### Commercial Software Price Index, June 2013

The Commercial Software Price Index (CSPI) was up 0.4% in June compared with the previous month. This was the first increase after three consecutive monthly decreases for the index.

Year over year, the CSPI was down 0.5%. This was the second consecutive annual decrease for the index.

#### **Note to readers**

*The Commercial Software Price Index is a monthly series measuring the change in the purchase price of pre-packaged software typically bought by businesses and governments. This release presents data that are not seasonally adjusted, and the indexes published are subject to a six-month revision period after dissemination of a given month's data.*

*This index is available at the Canada level only.*

**Available in CANSIM: table 331-0009.**

**Definitions, data sources and methods: survey number 5068.**

The Commercial Software Price Index for July will be released on August 30.
