## Releases

## Wholesale trade

## April 2011

Wholesale sales edged down $0.1 \%$ to $\$ 46.8$ billion in April, following a $0.3 \%$ gain in March. After an upward trend in the second half of 2010, sales have remained relatively flat so far this year.

In volume terms, wholesale sales declined $0.3 \%$ in April.

## Wholesale sales edge down in April

## Mixed results among the subsectors

In April, gains in three of the seven subsectors were offset by declines in the four others, particularly in the miscellaneous and the building material and supplies subsectors.

The miscellaneous subsector accounted for the largest decline in April, with sales falling 3.6\%. All of the component industries declined, with agricultural supplies accounting for half of the drop. Poor weather and spring flooding in Canada and the United States may have contributed to lower sales of fertilizer and seeds in April. International merchandise trade data for

## Note to readers

All the data in this release are seasonally adjusted and in current dollars, unless otherwise noted.

Wholesale sales expressed in volume are calculated by deflating current dollar values using import and industry product price indexes. Since many of the goods sold by wholesalers are imported, fluctuations in the value of the Canadian dollar can have an important influence on the prices of goods bought and sold by wholesalers.

The wholesale sales series in chained (2002) dollars is a chained Fisher volume index with 2002 as the reference year.

April showed an $11 \%$ decline in exports of fertilizers and fertilizer materials.

The building material and supplies subsector (-1.3\%) posted its second consecutive decrease. Among the industries in this subsector, the lumber, millwork, hardware and other supplies industry declined the most. This coincided with a drop in construction activities in Canada and lower lumber exports to the United States.

The two other declines in April were in the motor vehicle and parts and the farm product subsectors.

The largest gain was in the personal and household goods subsector $(+1.8 \%)$, followed by the food, beverage and tobacco products subsector ( $+1.2 \%$ ). Most of the industries in these two subsectors posted increased sales.

Despite the increase in April, sales of personal and household goods have been relatively flat since the beginning of 2010. This reflects weak consumer spending on furniture, furnishings and household equipment and maintenance.

## Wholesale sales down in half of the provinces

Sales were down in five provinces in April.
In dollar terms, Alberta ( $-3.8 \%$ ) and Saskatchewan (-10.6\%) reported the largest sales declines in April. Lower sales in the agricultural supplies and the farm, lawn and garden machinery and equipment industries were the main contributors.

British Columbia ( $-0.9 \%$ ) registered its third consecutive decline in April.

Ontario, which accounts for about half of Canada's total wholesale sales, increased $0.9 \%$ in April. Sales in Quebec rose $1.7 \%$. The increases in these provinces were attributable to higher sales of personal and household goods and food, beverage and tobacco products.

## Inventories continue to rise

Inventories rose $1.8 \%$ to $\$ 56.1$ billion in April. This was the fourth consecutive increase for inventories.

In April, higher inventory levels were reported by wholesalers in 16 of the 25 industries, led by the farm, lawn, garden, machinery and equipment industries (+14.7\%).

The inventory-to-sales ratio increased from 1.18 in March to 1.20 in April.

The inventory-to-sales ratio is a measure of the time in months required to exhaust inventories if sales were to remain at their current level.

Inventories increase for the fourth consecutive month

# Canada's international investment position <br> \author{ First quarter 2011 

}

## Canada's net international indebtedness

 increased $\$ 13.5$ billion to $\$ 209.7$ billion at the end of the first quarter. This marked the eight consecutive quarter of decline in Canada's net international investment position. Canada's international liabilities were up $\$ 22.6$ billion on ongoing strong foreign investment in Canadian securities, in line with the current account deficit. Growth in international assets was constrained by the downward revaluation effect of the appreciation of the Canadian dollar in the quarter.The appreciation of the Canadian dollar accounted for a $\$ 19.8$ billion downward revaluation on foreign currency denominated international assets, partially offsetting the effect of Canadian investment abroad in the quarter. Foreign currency denominated liabilities were affected to a lesser extent, with a downward revaluation of $\$ 11.4$ billion. Over the quarter, the Canadian dollar appreciated $2.6 \%$ against the US dollar and $5.1 \%$ against the Japanese Yen, but depreciated $3.1 \%$ against the Euro and $0.3 \%$ against the British pound.

Canada's international investment position \$ billions

## Net direct investment position declines further

Canada's net foreign direct investment position declined further, down $\$ 8.4$ billion in the first quarter to

## Note to readers

Annual and quarterly data have been revised for the reference years 2008 to 2010, and are consistent with Balance of Payments data released May 30, 2011. This is in keeping with the general policy to revise national accounts statistics at the time of the first quarter data release. In general, the revisions reflect more current sources of information arising from annual surveys and administrative data.

## Definition

The international investment position presents the value and composition of Canada's assets and liabilities to the rest of the world. Canada's net international investment position is the difference between these foreign assets and liabilities. The excess of international liabilities over assets can be referred to as Canada's net foreign debt; the excess of international assets over liabilities can be referred to as Canada's net foreign assets. The valuation of the assets and liabilities in the international investment position are measured at book value, unless otherwise stated. Book value represents the value of assets and liabilities recorded in the books of the enterprise in which the investment is made.

## Currency valuation

The value of assets and liabilities denominated in foreign currency are converted to Canadian dollars at the end of each period for which a balance sheet is calculated. Most of Canada's foreign assets are denominated in foreign currencies while less than half of Canada's international liabilities are in foreign currencies. When the Canadian dollar is appreciating in value, the restatement of the value of these assets and liabilities in Canadian dollars lowers the recorded value. The opposite is true when the Canadian dollar is depreciating.
a net asset position of $\$ 46.7$ billion. Canadian direct investment flows abroad amounted to $\$ 13.1$ billion, but these were partly offset by the downward revaluation effect of an appreciating Canadian dollar. On the liability side, the level of foreign direct investment in Canada was up $\$ 10.0$ billion in the quarter on increased investment inflows from abroad.

## Net investment position on securities continues to weaken

Canada's net portfolio position also fell further in the first quarter to a net debt position of $\$ 352.1$ billion, led by strong foreign purchases of Canadian securities. Non-residents further increased their holdings of Canadian securities in the first quarter by $\$ 10.8$ billion, with investment split between Canadian bonds and equities. However, the revaluation effect on foreign currency denominated Canadian debt instruments moderated the increase. On the other side of the ledger, the value of Canadian holdings of foreign securities was down $\$ 4.6$ billion in the first quarter. This largely reflected a downward exchange rate revaluation of $\$ 5.5$ billion.

The net investment position on securities has been deteriorating since the global financial crisis. This reflected Canadian sales of foreign debt securities starting in the second half of 2007, and the strong foreign purchases of Canadian debt instruments that began in the fourth quarter of 2008. As a result, the net foreign debt position on portfolio investments in the first quarter reached levels last seen in the late 1990s.

## Increase in net foreign debt larger when securities are valued at market prices

Canada's net international investment position can also be calculated with tradable securities valued at market prices. By this measure, Canada's net foreign debt increased by $\$ 22.3$ billion to $\$ 206.2$ billion.

During the first quarter, Canadian equity markets posted stronger gains than foreign equity markets. In addition, non-resident acquisitions of Canadian stocks exceeded Canadian purchases of foreign stocks. As
a result, non-resident investor holdings of Canadian equities rose by $\$ 30.8$ billion, compared with an increase of $\$ 14.3$ billion in Canadian investor holdings of foreign equity assets.

## Travel between Canada and other countries

 April 2011Travel by Canadian residents abroad rose 4.0\% from March to 5.0 million trips in April. This advance was largely attributable to an increase in trips by Canadians to the United States.

The number of trips by Canadian residents to the United States rose $4.2 \%$ to 4.3 million trips in April. This was the highest monthly figure since March 1995.

Canadian residents took 2.4 million same-day car trips to the United States in April, up 3.9\% from March. Same-day car travel has been on an upward trend since September 2010.

Canadian residents took 1.8 million overnight trips to the United States in April, up 4.5\% from March. This advance was in large part attributable to an increase in overnight car travel, which rose $6.4 \%$ to 1.1 million trips. Overnight plane travel rose $2.2 \%$ from March to 622,000 trips in April.

Travel by Canadian residents to overseas countries reached 766,000 trips in April, up 3.1\% from March.

In the other direction, the number of trips by overseas residents to Canada was up $0.8 \%$ to 1.9 million in April.

The number of trips taken by American residents to Canada increased $0.6 \%$ in April to 1.6 million.

Same-day car travel by American residents to Canada increased 1.5\% from March to 556,000 trips. This was the first monthly increase since August 2010.

In addition, overnight car travel rose 2.5\% from March to 545,000 trips in April. Overnight plane travel declined $3.6 \%$ to 284,000 trips.

The number of trips by overseas residents increased $1.9 \%$ to 369,000 in April. The number of trips taken by residents of Japan rebounded 27.3\% in April following a $26.7 \%$ decline in March. Travel by residents of South Korea increased 15.2\% while the number of trips by Mexican residents to Canada declined 14.3\%.

Note: Monthly data are seasonally adjusted. All seasonally adjusted data have been revised back to January 2010. Revisions have been made to some non-seasonally adjusted series for each month of the third and fourth quarters of 2010.

NEXUS travel data (for both land and sea) are not included.

## Available on CANSIM: tables 427-0001 to 427-0006.

Definitions, data sources and methods: survey number 5005.

$r$ revised
p preliminary

1. Percentage change is based on unrounded data.
2. Totals exceed the sum of "same-day car trips" and "total trips, one or more nights" because they include all of the same-day trips.
3. Estimates for the United States include counts of cars and buses, and estimated numbers for planes, trains, boats and other methods.
4. Figures for other countries exclude same-day entries by land only, via the United States.
5. Includes same-day and overnight trips.

Monthly Survey of Large Retailers
April 2011
Data for the Monthly Survey of Large Retailers are now available for April.

Available on CANSIM: table 080-0009.
