Friday, Febiuary 13, 1970

Securities International transactions in outstanding securities during November resulted in a net inflow of $\$ 3.3 \mathrm{million}$, compared with a net inflow in October of $\$ 25.6$ million. Transactions in portfolio securities for the year to date have resulted in a net inflow of some $\$ 118$ million.

Prices The investors price index (1956=100) for the week ended January 29, 1970 was lower (195.0) than the week before (200.5).

Transportation Twenty-five common carrier railways operating in Canada loaded and received from U.S. rail connections $50,174,675$ tons of revenue feight during the third quarter of 1969 , down $11.1 \%$ from the same 1968 period.

Construction During December, the total number of dwelling units in Canada was $9,479,000$ and the value of residential and non-residential construction amounted to $\$ 366,847,000$.

Hospitals There were 1,423 hospitals with 210,589 rated beds, and 1,634 related institutions with 83,227 rated beds in operation at January 1,1970 .

Manufacturing Steel ingot production for the week ended February 7, 1970 totalled 237,069 tons, an increase of $4.1 \%$ from the preceding week's total of 236,183 tons.

Agriculture and Food The output of wheat flour in Canada during December amounted to $3,220,000$ hundredweight, a decrease of $1 \%$ from the November 1969 output of 3,268,000 hundredweight, but $11 \%$ over the December 1968 total of $2,891,000$ hundredweight.
1.

Sales and Purchases of Securities Between Canada and Other Countries

International transactions in outstanding securities during November resulted in a net inllow of $\$ 3.3$ million, compared with a net inflow in October of $\$ 25.6$ million. Following tabling of the federal government's White Paper on tax reform on November 7 , speculation had suggested that major changes would take place in the stock holdings of Canadian investors, as institutions and others increased the Canadian content of their portfolios. The White Paper acted as a stimulant to stock markets in Canada, the Toronto stock exchange experiencing the heaviest trading in value terms for a single day in its history on the first day of business following release of the White Paper. Returns from investment dealers and other financial intermediaries on international trading in outstanding securities during November indicated that the initial substitutions of foreign stocks by Canadian had not been of major proportions, however. The reduced inflow from transactions in outstanding securities was attributable less to an increase in repurchases of Canadian securities from abroad, than to a fall in sales of Canadian securities to non-residents. Trading during the month resulted in net sales of securities to the United Kingdom of $\$ 8.2 \mathrm{million}$ and net purchases of $\$ 4.7 \mathrm{million}$ and $\$ 0.2$ million from the United States and other countries respectively.

A net capital outflow of almost $\$ 2.0 \mathrm{milli}$ an arose from international trading in Canadian securities. In spite of the flurry of market activity following release of the tax White Paper,gross international transactions were less than in the previous month. Geographically, net purchases of Canadian securities of $\$ 8.2$ million resulted from trading with the United States, and net sales of $\$ 5.3$ million and $\$ 0.9$ million were made to the United Kingdom and other countries respectively.

There was a small disinvestment in foreign securities by Canadian investors, as trading in foreign securities produced net sales of $\$ 5.3 \mathrm{million}$, down from the $\$ 14.3$ million net inflow of the previous month. Gross trading was significantly lower than in October. Net inflows of $\$ 3.5 \mathrm{million}$ and $\$ 2.9$ million came from trading with the United States and the United Kingdom, while a net outflow of $\$ 1.1$ million occurred in trading with other countries.

Transactions in portfolio securities for the year to date have resulted in a net inflow of some $\$ 118$ million, of which $\$ 86 \mathrm{million}$ has come from net sales of Canadian securities and $\$ 32$ million from trading in foreign securities. Geographically, inflows of $\$ 28$ million, $\$ 29$ million, and $\$ 61$ million have come from the United States, United Kingdom and other countries respectively. By comparison, trading in outstanding securities during the same period in 1968 gave rise to a total net outflow of some $\$ 373 \mathrm{million}$, comprised geographically of outflows of $\$ 341 \mathrm{mlll}$ lion to the United States, $\$ 39$ million to the United Kingdom, and a net inflow of $\$ 7 \mathrm{mlllion}$ from trading with other countries.

3. Rallway Freight Traffic

Twenty-five common carrier rallways operating in Canada loaded and received from U.S. rail connectian $50,174,675$ tons of revenue freight during the thixd quarter of 1969, down 11.1 per cent from the same 1968 period, according to an advance release of data to be contained in the Third Quarter issue of the D.B.S. report, "Railway Freight Traffic'. Canadian loadings (including water imports) declined 12.7 per cent to $44,450,229$ tons and overhead freight (U.S. to U.S. through Canada) decreased 6.0 per cent to $2,881,726$ tons. Freight received from U.S. rail contiections destined to points in Canada increased 15.8 per cent to $2,842,720$ tons.

The table below presents a regional and commodity group breakdown of tonnages relating to the third quarter of 1969.

List of Canadian Hospitals and Related Institutions and Facilities

This publication contains a complete listing of the names and bed capacities of all hospitals, related institutions and facilities in operation in Canada as at January 1, 1970. Hospitals are listed alphabetically according to location and are further identified as to category (public, private and federal) type of service (general, chronic, convalescent, rehalilitation, children's, mental and tuberculosis) type of ownership and rated bed capacity.

Related institutions are listed in a comparable manner, and include infirmaries, rest homes, homes for the aged, blind or senile. Facilities providing out of hospital insured services according to the Hospital Insurance and Diagnostic Services Act are presented in a separate list and include Red Cross Blood Depots, provincial laboratories and cancer clinics.

Additional in this year's publication is a table identifying hospitals which closed during the year and those whose classification as to service has altered.

Summary tables included in the report show that there were 1,423 hospitals with 210,589 rated beds, and 1,634 related institutions with 83,227 rated beds in operation at January 1, 1970.

EDUCATION
6.

Schools for the Blind and Deaf
There were 141 instructors in schools for the blind in the year 1969-70, with an enrolment of 728 students. There were 5 pupils in the pre-school programme. A total of 578 instructors were employed in schools for the deaf, which had a total enrolment of 3,394 students, with 383 pre-school pupils.

SERVICES
7.

Restaurants In December, estimated restaurant receipts rose by $5.6 \%$ to a and independent value of $\$ 92,336,000$. Chain businesses received $\$ 7,738,000$ in Manitoba.

ENERGY
8. Electric Storage Batteries

November factory sales of electric storage batteries amounted to 112,171 for initial installation compared to 104,803 in November 1968, and 233,083 for replacement (257, 509).

For the year to date, sales came to $1,053,324$ for initial installation ( $1,083,113$ in the 1968 period) and to $2,350,481$ for replacement $(2,265,797)$.

Raw Hides, Skins and Finished Leather
Raw hides and skins held by packers, dealers and tanners at December 1969 numbered: cattle hides, 247,665 ; calf and kip skins, 149,422. December receipts of cattle hides numbered 168,146 and wettings amounted to 185,119. Production of upper leather totalled $6,529,836$ square feet.
10. Hardboard December shipments of hardboard amounted to $36,571,309$ square feet ( $1 / 8$ inch basis) compared to $44,446,614$ square feet in December 1968. For the year 1969, shipments totalled $578,566,471$ square feet (543,690, 243 in 1968).
11. Felts During the quarter ended December 31, shipments of woven and/or needled papermakers' felts and jackets were as follows: to Canadian mills, 461,926 pounds, valued at $\$ 3,586,552$; to foreign mills, 334,934 pounds ( $\$ 1,951,190$ ); to Canadian mills, of woven and/or needled felts used in asbestos pipe or sheet forming operations, 4,114 pounds $(\$ 23,085)$.
12. Rubber December production of rubber fell by $1.9 \%$ to $43,011,000$ pounds from 43,821,000 in December 1968. For the year 1969, production rose by $0.6 \%$ to $471,476,000$ pounds from $468,747,000$ in the year 1968 . December consumption of rubber was $11.5 \%$ higher in 1969 , standing at $41,675,000$ pounds compared to $37,360,000$. For the year, consumption rose by $16.4 \%$ to $432,368,000$ pounds from 371,476,000 in 1968.
13. Radios and Televisions Manufacturers' domestic sales of radio receiving sets came to 119,776 in November and to $1,169,766$ during the year to date. November domestic sales of television receiving sets numbered 65,186 and during the eleven months ended November came to 560,515 .
14. Steel Ingots Steel ingot production for the week ended February 7, 1970 otalled 237,069 tons, an increase of $4.1 \%$ from the preceding week's total of 236,183 tons. The comparable week's total in 1969 was 216,804 tons. The index of production based on the average weekly output during 1457-1959 of 96, 108 equalling 100 was 247 in the current week, 246 a week earlier and 226 one year ago.
15. Floor Tile December production of vinyl-asbestos floor tile came to 4,739 tons or $10,226,880$ square feet compared to 6,699 tons or $14,995,829$ square feet in December 1968. For the year 1969, production totalled 87,647 tons ( $188,750,488$ square feet), compared to 85,599 tons ( $183,689,477$ square feet) in 1968.
16.

Footwear December production of footwear by shoe factories came to $3,360,372$ pairs compared to $3,751,523$ pairs in December 1968 . For the year 1969 production came to $49,045,001$ pairs (51,839,825 in 1968). Production of waterproof and canvas footwear amounted to $3,950,252$ pairs in December and to $4,356,449$ in December 1968. For the year 1969, production totalled $58,043,486$ pairs (61,799,057 in 1968). 17. Census of Manufactures The following statistics represent a selection of those which will appear later in regular publications of the Manufacturing and Primary Industries Division.

AGRICULTURE AND FOOD
18. Margarine, Shortening and Salad Oil During December, retail sales (20 pounds and less) of these products were as follows: margarine, $16,288,000$ pounds; shortening, baking and frying oils and fats, 3,990,000 pounds; and salad o11, 2,926,000. pounds. Commercial sales (21450 pounds) were as follows: margarine, 271,000 pounds; shortening, baking and frying oils and fats, $10,265,000$ pounds and salad oil, 811,000 pounds.
19.

Sugar Refined beet and cane sugar manufactured during Derember amounted to $551,346,000$ pounds compared to $486,543,000$ in December 1968. During the year $1969,2,538,270,000$ pounds were made ( $2,459,796,000$ in 1968).

Canadian supplies of feed grains were higher for barley, oats and corn in 1968-69 because production increased sharply, especially in barley, even thoagh opening stocks were lower than the previous year and about average. Total feed grain supplies were 24.1 million tons, compared with 21.4 million tons in 1967. Imports of corn were also higher by $6 \%$, at 944,000 tons. Domestic use of corn and barley increased but less oats were used. However, exports of barley fell by $36 \%$ to a low of 635,000 tons ( 26.4 million bushels).

Under the pressure of larger supplies of feed grains and wheat, in Canada, in other exporting countries and in importing areas, prices of feed grains fell considerably in 1968-69. Canadian Wheat Board asking prices of no. 1 feed barley in store at the Lakehead were reduced slowly from October 1968 , and have continued to : decline during 1969, reaching $\$ 41$ per ton by mid-year. Similarly, the price of no. 1 feed oats has also been reduced to reach $\$ 38$ per ton. In the summer and fall of 1968 , corn prices in the U.S. and Canada fell to very low levels but rose sceadily during the winter. As corn supplies were reduced in the U.S. through the season. Ontario prices rose sharply to end the crop year at $\$ 55$ per ton, a rise of $40 \%$ from the low of $\$ 39$ per ton.
21.

Poultry Survey Estimates of the number of poultry on farms in Canada (1) at December 1, 1969 are based on farmers' replies to the semi-annual farm survey together with hatchery data available through the Canada Department of Agriculture. The semi-annual estimates of poultry numbers provide a basis for monthly estimates of the number of layers and egg production. Revised estimates of production for 1969 will appear in the January report "production of Fggs", catalogue number 23-003.

The total number of all poultry on farms in Canada(1) at December 1,1969 is estimated at 78.3 million birds, up $9.1 \%$ from the 71.7 million at December 1,1968 . The December 1, 1969 estimate includes $73,983,000$ hens and chickens; 3,878,000 turkeys; 151,800 geese and 253,500 ducks. The estimate of 74.0 million hens and chickens is $10.5 \%$ higher than the 66.0 million at December $1,1968$.

The number of turkeys on farms at December 1 was $11.2 \%$ lower than last year. Although the number of turkeys on farms increased in New Brunswick, Quebec and Britist Columbia, this was more than offset by decreases in the other provinces.
$\overline{(1)}$ Current estimates for Newfoundland are not available. The Census of June 1,1966 reports 422,524 head of poultry on farms. By class, the numbers reported were: hens and chickens, 417,836 ; turkeys, 3,264 ; geese, 966 ; ducks, 458.

## 22. <br> Grain Milling The output of wheat flour in Canada during December amount-

 ed to 3,220,000 hundredweight, a decrease of $1 \%$ from the November 1969 output of $3,268,000$ hundredweight, but $11 \%$ over the December 1968 cotal of $2,891,000$ hundredweight. The preliminary total of wheat flour produced turing the calendar year 1969 was $38,281,000$ hundredweight, $2 \%$ above the revised 1968 Lotal of $37,707,000$ hundredweight. Production of wheat flour during the first Eive months (August-December) of the 1969-70 crop year amounted to 16,693,000 hundredveight, $4 \%$ higher than the $16,033,000$ hundredweight produced during the same period of. the 1968-69 crop year, but $4 \%$ lower than the ten year August-December average. Mill operations during December 1969 averaged $73.8 \%$ of capacity when computed on a 26 -day working period in the month and a daily capacity of 168,000 hundredweight. Hills reporting for November 1969 operated at $81.2 \%$ of their combined rated capacily Eor 24 days.23. Cattle, Sheep, Horses Cattle Total cattle and calf numbers in Canada(1) at December 1, 1969 are $11,828,000$, up $3 \%$ Erom 21,475,000 al December 1,1968 but unchanged from the $1963-1967$ average. In the East numbers are unchanged due 10 a $4 \%$ increase in Quebec offsetting lower inventories in che other Eastern provinces. In the West the estimate is $6 \%$ above last year with increases noted in all provinces of that region.

Milk cows are estimated at $2,526,000$, down $2 \%$ from a year earlier. In the Thst numides are $1 \%$ lower. All provinces, except Quebec, have reduced inventories; in quebec milk cow numbers are up $1 \%$. In the West there is a $5 \%$ drop in numbers with a decrease in each of these provinces. Dairy heifers are unchanged from December 1 , 1968 with a $1 / 7$ rise in the East offsetting $6 \%$ lower numbers in the West.

Beef cows are estimated at $2,915,900$, which is $5 \%$ above the year earlier es:iaste with the East and West having 6 and $5 \%$ rises respectively. All provinces axcept Prince Edward Island and Nova Scotia have more beef cows. Beel heifers are up $1 \%$ with a $5 \%$ decrease in the East and a $4 \%$ higher estimate in the West. Steer numbers are estimated at $1,233,000$, up $2 \%$ from December 1,1968 .In the East they are astimated to be down $7 \%$ due largely to a $9 \%$ decline in numbers in Ontario. In the west beef heifers are up $11 \%$ with large increases of 21 and $18 \%$ in Manitoba and Saskatchewan respectively.

Sheep Sheep and lambs are estimated at 598,000 , down $1 \%$ from 602,000 at December 1,1968. Both in the East and in the West numbers are down by $1 \%$. The breeding flock of sheep one year old or older is estimated al 422,000.fraclionally above 1968. A $1 \%$ drop in the East is offset by a $3 \%$ rise in the West. The Prairie Provinces have larger breding flocks indicating a possible upturn in sheep numbers. The lemo ascimste 1337 balow the corresponding 1968 estimate.

Ho: ses These ave estimated at 341,100, up $1 \%$ from December 1, 1968. This tapcesency the first increase in horse numbers for December 1 since 1941 when the Iirst December horse estimates were made. The increase is due lo a $5 \%$ rise in the West with each province in that region having more horses. In the East the horse astimate is $4 \%$ below last year.
