## Releases

## Retail trade

June 2009
Retail sales in current dollars rose in June, increasing $1.0 \%$ to $\$ 34.4$ billion. Most of the gain was driven by higher prices, especially for gasoline, as retail sales in volume terms increased $0.4 \%$. Retail sales have risen in five of the last six months, following large drops at the end of 2008.

Retail sales up five of the last six months

## Sales up for most store types

Sales rose in six of eight retail trade sectors in June. The automotive sector was the largest contributor to overall growth, with a $2.1 \%$ sales gain. A $4.7 \%$ rise in sales at gasoline stations was the main contributor to June's increase in the automotive sector. Higher gas prices drove this advance.

In the rest of the automotive sector, sales rose 2.2\% at used and recreational motor vehicle and parts dealers. This second consecutive monthly increase followed six months of decreases, and was partly due to higher sales at parts dealers. Sales at new car dealers increased $0.4 \%$ in June after a strong gain in May.

Food and beverage stores saw sales increase 1.3\% after being fairly flat in May. Most of the advance can be

## Note to readers

Total retail sales by volume are measured by deflating values in current dollars of the various trade groups using consumer price indexes. This retail sales in chained dollars series (2002) is a chain Fisher volume index with 2002 as the reference year.
attributed to a $1.2 \%$ rise in sales at supermarkets, which completely offset the declines registered in the previous two months. The increase at beer, wine and liquor stores ( $+1.9 \%$ ) was the seventh in nine months.

Sales at furniture, home furnishings and electronics stores increased in June for the second consecutive month with a $0.6 \%$ gain. This followed a downward trend that started in the middle of 2008. Strong sales at home electronics and appliance stores (+2.1\%) were behind this advance. This may have been influenced by the introduction of new technologies in the telephones and home office electronics commodity group, which accounts for approximately $15 \%$ of sales at home electronics and appliance stores.

Sales at general merchandise stores declined 0.6\% in June, giving back the gains of the previous two months. Sales for this store type have been relatively flat since October 2008.

The other sector where sales declined was building and outdoor home supplies stores. The $0.6 \%$ decline in June did not fully offset May's increase. Sales were down for home centres and hardware stores as well as at specialized building materials and garden stores.

## Sales up in nine provinces

Retail sales were up in nine provinces in June. Sales in Quebec rose $1.8 \%$, making it the largest contributor to the national increase. In addition to price-induced higher sales at gasoline stations, this advance reflects strong sales at new car dealerships.

The highest rates of increase were on the Prairies where Manitoba (+2.8\%) and Saskatchewan (+2.3\%) both built on their gains from the previous month.

Except for April, sales in Nova Scotia (+1.8\%) have risen every month in 2009. Nova Scotia was the only province where retail sales in June were higher than in October 2008.

With a $1.0 \%$ increase, sales in Newfoundland and Labrador rose for the sixth consecutive month in June.

After a strong increase in May, retail sales in Ontario were essentially unchanged in June.

The only province where sales decreased in June was New Brunswick. The $0.2 \%$ dip in sales follows a month in which the province posted the largest growth in sales nationally.

It is possible to consult the tables of unadjusted data by industry and by province and territory from the Tables by subject module of our website.

## Farm cash receipts

First half of 2009
Total farm cash receipts, which include crop and livestock revenues plus program payments, amounted to $\$ 22.3$ billion in the first half of 2009 , down $1.4 \%$ from the same period last year.

Market receipts for Canadian farmers from the sale of crops and livestock amounted to $\$ 20.8$ billion during the first half of 2009, up $2.0 \%$ from the same period a year earlier.

Crop receipts increased $2.4 \%$ to $\$ 11.7$ billion, while livestock receipts rose $1.6 \%$ to $\$ 9.1$ billion.

In the crop sector, the increase was due mainly to strong sales, particularly for canola and wheat. Although prices have retreated somewhat from highs set in 2008, production and market demand have both been strong.

In the livestock sector, hog receipts increased 10.2\% from the first half of 2008 to $\$ 1.6$ billion. Despite this increase, hog prices and receipts remained at low levels.

Cattle and calves receipts declined 3.2\% to $\$ 2.9$ billion in the first half of 2009, despite improved market prices. Receipts declined as fewer animals were slaughtered domestically and fewer animals were exported to the United States.

Canada's livestock sector has been affected by several factors. These include high feed costs; inventory reductions; the US Country of Origin Labeling legislation; the H1N1 flu virus; and the economic crisis, which put downward pressure on US demand for live animals.

Cash receipts for farmers in the supply-managed sector increased $2.3 \%$, due mainly to higher dairy and
poultry prices. This sector accounted for more than 45\% of total livestock receipts.

Program payments fell $32.7 \%$ to $\$ 1.5$ billion in the first half of 2009.

Note: Farm cash receipts measure gross revenue for farm businesses only. They do not represent their bottom line, as farmers have to pay their expenses and loans and cover depreciation.

Information on net farm income for 2008 was released in The Daily on May 25, 2009. Preliminary information on net farm income for 2009 will be available in May 2010.

All data in this release are expressed in current dollars.
