Summary of Exports, May 1971 - Advance information
May exports were estimated at $\$ 1,569 \mathrm{million}$ up $\$ 71 \mathrm{million}$ or $4.7 \%$ from a year earlier. Shipments to the United States increased by $\$ 104 \mathrm{million}$, or $10.7 \%$ to $\$ 1,075 \mathrm{million} \mathrm{Sales} \mathrm{rose} \mathrm{by} \$$.19 million in Latin American and "other" countries; stayed at the same level in the European Economic Community; and fell by $\$ 52$ million in the United Kingdom, other Commonwealth and preferential, and Japanese markets.

January-through-May export shipments were estimated at $\$ 7,090 \mathrm{mf1110n}$, up $\$ 165$ million or $2.4 \%$ from a year earlier. Higher sales (by $\$ 273$ million) to the United States exceeded losses of $\$ 120 \mathrm{million}$ in the United Kingdom, Other Commonwealth and Preferential countries and Japan.

Commodity information for May shows that automotive products, wheat, crude petroleum, and lumber gained significantly, but iron ore, nickel, and copper fell behind the high levele of 1970.

After adjustment for seasonal influences, total exports on a Trade of Ca nada basis rose to $\$ 1,463 \mathrm{million}$ in May, $\$ 68$ million more than in April.

For further information order the May issue of Summary of Exports ( $65-002$, $20 c / \$ 2.00$ )

Preliminary Statement of Canadian Trade, May 1971 - Advance infomation
Canada's merchandise trade surplus dropped by $16.3 \%$ from May 1970 to $\$ 180$ million in May 1971, with exports up $4.7 \%$ and imports up $8.2 \%$. However, the trade balance for the first five months dipped only $1.2 \%$ to $\$ 92 \mathrm{mill}$ ion from $\$ 1,004$ million in 1970.

Imports in May totalled $\$ 1,389$ million, up $\$ 106$ million or $8.2 \%$ from a year earlier. Shipments from the United States increased by $\$ 65 \mathrm{million}$ or $7.1 \%$ to $\$ 990$ million. Purchases were up by $\$ 17$ million from Japan, and by smaller amounts from all remaining countries except Other Commonwealth and Preferential, from which shipments were unchanged.

Cumulative imports for the first five months of 1971 reached $\$ 6,098 \mathrm{mil}-$ lion, up $\$ 177 \mathrm{million}$ or $3 \%$ from 1970 . Rising purchases of $\$ 74 \mathrm{million}$ from the United States, $\$ 37 \mathrm{million}$ from Japan, $\$ 21 \mathrm{million}$ from the European Economic Community, and $\$ 47$ million from "other" countries accounted for the change.

May imports of motor vehicles exceeded May levels of the post two years. The same was true for purchases of food, crude petroleum, petroleum and coal products, iron and steel and tractors. Aircraft deliveries diopped sharply from the high level of 1970.

Seasonally adjusted imports rose to $\$ 1,280 \mathrm{million}$ in May, $\$ 99$ million more than in April.

Prices and Price Indexes (Price indexes of Construction Machinery and Equipment, 1970) - Advance information.

A new base-weighted parice index $(1968=100)$ showed an increase of $1.9 \%$ in construction machinery and equipment prices in 1970. This compared with increased of $4.4 \%$ in 1969 and $5.6 \%$ in 1968.

Prices are manufacturers' selling prices adjusted as necessary for Federal Sales Tax. Equipment manufactured in the United States is represented in the index through prices obtained from U.S. manufacturers and from the U.S. Bureau of Labour, adjusted for exchange, duty and Federal Sales Tax.

Further information will be contained in the June and subsequent issues of Prices and Price Indexes (62-002, 40c/\$4).

Construction Price Indexes for Hydro-Electric Generating Stations, 1970 Advance information

The total index of hydro-electric generating station construction was $47 \%$ higher in 1970 than in 1961, according to a new set of construction indexes just released by the Prices Division. The indexes of interest during construction and of engineering and administration rose more than $60 \%$, but. electrical equipment rose only $19 \%$; mechanical equipment $29 \%$ and temporary construction camps about $39 \%$.

These base-weighted indexes, which will be released annually, can be used to convert expenditures in hydro-electric generating stations into the price levels of a particular year. The price sample relates in part to input prices for such things as labour and construction materials and in part to such things as equipment and construction materials in place. Bond interest and engineers' and technicians' salary changes are also included.

For further information, order Construction Price Indexes for Hydro-Electric Generating Stations ( $62-533,50 c$ ). Subscribers to the Energy Statistics Service Bulletin (57-002) and to Prices and Price Indexes will automatically receive copies. Additional basic wage rate indexes are available on request from the Prices Division, DBS, Ottawa 3.

## Consumer Price Movements, May 1971 - Advance information

The Consumer Price Index for Canada ( $1961=100$ ) advanced $0.4 \%$ to 132.7 in May from 132.2 in April. In May 1971 the index stood 2.4\% above its level of twelve months earlier and $2.2 \%$ above that of December 1970. All major components registered advances in the latest month. The Food index increased $0.8 \%$ reflecting higher prices for most food items. Both the Transportation and the Health and Personal Care components advanced $0.4 \%$, the former in response to higher automobile operation prices, the latter because of increased personal care prices. A $0.3 \%$ rise in the Clothing index was mainly attributable to higher prices for men's wear and piece gools, while increased beer prices were the main cause of a $0.5 \%$ advance in the Tobacco and Alcohol component. The Recreation and Reading index rose $0.2 \%$ and the Housing index edged up $0.1 \%$.

In the supplementary classification, the indexes for non-durable comodities excluding food and for services each advanced $0.3 \%$; the former mainly in response to higher prices for men's clothing, piece goods, toiletries, beer and toys; the latter mainly because of increased charges for men's haircuts, women's hairdressing, theatre admission and automobile insurance.

Consumer Price Index and Main Components (1961=100)

All items consumer price index converted to $1949=100$ is 171,4 .
a Component weights indicate the relative importance of item groups.
** Zncludes such items as new passenger cars, refrigerator, stoves, vacuum cleaner, sewing machine, television and radio set, furniture, tioor coverings, and dishes.

Motor Vehicle Traffic Accidents, March 1971 - Advance information
During the first quarter of 1971,673 fatalities were caused by motor vehicle traffic accidents on Canada's streets and highways. This was $3.9 \%$ less than the 701 deaths a year earlier. Fatalities decreased in Quebec (to 240 from 290), in Ontario (to 259 from 273), New Brunswick (to 27 from 37), and Alberta (to 60 from 64). They remained the same (2) in the Yukon and Northwest Territories. They increased in Prince Edward Island (to 5 from 4), British Columbia ( to 98 from 96), Nova Scotia (to 35 from 27), Manitoba (to 25 from 19), Newfoundland (to 16 from 9) and Saskatchewan (to 28 from 20).

The 269 deaths in March were $17.7 \%$ fewer than the 327 in March 1970.
For further information order March issue of Motor Vehicle Traffic Accidents (53-001, 50c/\$2.00).

(1) 1971 figures are not comparable with those of 1970 as most provinces increased their ainimu reporting levels to $\$ 200$. Only Quebec now has a $\$ 100$ ainimum.

Tuberculosis Statistics, 1970 - Advance information
Tuberculosis was the under lying cause of 521 Canadians in 1970, compared with 526 the previous year. New active cases declined to 3,920 (18.3 per 100,000 population) from 4,438 (21.1); reactivated cases to 620 from 680; and patients under treatment to 10,716 (49.7 per 100,000) from 12,573 (59.1). The only increase in national tuberculosis statistics was in the 10,191 persons receiving preventive outpatient drug treatment ( 47.3 per 100,000 ), up from 9,974 (46.9) in 1969.

## Inventories, Shipments and Orders in Manufacturing Industries, April 1971 - Advance information.

The preliminary estimate of the total value of April shipments by Canadian manufacturers, seasonally adjusted, was $\$ 3,879.0$ million. This was $1.9 \%$ more than the revised estimate for March. Shipments by durable goods producing industries increased $3.0 \%$ to $\$ 1,823.2$ million, and by non-durable goods producing industries, just under $1 \%$ to $\$ 2,055.8 \mathrm{million}$.

The seasonally adjusted total value of new orders received was
estimated to be $1.5 \%$ higher during April at $\$ 3,964.7$ million. The increase
was most marked in non-durable goods producing industries where the estimated value of $\$ 2,058.3$ million was up $2.3 \%$.

Unfilled ordersin all manufacturing were valued, seasonally adjusted, at $\$ 4,571.2$ million, an increase of $1.9 \%$. This total has increased each month since the end of last year. At $\$ 3,992.4 \mathrm{million}$, the estimated backlog of orders for durable goods producing industries had increased each month since November, 1970 , and was $\$ 320.8$ million or $8.7 \%$ higher than at that time.

The estimated $\$ 7,865.5$ million worth, seasonally adjusted, of inventory owned at the end of April, was slightly less than in March reflecting a $1.4 \%$ drop in the value of finished products held at the manufacturing plants. Estimated total values of goods in process and raw materials at the plants were slightly higher.

The ratio of total inventory owned to shipments decreased to 2.03 from 2.07 , and that of finished products to shipments to 0.74 from 0.76.

The estimated values of shipments by province, not adjusted for seasonal variation, increased for only two of the listed provinces, Newfoundland, $3.8 \%$, and Nova Scotia, $4.0 \%$. All other provinces showed decreases ranging from $5.3 \%$ in Alberta to $0.2 \%$ in Lritish Columbia.

Cumulative shipments for the first four months of 1971 , estimuted at $\$ 15,008.0$ million, were $1.9 \%$ higher than for the same period in 1970 with increases in six of the listed privinces varying between $5.7 \%$ in New Brunswick to $0.7 \%$ in Newfoundland.
