Real Domestic Product, April 1972 - Advance information

The seasonally adjusted real domestic product index for April rose by 0.6% from its March level (which has been revised marginally to 172.7 from 172.5). This growth was achieved despite some major strikes as a result of which the number of man-days lost was by far the largest for a ny month since the beginning of 1961.

Manufacturing and agriculture dominated the increase in industrial production in April. Manufacturing output rose strongly, paced by the expansion in durables. Within durables manufacturing, the largest increases were in motor vehicle manufacturers, sawmills and manufacturers of household radio and television receivers. Within non-durables the dominant increases were an advance in pulp and paper and an expansion in petroleum and coal products.

After three months of declining production, agricultural output rose sharply in April. During April, poultry and livestock production increased significantly, and sales of wheat, barley and oats also increased.

Transportation, storage and communication continued to rise. Increases were recorded by air, water (the first increase in four months) and pipeline transport. Output of inter-urbain bus transport fell as a result of a strike. Mining rose strongly based on increases in most components, particularly in iron and coal mining. Construction registered an increase, with all components contributing.

The strikes of more than 200,000 provincial employees in Quebec, for periods up to one and a half weeks had severe effects on education services, hospitals, and provincial administration. As a result community business and personal services fell by more than in any month since January 1961. Also the index for public administration and defence was significantly lower in April. Strikes in Toronto and Vancouver affected the local administration component.

Other industries registering significant changes were trade, which decreased mainly due to a decline in wholesale trade, and utilities which also decreased.

For further information, order the April 1972 issue of Real Domestic Product (61-005, 30c/\$3).

(see table on next page)

Manufacturing Industries of Canada: Type of Organization and Size of Establishment, 1969 - Advance

# 1970, Census of Manufactures - Advance information

The non-metallic mineral products industries (major group 17) shipped \$1,265 million worth of products of own manufacture in 1970. This was 1.7% less than in 1969. The total value added by these industries decreased 1.8% to \$751 million, the number of employees decreased 5.4% to 49,101, and total salaries and wages decreased 0.2% to \$357 million.

The plastic fabricators n.e.s. shipped \$438 million worth of products of own manufacture in 1970. This was 1.4% more than in 1969. The total value added by the industry increased 1.0% to \$235 million, the number of employees increased 0.3% to 20,157, and total salaries and wages increased 5.5% to \$115 million.

These increases, small in comparison with the rapid growth rates of previous years, reflect depressed conditions in 1970 in this industry.

For further information order 1970 Census of Manufactures Preliminary Bulletins (\$3.50 for the series) or the publication Plastic Fabricators, n.e.s., 1970 (47-208, 50c).

## Electric Power Statistics (Generating Capacity), 1971 - Advance information Total installed generating capacity in Canada increased 9.0% by December 31, 1971 to 46,675,733 kw. from 42,825,645 kw. a year earlier.

Complete details for all generating stations with a capacity of 500 kw. or over will be published in Electric Power Statistics, Vol.III, Inventory of Prime Mover and Electric Generating Equipment, 1971 (57-206, \$1.50).

#### Commercial Failures, First Quarter 1972 (61-002, 25¢/\$1)

An estimated 883 business failures were reported under the Bankruptcy and Winding Up Acts in the first quarter — down 3.0% from a year earlier. Liabilities involved dropped 25.4% to \$57.9 million.

Failures in trade decreased by 11.4% to 388, liabilities by 29.1% to \$17.0 million. In manufacturing bankruptcies dropped 26.4% to 64, liabilities 56.9% to \$8.9 million. But in construction, failures increased 19.7% to 152 and liabilities 35.3% to \$17.4 million, while failures in the service industry were up 17.4% to 142 and liabilities 6.0% to \$5.6 million.

Railway Operating Statistics, January 1972 - Advance information

Revenues from Canadian operations increased by 5.9% to \$135,809,798 in January from \$128,243,025 a year earlier according to reports filed by 24 common carrier railways. Operating expenses rose 6.8% to \$141,591,781, increasing the net deficit by 32.0% to \$5,781,983.

Revenue freight ton-miles eased 1.4% to 8,139,248,000 while revenue passenger-miles increased 21.2% to 179,796,000.

For further information, order the January 1972 issue of Railway Operating Statistics (52-003, 10c/\$1).

# Railway Carloadings, May 1972 - Advance information

Railways in Canada loaded 19,699,537 tons of revenue freight during May, 1.5% more than a year earlier. Carloads increased 3.0% to 344,713. Receipts from U.S. connections increased 17.4% to 2,312,449 tons, leaving total freight carried up 2.9% at 22,011,986 tons.

Major increases occurred in loadings of coal, gypsum, logs, potash, other grains, and newsprint, while iron ore loadings were significantly lower.

Year-to-date tonnage loaded rose 4.8% to 83,859,854 tons while total tonnage carried was ahead 4.5% to 94,089,214 tons.

For further information, order the May issue of Railway Carloadings (52-001, 20c/\$2).

Building Permits, March 1972 - Advance information

For further information, order the March issue of Building Permits (64-001, 30c/\$3).

#### Production of Eggs, May 1972 (23-002, 10¢/\$1)

Canadian egg production declined by 3.2% to 42.5 million dozen in May 1972 from 43.9 million a year earlier. The average number of layers was down 6.0% to 26.9 million from 28.6 million while the number of eggs per 100 layers increased 3.0% to 1,900 from 1,844. Farm price of eggs sold for market was up 1.6% to 31.0¢ per dozen compared with 30.5¢ per dozen.
