## Crude oil and natural gas: Supply and disposition

June 2010 (preliminary)

Domestic production of crude oil and equivalent hydrocarbons totalled 13.9 million cubic metres in June, up 8.0% from June 2009.

Crude oil and equivalent exports were down 2.6% in June compared with the same month in 2009. About 66% of Canada's total domestic production went to the export market.

Marketable natural gas production totalled 10.8 billion cubic metres in June, down 4.6% from the same month a year earlier, while domestic sales of natural gas increased by 14.0%.

Natural gas exports rose by 9.9% in June from the same month a year earlier. Exports accounted for about 67% of marketable natural gas production.

**Note:** Preliminary data are available on CANSIM at the national level to June 2010 inclusive. At the national and provincial level detailed information is available for crude oil (126-0001) up to February 2010 inclusive, and for natural gas (131-0001) up to December 2009 inclusive.

**Available on CANSIM: tables 126-0001 and 131-0001.**

**Definitions, data sources and methods: survey number 2198.**

<sup>r</sup> revised

<sup>p</sup> preliminary

1. Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.

2. Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.

3. Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.

4. Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.

5. Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.

6. Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).

## Electric utility construction price indexes

Annual 2009 (revised) and first half of 2010 (preliminary)

Construction costs for the distribution systems series increased by 1.0% in first half of 2010 compared with the 2009 annual index. Higher costs for labour (+4.4%) and overhead conductors (+7.2%) were the major contributors to the advance.

Construction costs for the transmission line system series rose 0.9% during the first half of 2010, while the transmission line component increased 2.0%, largely as a result of installation labour (+4.4%). The substation component edged up 0.2% in the first half of 2010, led by an 8.1% increase in the power cables and buswork component.

Compared with 2008 final data, the revised 2009 data show increases for both the distribution systems (+0.5%) and the transmission line system series (+0.6%). The transmission line component declined by 0.7%, while the substation component increased by 1.4%.

**Note:** This release presents data that are not seasonally adjusted and the indexes published are subject to a two-year revision period after dissemination of a given year's data.

**Available on CANSIM: table 327-0011.**

**Definitions, data sources and methods: survey number 2316.**

## Access and Support to Education and Training Survey

2007/2008

The public use microdata file from the 2008 Access and Support to Education and Training Survey is now available. This file contains information collected from more than 31,000 respondents under the age of 65, excluding individuals residing in the three territories in the North, and excluding individuals residing in institutions.

The survey was conducted from June to October 2008 on behalf of Human Resources and Skills Development Canada and references the period between July 2007 and June 2008.

The survey addresses issues relating to antecedents and determinants to access to post-secondary education. It provides an holistic approach to collecting information on participation in and financing of education and training in Canada.

The Access and Support to Education and Training Survey brings together three previously conducted surveys: The Survey of Approaches to Educational Planning, the Post-secondary Education Participation Survey and the Adult Education and Training Survey.

The initial results from the 2008 Access and Support to Education and Training Survey were made available to the public via *The Daily* on November 25, 2009.

**Definitions, data sources and methods: survey number 5151.**

*The Access and Support to Education and Training Survey: Public Use Microdata File, 2008*, is available on CD-ROM (81M0019X, \$80), along with complete documentation including a user's guide. See *How to order products*.

A report entitled "Lifelong learning among Canadians aged 18 to 64 years: First results from the 2008 Access and Support to Education and Training Survey" is available as part of the *Culture, Tourism and the Centre for Education Statistics: Research Papers*, 2009 (81-595-M2009079, free). From the *Publications* module of our website, choose *Publications by subject*, then *Education, training and learning*.
