External Trade The value of total exports increased to $\$ 1,3+0,064,000$ in March 1970 from $\$ 1,216,131,000$ and $\$ 1,028,467,000$ in the same month of 1969 and 1968 respectively.

Prices In 39 manufacturing industries, industry selling price indexes ( $1961=100$ ) were higher in March, 6 less than the 45 increases recorded in the January-February period.

Police Administration Statistics Actual strength of total police personel was 46,034 in 1969 , representing $97.9 \%$ of the total authorized sirength, and a $4.7 \%$ increase from 1968.

Vital Statistics Live births registered in provincial offices in March numbered 29,014 compared with 29,990 in March 1969.

Education During 1967-68, 121,632 students were enrolled in correspondence courses in Canada. The sources of correspondence study included provincial government departments, institutes of technology, universities, private trade and business schools, and business and professional associations.

Manufacturing Steel ingot production for the week ended May 2, 1970 totalled 214,379 tons, a decrease of $8.2 \%$ from the preceding week's total of 233,441 tons.

Agriculture and Food Canadian egg production rose by $4.4 \%$ to $42,815,000$ dozen in March 1970 from 41,027,000 in March 1969.

## E X T ERNAL TRADE

1. Total Exports The External Trade Division reports that the value of Total exports increased to $\$ 1,340,064,000$ in March 1970 from $\$ 1,216,131,000$ and $\$ 1,028,467,000$ in the same month of 1969 and 1968 respectively. For the cumulative period, January-March exports increased over the years, with the totals being $\$ 3,938,979,000$ in $1970, \$ 3,466,820,000$ last year and $\$ 3,021,533,000$ in 1968.

In 39 manufacturing industries, industry selling price indexes (1961=100) were
higher in March, 6 less than the 45 increases recorded in the January-February period Industry indexes which declined numbered 20 in March, 5 more than in february. of the 100 industries 41 were unchanged, 1 more than in the previous month.

The more notable changes in March included increases of $2-5 \%$ in the following industries: sugar refineries, asphalt roofing manufacturers, cordage and twine, copper and alloy rolling casting and extruding, and metal rolling, casting and extruding. Decreases were relatively insignificant with the exception of the vegetable oil mills and venner and plywood mills industries where declines of $2 \%$ were recorded

The arithmetic average of the 100 industry indexes was 119.5 in March, up slightly from 119.2 in February. The median also advanced to 118.9 from 118.6.

The following table summarizes February-March price movements by major industry group:

February to March Changes in Industry Indexes

(1) Not relevant.

## PRIC E S (continued)

3. 

General Wholesale Index
The general wholesale index (1935-39=100) moved up $0.1 \%$ in March to 289.5 from the February index of 289.1 and was $3.2 \%$ higher than the March 1969 index of 280.5 . Six of the eight major group indexes were higher, while two declined.

The non-ferrous metals products group index rose $1.2 \%$ in March to 294.5 from the Eebruary index of 291.1 on higher prices for copper and its products. A rise of $0.6 \%$ to 305.1 in the iron products group index reflected price increases for scrap iron and steel. The vegetable products group index moved up $0.3 \%$ to 238.7 from 237.9 on ligher prices for sugar and its products, vegetable oils and their products and raw tobacco. An advance of $0.3 \%$ in the textile products group index to 257.5 from 256.8 was attributable to price increases for raw cotton and cotton yarns. The nonmetallic mineral products group index rose $0.3 \%$ to 213.7 from 213.0 on higher prices recorded for crude oil. The chemical products group index moved slightly higher to 223.8 from 223.4

The wood products group index declined $0.5 \%$ in March to 378.1 from 380.1 in response to lower prices for fir. The animal products group index eased down $0.4 \%$ to 337.2 from 338.4 reflecting price decreases for cured meats, milk and its products, eggs and livestock.

The following table shows some of the more noteworthy changes:

Price Index Numbers of Comnodities and Services Used by Farmers
decrease of $0.5 \%$ to 357.8 in January from the August index of 359.7 and was $3.1 \%$ higher than the January 1969 index of 347.1 . The composite index exclusive of living component moved down $0.7 \%$ to 412.6 from 415.5 in the August-January period but was $3.5 \%$ above the January 1969 index of 398.7 .

The al1-Canada farm wage rate index decreased $3.4 \%$ to $1,012.4$ in January from the August index of $1,037.2$ but was $7.8 \%$ higher than the January 1969 figure of 939.5. The Eastern series moved up $1.0 \%$ to $1,037.2$ from the August index of $1,026.6$, while the Western series dropped $7.1 \%$ to 977.2 from $1,052.3$ during the same period.

The all-Canada price index of equipment and materials used by farmers moved $0.8 \%$ higher to 279.2 in January from the August index of 277.1 but was $1.0 \%$ above the January 1969 index of 276.3. Sub-group increases were $3.6 \%$ for farm machinery, $3.5 \%$ for compounded fertilizer, $3.1 \%$ for binder twine, $1.2 \%$ for gasoline, oil and grease, and $0.5 \%$ for hardware while decreases occurred for building materials, $2.9 \%$, feed, $1.4 \%$ and seed, $1.4 \%$. The all-Canada farm family living component dropped $0.1 \%$ to 275.6 in January from 275.9 in August.

C ENSUS
6.

The Impact of Immigration
on Canada's Population

In a Census monograph released today, post-war immigration is examined in its historical context, i.e., as a continuation of trends in the foreign-born population resulting from variations in the size as well as character of immigration throughout both pre-World War II and post-war periods. Growth and distribution in relation to Canada's population is illustrated by analysing the age and sex structure, ethnic composition and population mobility. The resemblance of native-born population and pre-war immigrants in relation to their demographic contribution is examined including adjustment at the individual as well as family level. Political identification and integration is covered at a very elementary level, by means of the citizenship status of post-war immigrants who had been resident in Canada for a sufficient period of time to attain eligibility.
7. Bulletin 4.1-11, Volume IV, 1961 Census The introductory report to Volume IV, Bulletin 4.1-11, catalogue num-er 98-511, is designed to complete the contents of this volume of the 1961 Census. The income, fertility and migration tables presented in Volume IV and already published in Bulletins $4.1-1$ to $4.1-10$ inclusive, are based on the data compiled from three questionnaires in the 1961 Census: Form 2A - the General Population Questionnaire designed to enumerate individuals in all households; Form 2B - the Housing Sample Questionnaire which was collected from every sample household, and Form 4 - the Population Sample Questionnaire which addressed questions on migration, fertility and income (in that order), to every person 15 years of age and over in a $20 \%$ sample of private households.

Although the questions designed to elicit the 1961 income, fertility and migration information were all included together on Form 4, it must be kept in mind that income, fertility and migration are three distinct subject-matter areas. The definitions required to delineate each area of data are quite different. Furthermore, the editing, processing, and weighting techniques used were different for each of income, fertility and migration. It is customary, therefore, to refer to the income sample, the fertility sample, and the migration sample.

C E N S US (concluded)
Bulletin 4.1-11, as the introductory report to Volume [V, includes the following: - A table of contents, i.e., complete lists of tables on income, fertility and migration which appear in Bulletins 4.1-1 to 4.1-10 inclusive; - Explanations of the general enumeration and processing methods used for form 2 A and form 4 , to obtain the sample income, fertility and migration data, and the individual processing adjustment and weighting techniques used in preparing these sample data; - Reconciliations of the sample estimates of income, fertility and migration obtained from the $20 \%$ sample counts, with total census counts; - Definitions and explanations of terms and concepts used in the tables of Volume IV. This includes general definitions which are mainly the same for all three samples, as well as specific definitions applying solely to the income, or the fertility, or the migration data; - Notes on talbles and errata, that is, explanations and corrections to the tables in Volume IV which are not included in the individual bulletins; - A tabular section containing detailed reconciliation tables, for Canada and the provinces, for fertility and migration. (The reconciliation tables for income are included in the main "text" on the income sauple).

Also included is an appendix which reproduces form 1 (the visitation record, from which the $20 \%$ population sample was selected), and form 2 A , form 2 B , and form 4, the 1961 Census questionnaires which provided the data for the tables published in Volume IV.

```
POLICE ADMINISTRATION
```

8. $\quad \frac{\text { Preliminary Police }}{\text { Administration Statistics }}$

Actual strength of total police personnel was 46,034 in 1969, representing $97.9 \%$ of the total authorized strength, and a $4.7 \%$ increase from 1968. All 3 categories of police personnel (police, cadets and other full-time employees) showed increases in authorized and actual strength from 1968. Considering police personnel separately, the strength at the national level remained the same as in 1968 , at 1.8 per 1,000 total population.

All types of police forces showed increases except the railways police; notably, the national harbours board police and security increased its actual strength by $21.9 \%$, and the Quebec provincial police by $10.3 \%$.

More detailed statistics may be obtained from the preliminary release on "Police Administration Statistics - 1969" which is available from the Judicial Division, Dominion Bureau of Statistics.

## UNEMPLOYMENTI NSURANCE

9. 

Unemployment Insurance
Claimants for unemployment insurance benefit numbered 694,400 on February 27, 1970, an increase of $5 \%$ over the 659,500 recorded at the end of January. On February 29, 1969 the claimant count was 631,000.

During February 1970 there were 201,000 initial and rentwal claims filed in local offices across Canada, in comparison with 266,000 in January and 169,000 one year ago.

The average number of beneficiaries per week during February 1970 was estimated at 549,100 versus 549,400 in January and 536,200 in February 1969. Benefit payments totalled $\$ 77.6$ million in February, $\$ 76.5$ million in January and $\$ 67.4$ aillion in February 1069.

VITALSTATISTICS
10. Vital Statistics Live births registered in provincial offices in March The cumulative total for the first quarter of 1970 was $2.2 \%$ lower than the corresponding period of last year. The birth rate for March was 16.1 per 1,000 population.

In March, a total of 8,706 marriages were filed in provincial offices giving a rate of 4.8 per 1,000 population. For the first quarter of 1970 , marriages exceeded the corresponding months of last year by $5.1 \%$ although three provinces reported decreases.

The 12,634 deaths registered during March brought the total number registered for the first quarter of 1970 to 41,824 , an increase of $2.2 \%$ over the corresponding months of 1969. The death rate for the month was 7.0.

## EDUCATION

11. Canadian Education Through Correspondence This is the third report of series. It indicates that during 1967-68, 121,632 students were enrolled in correspondence courses in Canada. The sources of correspondence study included provincial government departments, institutes of technology, universities, private trade and business schools, and business and professional associations.

Of the total number of students, $72 \%$ were enrolled in elementary and secondary academic courses and vocational courses provided by the correspondence school branches of the provincial departments of education. Courses offered by various business and professional associations, either through their own facilities or those of universities, accounted for $16 \%$ of the total. Enrolment in university degree credit courses by correspondence, on a downward trend since 1964-65, was 4.3\%. Institutes of technology and private trade and business schools accounted for the remainder.

An additional 16,000 students were reported by five American private correspondence schools having outlets in Canada.

The provincial government correspondence school branches reported an administrative staff of 155 , while the instructional staff numbered 424 with the majority being part-time. Of the 530 instructors reported by the universities, all but three were part-time.

(1) Subject to slight revision.
13. Estimates of Citizenship of University Teachers in Canadian Universities and Colleges, 1969-70

Information on the citizenship of full-time teaching staff of Canadian universities was made available to DBS for the first time in a recent survey covering salaries and qualifications of teachers in canadian universities and colleges. Citizenship data were provided for 14,925 of 20,850 in 61 reporting institutions; these were distributed as follows:

Citizenship of 14,925 Full-Time University Teaching Staff, 1969-70

|  | Canada | U.S.A. |  | U.K. | France |  | Others |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

It was found that the country in which the first degree was awarded is the same as stated citizenship for $79.4 \%$ of the Canadians, $77.8 \%$ of the Americans, $76.3 \%$ of the British, and $75.2 \%$ of the French.

An analysis of the 5,925 for whom citizenship information was not provided, revealed that 2,273 obtained their first degrees in Canada, 958 in the U.S.A., 492 in the U.K., 730 in other countries, and 1,398 not stated.

It is assumed that 2,273 is only $79.4 \%$ of the Canadians, thus 2,863 would represent $100 \%$ of all Canadians among the 5,925 . In the case of the Americans, 958 is $77.8 \%$ of 1,231 ; the British group becomes 645 , the French 98 , and the non-stated is reduced to 358. (These latter are added to the category labelled "other"). By adding the numbers arrived at by this method to those whose citizenship was reported, the following distribution results.

Estimate of Citizenship of 20,850 Full-Time Univer sity
Teaching Staff, 1969-70

|  | Canada | $\frac{\text { U.S.A. }}{3,379}$ | $\frac{\text { U.K. }}{2,099}$ |  | $\frac{\text { France }}{427}$ | $\frac{\text { Others }}{2,695}$ |
| :--- | ---: | ---: | :--- | ---: | :--- | :--- |

## ROADS AND STREETS

14. Road ans Street Mileage and Expenditure

The surfaced mileage of Canada's roads and streets rose to 385,952 miles in 1968 from 350,524 miles in 1964. Rigid and flexible paved mileage increased $18.0 \%$ to 104,523 from the 87,738 miles reported five years ago. Surfaced roads accounted for $73.5 \%$ of all roads and streets open to traffic by the end of 1968 . of the $73.5 \%$, paved surfaces made up $19.9 \%$, gravelled surfaces $53.6 \%$.

Expenditure on highways and rural roads, including bridges during 1968 was $\$ 1,331.0$ million, $0.5 \%$ lower than the 1967 total of $\$ 1,337.8$ million. Expenditures increased in all provinces except Prince Edward Island, Nova Scotia, New Brunswick and Alberta. Construction work accounted for $\$ 862.9 \mathrm{million}, 64.8 \%$ of the total $\$ 1,331.0$ million, whereas $\$ 892.5$ million was spent on this phase of road work in 1967. Maintenance expenditure increased to $\$ 382.7$ million from $\$ 363.6$ million reported for 1967 , a rise of $5.3 \%$.

In 1968 total expenditures on streets, sidewalks, bridges and ferries in urban areas aggregated $\$ 406.8$ miliion. Of this, $\$ 258.1$ million or $63.4 \%$ was spent on construction; maintenance accounted for $\$ 125.0$ million or $30.7 \%$; while the remaining $\$ 23.2$ million was spent on administration and general expenses. Expenditures showed increases in all provinces except Newfoundland, Prince Edward Island, Manitoba, Saskatchewan and Alberta.
15.

Restaurants

Estimated restaurant receipts in February increased by $2.8 \%$ over last February to reach a value of $\$ 88,775,000$. Chain restaurants received $\$ 8,816,000$, while independent businesses received $\$ 79,959,000$. The largest increase occurred in Newfoundland (28.7\%).

## C I G A R S

16. 

Cigars Preliminary figures indicate that production of cigars during March came to $47,821,000$; the opening inventory was $82,427,000$ and the closing inventory, 88,779,000. Sales were as follows: domestic, 40,177,000; ex-warehoused for ships' stores (including sales to embassies), 42,000 and exwarehoused for export, 1,250,000.

## ENERGY

17. 

Refined Petroleum Products
Production of refined petroleum products amounted to $36,018,600$ barrels in February, an increase of $3.5 \%$ over the same month last year. Detailed data will be contained in the February issue of Refined Petroleum Products, catalogue number 45-004.

MANUEACTURING
18.
Paints, Varnishes and Lacquers

February sales of paints, varnishes and lacquers amounted to a value of $\$ 15,315,797$ compared to $\$ 15,533,812$ in February 1969. ( $\$ 28,469,094$ ).

Year-to-date sales totalled $\$ 28,154,391$
19. Footwear February production of footwear by shoe factories came to 3,920,192 pairs compared to $4,480,796$ in February 1969. Year to date production came to $7,467,167$ compared to $8,689,086$ for 1969 . Production of waterproof, plastic and canvas footwear amounted to 820,524 in February this year and 879,904 in 1969. Year to date production was $1,446,259$ pairs in 1970 and 1,636,804 in 1969 .
20.

Vinyl-Asbestos Floor Tile
March production of vinyl-asbestos floor tile came to 7,061 tons or $15,058,242$ square feet compared to 7,606 tons or $19,021,680$ square feet in 1969.
21.

Soaps and Synthetic Detergents
Net domestic sales of bulk products in February with the corresponding 1969 figures in brackets were as follows: soaps, $1,402,894$ pounds $(1,836,541)$; synthetic detergents, $7,384,160$ pounds $(7,396,270)$; other washing and cleaning products, $2,394,864$ pounds $(2,739,149)$. Net domestic sales of household products in February with the corresponding 1969 figures in brackets were as follows: soaps, 5,131,422 pounds $(4,586,560)$; synthetic detergents, $30,677,739$ pounds $(27,674,308)$; other washing and cleaning products, $12,682,119$ pounds $(14,357,625)$.
22.

Hosiery and Knitting Mills
Shipments of goods of own manufacture in 1968 for selected segments of industry 2300 , hosiery and knitting mills, have been tabulated and are available on request from the Manufacturing and Primary Industries Division (992-2231). They are summarized as follows: sweaters: cardigans and pullovers, $1,818,116$ dozen valued at $\$ 84,103,607$; hosiery (excluding greige), $19,305,989$ dozen pairs $(\$ 96,925,829)$.
23.

Margarine, Shortening and Salad Oil During March, retail sales ( 20 pounds and less) of these products were as
follows: margarine, $16,716,000$ pounds; shortening, baking and frying oils and fats, $3,591,000$ pounds; and salad oil, 3,339,000 pounds. Commercial sales ( $21-450$ pounds) were as follows: margarine, 395,000 pounds; shortening, baking and frying oils and fats, $10,765,000$ pounds and salad oil, 1,416,000 pounds.

## MANUFACTURING (continued)

25. Phonograph Records and Pre-Recorded Tapes Phonograph records produced during February numbered $3,636,354$, while net sales for the same period amounted to $3,084,041$ valued free on board at the plant at $\$ 4,238,507$. For the year to date, production came to $6,879,661$ and shipments to $5,623,350$ valued at $\$ 7,417,416$.

Pre-recorded tapes produced during February numbered 361,581 , net sales for the same period amounted to 312,540 valued free on board at the plant at $\$ 1,342,513$. Similar data for the year to date are: production, 595,119 ; shipments, 522,657 , valued at $\$ 2,308,857$.
26. Steel Ingots Steel ingot production for the week ended May 2, 1970 totalled 214,379 tons, a decrease of $8.2 \%$ from the pieceding week's total of 233,441 tons. The comparable week's total in 1969 was 225,156 tons. The index of production based on the average weekly output during 1957-1959 of 96, 108 equalling 100 was 223 in the current week, 243 a week earlier and 234 one year ago.
27. Farm Implement and Equipment Sales Sales of farm implements and equipment ended February 28,1970 (including repair parts) in the period from the 1969 value of $\$ 25,601,000$. The above figures, was $\$ 8,804,000$ in 1970 and $\$ 8,819,000$ in 1969 . A total of 929 wheel type farm tractors were sold during the two months ended February as against 1,626 units in the same period in 1969 .
28. Hardboard Shipments of hardboard came to $41,202,351$ square feet ( $1 / 8$ inch basis) in March, compared to 48,908,500 in March 1969. For the year to date, shipments totalled $125,062,321$ square feet $(138,886,883)$.

## 29. Raw Hides, Skins and Finished leather Raw hides and skins held by

packers, dealers and Lanners at
March 31, 1970 numbered: cattle hides, 255,295; calf and kip skins,138,995. March receipts of cattle hides numbered 180,938 and weltings amounted to 182,403. production of upper leathir totalled $3,115,00^{\prime}$ square feet.

[^3]31. Coarse Grains Preliminary data available since July 1,1969 for the world's major feed grain exporters indicates that trade is off by about 1.2 million tons or nearly 7 percentage points. The respective totals for the periods indicated are 17.8 million tons in 1968 versus 16.6 million in 1969. It shound be noted that data for some countries are available for the July-December period whereas others are only for July-October. This account of the world feed grain situation has been taken from the world agricultural production and trade statistical report, published by the United States Department of Agriculture, Foreign Agricultural Service, under date of February 27, 1970.

Data recorded up to February 18,1970 indicate that deliveries of oats in Canada have amounted to 9.0 million bushels, $47 \%$ less that the 16.9 million at the same period a year ago while marketings of barley, at 67.3 million bushels, were $75 \%$ above the comparable 1968-69 figure of 38.5 million. In addition to oats and barley, farmers in the Prairie Provinces marketed 3.3 mllli on bushels of rye up to February 18 this year, compared with the 1.2 million delivered at the same time a year ago.
32. Egg Production Canadian egg production rose by $4.4 \%$ to $42,815,000$ dozen in March 1970 from 41,027,000 in March 1969. The average number of 1 ayers was up $3.5 \%$ to $28,176,000$ from $27,229,000$ and the number of eggs per 100 layers increased $0.8 \%$ to 1,823 in March this year from 1,808 in March 1969. Farm price of eggs sold for market was down $5.4 \%$ to 38.9 cents per dozen compared with 41.1 cents per dozen during the corresponding period in 1969.
33.

Sugar Refined beet and cane sugar manufactured in March amouned to $541,250,000$ pounds compared to $560,734,000$ pounds in March 1964. This brought the year-to-date total to $848,598,000$ pounds $(855,318,000$ in the same period last year).

## RELEASED THIS WEEK

Catalogue numbers and prices are shown following the titles, except in cases where items are published as advance information. The information will be included in regular DBS publication, which will be released at a later date.

1. Total Exports, March 1970
2. Industry Selling Price Indexes, March 1970
3. General Wholesale Index, March 1970
4. Security Price Indexes, Week ended April 30, 1970
