Standard Industrial Classification Information Bulletin No.1, January 1971 (no charge)

This news bulletin will be published semi-annually to bring users of the Standard Industrial Classification up to date on current developments in the field, corrections for errors discovered in the manual, changes in the classification and new rulings.

It can be obtained from Mr. D.H. Braun, Central Classification Staff, Statistics Canada, Ottawa K1A 0V7.

Consumer Price Movements, January 1972 — Advance information

The Consumer Price Index for Canada (1961=100) increased 0.3% to 136.7 in January from 136.3 in December, a rise close to the average increase recorded between these two months in recent years. The main contributors to the latest month's rise were food, which advanced 0.7% and housing, 0.5%. Other components that registered increases were transportation (0.6%), health and personal care (0.1%), and recreation and reading (0.1%). The only major component that declined was clothing, which fell seasonally 0.7%. The tobacco and alcohol index remained unchanged. In the twelve months since January 1971, the all-items index increased 4.9%.

Canadian Balance of International Payments, Fourth Quarter 1971 - Advance information

Advance estimates indicate that Canada's current account transactions, not adjusted for seasonal variations, produced a deficit of \$238 million in the fourth quarter of 1971. There was a \$417-million surplus on merchandise trade which was more than offset by a \$655-million deficit on non-merchandise transactions. Capital movements led to a net inflow of \$818 million. Current and capital account transactions in total therefore produced a \$580-million rise in Canada's official international reserves.

On a seasonally adjusted basis there was a sharp swing of \$207 million in the current account to a deficit of \$188 million in the fourth quarter of 1971. Total current account receipts increased by \$91 million to \$5,836 million but payments rose by \$298 million to \$6,024 million. The fourth quarter deficit continued the downward movement in the current account balance evident throughout 1971 and represented the first deficit since the fourth quarter of 1969.

With rising economic activity in Canada, the growth in merchandise imports outpaced that for exports so that the trade surplus dropped to \$417 million. Although seasonally adjusted data on a geographical and commodity basis are not yet available, it is expected that sales to the United States will have shown the largest increase; there was probably a moderate increase to Japan and some declines to other major markets. Commodities expected to have recorded strength on foreign markets are wheat, newsprint, crude petroleum and natural gas. On imports, there are indications that purchases from Japan may have shown the largest increase, to be followed by the United States and the United Kingdom. The principal commodities indicating increases are motor vehicle engines and parts, machinery, communication equipment, non-ferrous alloys, apparel and footwear, office machines including computers, and trucks.

The reduction in the merchandise surplus was further reinforced by a rise of over \$100 million in the seasonally adjusted deficit on non-merchandise transactions. This movement was mainly brought about by an increase of over \$90 million in net interest and dividend payments, due mainly to some large irregular distributions, and a rise of over \$20 million in net payments on "other service transactions". A partial offset resulted from a \$20 million reduction in the deficit on the travel account.

The current account deficit of \$238 million, unadjusted for seasonal variations, resulted from total current receipts of \$5,849 million and payments of \$6,087 million. Merchandise exports rose to \$4,695 million while imports went up to \$4,278 million. The merchandise trade surplus therefore amounted to \$417 million; the lowest quarterly surplus of the year.

Non-merchandise trade, unadjusted for seasonal variations, produced a deficit of \$655 million mainly on service transactions. Total non-merchandise receipts were \$1,154 million and payments \$1,809 million. The interest and dividend items recorded the largest deficit and accounted for about two-thirds of total net payments of about \$620 million on services. The deficit on transfers, including an amount of \$65 million for foreign aid, was \$42 million.

Capital account transactions produced a net inflow of \$818 million. Preliminary indications suggest that capital movements in long-term forms resulted in a net inflow of perhaps \$100 million so that the bulk of the inflow occurred in short-term forms.

Among capital movements in long-term forms, it appears that there was a sharp increase in direct investment in Canada which was, however, related to a capital restructuring of a major company. New issues of Canadian securities were probably in the \$250-million range and retirements about \$100 million. Trading in outstanding securities, both Canadian and foreign, suggest a small outflow. This was augmented by relatively larger purchases of new foreign security issues by Canadians reflecting the \$25-million issue placed on the Canadian market by the International Bank for Reconstruction and Development. Government loans and subscriptions, receipts under the Columbia River Treaty and export credits extended directly or indirectly at the risk of the Canadian government probably led in total, to a net outflow in the magnitude of \$100 million.

Very little information is currently available on short-term capital movements. Preliminary indications suggest chartered bank foreign currency transactions with non-residents resulted in an inflow of \$275 million. Data are not yet available for transactions in short-term Canadian money market instruments, however it does not appear that covered interest rate differentials between Canada and the United States would have led to substantial inflows. Interest rates on United States finance company paper remained slightly above those paid on the Canadian equivalent. However, a premium on the forward Canadian dollar developed during the end of the quarter to produce a small hedged differential in favour of Canadian instruments. The spot United States dollar, in terms of Canadian funds, traded between a high of 100.97 cents early in October and a low of 99.31 cents late in December, closing the quarter at 100.22 cents.

For further information, order the Fourth Quarter 1971 issue of Quarterly Estimates of the Canadian Balance of International Payments (67-001, 75¢/\$3).

Preliminary Statement of Total Canadian Exports, January 1972 -
Published only in Statistics Canada Daily and Weekly

January exports increased 5.1% or \$66 million over the same month last year, continuing the moderate increases recorded in 1971. However, the increase in export shipments was confined to the United States market, as all overseas destinations registered declining demand for Canadian exports. A particularly sharp drop reduced shipments to the United Kingdom by \$74 million, and exports to Other Commonwealth and to EEC countries declined by \$14 million and \$9 million respectively. The increasing pace of economic activity in the United States offset this weakness in overseas markets, as U.S.-destined exports increased by \$181 million or 22% over last year.

The strength of U.S. demand was further revealed by commodity detail. Shipments of automotive products were up \$48 million; lumber \$25 million petroleum and gas \$19 million; and fertilizer materials, \$12 million on the basis of strength in the U.S. market. Demand for whisky, iron ore and communication equipment remained weak.

Overseas shipments increased significantly only in the case of aircraft. Exports of metals and metal ores, wood pulp and communication equipment all declined sharply, while wheat sales slowed.

Seasonally adjusted January exports declined from fourth quarter levels, reflecting the growth in the United States market, while shipments to Britain and to other countries declined substantially.

Preliminary Statement of Total Canadian Exports - January 1972

For further information order the January issue of Summary of Exports (65-002, 20¢/\$2.00).

Preliminary Statement of Canadian Trade, January 1972 - Published only in Statistics Canada Daily and Weekly

January imports increased by \$327 million or 32% over last year, continuing the large increases in import demand observed in the fourth quarter of 1971. With imports at \$1,352 million, the monthly trade balance declined from a surplus of \$267 million to a surplus of \$5 million. All major trading areas except Latin America increased sales to Canada with particularly large increases coming from the United States (\$194 million), Japan (\$32 million), the E.E.C. (\$31 million) and the U.K. (\$25 million).

Purchases of automotive products contributed \$100 million to the increase in imports, as U.S. sales increased \$78 million, and demand for overseas passenger vehicles advanced \$18 million. Among other consumer goods, demand for food products and for wearing apparel was also strong.

Increasing imports of capital equipment are reflected in larger purchases of industrial machinery (up \$17 million), computers and office equipment (\$14 million) and tractors (\$10 million). Canadian demand for crude petroleum, iron and steel products and communication equipment maintained the increase in purchases of these products which was observed in 1971.

Seasonally adjusted January imports at \$1,456 million exceeded the average level for the fourth quarter of 1971. However, imports of United States origin declined, while those from the United Kingdom and "Other Countries" advanced sharply over fourth quarter levels.

For further information order the January issues of Summary of Exports (65-002, 20¢/\$2), and Summary of Imports (65-005, 20¢/\$2).

Employment, Earnings and Hours, November 1971 - Advance information.

The advance estimate of the industrial composite index of employment (1961=100), not adjusted for seasonal variation, declined in November.

(Industrial composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having 20 or more employees in any month of the year).

Seasonally-adjusted, the composite index for November also fell. Service and finance, insurance and real estate recorded increases, trade was unchanged and the remaining industry divisions declined. All regions reported decreases.

Average weekly earnings at the industrial composite level dipped slightly in November. Among the industry divisions, construction, trade, and finance, insurance and real estate had decreases while the other industries showed gains. Regionally, only Quebec had an increase.

At the Canada level, average hourly earnings rose in November for the three industries shown in Table 2 while average weekly hours declined in mining and construction and remained unchanged in manufacturing.

The October preliminary index of employment for the industrial composite, not adjusted for seasonal variations, was 0.8% lower at 130.7 than in September. Decreases occurred in all industries except trade, which recorded an increase. There were declines in all provinces.

Seasonally-adjusted, the composite index of employment fell 0.2% in October to 128.4. The largest percentage changes were the declines of 1.4% in service and 1.1% in mining and an increase of 1.0% in manufacturing. There were declines in Ontario, Manitoba, New Brunswick and Nova Scotia; the other provinces had increases.

Average weekly earnings for the industrial composite rose \$1.48 to \$142.45 in October. All industry divisions recorded increases of which the largest were in forestry (\$6.64) and mining (\$2.32). All provinces had gains ranging from 54 cents in British Columbia to \$7.65 in Prince Edward Island.

In mining, average weekly hours increased 0.2 hours to 41.0 in October (the October 1970 level was 41.6) while average hourly earnings rose 4 cents to \$4.13 (a year-over-year gain of 33 cents).

Average weekly hours in manufacturing rose to 40.4 in October from 40.3 in September; average hourly earnings increased 1 cent to \$3.33. The October 1970 levels were 40.1 hours and \$3.06.

In construction, average weekly hours in October remained at the September level of 41.6. Average hourly earnings registered a 3-cent gain to \$4.86. Over the year, average weekly hours were up 0.6 hours and average hourly earnings increased 51 cents.

Detailed information for September and October will be available in the November issue of Employment, Earnings and Hours (72-002, 40¢/\$4).

Advance Release of Employment and Earnings, November 1971.

Passenger Bus Statistics, December 1971 - Advance information

In December, 51 intercity and rural bus companies carried 3,695,689 passengers. This was 3.5% less than the 3,829,512 carried a year earlier. Their busses travelled 10,306,558 vehicle miles (up 3.6%) and consumed 1,395,529 gallons of diesel oil (up from 1,366,466) and 94,152 gallons of gasoline (up from 79,606). Total operating revenue increased 11.9% to \$7,683,290.

For further information order the December issue of Passenger Bus Statistics (53-002, 50¢/\$2).

Urban Transit, December 1971 - Advance information

In December, 58 urban transit systems collected 89,276,536 initial passenger fares, excluding transfers. This was 0.6% less than the 89,840,694 collected a year earlier. Their vehicles travelled 22,019,422 vehicle miles (up from 21,272,831), and their operating revenue increased 1.3% to \$21,173,230.

For further information order the December issue of Urban Transit (53-003, 10¢/\$1).

Weekly Railway Carloadings, January 21, 1972 - Advance information

Railways loaded 3,573,620 tons of revenue freight in Canada during the 7-day period ending January 21. This was 4.5% more than in the comparable period of 1971. Year-to-date loadings increased 6.1%.

For further information, order the January issue of Railway Carloadings (52-001, 20¢/\$2).

Indexes of Real Domestic Product (Industrial Production), December 1971 - Advance information

The seasonally adjusted index of industrial production increased by 0.8% in December to a level of 183.0 from the revised level of 181.6 in November. All divisions contributed to the increase. In manufacturing, both non-durables and durables shared in the increase.

Further information will be provided in the December issue of Indexes of Real Domestic Product by Industry (61-005, 30¢/\$3).

INDEXES OF INDUSTRIAL PRODUCTION
(Seasonally Adjusted, 1961=100)

| | 1961 percentage weight | 1971 | | | % Change |

New Motor Vehicle Sales, December 1971 - Advance information

In December, the value of retail sales of new motor vehicles reached \$270.1 million - 60.6% more than a year earlier. The value of passenger car sales increased 53.3%, with North American manufactured cars up 58.4% and cars from overseas up 32.5%. Sales of commercial vehicles jumped 86.7%.

In terms of units, new motor vehicle sales increased 48.7% to 68,569; passenger cars by 42.8% to 55,585 (Canadian and U.S. by 50.2% to 43,553 and overseas by 21.2% to 12,032); and commercial vehicles by 80.7% to 12,984.

Throughout 1971, a total of 938,706 new motor vehicles were sold - 21.2% more than the previous year. Total sales of passenger cars grew 21.8% to 779,680, with North American cars up 19.1% to 592,202 and overseas cars 30.9% to 187,478. The North American cars' share of the market slipped to 76.0% from 77.6%. Sales of commercial vehicles expanded 18.8% to 159,026 units.

Total dollar volume of new motor vehicle sales rose 26.0% to \$3,500 million in 1971 from \$2,800 million in 1970. For North American cars the increase was 23.8% to \$2,200 million, and for overseas cars, 40.4% to \$509 million.

The average unit price for North American cars edged up 4.0% to \$3,755 while that of overseas cars increased 7.2% to \$2,717.

Further details will be published in New Motor Vehicle Sales, December 1971 (63-007, 20¢/\$2), and in the annual New Motor Vehicle Sales, 1971 (63-208, 50¢).

Gold Production, December 1971 - Advance information

The value of gold production was \$5,876,593 in December, calculated at the average price paid by the Royal Canadian Mint. Production declined to 168,008 troy ounces from 198,369 troy ounces a year earlier. This brought the year-to-date output to 2,207,639 troy ounces from 2,408,574.

For further information, order the December issue of Gold Production (26-004, 10¢/\$1).

Iron Ore, December 1971 - Advance information

Canadian mines shipped 2,801,931 tons of iron ore in December 1971, compared to 2,915,422 tons a year earlier. This brought the twelve months output to 47,708,525 tons from 52,388,060 tons a year earlier.

For further information, order the December issue of Iron Ore (26-005, 10¢/\$1).

Gas Utilities, December 1971 - Advance information

Canadian consumers purchased 114.2 billion cubic feet of natural gas in December, up 10.0% from 103.8 billion a year earlier. Exports rose to 88.7 billion cubic feet from 78.9 billion.

For further information, order the December issue of Gas Utilities (55-002, 20¢/\$2); or Energy Service Bulletin, Vol.7, No.9 (57-002, \$3).

Copper and Nickel Production, December 1971 - Advance information

December production of primary copper increased to 67,663 tons from 55,653 tons in December 1970. This brought the twelve months output to 719,821 tons from 672,717 tons a year earlier.

December production of primary nickel decreased to 25,615 tons from 26,459 tons in December 1970. This brought the twelve months output to 294,610 tons from 305,881 tons a year earlier.

For further informations, order the December issue of Copper and Nickel Production (26-003, 10¢/\$1).

Warehousing, 1970 - Advance information

Revenues of 135 public warehousing firms reached \$72,794,085 in 1970, up 6.2% from 1969. Expenses increased 7.2% to \$68,591,401 and average occupancy declined to 75.9% from 76.3%.

Further information will be contained in Warehousing, 1970 (63-212, 50¢).

Sugar Situation, January 1972 - Advance information

Canadian sugar refineries reported total sales of 147,154,008 pounds of all types of sugar, 144,737,271 pounds in domestic sales and 2,416,737 in export sales for January 1972.

For further information, order the January issue of Sugar Situation (32-013, 10¢/\$1).

Steel Ingots, Week ended February 12, 1972 - Advance information

Preliminary steel ingot production for the week ended February 12, totalled 244,534 tons, an increase of 5.2% from the preceding week's total of 232,424 tons. The comparable week's total in 1971 was 207,962 tons. The index of production based on the average weekly output during 1967 of 183,227 tons equalling 100 was 133.5 in the current week, 126.9 a week earlier and 113.5 one year ago.

Building Permits, December 1971 - Advance information
