**Releases**

**Canada's balance of international payments, first quarter 2008** 2  
The current account surplus with the rest of the world (on a seasonally adjusted basis) increased sharply to \$5.3 billion in the first quarter of 2008, led by higher prices for several export commodities combined with a lower import deficit. In the financial account, foreign direct investments from the United States increased significantly from the expenditure-driven pace of the previous quarter, while Canadian direct investment abroad continued to strengthen.
