Releases

Canada's balance of international payments

Third quarter 2011

Canada's overall current account deficit (on a seasonally adjusted basis) narrowed \$4.0 billion in the third quarter to \$12.1 billion, largely the result of higher exports of goods.

Current account balances

Note to readers

The **balance of international payments** covers all economic transactions between Canadian residents and non-residents in two accounts, the current account and the capital and financial account.

The **current account** covers transactions in goods, services, investment income and current transfers.

The **capital and financial account** is mainly composed of transactions in financial assets and liabilities.

In principle, a current account surplus/deficit corresponds to an equivalent net outflow/inflow in the capital and financial account. In practice, as international transactions data are compiled from multiple sources, this is rarely the case and gives rise to measurement error. The **statistical discrepancy** is the unobserved net inflow or outflow.

For more information about the balance of payments, consult the "Frequently asked questions" section in the National economic accounts module of our website. The module also presents the most recent balance of payments statistics.

Current account

Goods balance returns to a surplus

The overall balance on the trade in goods was a \$0.7 billion surplus in the third quarter following a \$3.5 billion deficit the previous quarter. This was led by a rebound in exports, mainly industrial goods and machinery and equipment, while motor vehicles and parts were largely unchanged and energy products weakened further. As a result, the majority of the export strength in the quarter reflected trade with countries other than the United States.

In the capital and financial account (unadjusted for seasonal variation), foreign portfolio investors continued to supply funds to the Canadian economy, mostly through the acquisition of short-term debt securities. Foreign direct investment activity moderated the overall inflows, as Canadian direct investment abroad exceeded foreign direct investment in Canada for the first time in 2011.

Goods balances by geographic areas

Exports of goods were up \$4.7 billion to \$115.2 billion in the third quarter, the highest level since the third quarter of 2008.

The export of industrial goods, which advanced for a ninth straight quarter, increased \$2.3 billion on higher volumes and prices. Most of the gains during the quarter were recorded in precious metals and in metal ores.

Exports of machinery and equipment increased \$2.2 billion, mostly on higher volumes. In particular, exports of aircraft rebounded by \$0.9 billion in the third quarter after recording their lowest level in more than 10 years in the previous quarter.

Lower exports of crude petroleum more than offset the gains in natural gas and in other energy products as was the case in the previous quarter.

Imports of goods edged up \$0.4 billion in the third quarter to \$114.5 billion. Automotive products rose \$1.2 billion, as a result of higher volumes of imports of cars, trucks and parts. Imports of industrial goods strengthened for a ninth straight quarter, up \$0.6 billion on higher prices. However, imports of energy products fell \$1.7 billion as both prices and volumes decreased. This was the first decline since the first quarter of 2009.

Trade in services deficit narrows, led by transportation and travel

The trade in services deficit narrowed \$0.2 billion to \$6.3 billion in the third quarter. In both the transportation and the travel accounts, receipts increased while payments decreased. The reduction in these deficits was slightly offset by a lower surplus on trade in commercial services.

Investment income deficit expands on higher payments

The deficit in investment income went up \$0.4 billion to \$5.9 billion, as payments outpaced receipts in the third quarter.

Profits on foreign direct investment in Canada were up \$0.5 billion as both dividends paid and non-distributed earnings increased, notably in the energy sector. Interest and dividends paid to non-residents were also up (+\$0.2 billion), in line with increased foreign holdings of Canadian securities.

On the other hand, profits earned by Canadian direct investors advanced \$0.4 billion.

Capital and financial account

Non-resident investment in Canadian securities led by Treasury bills

Foreign investment in Canadian securities focused on money market instruments in the third quarter with purchases of \$16.2 billion of these instruments, exceeding the previous high of \$9.9 billion in the fourth quarter of 2008. Non-resident acquisitions of short-term securities were mainly in the form of federal government paper, for which foreign holdings increased almost 50% in the quarter.

Foreign investment in Canadian bonds continued in the third quarter with non-residents adding \$7.4 billion to their holdings, marking an 11th straight quarter of such investment. However, this was the lowest quarterly acquisition of Canadian bonds during this period.

Foreign investors favoured bonds issued by provincial governments and private corporations in the quarter, both new issues and secondary market acquisitions. These inflows were moderated by a \$1.9 billion reduction in foreign holdings of federal bonds, the first such divestment since the fourth quarter of 2008. Non-residents also reduced their holdings of federal government enterprise bonds by \$2.1 billion, following five straight quarters of investment. Nevertheless, non-resident holdings of federal bonds at the end of September 2011 were

almost three times higher than what they were at the end of December 2008.

Foreign portfolio investment in Canadian debt securities

Foreign acquisitions of Canadian stocks rose to \$4.1 billion in the third quarter. Most of this increase reflected merger and acquisition activity, resulting in the issuance of Canadian shares to former shareholders of foreign firms acquired. This was moderated by the first foreign divestment of Canadian shares on the secondary market in six quarters. Canadian stock prices declined 12.6% in the third quarter, the largest quarterly drop since the fourth quarter of 2008.

Canadian investors continue to focus on foreign equities

Canadian investors purchased \$4.6 billion of foreign securities in the third quarter, as the pattern of investment in equity securities and divestment of debt securities continued in 2011.

Acquisitions of foreign stocks were \$7.8 billion in the third quarter and mostly targeted the US stock market, led by demand from Canadian pension funds. Most major world equity markets posted losses in the third quarter.

Canadians continued to reduce their holdings of foreign debt securities in the third quarter, but at a

slower pace than in the previous quarter. This was led by a \$3.0 billion divestment in foreign bonds, mainly from a reduction in holdings of US government securities. Canadians also continued to reduce their holdings of Maple bonds, consistent with the general trend observed since the beginning of 2008.

Outward direct investment exceeds inward direct investment for the first time in 2011

Canadian direct investment abroad was \$15.4 billion in the third quarter, the largest such outflow recorded in 2011. This was largely related to cross-border merger and acquisition activity by Canadian financial firms. The US economy accounted for the bulk of this quarterly investment at \$11.6 billion, the highest in two years.

Canadian direct investment abroad¹

1. Reverse of balance of payments signs.

Foreign direct investment of \$6.2 billion in Canada amounted to the lowest investment since the third quarter of 2010. The majority of the inflows resulted from profits reinvested in Canadian subsidiaries by foreign direct investors. On an industry basis, this was mainly in the energy and metallic minerals sectors of the Canadian economy. Withdrawals of foreign funds from the Canadian financial sector moderated the overall inflows in the third quarter.

Available on CANSIM: tables 376-0001 to 376-0017 and 376-0035.

Definitions, data sources and methods: survey numbers, including related surveys, 1534, 1535, 1536 and 1537.

The third quarter 2011 issue of *Canada's Balance of International Payments* (67-001-X, free) will be available soon.

The balance of international payments data for the fourth quarter will be released on March 1, 2012.

Natural gas sales

September 2011 (preliminary)

Natural gas sales totalled 4 402 million cubic metres in September, down 0.3% compared with September 2010.

In September, the volume of sales to the industrial sector was up 3.6% compared with September 2010, while the volume of sales to the commercial (-11.0%) and residential (-14.0%) sectors declined.

Total sales in September were 3.2% lower compared with August.

Definitions, data sources and methods: survey number 2149.

^P preliminary

1. Gas sold for domestic purposes, including space heating, water heating and cooking, to a residential dwelling unit.

2. Gas sold to customers engaged in wholesale or retail trade, governments, institutions, office buildings, etc.

3. Gas sold to customers engaged in a process that creates or changes raw or unfinished materials into another form or product. Includes mining and manufacturing establishments. Includes firm, interruptible and buy/sell agreements.

2011 Census geographic products

Available today are four geographic products from the 2011 Census: *Boundary Files*, *Road Network File*, *Correspondence Files* and the *Interim List of Changes to Municipal Boundaries, Status, and Names*. These products represent the first suite of geographic products released from the 2011 Census.

Boundary Files provide geographic limits used for census dissemination and a framework for mapping and spatial analysis. Digital files depict the full extent of the geographic areas, including the coastal water area. Cartographic files depict the geographic areas using only the major land mass of Canada and its coastal islands.

These files contain boundaries of standard geographic areas in effect on January 1, 2011. Digital and cartographic boundary files, portrayed in latitude and longitude coordinates, are available for provinces and territories, census divisions, economic regions, federal electoral districts (2003 Representation Order), census consolidated subdivisions, census subdivisions, census metropolitan areas / census agglomerations, census tracts, dissemination areas and dissemination blocks.

The *Road Network File* is a digital representation of Canada's national road network, containing information such as street names, types, directions and address ranges. In addition, on each side of every street arc there are unique identifiers and names for the following levels of geography: province/territory, census metropolitan area / census agglomeration, census subdivision.

Roads are ranked according to five levels of detail, suitable for mapping at small to medium scales. Applications may include mapping, geocoding, geographic searching, area delineation, and database maintenance as a source for street names and locations.

Three *Correspondence Files* provide tabular data showing the correspondence between two vintages of geographic areas. Each correspondence file contains a unique identifier for the 2011 Census geographic area and the corresponding unique identifier for the 2006 Census geographic area. In addition, a relationship flag indicates the degree of correspondence between the geographic areas, facilitating a comparison between 2011 and 2006 census years.

The *Interim List of Changes to Municipal Boundaries, Status, and Names* summarizes changes to municipal boundaries, status and names that occurred between January 2, 2006, and January 1, 2011. Municipal changes are based on information received through provincial and territorial gazettes, letters patent and orders-in-council.

Boundary files are available in three formats: ArcInfo®, Geography Markup Language and MapInfo®. The 2011 Census *Boundary Files* (92-160-X, 92-163-X, 92-168-X, 92-169-X, 92-171-X), and *Boundary Files, Reference Guide* (92-160-G) are now available at no cost from the *Key resource* module of our website, under *Publications*.

The Road Network File is available in three formats: ArcInfo®, Geography Markup Language and MapInfo®. The 2011 Census *Road Network File* (92-500-X, free), and *Road Network File, Reference Guide* (92-500-G, free) are now available.

Correspondence files are available in two formats: Excel® (.xlsx) and Text (.txt). The 2011 Census *Correspondence Files* (92-156-X, free), and *Correspondence Files, Reference Guide* (92-156-G, free) are now available.

The *Interim List of Changes to Municipal Boundaries, Status, and Names*, January 2, 2006 to January 1, 2011 (92F0009X, free), is now available in HTML and PDF formats.

Statistics Canada

Thursday, May 29, 2008
Released at 9:30 a.m. Eastern time

Releases

Canada's balance of international payments, first quarter 2008	2
<small>The current account surplus with the rest of the world (on a seasonally adjusted basis) increased sharply to \$5.0 billion in the first quarter of 2008, led by higher prices for several exported commodities compared with a lower base level. In the financial account, foreign direct investment flows into Canada slowed significantly from the expansion-driven pace of the previous quarter, while Canadian direct investment abroad continued to strengthen.</small>	
Payroll employment, earnings and hours, March 2008	7
Study: The year to review for wholesale trade, 2007	9
Public sector employment, first quarter 2008	10
