.

## Demographic and regional overview: Sharp increase in male beneficiaries

Regional data and data by sex and age on Employment Insurance are not seasonally adjusted and therefore should only be compared on a year-over-year basis.

Between February 2008 and February 2009, there was a larger increase in the number of men receiving regular benefits (+36.7%) compared with women (+20.6%).

## The number of beneficiaries doubled in most large centres in Alberta

All census metropolitan areas in Canada have seen an increase in the number of regular beneficiaries in the past year.

The number of beneficiaries doubled in most large centres in Alberta between February 2008 and February 2009. In Calgary, the number of regular beneficiaries more than doubled to 11,700. In Edmonton, the 96.4% increase brought the number of beneficiaries to 10,900. Red Deer, Lethbridge, Wood Buffalo and Grande Prairie all doubled in number of beneficiaries. In Alberta, the drop in employment in recent months was spread across a number of sectors, including construction, trade, manufacturing and professional, scientific and technical services.

Sharp increases were also observed in Southwestern Ontario ([map](#)) between February 2008 and February 2009. In Windsor, the number of regular beneficiaries climbed 103.8% to 11,700. Also affected were Kitchener (+96.0%), Hamilton (+83.4%) and London (+82.9%), as were Guelph, Tillsonburg, Woodstock, Stratford and Barrie. In Toronto, the number of regular beneficiaries rose 60.6%. During the same period, the sectors of the Ontario economy experiencing steep declines in employment were manufacturing; business, building and other support services; and construction and trade.

Between February 2008 and February 2009, the increase in the number of beneficiaries in British Columbia was widespread. At the same time, the decrease in employment affected a large number of sectors, including manufacturing; construction; transportation and warehousing; retail trade; and forestry and logging.

In British Columbia, the number of beneficiaries almost tripled in Williams Lake, and it doubled further north in Quesnel. The number also roughly doubled in Kelowna, Cranbrook, Chilliwack, Powell River and Penticton. In Victoria the number of beneficiaries increased 88.8%, while in Vancouver, the 12,300 additional beneficiaries represented an increase of 75.3% in one year.

## Claims continue to flow in

To receive EI benefits, individuals must first submit a claim. Statistics on claims cover the month and provide an indication of the number of people who could become beneficiaries. In February, 325,700 claims were received, the largest number since comparable data are available in 1997. The number of claims received

in Canada in February was up 51,000 or 18.6% from January.

There were more claims received in all provinces in February compared with January. The strongest increases were in Alberta (+27.7%) and Manitoba (+22.3%).

**Available on CANSIM: tables 276-0001 to 276-0006, 276-0009, 276-0011, 276-0015 and 276-0016.**

**Definitions, data sources and methods: survey number 2604.**

Data tables are also now available online. From the *By subject* module of our website, choose *Labour*.

Data on Employment Insurance for March will be released on May 26.

## Hog inventories

First quarter 2009

On April 1, farmers had 11.9 million hogs on their farms, down 1.1 million or 8.6% from the same date last year.

Hog inventories have been declining for the past three years. High feed costs, soft slaughter prices, and the implementation of Country of Origin Labeling legislation in the United States have led to farm restructuring and farm closures in Canada.

There were 8,300 hog operations in Canada on April 1, about 1,000 fewer farms than the same date a year earlier, as several hundred producers took advantage of the federal government's Cull Breeding Swine Program to dispose of their breeding herd.

Hog producers exported 1.7 million hogs in the first quarter of 2009, down 42.8% from the peak reached in the first quarter of 2008.

## Deaths

2006

Data on deaths in Canada are now available for 2006.

From 2001 to 2006, life expectancy at birth rose by 1.2 years, from 79.6 to 80.8 years. During this period, life expectancy for men increased by 1.4 years, whereas life expectancy for women advanced by 0.9.

**Available on CANSIM: tables 102-0501 and 102-0511.**

**Definitions, data sources and methods: survey number 3233.**

The publication *Deaths, 2006* (84F0211XWE, free), is now available from the *Publications* module of our website.

For more information, contact Client Services (613-951-1746; fax: 613-951-4198; [hd-ds@statcan.gc.ca](mailto:hd-ds@statcan.gc.ca)), Health Statistics Division.

To enquire about the concepts, methods or data quality of this release, contact Shiang Ying Dai (613-951-1759) or Patricia Schembari (951-9502), Health Statistics Division. ■

## Aircraft movement statistics: Major airports

March 2009

Aircraft take-offs and landings at Canadian airports with NAV CANADA air traffic control towers and flight service stations decreased 2.8% in March compared with the same month a year earlier. These 93 airports reported 489,549 movements in March compared with 503,857 movements at 95 airports in March 2008.

**Available on CANSIM: tables 401-0007 to 401-0020.**

**Definitions, data sources and methods: survey number 2715.**

The March 2009 issue of *Aircraft Movement Statistics: NAV CANADA Towers and Flight Service Stations (TP 141)* (51-007-XWE, free) is now available from the *Publications* module of our website. This report is a joint publication of Statistics Canada and Transport Canada.

For more information, or to enquire about the concepts, methods or data quality of this release, contact Client Services (toll-free 1-866-500-8400; [transportationstatistics@statcan.gc.ca](mailto:transportationstatistics@statcan.gc.ca)), Transportation Division. ■

## Fertilizer Shipments Survey

2008/2009 (third quarter)

Data from the Fertilizer Shipments Survey are now available for the third quarter of the fertilizer year 2008/2009.

**Definitions, data sources and methods: survey number 5148.**

Custom tables are subject to confidentiality constraints and are structured on a cost-recovery basis.

For more information, to order data, or to enquire about the concepts, methods or data quality of this release, contact Client Services (toll-free 1-800-465-1991; [agriculture@statcan.gc.ca](mailto:agriculture@statcan.gc.ca)), Agriculture Division. ■

## Consolidated government finance: Assets and liabilities

As of March 31, 2007

Data on assets, liabilities and net financial debt for the consolidated federal, provincial and territorial general and local governments as of March 31, 2007 are now available.

# The Daily

Statistics Canada

Thursday, May 09, 2008  
Released at 9:30 a.m. Eastern time

---

**Releases**

**Canada's balance of international payments, first quarter 2008** 2  
The current account surplus with the rest of the world (on a seasonally adjusted basis) increased sharply to \$5.3 billion in the first quarter of 2008, led by higher prices for mineral exports. Merchandise exports continued with a lower trade deficit, in the financial account, foreign direct investment flows into Canada showed significantly from the expenditure-driven pace of the previous quarter, while Canadian direct investment abroad continued to strengthen.

**Paid employment, earnings and hours, March 2008** 7

**Study: The year in review for vulnerable trade, 2007** 9

**Public sector employment, first quarter 2008** 10

**Consumer and Mortgage Services Price Index, April 2008** 11

**Placement of tertiary students and tertiary profile, April 2008** 12

**Health Indicators, 2008** 12
