# DBS Weekly 

Friday, August 23, 1968

External Trade: Canadian exports to the United Kingdom deciined by $9.6 \%$ in July to $\$ 82.3$ million from $\$ 91.0$ million in July 1967. Exports to the United States, on the other hand, rose by $20.8 \%$ to $\$ 721.0 \mathrm{mll1ion}$ from $\$ 597.1 \mathrm{million}$. (page 2)

Prices: The investors price index ( $1956=100$ ), with 114 stocks priced, stood at 181.3 on August 15, 1968, at 180.3 on August 8, and at 183.4 on July 18. (page 3)

Investment: Capital spending plans of all sectors of the Canadian economy are expected to reach $\$ 16.0$ billion in 1968. This figure exceeds the $\$ 15.2$ billion spent in 1967 by almost $6 \%$ and indicates a further increase over the $\$ 15.8$ billion of planned capital outlays reported at the beginning of 1968. (page 5)

Labour: Total labour income was estimated at $\$ 2,821.7 \mathrm{million}$ in April and $\$ 2,902.7$ million in May. Seasonally-adjusted, wages and salaries were $\$ 39.7 \mathrm{mll}-$ 110n ( $1.5 \%$ ) higher in April than in March.
(page 12)
Merchandising: Department store sales increased $10.9 \%$ to $\$ 185,837,000$ from $\$ 167,508,000$ in May 1967. The largest increase occurred in toys and games (24.7\%).
(page 14)
Manufacturing: Preliminary figures show that the July production of motor vehicles came to 64,253 units compared to 44,271 in the 1967 month.
(page 15)
Tobacco: Opening inventory of cigarettes for July numbered $4,169,226,000$, and total production came to $2,980,124,000$. (page 20)

Food and Agriculture: The total number of hogs on farms in Canada (excluding Newfoundland), at June 1 is estimated at $5,682,000$, down $5 \%$ from $6,012,000$ on June 1, 1967. In the East and West numbers are down by $6 \%$ and $5 \%$ respectively from the corresponding period a year earlier.
(page 21)
Vital Statistics: In June, a total of 28,459 births were registered in provincial offices compared with 31,030 in June last year. The cumulative total for the first half of 1968 was $4.5 \%$ lower than in the corresponding period of 1967 with increases reported in three provinces.
(page 21)
Census: Canada's estimated population at June 1 was $20,744,000$. This shows an increase of 339,000 or $1.7 \%$ over the June 1, 1967 estimate of $20,405,000$ and an 1ncrease 729,000 or $3.6 \%$ over the June 1, 1966 Census count.
(page 22)

$\rightarrow$ NOTES 1. Preliminary totals for Canadian Trade are understated because of the postal strike. Complete figures W11 be compiled and published in the monthly report Trade of Canada, Imports by Comodities on or about September 20th.
2. Data for 1967 reflect adjustments made in import statistics to correct distortions caused by disruptions in document receipts.
2. Preliminary Statement of Total Canadian Exports ${ }^{1}$ - July 1968
(Domestic Exports plus Re-Exports)

5. Private and Public Investment in Canada, Out look. Mid-year Review. 1968

Capital spending plans of all sectors of the Canadian economy, as revealed in a recent Dominion Bureau of Statistics survey, are expected to reach $\$ 16.0$ bililon in 1968 . This figure exceeds the $\$ 15.2$ billion spent in 1967 by almost $6 \%$ and indicates a further increase over the $\$ 15.8$ billion of planned capital outlays reported at the beginning of 1968 .

The estimates given here are comparable with those published in the April report "Private and Public Investment in Canada - Outlook 1968 " and are the results of the survey conducted in May and June covering business establishments, institutions and all levels of government. Respondents were asked to revise only their estimates of capital spending during 1968 and therefore the figures shown here for repair expenditures are the same as those appearing in the earlier report. Data for each province are also being compiled and are expected to be published early in September.

The present estimates reflect a slight downward adjustment in expenditures for non-residential construction but additions were made to earlier estimates for housing and for new machinery and equipment. Spending on all new construction is now expected to total $\$ 10,255$ million in 1968 , or about $8 \%$ above that of 1967 and a fraction of $1 \%$ above the earlier 1968 estimates. Plans for purchases of new machinery and equipment, at $\$ 5,783 \mathrm{million}$, have also been revised upwards by $3 \%$ with the result that a marginal decline shown at the beginning of the year has been changed to an increase of $2 \%$ over 1967 .

The strengthening in investment plans has occurred in both the business sector and in housing, with social capital showing some decline from the earlier estimates for 1968. Businessmen are now expected to increase their spending in 1968 by about $3 \%$, whereas a decline of a little over $1 \%$ was estimated at the first of the year. The largest upward adjustment in business investment plans has occurred in the resource based forest and mineral group of industries. While expanded plans were reported in wood products, paper and primary metals, a major part of the gain can be attributed to the confirmation of starts on large mining developments not included in the first statements of intentions. In manufacturing, generally, outlays are still expected to be lower than in 1967 but the magnitude of the decrease is now reduced to $2 \%$ compared with $7 \%$ expected earlier in 1968 . Utilities have also registered additions to earlier plans for a resultant total of $7 \%$ above 1967. Outlays by the trade, finance and commercial group show more strength at mid-year for an increase of $2 \%$ over 1967 instead of a small decline reported at the beginning of this year.

The 1968 total for housing and social capital is now showing an increase of $12 \%$ over 1967 as a result of a further gain at mid-year of $3 \%$ in housing and a $7 \%$ decrease in soclal capital. Government spending plans have been revised only slightly and remein at a total which is $9 \%$ above the 1967 estimate. Plans by institutions are now at a level $15 \%$ higher than 1967 but significantly lower than the earlier expectations for 1968.

"Estimates for repair expenditures in past yoars showed relatively little change betwepn thes ariminal forecast :artey and the mid-year forecast survey. As a result ristablishments included in the mid-year sample survey were not asked tor rexamine their original estimates of ropair expenditures. Therefore the estimatrs for repair expenditures are as reportod in the eardler survey at the heginning of the year.

${ }^{1}$ Not surveved on mid-year revion. Spe footnote, Table 1.
${ }^{2}$ Original forecast.
${ }^{1}$ Revised forecast - Capital expenditures.

- Includes natural gas processing plants and contract drilling for petroleum and gas.
-Includes asbestos. gypsum. salt. miscellancous non-melal (including potash) and quarryink.

- See footnote 4. Table 5.
, Includes services to business management, recreational services other than motion picture theatres, personal servicus other than hotels, laundrles and cleaners and miscellaneous services such as trade and exhibition associations, Estimates are also included for commercial vehicles not covered by the other sector tables.
- Not surveyed on mid-year peview.

6. Estimates of Labour Income Total labour income was estimated at $\$ 2,821.7$ million in April and $\$ 2,902.7$ million in May.

Seasonally-adfusted, wages and salaries were $\$ 39.7 \mathrm{million}(1.5 \%$ ) higher in April than in March. The largest variation was an increase of $\$ 22.3$ million ( $3.1 \%$ ) in manufacturing, largely attributed to the cessation of labour disputes in the motor vehicle industry. All other industry groups increased moderately except forestry, public utilities and transportation, storage and communications which decreased slightly.

During May, wages and salaries (seasonally-adjusted) increased by $\$ 28.0$ million (1.0\%). Increases were recorded in all industrial divisions except mining and transportation, storage and communication where small declines were recorded.

[^2]Civilian amployment within the public service totalled 369.4 thousand at the end of December 1967, according to an advance release that will be contained in the December issue of the Dominion Bureau of Statistics report, "Federal Government Employment".

Total payrolls for the last three months of the year smounted to $\$ 584.3$ million, opposed to $\$ 597.4$ million for the period July to September. Cumulative payrolls for 1967 amounted to $\$ 2,305 \mathrm{mfllion}$, compared to $\$ 2,048$ million for 1966 .

In the agency and proprietary corporations and other agencies group, employment decreased to 138.7 thousand at the end of December from 159.1 thousand in September. Total payrolls for the period October-December amounted to $\$ 247.0 \mathrm{mfl11} \mathrm{on}, 5.3 \%$ below the previous three months. Cumulative payrolls for the year came to $\$ 985$ million, compared to $\$ 856.8$ million for 1966.

Staff strength of the departments and departmental corporations was 230.7 thousand at the end of December, a decrease of $2.3 \%$ from the September figure of 236.1 thousand. Total payrolls for the three month perlod amounted to $\$ 337.2$ m1111on, a slight decrease ( $0.2 \%$ ) over the July-September payroll.

Payrolls for the 1967 calendar year amounted to $\$ 1,320 \mathrm{mll1ion}, 10.8 \%$ greater than for 1966.
8. Corporations and Labour Unions Returns Act The Report for 1966, Part II (Labour Unions), of the Corporations
and Labour Unions Returns Act is being released today. It presents a statistical summary and analysis of the information contained in annual returns filed with the Dominion Statistician by labour organizations subject to Part II of the Act for fiscal years ending in 1966. It constitutes the Fifth Annual Report published under the Act.
9. The Labour Force The labour force increased by 165,000 to $8,323,000$ between June and July. This smaller-than-usual increase followed an unusually large influx of students into the labour market between May and June. Employment increased during the month by 189,000 to $7,952,000$. Unemployment decreased during this period by 24,000 to 371,000 .

Compared to a year ago, the labour force showed an increase of 198,000, or 2. $4 \%$. Employment was up by 111,000 and unemployment by 87,000 .

Employment Employment among persons 14 to 19 years of age increased by 204,000 between June and July which compared with average gains of 254,000 during the same period in the past five years. The smaller-than-usual advance during the month followed an unusually large increase between May and June.

As usual, employment among persons 20 years of age and over deciined during the month as many married women moved out of the labour force during the school holiday period.

About two-thirds ( 124,000 ) of the June-to-July increase in employment was in non-farm industries; farm employment increased by 65,000. Gains were recorded in trade $(45,000)$, construction $(34,000)$, transportation, communication and other utilities ( 19,000 ) and comunity, business and personal services ( 18,000 ). Employment in manufacturing, which in recent years has gone up between June and July, registered a decrease of 22,000 .

Compared with a year ago, non-farm employment in July 1968 was up by 137,000 . The largest gain took place in comminity, business and personal services $(89,000)$. Smaller gains were recorded in transportation, commnication and other utilities ( 34,000 ) and trade ( 22,000 ). Employment in manufacturing was lower than a year ago by 30,000 .

Year-to-year increases in employment were recorded in British Columbia (4.2\%), the Prairies ( $2.3 \%$ ) and Ontario ( $2.1 \%$ ). There was little change in the Atlantic region and in Quebec.

Unemployment Between June and July unemployment decreased by 24,000 to 371,000. This compares with an average June-July decrease of 7,000 during the past five years.

Of the total unemployed in July 123,000 , or $33 \%$, had been unemployed for less than one month. Some 147,000 , or $40 \%$, had been unemployed for one to three months, and some 101,000 , or $27 \%$, for four months or over.

Unemployment in July 1968 represented $4.5 \%$ of the labour force, compared with $3.5 \%$ in July 1967, and 3.1\% in July 1966 . The seasonally adjusted unemployment rate for July 1968 was $5.3 \%$.

MERCHANDISING
10. Department Store Sales During the week ended July 27, department store sales rose in Canada by $6.4 \%$ over the corresponding week last year, with regional changes as follows: Atlantic Provinces, $-0.9 \%$; Quebec, $-5.1 \%$; Ontario, $+8.0 \%$; Manitoba, $+10.6 \%$; Saskatchewan, $+18.5 \%$; Alberta, $+4.4 \%$ and British Columbia, $+8.7 \%$.

## 11. Department Store Sales and Stocks

Department store sales increased $10.9 \%$ to $\$ 185,837,000$ from $\$ 167,508,000$ in May 1967. The largest increase occurred in toys and games, (24.7\%). Only two departments reported decreased sales, of $30.7 \% \mathrm{in}$ furs and of $2.3 \% \mathrm{in} \mathrm{millinery}$. selling value were valued at $\$ 616,158$, the largest value occurring in the men's furnishings department $(\$ 41,426,000)$ and the smallest in milinery $(\$ 1,510)$.

For the January-May period, the value of sales increased by $9.8 \%$, with the largest increase reported in women's and girls' hosiery (23.5\%). Only three departments reported decreases: furs, $-12.0 \%$; plece goods, $-0.1 \%$ and 11 nens and domestics, $-0.2 \%$.
12. Restaurants Total restaurant recelpts during June decreased by $2.8 \%$ to $\$ 96,127,000$. Of this total $\$ 89,934,000$ were received by independent businesses and $\$ 6,193,000$ by chain establishments. During the six-month period, total receipts increased by $0.4 \%$ to $\$ 535,500,000$, with independent restaurants receiving $\$ 499,273,000$ and chain establishments $\$ 36,227,000$.
13. Sawnills East of the Rockies

Production in sawmills east of the Rockies in June fell to $290,922,000$ feet board measure from 298,968,000 feet boerd measure in June, 1967. For the six months to the end of June, production amounted to $1,578,518,000$ feet board measure compared to $1,537,075,000$ feet board measure during the same period last year. Stocks on hand at June 30 totalled 488,833,000 feet board measure.
14. Sawmilis in British Columbia June production of lumber and ties in sawmills in British Columbia came to 673.3 thousand feet board measure, compared to 670.3 thousand feet board measure in June 1967. Of this total, 329.4 thousand feet board measure were produced in coast mills (343.2 thousand in June 1967) and 343.9 thousand in interior milis ( 327.1 thousand). Production for the six months ended June totalled 3,793.5 thousand feet board measure, a decrease from the last year's period production of $3,847.5$ thousand. Coast mills accounted for 2,086:6 thousand feet board measure of the total ( $1,985.0$ thousand in 1967) while interior mills accounted for $1,707.1$ thousand ( $1,862.4$ thousand).

## 15. Plastic Bottles The periodicity and quantity were incorrectly stated in

 item 5 on plastic bottles in the Daily of August 14, 1968. The correct version reads as follows: Plastic bottles produced during the second quarter of 1968 numbered $70,639,000$, of which $53,256,000$ were shipped to outside customers. These shipments were valued free on board at the plant at $\$ 3,752,000$.16. Concrete Products June production of concrete brick, expressed in terms of from single brick equivalent decreased to $7,513,406$ bricks however, mem from $35,430,138$. Production of ready-mixed concrete in June rose to $1,372,516$ cubic yerds from $1,226,444$ in the 1967 month, and cumulative production rose to $6,022,252$ cubic yards from 5,131,457. (A11 1967 figures are revised).
17. Paints, Varnishes and Lacquers The value of June sales of paints, varnishes and lacquers amounted to $\$ 20,410,569$, compared to $\$ 20,554,225$ in June 1967. Value of sales for the six months ended June increased to $\$ 106,262,441$ from $\$ 102,079,813$ in the 1967 period.
18. Raw Hides, Skins and Finished Leather Stocks of raw hides and skins held by packers, dealers and tanners on June 30, with the revised June 30,1967 figures $1 \pi$ brackets, are as follows: cattle hides, 324,965 ( 330,107 ); calf and kip skins, $209,373(209,170)$; sheep and lamb skins, 23,861 dozen ( $41,610^{\circ}$ dozen); gost skins, 9,367 ( 4,491 ); horse hides, 7,666 ( 8,510 ); and all other hides and skins, 2,021 (803).
19. Refrigerators and Freezers Production of domestic refrigerators and freezers during June increased to 39,625 units from 26,922 in June 1967, while production for the six-month period came to $225,763(199,776)$. Total sales during June amounted to 37,903 units $(35,275)$, and during the JanuaryJune period came to $201,193(188,260)$.
20. Motor Vehicles Preliminary figures show that the July production of motor vehicles came to 64,253 units compared to 44,271 in the 1967 month. Of these, 22,831 were commercial vehicles ( 12,248 in 1967) and 41,422 were passenger automobiles ( 32,023 ). January-June production of motor vehicles totalled 664,209 ( 571,341 in 1967) of which 164,435 were commercial vehicles (144,949) and 499,774 were passenger automobiles $(426,392)$.
21. Iron Castings. Pipe and Fittings

Production of iron castings, pipe and fittings decreased to 79,862 tons in June from the 82,447 tons produced in June 1967. Shipments during the month aiso decreased to 52,743 tons from 64,182 in 1967. Cumulative production decreased to 484,732 tons from 505,926 tons in 1967 and tonnage shipped during this period dropped to 297,959 tons from 369,022 tons. (All 1967 figures are revised).
22. Steel Ingots Steel ingot production for the week ended August 17 totalled 203,431 tons, a decrease of $2.4 \%$ from the preceding week's total of 208,308 tons. The comparable week's total of 1967 was 189,539 tons. The index of production based on the average weekly output during 1957-1959 of 96, 108 equaliing 100 was 212 in the current week, 217 a week earlier and 197 one year ago.
23. Steel Ingots and Pig Iron June production of steel ingots came to 895,123 tons,
compared to 781,142 tons in June 1967 and 836,492
tons in June 1966. Production for the year to date came to $6,459,005$ tons (5,605,636 tons in 1967 and $5,961,519$ in 1966). Production of pig iron for June, at 733,042 tons represented an increase over both the 1967 and 1966 production of 614,289 tons and 607,346 tons respectively. Cumulative production stood at $4,994,436$ tons, $3,991,566$ tons and $4,316,600$ tons for 1968,1967 and 1966 respectively.

(1) Separate breakdown not avallable.
(2) Includes 3,419 tons exported for conversion and return.

29.

Salt Production of dry salt and salt content of brine came to 423,510 tons In June and to $2,597,462$ tons during the year to date. The quantity of dry salt and salt content of brine shipped or used by producers during June amounted to 359,308 tons and during the cumulative period to $2,551,884$ tons.
30. Hogs The total number of hogs on farms in Canada (1) at June 1, 1968 is est1mated at $5,682,000$, down $5 \%$ from $6,012,000$ at June 1, 1967. In the East and West numbers are down by $6 \%$ and $5 \%$ respectively from the corresponding period a year earlier. All provinces have decreased their hog inventories except Nova Scotia and New Brunswick.

The number of sows farrowed in the spring period of 1968 (December 1967 - May 1968) is estimated at 594,600 , down $2 \%$ from the 1967 spring farrowings. Farrowings are down in both the Eastern and Western regions although the Maritimes and Alberta had increased farrowings. Sows and gilts kept for breeding numbered 651,900, down by $3 \%$.

Reports from farmers indicate that fall farrowings could be 600,500 which, if realized, would be $2 \%$ below the 1967 fall farrowings. Indications are for lower farrowings both in the East (down 3\%) and the West (down 1\%). Exceptions are expected in Nova Scotia, New Brunswick and Alberta. Sows bred before June 1, and expected to farrow before September 1 , are estimated at 306,600 , down $2 \%$ from the estimate of 312,500 that farrowed in the third quarter of 1967 .

The report released today includes a tabulation of revised semi-annual estimates (as at June 1 and December 1) of pigs on farms between the Census years 1961 and 1966. Previously published estimates for the intercensal years were revised to conform with Census benchmarks.
(1) This figure does not include Newfoundland, which, according to the 1966 Census had 7,307 hogs on Census farms of which 1,385 were six months old or older.

VITALSTATISTICS
31. Vital Statistics In June, a total of 28,459 births were registered in the provincial offices compared with 31,030 in June last year. The cumulative total for the first half of 1968 was $4.5 \%$ lower than in the corresponding period of 1967 with increases reported in Newfoundland, Prince Edward Island and Saskatchewar.

There were 14,205 marriages in June, approximately the same as the 14,225 reported in June 1967. For the six-month period, marriages were $6.5 \%$ above the same period of last year, with decreases in Prince Edward Island, Nova Scotia and British Columbia.

The total number of deaths during June was 11,674 , compared with 12,436 in June last year. During the first six months, deaths were $5.5 \%$ above last year's total for the same period with increases in all provinces except Newfoundland and Nova Scotia.

CLESUS
32. Population by Census Tracts The firstfive of a series of twenty-eight Census Tract bulletins are being released today by the Census Division of the Dominion Bureau of Statistics. The bulletins give data from the 1966 Census on population, households and families by census tracts. Population characteristics include age, sex and marital status. Households are classified by number of persons and families; dwellings, by type and tenure; and families by age of head, number and ages of children, and type of family. The remaining reports in the series will be released within the next few weeks.
33. Estimated Population of Canada and Provinces Canada's estimated population at June 1, 1968 was $20,744,000$
according to a bulletin (Catalogue No. 91-201) released today by the Dominion Bureau of Statistics. This shows an increase of 339,000 , or $1.7 \%$, over the June 1 , 1967 estimate of $20,405,000$ and an increase of 729,000 , or $3.6 \%$ over the June 1 , 1966 Census count. The smaller increase over the census year 1967-68 (339,000) as compared with the increase in the census year 1966-67 (390,000) is falrly evenly divided among the four components of population growth; in the 1967-68 census year, the drop in births was about 10,000 , imigration wns also about 10,000 lower, deaths. had risen by about 8,000 and estimated emigration had increased by about 11,000.

Ontario continued to show the largest increase, 157,000 , or $2.2 \%$, with an estimated population of $7,306,000$ in 1968 as compared with $7,149,000$ in 1967. Although Ontario constitutes $35 \%$ of Caneda's total population, about $53 \%$ of the imigrants to Canada choose Ontario as their province of destination, and Ontario also gains from the interprovincial movements of Canadians, British Columbia with the second largest increase, 60,000 , and the largest percentage increase ( $3.3 \%$ ) hed an estimeted population of $2,007,000$ in 1968 , as compared to $1,947,000$ on June 1 , 1967. British Columbia continued to be the province attracting the largest number of interprovincial migrants. Quebec's population at June 1, 1968 was estimated at $5,927,000$, an increase of 59,000 , or $1.0 \%$, over $5,868,000$ on June 1,1967 . Alberta gained 36,000 in population over the 1967-68 Census year, increasing from 1,490,000 in 1967 to $1,526,000$ in 1968. Manitoba gained 8,000, rising from 963,000 in 1967 to 971,000 in 1968; Newfoundland rose from 500,000 in 1967 to 507,000 in 1968. The estimated population of New Brunswick increased by 4,000, from 620,000 in 1967 to 624,000 in 1968; Nova Scotia increased by 3,000, from 757,000 in 1967 to 760,000 in 1968; Saskatchewan increased by 2,000 from 958,000 to 960,000 over the year and Prince Edward Island increased by 1,000 to an estimated 110,000 at June 1,1968 .

The final census count of June 1,1966 was the starting point of these estimates. To these provincial counts were added the births and immigrations by census years while deaths and emigrations were subtracted. The interprovincial movement of population was calculated from data on movements of families in receipt of family allowances.
