Releases

Wholesale trade

August 2011

Wholesale sales edged up 0.2% in August to \$48.4 billion following a 0.9% advance in July.

Increases were reported in all of the subsectors, except for the miscellaneous, and the building material and supplies subsectors.

Wholesale sales edge up in August

In volume terms, wholesale sales fell 0.9% in August.

The difference between the growth rate expressed in current and constant dollars reflects higher prices for the imported products sold by wholesalers. This was partly attributable to the depreciation of the Canadian dollar relative to the American dollar during the month.

Increases in most subsectors

In August, five out of seven subsectors, representing close to 75% of total sales, reported increases.

The largest increase in dollar terms came in the machinery, equipment and supplies subsector. Sales rose 0.7% to \$10.5 billion in August, the sixth monthly sales increase since the beginning of the year. All of the

Note to readers

All the data in this release are seasonally adjusted and in current dollars, unless otherwise noted.

Wholesale sales expressed in volume are calculated by deflating current dollar values using import and industry product price indexes. Since many of the goods sold by wholesalers are imported, fluctuations in the value of the Canadian dollar can have an important influence on the prices of goods bought and sold by wholesalers.

The wholesale sales series in chained (2002) dollars is a chained Fisher volume index with 2002 as the reference year.

gains in this subsector came from the farm, lawn and garden machinery and equipment industry (+10.6%).

The food, beverages and tobacco products subsector (+0.5%) continued its upward trend that began in late 2009. The food products industry, which accounts for close to 90% of the subsector, increased 0.3% in August.

Sales in the motor vehicle and parts subsector gained 0.4%, reflecting an increase of 1.7% in the motor vehicle industry. Sales in this industry reached \$6.1 billion in August, their highest level since July 2008. The other major industry in this subsector, new motor vehicle parts and accessories, saw sales fall 4.0% following an increase of 3.1% the previous month.

The largest decline in August occurred in the miscellaneous subsector (-1.1%), which reflected a 13.7% decrease in the agricultural supplies industry. Declines in July and August in this industry offset large increases in May and June.

The building material and supplies subsector fell 0.7%, pushed down by the metal service centres (-1.9%) and the lumber, millwork, hardware and other building supplies (-0.7%) industries.

Wholesale sales up in most provinces

Alberta and Ontario posted the largest increases in dollar terms in August.

In Alberta, sales grew by 1.1% in August following a decrease of 0.1% the previous month. Higher sales in several subsectors, including machinery, equipment and supplies and food, beverage and tobacco products helped fuel the growth.

Sales in Ontario edged up 0.2% in August, following a 1.8% increase in July.

Wholesalers in Saskatchewan posted the largest sales decrease, (-4.8%). Weakness in the agricultural

supplies industry was a major factor contributing to this decline.

Wholesale sales in Quebec remained unchanged in August.

Three out of four Atlantic provinces advanced, with Nova Scotia (+2.9%) recording the largest increase in dollar terms. New Brunswick (-0.2%) posted the only loss.

Inventories continue to rise

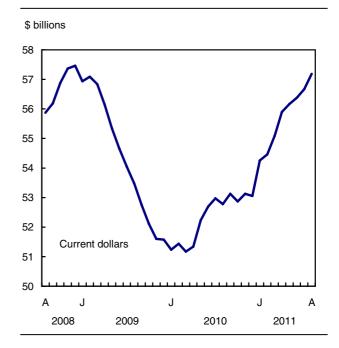

Inventories rose 0.9% to \$57.2 billion in August, posting their eighth consecutive monthly increase.

Inventories were up in 19 of the 25 wholesale industries. Wholesalers in the motor vehicle industry (+5.7%), other machinery, equipment and supplies industry (+2.1%), and the pharmaceuticals and pharmacy supplies industry (+1.1%) reported the largest gains in dollar terms.

The inventory-to-sales ratio increased from 1.17 in July to 1.18 in August.

The inventory-to-sales ratio is a measure of the time in months required to exhaust inventories if sales were to remain at their current level.

Inventories increase in August

Employment Insurance

August 2011

The number of people receiving regular Employment Insurance (EI) benefits increased by 35,200 (+6.6%) to 568,600 in August, following a decline of similar magnitude in July.

The number of beneficiaries rose in every province, with the largest percentage increases occurring in Manitoba, Ontario, Quebec, Nova Scotia and Saskatchewan.

More Employment Insurance beneficiaries in August

Claims up in August

To receive EI benefits, individuals must first submit a claim. The number of claims provides an indication of the number of people who could become beneficiaries.

The number of initial and renewal claims rose for the second consecutive month, up $10,700 \ (+4.4\%)$

Note to readers

All data in this release are seasonally adjusted unless otherwise specified.

Each month, Statistics Canada provides analysis of the current labour market situation, using Employment Insurance (EI) statistics and other sources. Earlier this month, the Labour Force Survey (LFS) provided a picture of overall labour market conditions, including unemployment, total employment and characteristics of those affected by changes in the labour market.

In this release, Statistics Canada provides additional sub-provincial detail through the El statistics. Details by industry will follow with data from the Survey of Employment, Payrolls and Hours

El statistics are produced from administrative data sources provided by Service Canada and Human Resources and Skills Development Canada. These statistics may, from time to time, be affected by changes to the Employment Insurance Act or administrative procedures. The number of regular beneficiaries and the number of claims received for July and August are preliminary. In this release, large centres correspond to those with a population of 10,000 or more.

The number of beneficiaries is a measure of all persons who received EI benefits from August 14 to 20. This period coincides with the reference week of the LFS.

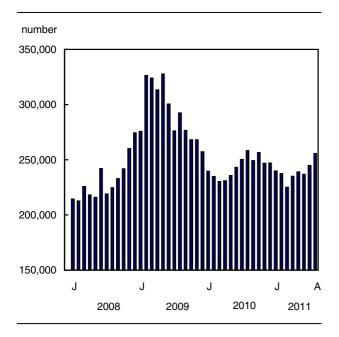

El statistics indicate the number of people who received El benefits, and should not be confused with data coming from the LFS, which provides information on the total number of unemployed people.

There is always a certain proportion of unemployed people who do not qualify for benefits. Some unemployed people have not contributed to the program because they have not worked in the past 12 months or their employment is not insured. Other unemployed people have contributed to the program but do not meet the eligibility criteria, such as workers who left their job voluntarily or those who did not accumulate enough hours of work to receive benefits.

The change in the number of regular EI beneficiaries reflects various situations, including people becoming beneficiaries, people going back to work, and people exhausting their regular benefits

to 255,600 in August. The largest percentage increase occurred in Quebec (+23.6%) as well as Newfoundland and Labrador (+19.8%). This contrasts with Ontario and Alberta, where the number of claims fell by 6.5% and 4.2%, respectively.

Number of claims up for the second consecutive month

More beneficiaries in all provinces

The number of regular beneficiaries was up in all provinces, with the largest percentage increase in Manitoba (+14.1%). There were also marked increases in the number of beneficiaries in Ontario (+8.2%) and Quebec (+6.4%).

The increases in Manitoba, Ontario, Quebec, Saskatchewan and Alberta follow a period of continuous decline that began nearly a year ago.

Sub-provincial and demographic overview

Employment Insurance data by sub-provincial region, sex and age are not seasonally adjusted and are therefore compared on a year-over-year basis.

Most large centres show year-over-year declines

Between August 2010 and August 2011, the number of people receiving regular benefits nationally fell by 109,700 (-16.0%). Declines occurred in 131 of the 143 large centres (see map). Large centres are those with a population of 10,000 or more.

In Newfoundland and Labrador, there were fewer beneficiaries in all five large centres. In St. John's, the number fell by 16.2%, extending the trend of monthly

year-over-year decreases that began in April 2010. In Grand Falls-Windsor, the number declined 14.4%.

In Nova Scotia, four of the five large centres had fewer beneficiaries in August 2011 compared with August 2010. The most notable percentage decrease was in Halifax, where the number fell 9.4% to 5,800, extending the downward trend that began in March 2010.

In New Brunswick, three of the six large centres had fewer beneficiaries in the 12 months to August, with the fastest pace of decline in Saint John (-13.3%) and Moncton (-12.8%).

The number of beneficiaries fell in 30 of the 33 large centres in Quebec. The largest percentage decrease occurred in the census metropolitan area of Québec (-23.3%). There were similar year-over-year percentage declines in Rouyn-Noranda and Saint-Hyacinthe. In Montréal, there were 19.7% fewer beneficiaries in August 2011 compared with August 2010, continuing the downward trend that began in March 2010.

In Ontario, 38 of the 41 large centres had fewer beneficiaries compared with 12 months earlier, with the largest percentage decrease occurring in Tillsonburg. Other large centres with marked percentage declines in August include Guelph, Chatham-Kent and Thunder Bay. In Toronto, the number fell by 20.0% to 74,100, extending the trend of year-over-year declines that began in March 2010.

In Manitoba, the number of people receiving regular benefits fell in three of the four large centres in the 12 months to August. In Winnipeg, the number of beneficiaries declined by 18.6% to 8,800, the 12th consecutive decrease.

In Saskatchewan, all eight large centres recorded year-over-year declines, with the fastest decrease occurring in Moose Jaw. In Regina, 1,400 people received benefits, down 24.9% from August 2010, extending the trend of monthly year-over-year decreases which started just over a year ago. In Saskatoon, the number of beneficiaries fell 20.2% to 2,600, the ninth consecutive decline.

In Alberta, all 12 large centres had fewer beneficiaries compared with August 2010. In Calgary, the number fell 32.7% to 10,600, while it fell 29.5% to 11,200 in Edmonton. Other large centres with year-over-year declines include Grande Prairie, Red Deer, Medicine Hat and Cold Lake.

The number of beneficiaries fell in all 25 large centres of British Columbia, with the largest percentage declines occurring in Campbell River, Kamloops, and Powell River. The number of people receiving benefits also fell in Vancouver (-27.5% to 26,400) and in Victoria (-18.4% to 3,300).

Demographic groups

In August, the number of men receiving regular benefits fell by 20.7% from 12 months earlier to 268,700. There were declines of 23.2% among men aged under 25 and 22.6% among those aged 25 to 54. The number of male beneficiaries aged 55 and over decreased 13.5%.

The number of women receiving benefits in August totalled 307,600, down 11.4% from August 2010. The number of beneficiaries decreased 20.1% among women under 25, and fell by 12.4% among those aged 25 to 54. The pace of decline for women 55 and over was slower, at 4.6%.

Available on CANSIM: tables 276-0001 to 276-0006, 276-0009, 276-0011, 276-0015 and 276-0016.

Wholesale Services Price Index

Second quarter 2011

In the second quarter, the Wholesale Services Price Index (WSPI) rose 1.3%.

Five of the eight wholesale sectors registered increases in the second quarter. The largest contributors to the WSPI's second quarter increase were petroleum products (+14.7%), machinery, equipment and supplies (+3.7%) and miscellaneous products (+2.3%).

Services Producer Price Index: Wholesale services

Wholesalers of food, beverage and tobacco products (-3.2%) posted the largest decrease in the

second quarter. Margins also fell for wholesalers of building material and supplies (-1.8%) and farm products (-1.3%).

The WSPI was up 0.5% in the second quarter compared with the same quarter a year earlier. Year-over-year margin increases were posted by wholesalers of farm products (+3.9%), miscellaneous products (+3.8%) and motor vehicles and parts (+2.4%). The year-over-year increase of the WSPI in the second quarter was moderated by downward movements by wholesalers of building material and supplies (-5.1%) and petroleum products (-0.1%).

Note: All data in this release are seasonally unadjusted and are subject to revision. With the release of the final fourth quarter data for any given year, finalized data for all quarters of that year are released at the same time. The Wholesale Services Price Index (WSPI) is part of the Services Producer Price Index program at Statistics Canada. The WSPI is not a wholesale selling price index. The Index represents the change in the price of the wholesale service. The price of the wholesale service is defined as the margin price, which is the difference between the average purchase price and the average selling price of the wholesale product being priced.

Available on CANSIM: table 332-0006.

Definitions, data sources and methods: survey number 5106.

Commercial and Industrial Machinery and Equipment Rental and Leasing Services Price Index

Second quarter 2011

The Commercial and Industrial Machinery and Equipment Rental and Leasing Services Price Index rose 0.4% in the second quarter, following a 0.2% increase in the first quarter.

Heavy machinery and equipment rental and leasing services (construction, transportation, mining and forestry) posted an increase of 0.3% while office and other commercial and industrial machinery and equipment rental and leasing services increased 0.4%.

Services Producer Price Index: Commercial and industrial machinery and equipment rental and leasing services

On a year-over-year basis, the index rose 0.2% in the second quarter compared with the same quarter of 2010.

^p preliminary

^{1.} The relative importance is based on the weight that each three-digit North American Industrial Classification System contributes to the overall Wholesale Services Price Index. The total does not equal 100 as the Wholesale Agents and Brokers group was not priced and data are imputed.

Note: With this release, the first quarter 2011 data are revised and the second quarter 2011 data are subject to revision.

The Commercial and Industrial Machinery and Equipment Rental and Leasing Services Price Index is part of the Services Producer Price Index program at Statistics Canada. The purpose of this survey is to collect and compile data to measure movements in the price of rental and leasing activities for the commercial and industrial machinery and equipment industry. These data are combined to estimate a price index for the commercial and industrial machinery and equipment rental and leasing services sector. The index can be joined with other business service indexes to provide better estimates of real output and productivity, and to monitor inflation in the services sector.

The data are not seasonally adjusted. This is a monthly index which is disseminated on a quarterly basis. Indexes are available at the Canada level only.

The Office and Other Commercial and Industrial Machinery and Equipment Rental and Leasing Services Price Index combines the North American Industry Classification System codes 53242 and 53249.

Available on CANSIM: table 332-0005.

Definitions, data sources and methods: survey number 5137.

14

The relative importance is based on the weight that each five-digit North American Industrial Classification System contributes to the overall Commercial and Industrial Machinery and Equipment Rental and Leasing Services Price Index.

^{2.} Data for office machinery and equipment rental and leasing services, and other commercial and industrial machinery and equipment rental and leasing services were collected separately, then the indexes were combined together at aggregation.

Construction Union Wage Rate Index

September 2011

The Construction Union Wage Rate Index (including supplements) for Canada remained unchanged in September compared with the previous month. The composite index increased by 1.7% compared with September 2010.

Note: Union wage rates are published for 16 trades in 22 metropolitan areas for both the basic rates and rates including selected supplementary payments. Indexes on a 2007=100 time base are calculated for the same metropolitan areas and are published for those where a majority of trades are covered by current collective agreements.

This release presents indexes that are not seasonally adjusted. The union wage rates and indexes published are subject to a 30-month revision period after dissemination of a given month's data.

Available on CANSIM: tables 327-0003 and 327-0045.

Definitions, data sources and methods: survey number 2307.

The second quarter 2011 issue of *Capital Expenditure Price Statistics* (62-007-X, free) will be available soon.

The construction union wage rate indexes for October will be released on November 17.

For more information, or to enquire about the concepts, methods, or data quality of this release, contact Client Services (toll-free 1-888-951-4550; 613-951-4550; fax: 1-855-314-8765 or 613-951-3117; ppd-info-dpp@statcan.gc.ca), Producer Prices Division.

Primary iron and steel

August 2011

Data on primary iron and steel are now available for August.

Available on CANSIM: tables 303-0048 to 303-0051.

Definitions, data sources and methods: survey numbers, including related surveys, 2116 and 2184.

The August 2011 issue of *Steel, Tubular Products* and *Steel Wire* (41-019-X, free) will soon be available.
