Sales and Purchases of Securities Between Canada and other Countries, February 1971 (67-002, 20¢/\$2).

As in January, the net inflow from trading in foreign securities exceeded the net outflow from trading in Canadian securities by almost \$7 million during February. The trading pattern was also similar to January's as net inflows of \$17 million from the United States, \$1 million from "Other Europe", and \$3 million from "Other Countries", were reduced by a net outflow of over \$14 million to the United Kingdom.

Net purchases of Canadian securities, at \$17 million, were lower than the corresponding outflow of \$28 million in January. The February outflow was almost evenly distributed between debt and equity issues in contrast to the January outflow which occurred primarily in equities. Gross trading was slightly higher in February than in the previous month but at \$150 million it was still relatively light. Net purchases of Canadian issues from United Kingdom residents, reached their highest level (\$15 million) since a series of net outflows to that country began in April 1970.

Trading in foreign securities resulted in a net inflow of \$24 million, compared with \$34 million in January. Net sales of United States equities were concurrent with a substantially larger increase in stock prices (as represented by the Standard and Poor's "500" and D.B.S. Investors' price indexes) in the United States than in Canada.

In the first two months of 1971, portfolio transactions in outstanding securities gave rise to net inflows of over \$12 million. Net inflows of \$31 million from the United States, \$2 million from "Other Europe", and over \$5 million from "Other Countries" were reduced by net outflows of \$26 million to the United Kingdom. By comparison, in the first two months of 1970 net inflows of \$96 million were made up of net inflows of \$88 million from the United States, over \$6 million from the United Kingdom, and \$3 million from other European countries, and a net outflow of \$1 million to all other countries.

P R I C E S

General Wholesale Index

The General Wholesale Index (1935-39=100) moved up 0.6% in April to 288.4 from the revised March index of 286.7. It was slightly lower than the April 1970 index of 288.5. Five of the eight major group indexes were higher while three declined.

The chemical products group index advanced 2.4% to 235.8 from 230.2 in March on higher prices for fertilizer materials and drugs and pharmaceuticals. A rise of 2.2% to 388.0 from 379.6 in the wood products group index resulted mainly from price increases for newsprint, cedar and fir. An increase of 1.2% to 263.5 from 260.3 in the non-ferrous metal products group index reflected higher prices for copper for copper and its products silver and zinc. The non-metallic mineral products group index moved up 0.9% to 225.7 from 223.6 on higher prices for petroleum products. The iron products group index advanced 0.5% to 314.1 from 312.5.

The textile products group index moved down 0.7% to 259.5 from 261.2 in response to lower prices for raw cotton. A decline of 0.3% to 319.7 from 320.8 in the animal products group index reflected price decreases for fishery products, cured meats and livestock. The vegetable products group index moved 0.3% lower to 240.2 from 240.9.

Prices and Price indexes, Industry Selling Price Indexes, April 1971 - Advance information.

Industry selling price indexes (1961=100) were higher in April than in March for 49 manufacturing industries, lower for 22 and unchanged for 29.

The petroleum and coal products index increased to 15.3 from 109.7, mainly due to higher prices in the petroleum refining industry. Advances in the paper and allied products index (to 118.4 from 116.2) and the wood products index (142.0 from 140.3) reflected higher prices in the pulp and paper mills and the sawmills industries. The primary metals index moved to 133.0 from 131.5 on price increases in the smelting and refining industry and in the iron and steel mills industry. A moderate decline (to 102.5 from 103.2) occurred in the chemical products index.

The arithmetic average of the 100 industry indexes increased in April to 121.9 from 121.3 in March. The average of the increases was 1.1% and of the decreases, 0.6%.

.. Figures not available.

Motor Vehicle Traffic Accidents, January 1971 - Advance information

An estimated 251 persons were killed in traffic accidents on Canadian streets and highways in January, 4 fewer than in January 1970. Some 12,360 victims were injured in 8,733 accidents, compared with 12,100 victims in 8,405 accidents a year earlier.

Quarterly information will be contained in the January issue of Motor Vehicle Traffic Accidents (53-001, 50¢/\$2.00).

Oil Pipe Line Transport, March 1971 - Advance information

Canadian oil pipe lines received 2,307,300 barrels per day of crude oil, condensate, pentanes plus and petroleum products in March. This was 7.0% more than the 2,155,600 B/D received a year earlier. Domestic oils increased 7.9% to 1,836,100 B/D, and imported oils 3.8% to 471,200.

For further information order the March issue of Oil Pipe Line Transport, (55-001, 20¢/\$2.00), or Energy Service Bulletin (57-002, \$5.00).

Weekly Railway Carloadings, Period ended May 7, 1971

Canadian railways loaded 4,534,674 tons of revenue freight during the 7-day period ended May 7, up 7.9% from the corresponding period of 1970. The number of cars loaded rose 5.8% to 82,203.

Year-to-date tonnage loaded declined by 1.0% to 65,001,925 tons; cars loaded by 2.4% to 1,246,879.

For further details order Railway Transport Service Bulletin, (Catalogue No. 52-004) and monthly Railway Carloadings, (52-001, 20¢/\$2).

Railway Operating Statistics, December 1970 - Advance information

Twenty-four common carrier railways in Canada reported operating revenues of \$139,248,359 in December 1970, down 1.1% from December 1969. Net operating income declined 26.2% to \$3,750,056.

Revenue freight carried rose 5.6% to 20,721,263 tons, while 2,154,885, revenue passengers were carried, 6.5% more than in 1969.

Further details will be contained in the December issue of Railway Operating Statistics (52-003, 10¢/\$1)

Estimates of Labour Income, 1st Quarter 1971 - Advance information

During the first quarter, total labour income, adjusted for seasonal fluctuations, increased 1.9 per cent to \$12,310.7 million. This is 0.5 percentage points less than the growth experienced during the fourth quarter but is comparable to the average quarterly growth for 1970.

In the goods-producing industries, wages and salaries increased 2.0 per cent to \$4,471.5 million, thereby continuing the pattern of accelerating growth which began in the third quarter of 1970. The quarterly gain was 0.8 percentage points higher than the average quarterly gain for 1970. In the service-producing industries, wages and salaries advanced 1.7 per cent to \$7,197.4 million. This was 1.2 percentage points lower than the increase recorded in the fourth quarter and 0.7 percentage points lower than the average quarterly gain for 1970.

The goods-producing industries accounted for about 40 per cent of the total quarterly gain in wages and salaries, compared to an annual contribution of about 30 per cent for 1970. A 3.0 per cent increase in manufacturing represented virtually all of this quarterly growth. However if the effect of retroactive payments and of wages and salaries lost by employees on strike in the fourth and the first quarters of 1970 and 1971 respectively, were removed, the gain in the first quarter would have been reduced to 1.0 per cent. Construction decreased 0.1 per cent but showed an upward trend in the last two months of the quarter. The primary industries, due to a 1.1 per cent decline in mining, decreased 0.2 per cent.

The service-producing industries accounted for about 60 per cent of the total quarterly growth in wages and salaries, compared to an annual contribution of over 70 per cent for 1970. The smallest gain was recorded in transportation, communications and other utilities, which increased 0.5 per cent. However, if the effect of retroactive payments and strikes were removed from the fourth and first quarter estimates, the first quarter gain would have been 2.1 per cent which is comparable to the average quarterly gain for 1970. Wages and salaries in trade rose 0.9 per cent with a 3.8 per cent gain in wholesale trade more than offsetting a 1.1 per cent decline in retail trade. This increase in trade is 2.1 percentage points lower than the gain for the fourth quarter of 1970. Finance increased 2.6 per cent which is comparable to the average quarterly gain for 1970. Commercial service rose 2.6 per cent while non-commercial, due to a 3.6 per cent increase in education, advanced 2.5 per cent. While commercial service was slightly higher than the average quarterly gain for 1970, non-commercial service was about 0.8 percentage points lower. Public administration and defence increased 1.7 per cent, but if the effect of retroactive payments were removed from the estimates, the gain would have been 3.7 per cent.

(see figures on page 10)

Further information will be contained in the next issue of Estimates of Labour Income (72-005, 20¢/\$2).

Statistical Report on the Operation of the Unemployment Insurance Act,
March 1971 (73-001, 20¢/\$2)

There were 222,000 initial and renewal claims for benefit filed in March. This was 8% more than the 206,000 filed in February and 9% more than the 203,000 filed in March 1970.

At 857,000 the number of claimants at the end of March was 4% less than 888,000 at the end of February but 22% more than the 705,000 registered on March 31, 1970.

Benefit payments totalled \$114 million in March, \$101 million in February and \$84 million in March 1970. The average weekly benefit payments for these 3 months were \$35.74, \$36.47 and \$35.36 respectively.

The Supplementary Unemployment Insurance Benefit of 10%, effective January 3, 1971, is not included in the benefit payment data.

E N E R G Y

Gas Utilities, March 1971 - Advance information

Canadian consumers purchased 105.6 billion cubic feet of natural gas in March 1971, up 9.2% from 96.6 billion a year earlier. Exports rose to 80.5 billion cubic feet from 67.9 billion.
