Labour Force Survey

April 2011

Following two months of little change, employment rose by 58,000 in April, mainly in part time. The unemployment rate edged down 0.1 percentage points to 7.6%. Compared with April 2010, employment has grown by 283,000 (+1.7%).

Employment

thousands

There were gains in finance, insurance, real estate and leasing as well as in business, building and other support services in April. Employment was essentially unchanged in the other industries.

In April, Ontario and Newfoundland and Labrador were the only provinces with notable employment gains. At the same time, employment declined in Nova Scotia and Manitoba while there was little change in the remaining provinces.

The number of employees rose in both the private and public sectors in April. Over the past 12 months, employment in the public sector has grown by 2.8% compared with 1.6% in the private sector, while self-employment was little changed.

Employment in part time increased by 41,000 in April, and it edged up in full time. Over the past 12 months, full-time employment grew by 1.9% compared with 0.8% in part time.

Note to readers

Labour Force Survey (LFS) estimates are based on a sample, and are therefore subject to sampling variability. Estimates for smaller geographic areas or industries will have more variability. For an explanation of sampling variability of estimates, and how to use standard errors to assess this variability, consult the "Data quality" section of the publication Labour Force Information (71-001-X, free).

Unless otherwise stated, this release presents seasonally adjusted data, which facilitates comparisons by removing the effects of seasonal variations.

With April's slight gain, full-time employment has returned to the level of October 2008 for the first time. The total number of hours worked, however, remained 0.6% below its October 2008 level.

Employment was up among women aged 55 and over in April, while it changed little for the other demographic groups.

Unemployment rate

%

Service sector leads employment gains

The largest employment gains in April were in the service sector, led by finance, insurance, real estate and leasing (+19,000) and business, building and other support services (+17,000).

In the goods sector, employment in natural resources (+6,600) edged up in April.

Employment in both manufacturing and construction was little changed in April. Over the past 12 months, however, these industries had employment gains of 3.3% and 2.7% respectively.

Despite little change over the last few months, the fastest employment growth since April 2010 was in transportation and warehousing (+7.7%). The second fastest year-over-year growth was in health care and social assistance (+3.6%), continuing its long-term upward trend.

Employment in Ontario continues upward trend

Employment in Ontario rose by 55,000 in April, driven by gains in part time (+46,000). As a result, the unemployment rate declined by 0.2 percentage points to 7.9%, its lowest level since December 2008. Despite April's part-time gain, Ontario's employment growth of 157,000 (+2.4%) over the past 12 months was all in full time.

Newfoundland and Labrador was the only other province with a notable employment gain in April, up 3,100. Over the past 12 months, the number of workers rose by 15,000 or 6.9%, the fastest rate of growth of all provinces. In April, the unemployment rate fell by 1.3 percentage points to 11.1%, its lowest rate since 1976, when comparable data became available.

In April, employment fell by 5,500 in Nova Scotia and by 3,300 in Manitoba.

In Quebec, employment was unchanged in April, and the unemployment rate was 7.8%. Compared with 12 months earlier, employment in the province was up 1.2% (+46,000).

Fastest employment growth among women 55 and over

Employment rose among women 55 and over, up 29,000 in April. Compared with 12 months earlier, employment among these women increased by 102,000 or 7.9%, the fastest rate of growth of all demographic groups.

Among youths aged 15 to 24 and core-aged workers (25 to 54), employment held steady in April. Over the past 12 months, employment among youths and core-aged women was little changed, while it was up 105,000 (+1.7%) among core-aged men.

Available on CANSIM: tables 282-0001 to 282-0042, 282-0047 to 282-0063, 282-0069 to 282-0095 and 282-0100 to 282-0121.

Definitions, data sources and methods: survey number 3701.

A more detailed summary, *Labour Force Information* (71-001-X, free), is now available online for the week ending April 16. From the *Key resource* module of our website under *Publications*, choose *All subjects*, then *Labour*. LAN and bulk prices are available on request. The DVD-ROM *Labour Force Historical Review*, 2010 (71F0004X, \$209), is now available. See *How to order products*.

Data tables are also now available online. From the *Subject* module of our website, choose *Labour*.

The next release of the Labour Force Survey will be on June 10.

Stocks of principal field crops

March 31, 2011

As of March 31, total stocks of canola and barley fell significantly compared with the same date in 2010. Meanwhile, total stocks of corn for grain rose slightly above March 2010 levels, the result of increased production in 2010.

Total stocks of canola stood at 4.9 million metric tonnes as of March 31, down 22.8% or 1.4 million tonnes from the same date in 2010. Overall, total stocks at March 31 were approaching 2007 and 2008 levels, after having increased substantially in 2009 and 2010. Prairie on-farm stocks fell 34.9% to 3.4 million tonnes, with large declines reported in Manitoba and Saskatchewan. Commercial stocks of canola rose 38.4% to 1.4 million tonnes. Prairie production of canola fell in 2010 as a result of a lower yield.

Total stocks of barley fell to 3.5 million tonnes as of March 31, down 31.0% from 5.1 million tonnes reported in March 2010. Barley production fell significantly in 2010, the result of a large decline in harvested area. This was the second annual decrease since 2009. On-farm barley stocks fell 33.4% to 3.0 million tonnes, and declines were noted in all three Prairie provinces. Commercial stocks of barley declined 12.4% to 510 000 tonnes.

Total stocks of corn for grain at the national level reached 5.9 million tonnes as of March 31, up 1.9% from the same date in 2010, and remained near the record high of 6.0 million tonnes set in 2009. There was a strong increase in crop production in 2010, the result of large increases in crop yield. Over the last four years, the total stocks of corn for grain have been close to the 2009 record high. Commercial stocks of corn for grain rose 226 000 tonnes to 1.8 million tonnes, a 14.3% increase.

Note: The March Farm Survey of 12,600 Canadian farmers is a survey of stocks of principal field crops

conducted from March 24 to March 31, 2011. Farmers were asked to report the amounts of grain, oilseeds and special crops in on-farm storage. Data on commercial stocks of western major crops originate from the Canadian Grain Commission. Commercial stocks of corn and soybeans are estimated by a Statistics Canada sample of grain elevators in Eastern Canada. Data on commercial stocks of special crops originate from a survey of handlers and agents of special crops.

National supply-disposition tables for the major grains and special crops are included in this report and will be included in future production and stock reports. Methodology details are published annually in the October issue of *Cereals and Oilseeds Review* (22-007-X, free).

Stocks data are subject to revision during the two years following their initial publication. Revisions are published in the July stocks report, which is released in September.

Crude oil and natural gas: Supply and disposition

February 2011 (preliminary)

Domestic production of crude oil and equivalent hydrocarbons totalled 13.8 million cubic metres in February, up 8.4% from the same month a year earlier.

Crude oil exports rose 22.1% between February 2010 and February 2011. About 73% of Canada's total domestic production went to the export market in February.

Marketable natural gas production totalled 12.7 billion cubic metres in February, up 5.8% from the same month a year earlier.

Domestic sales of natural gas increased 11.6% between February 2010 and February 2011, while natural gas exports rose 6.8%. Exports accounted for about 65% of marketable natural gas production in February.

From January to February, domestic production of crude oil and equivalent hydrocarbons declined 6.8%

while marketable production of natural gas was down 11.0%.

Note: Preliminary data are available on CANSIM at the national level to February 2011 inclusive. At the national and provincial level detailed information is available for crude oil (126-0001) up to September 2010 inclusive, and for natural gas (131-0001) up to December 2010 inclusive.

Available on CANSIM: tables 126-0001 and 131-0001.

Definitions, data sources and methods: survey number 2198.

Crude oil and natural gas: Supply and disposition (key indicators)

	February 2010	January 2011	February 2011 ^p	January to February 2011	February 2010 to February 2011
	thousands of cubic metres			% change	
Crude oil and equivalent hydrocarbons					
Supply ¹					
Production	12 702.6	14 764.8	13 764.5	-6.8	8.4
Imports ²	3 324.5	3 276.4	3 088.8	-5.7	-7.1
Disposition					
Refinery receipts ³	7 609.5	8 198.1	7 836.6	-4.4	3.0
Exports	8 278.3	10 759.4	10 105.4	-6.1	22.1
	millions of cubic metres			% change	
Natural gas					
Supply ⁴					
Marketable production ⁵	12 000.2	14 255.5	12 693.7	-11.0	5.8
Imports	1 917.0	3 097.3	2 938.2	-5.1	53.3
Disposition					
Domestic sales ⁶	8 067.5	9 741.6	9 005.3	-7.6	11.6
Exports	7 756.4	9 655.5	8 283.0	-14.2	6.8

^P preliminary

- Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.
- Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.
- Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.
- Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.
- Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.
- Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).

Natural gas liquids and liquefied petroleum gases

July to December 2010

Data on the supply and demand for natural gas liquids and liquefied petroleum gases are now available for July to December.

Available on CANSIM: table 132-0001.

Definitions, data sources and methods: survey number 7524.

How to order products

To order by phone, please refer to:

- The title
 - The catalogue number
 - The volume number
 - The issue number
 - Your credit card number.
- From Canada and the United States, call: **1-800-267-6677**
From other countries, call: **1-613-951-2800**
To fax your order, call: **1-877-287-4369**

To order by mail, write to: Statistics Canada, Finance, 6th floor, R.H. Coats Bldg., Ottawa, K1A 0T6.
Include a cheque or money order payable to **Receiver General of Canada/Publications**. Canadian customers add 5% GST and applicable PST.

To order by Internet, write to: infostats@statcan.gc.ca or download an electronic version by accessing Statistics Canada's website at www.statcan.gc.ca and browse by "Key resource" > "Publications."

Authorized agents and bookstores also carry Statistics Canada's catalogued publications.
