Crude oil and natural gas: Supply and disposition, June 2012

Domestic production of crude oil and equivalent hydrocarbons increased 15.7% to 15.4 million cubic metres in June from June 2011.

During the same period, crude oil exports rose 15.6%.

Marketable natural gas production declined 4.7% to 10.7 billion cubic metres.

Domestic sales of natural gas increased 4.4% while natural gas exports rose 4.4%.

From May to June, domestic production of crude oil and equivalent hydrocarbons declined 2.9%.

Note to readers

Data are available on CANSIM at the national level to June 2012 inclusive. At the national and provincial level, detailed information is available for crude oil (126-0001) up to December 2011 inclusive, and for natural gas (131-0001) up to March 2012 inclusive.

^P preliminary

1. Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.

2. Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.

3. Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.

4. Exports may include some volumes that are not included in the supply, such as imports used for re-export and diluents that are blended in exports.

5. Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.

6. Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.

7. Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).

Available without charge in CANSIM: tables 126-0001 and 131-0001.

Definitions, data sources and methods: survey number 2198.
