Crude oil and natural gas: Supply and disposition

July 2010 (preliminary)

Domestic production of crude oil and equivalent hydrocarbons totalled 14.4 million cubic metres in July, up 3.1% from June and 3.7% higher compared with July 2009.

Crude oil and equivalent exports were down 0.5% in July compared with the same month in 2009. About 70% of Canada's total domestic production went to the export market.

Marketable natural gas production totalled 11.5 billion cubic metres in July, down 4.8% from the same month a year earlier. This was in contrast to an increase in production of 6.9% from June to July 2010.

Domestic sales of natural gas increased by 6.0% in July compared with July 2009.

Natural gas exports rose by 2.2% in July from the same month a year earlier. Exports accounted for about 68% of marketable natural gas production.

Note: Preliminary data are available on CANSIM at the national level to July 2010 inclusive. At the national and provincial level, detailed information is available for crude oil (126-0001) up to March 2010 inclusive, and for natural gas (131-0001) up to May 2010 inclusive.

Available on CANSIM: tables 126-0001 and 131-0001.

Definitions, data sources and methods: survey number 2198.

1. Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.

2. Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.

3. Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.

4. Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.

5. Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.

6. Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).
