### Aircraft movement statistics: Major airports, January 2014

Aircraft take-offs and landings at Canadian airports with NAV CANADA air traffic control towers and flight service stations decreased 4.0% in January from the same month a year earlier. These 92 airports reported 345,089 movements in January compared with 359,485 movements at 93 airports in January 2013. The decline was partially attributable to the extreme cold this January and, since December 2013, to the closing of Edmonton City Centre Airport in November 2013.

On January 7, 2014, Toronto/Lester B. Pearson International Airport experienced a ground stop for approximately eight hours caused by the deep freeze. This contributed to a 3.8% decline in the number of movements compared with January 2013.

#### **Note to readers**

*Data for January 2013 have been revised.*

**Available in CANSIM: tables 401-0007 to 401-0020.**

**Definitions, data sources and methods: survey number 2715.**

A [data table](#) with summary information on airports with NAV CANADA air traffic control towers is available from the *Browse by key resource* module of our website under *Summary tables*.
