Preliminary Statement of Canadian Trade, September 1970 - Advance information

The External Trade Division reports that preliminary September import figures indicate a record-breaking merchandise surplus of nearly \$2 billion for the first nine months of 1970.

Seasonally adjusted September imports showed a moderate increase over August but this did not offset the quarter to quarter decline registered since the end of 1969. Unadjusted imports at \$1,182 million reflected a decrease of 3.9% from September 1969, largely accounted for by a drop of 4% in imports from the United States to \$834 million, and declines in imports from the United Kingdom, European Economic Community and Commonwealth and Preferential Countries.

Imports from Japan at \$53 million were up nearly 6% from September 1969, and those from other countries at \$81 million were up by 20%.

The decline in imports was widespread with petroleum and coal products dropping almost 25%, motor vehicle engines and engine parts 18%, iron and steel fabricated shapes, 14%; metals in ores and concentrates, 36%; and non-ferrous metals and alloys almost 8%. In contrast, imports of organic and inorganic chemicals doubled, aircraft and parts were up by 20%, and crude petroleum by 13%.

Further information will be contained in the DBS publications Summary of Foreign Trade (65-001, 10¢/\$1.00), Summary of Exports (65-002, 20¢/\$2.00) and Summary of Imports (65-005, 20¢/\$2.00).

PRICES

Prices and Price Indexes (Industry Selling Price Indexes), September 1970 - Advance information

Industry selling price indexes (1961=100) were higher in September than in August for 30 manufacturing industries, lower for 23 and unchanged for 46.

Notable price increases occurred in the wood products group, particularly in the veneer and plywood mills industry; in the foods and beverages group; and in the rubber products group. Decreases of significance occurred within those industries influenced most by declines in the price of U.S. dollars in Canadian funds, notably the pulp and paper mills, and the smelting and refining industries.

The arithmetic average of the 99 industry indexes moved upwards slightly in September to 119.7 from 119.6 in August. The average increase for those industries showing higher price movements was 0.6%, while the comparable figure for those showing decreases was 0.5%.

Further information will be contained in the DBS publication Prices and Price Indexes (62-002, 40¢/\$4.00).

PRICES (concluded)

Prices and Price Indexes (General Wholesale Index), September 1970 - Advance information

The general wholesale index (1935-39=100) advanced slightly in September to 284.0 from the revised August index of 283.9. It was 0.2% higher than the September 1969 index of 283.4. Three of the eight major group indexes were higher, while five declined.

The vegetable products group index rose 0.6% in September to 237.5 from 236.2 as price increases for grains, and livestock and poultry feeds outweighed price decreases for potatoes. An advance of 0.3% to 225.3 from 224.6 in the chemical products group index reflected higher prices for soaps and detergents and organic chemicals. The non-metallic minerals products group index moved 0.2% higher to 214.8 from 214.4.

The animal products group index declined 0.3% to 320.6 from 321.6 on lower prices for cured meats, fishery products, and dressed fowl. Decreases of 0.2% or less occurred in four major group indexes; non-ferrous metals to 275.1 from 275.6; wood products to 372.5 from 372.8; textile products to 256.9 from 257.0 and iron products to 305.7 from 305.8.

Further information will be contained in the DBS publication Prices and Price Indexes (62-002, 40¢/\$4.00).

Weekly Railway Carloadings, Period ended October 21, 1970 - Published only in DBS Daily and Weekly

Loadings of revenue freight in Canada rose 12.0% to 86,475 cars during the week ended October 21, as compared with 77,209 cars in the comparable 1969 period. This increase was mainly attributable to Western carloadings which rose 29.5% to 36,981 cars, while loadings East of the Lakehead rose only 1.7% to 49,494.

Year-to-date loadings were up 6.8% to 3,118,843 cars from 2,921,218 cars in the same period of 1969. Western loadings were ahead 9.6% at 1,216,484 while Eastern cars totalled 1,902,359, up 5.0%.

* Revised

Further details will be contained in the DBS monthly publication Railway Carloadings (52-001, 20¢/\$2.00).

Railway Carloadings, September 1970 - Advance information

Railway carloadings increased to 330,707 cars in September 1970, 12.1% more than a year earlier. Tonnage loaded increased 17.8% to 18,758,613 tons. Tonnage received from United States connections eased 0.9% to 2,242,093 tons, leaving total traffic carried up 15.5% at 21,000,706 tons.

Commodities posting significant gains included "other grains", iron ore, copper-nickel ore, wheat, coal and iron and steel. Major declines occurred in loadings of passenger automobiles and pulpwood.

For the first nine months of 1970 carloads were up 6.9% while tonnage loaded rose 14.6%. Total freight carried, including receipts from U.S. connections, showed a rise of 12.8% to 174,428,744 tons in 1970.

Further information will be contained in the DBS publication Railway Carloadings (52-001, 20¢/\$2.00).

TRAVEL

Non-Resident Vehicles Entering Canada, September 1970 (66-002, 10¢/\$1.00)

A total of 1,219,578 vehicles registered in other countries entered Canada in September, 16.0% more than the 1,051,289 that entered in September 1969. Of these, 450,913 vehicles remained one or more nights, an increase of 28.2% above the 351,634 in September 1969. January-September total traffic increased by 4.6% to 10,426,439 vehicles from 9,969,941 in 1969, while 3,487,157 vehicles stayed one or more nights, up 9.0% from 3,199,843.

UNIVERSITIES INCOMES AND EXPENDITURES

Canadian Universities Incomes and Expenditures, 1968-69 - Advance information

Canadian universities spent \$311.7 million on fixed assets (land, buildings, equipment and contents) in the 1968-69 academic year. This was \$46.4 million (13.0%) less than in 1967-68. It was the first decline since 1954-55, and probably indicates a scarcity of funds for capital purposes.

Operating expenditures of \$888.1 million in 1968-69 were 20.3% higher than in the previous year, but the comparable increase was 27.5% in 1967-68, and 34.0% in 1966-67.

In spite of the levelling off of universities' total expenditures, they still increased faster than the Gross National Product. In 1968-69 they represented 1.55% of the GNP compared with 1.53% the previous year, and 1.03% five years previously.

Further information will be contained in the DBS publication Canadian Universities Income and Expenditures (81-212, 75¢)

VITAL STATISTICS

Vital Statistics, September 1970 (84-001, 10¢/\$1.00)

In September, 32,525 births were registered in provincial offices giving a rate of 18.5 per 1,000 population. The cumulative total for the nine months (278,463) was 0.5% lower than for the corresponding months of last year although half of the provinces reported increases.

The 13,013 deaths registered in September brought the total for the first three quarters of 1970 to 117,640, an increase of 1% over the same period of last year. The death rate for the month was 7.4 per 1,000 population.

A total of 21,905 marriages was recorded, giving a rate of 12.5 per 1,000 population. The total of 137,875 marriages for the January-September period was 1.5% higher than for the same months of 1969.

Statistical Report on the Operation of the Unemployment Insurance Act,
August 1970 (73-001, 20¢/\$2.00)

There were 106,000 claims for unemployment insurance during August, 42,000 (28%) fewer than in July but 19,000 (22%) more than in August 1969.

The 409,000 people claiming benefit as of August 31 were 30,000 (7%) fewer than on July 31. While male claimants decreased by 35,000, females increased by 4,500. In comparison with the end of August 1969, the number of claimants increased by 141,000 (53%).

Benefit payments totalled \$41.4 million in August 1970, \$43.9 million in July 1970 and \$27.7 million in August 1969. The average weekly benefit payments for these 3 months were \$34.66, \$35.07 and \$31.73 respectively.

CHEQUES

Cheques Cashed in Clearing Centres, August 1970 (61-001, 20¢/\$2.00)

During August, \$65,090 million worth of cheques were cashed by Canada's fifty clearing centres. This was an increase of 15.6% over August of 1969. Payments in the province of Quebec increased 18.8%, in the Prairie Provinces, 17.1%, in Ontario, 16.8% and in the Atlantic Provinces, 1.6%. In Toronto the increase was 20.6%, in Montreal, 17.2% and in Winnipeg, 8.6%.

INFORMATION SYSTEM FOR MUNICIPALITIES

A Financial Information System for Municipalities - Vol. 1, General Introduction (12-532, 50¢) - Vol. 2, The Classification Systems (12-533, 75¢)

This publication presents a plan to achieve standard classification of financial transactions in record-systems at all levels of government. It was developed through the Eighth Federal-Provincial Conference on Municipal Finance Statistics.

SOFT DRINKS

Monthly Production of Soft Drinks, September 1970 (32-001, 10¢/\$1.00)

Production of soft drinks reached 29,880,589 gallons during September, up from 27,068,653 gallons a year earlier.

MINING

Asbestos, September 1970 (26-001, 10¢/\$1.00)

Canadian manufacturers produced 160,331 tons of asbestos in September, up from 147,336 tons in September 1969. January-September production also rose to 1,165,473 tons from 1,092,692 in the 1969 period.

M E R C H A N D I S I N G

Department Store Sales by Regions, September 1970 (63-004, \$1 a year)

Canadian department store sales were 7.9% higher in September 1970 than in September 1969. In the Atlantic Provinces sales were up 20.4% and in Ontario 9.9%. The only declines occurred in Saskatchewan (3.9%) and Manitoba (0.2%).

New Motor Vehicle Sales, September 1970 - Advance information

Another sharp drop in new motor vehicle sales (20.7%) was recorded in September 1970 as compared with September 1969. The decline in 1970 unit-sales from corresponding months in 1969 had been running at about 6% from June to August.

In part, this decline may have been aggravated by the strike in the industry. Usually, sales increase considerably in September (by 32.5% in September 1969 over August). This year, a mere 10.2% increase was recorded.

In part, however, the decline may have been due to a general inability or disinclination to buy. Unit sales of overseas manufactured passenger cars showed a drop of 4.3% over a year ago. This was the first such decline recorded since March 1967. Due to a substantial increase in the unit price paid for these cars, (\$2,570 in September 1970, compared with \$2,343 in September 1969), dollar sales of overseas manufactured passenger cars still showed a 4.1% increase.

From January to September 1970, unit sales of North-American manufactured passenger cars had declined by 20.9% compared with the same period in 1969, while overseas car sales increased by 16.4%, so that the market share to-date of North American cars was 78.2%, as compared with 21.8% of that of overseas imports.

Further information will be contained in the DBS publication New Motor Vehicle Sales (63-007, 20¢/\$2.00).

E N E R G Y

Coal and Coke Statistics, August 1970 - Advance information

August coal production increased by 129.5% to 1,304,513 tons from the August 1969 production of 568,396 tons. Imports jumped to 2,025,588 tons from 1,628,634 tons a year earlier. Industrial consumers used 1,233,404 tons of coal and 497,789 tons of coke, an increase of 193,530 tons of coal and 241,329 tons of coke from last year.

Further information will be contained in the DBS publication Coal and Coke Statistics (45-002, 20¢/\$2.00).

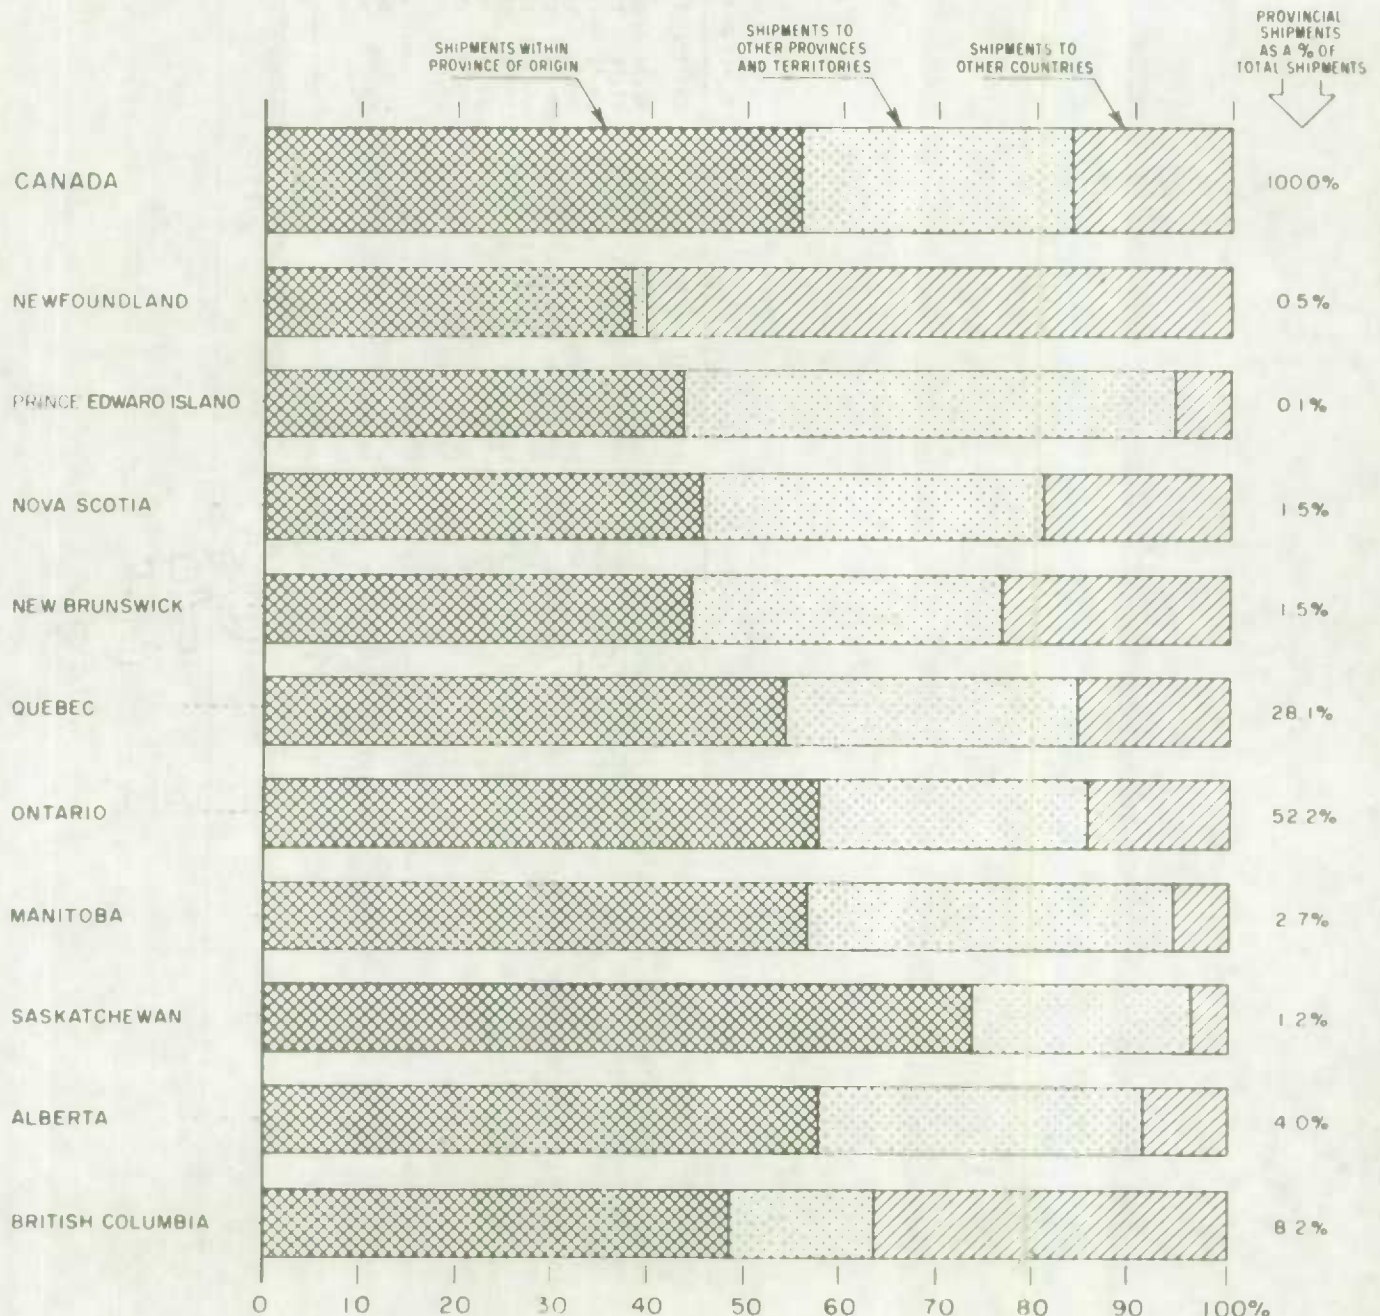

Distribution of Shipments of Manufacturers, 1967 - Advance Information

Canadian producers shipped 56% (by dollar value) of their products to destinations within their own province, 28% to destinations in other provinces, and 16% to foreign countries in 1967. This relationship has been established for the first time by a survey being completed by the Merchandising and Services Division.

The study of shipments from manufacturer-to-manufacturer and manufacturer-to-wholesaler adds a new dimension to comparisons of provincial economies. For example, Ontario's shipments (valued at \$20,025,876,000 and representing 52% of the national total) followed the national pattern very closely - 58% to destinations within the province, 28% to other provinces and 14% to foreign countries. Quebec's shipments (\$10,790,104,000 which was 28% of the national total) were also close - 54% within the province, 30% to other provinces, and 16% to foreign countries. But Newfoundland, with shipments valued at \$184,028,000 (0.5% of the national total) kept 38% of its shipments within its borders, sent 2% to other provinces, and exported 60%, while Saskatchewan (\$470,267,000 and 1.2%) kept 74% within the province, sent 22% to other provinces and exported only 4%.

Further information will be contained in the DBS publication *Destination of Shipments of Manufacturers* (31-504, \$2.00). (see tables on pages 3 and 4)

MANUFACTURING (concluded) - 16 -

Steel Ingots, Week ended October 31, 1970 - Advance information

Steel ingot production for the week ended October 31, totalled 234,630 tons, an increase of 4.6% from the preceding week's total of 224,287 tons. The comparable week's total in 1969 was 184,560 tons. The index of production based on the average weekly output during 1957-1959 of 96,108 tons equalling 100 was 244 in the current week, 233 a week earlier and 192 one year ago.

Particle Board, August 1970 (36-003, 10¢/\$1.00)

Canadian mills produced 11,759,000 square feet (5/8 inch basis) of particle board in August 1970, versus 11,891,000 in August 1969. This brought the January-through-August total to 130,314,000 square feet in 1970 compared with 114,580,000 in 1969.

Stoves and Furnaces, August 1970 - Advance information

	Total Canada sales	Exports number of units	Stocks at end of month

AGRICULTURE AND FOOD

Oils and Fats, September 1970 - Advance information

During September, retail sales (20 pounds and less) of these products were: margarine, 17,522,000 pounds compared to 16,763,000 in September 1969; shortening, baking and frying oils and fats, 4,987,000 pounds (4,828,000); and salad oil, 3,578,000 pounds (3,816,000).

Commercial sales (21-450 pounds) were: margarine, 706,000 pounds (versus 420,000 in September 1969); shortening, baking and frying oils and fats, 12,330,000 pounds (12,684,000) and salad oil, 1,540,000 pounds (1,095,000).

Further information will be contained in the DBS publication Oils and Fats (32-006, 20¢/\$2.00).

Production of Eggs, September 1970 (23-003, 10¢/\$1.00)

Canadian egg production rose by 4.6% to 38,619,000 dozen in September 1970 from 36,926,000 dozen in September 1969. The average number of layers was up 3.4% to 28,136,000 from 27,212,000 and the number of eggs per 100 layers increased 1.2% to 1,647 in September this year from 1,628 in September 1969. The farm price of eggs sold for market was down 20.0% to 32.3 cents per dozen compared with 40.4 cents per dozen a year earlier.
